

# Lesson 1: Basics of Accounting

## Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ Principles and concepts of Accounting
- ❑ Double Entry System of Accounting
- ❑ Financial Statements

## 1.1 Introduction

Accounting is a process of identifying, recording, summarising and reporting economic information to decision makers in the form of financial statements. Financial statements will be useful to the following parties:

- ❑ Suppliers
- ❑ Customers
- ❑ Employees
- ❑ Banks
- ❑ Suppliers of equipments, buildings and other assets
- ❑ Lenders
- ❑ Owners

### 1.1.1 Types of Accounts

There are basically three types of Accounts maintained for transactions :

- ❑ Real Accounts
- ❑ Personal Accounts
- ❑ Nominal Accounts

### Real Accounts

Real Accounts are Accounts relating to properties and assets, which are owned by the business concern. Real accounts include tangible and intangible accounts. For example,

- Land
- Building
- Goodwill
- Purchases
- Cash

### Personal Accounts

Personal Accounts are Accounts which relate to persons. Personal Accounts include the following.

- Suppliers
- Customers
- Lenders

### Nominal accounts

Nominal Accounts are Accounts which relate to incomes and expenses and gains and losses of a business concern. For example,

- Salary Account
- Dividend Account
- Sales

Accounts can be broadly classified under the following four groups.

- Assets
- Liabilities
- Income
- Expenses

The above classification is the basis for generating various financial statements viz., Balance Sheet, Profit & Loss A/c and other MIS reports. The Assets and liabilities are taken to Balance sheet and the Income and Expenses accounts are posted to Profit and Loss Account.

### 1.1.2 Golden Rules of Accounting

|        | Real Accounts | Personal Accounts | Nominal Accounts    |
|--------|---------------|-------------------|---------------------|
| Debit  | What Comes in | The Receiver      | Expenses and Losses |
| Credit | What Goes out | The Giver         | Incomes and Gains   |

### 1.1.3 Accounting Principles, Concepts and Conventions

The Accounting Principles, concepts and conventions form the basis for how business transactions are recorded. A number of principles, concepts and conventions are developed to ensure that accounting information is presented accurately and consistently. Some of these concepts are briefly described in the following sections.

#### Revenue Realisation

According to Revenue Realisation concept, revenue is considered as the income earned on the date, when it is realised. As per this concept, unearned or unrealised revenue is not taken into account. This concept is vital for determining income pertaining to an accounting period. It reduces the possibilities of inflating incomes and profits.

#### Matching Concept

As per this concept, Matching of the revenues earned during an accounting period with the cost associated with the respective period to ascertain the result of the business concern is carried out. This concept serves as the basis for finding accurate profit for a period which can be distributed to the owners.

#### Accrual

Under Accrual method of accounting, the transactions are recorded when earned or incurred rather than when collected or paid i.e., transactions are recorded on the basis of income earned or expense incurred irrespective of actual receipt or payment. For example, a seller bills the buyer at the time of sale and treats the bill amount as revenue, even though the payment may be received later.

*The cash basis of accounting is a method wherein revenue is recognised when it is actually received, rather than when it is earned. Expenses are booked when they are actually paid, rather than when incurred. This method is usually not considered to be in conformity with accounting principles and is, therefore, used only in select situations such as for very small businesses.*

#### Going Concern

As per this assumption, the business will exist for a long period and transactions are recorded from this point of view.

### **Accounting Period**

The users of financial statements required periodical reports to ascertain the operational and the financial position of the business concern. Thus, it is essential to close the accounts at regular intervals. viz., 365 days or 52 weeks or 1 year is considered as the accounting period.

### **Accounting Entity**

According to this assumption, a business is considered as a unit or entity apart from its owners, creditors and others. For example, in case of a Sole Proprietor concern, the proprietor is treated to be separate and distinct from the business, which he controls. The proprietor is treated as a creditor to the extent of his capital and all the business transactions are recorded in the books of accounts from the business stand point.

### **Money Measurement**

In accounting, only business transactions and events of financial nature are recorded. Only transactions that can be expressed in terms of money are recorded.

#### **1.1.4 Double Entry System of Book Keeping**

As per Double Entry System of book-keeping, all the business transactions recorded in accounts have two aspects - Debit aspect (receiving) and Credit aspect (giving). For example, when a business acquires an asset (receiving) and pays cash (giving) for it. This accounting technique records each transaction as debit and credit, where every debit has a corresponding credit and vice versa.

#### **Features of Double Entry System of Book Keeping**

The Double entry system of book keeping comprises of the following features :

- ❑ Every business transaction affects two accounts
- ❑ Each transaction has two aspects, i.e., debit and credit
- ❑ Maintains a complete record of all business transactions
- ❑ Helps to check the accuracy of the accounting transactions, by preparation of trial balance
- ❑ Helps ascertaining profit earned or loss occurred during a period, by preparation of Profit & Loss Account
- ❑ Helps ascertaining financial position of the concern at the end of each period, by preparation of Balance Sheet
- ❑ Helps timely decision making based on sufficient information
- ❑ Minimises the possibilities of fraud due to its systematic and scientific recording of business transactions

The following chart explains the way in which accounting transactions are recorded in the Double Entry system and financial statements are prepared.

Figure 1.1 Double Entry System

### 1.1.5 Mode of Accounting

Accounting process begins with identifying and recording the transactions in the books of accounts i.e., the first step in the Accounting Process is recording of transactions in the books of accounts. Accounting identifies only those transactions and events which involves money and is sorted based on various source documents.

The following are the most common source documents.

- ❑ Cash Memo
- ❑ Invoice or Bill
- ❑ Vouchers
- ❑ Receipt
- ❑ Debit Note
- ❑ Credit Note

**Voucher**

A voucher is a document in support of a business transaction, containing the details of such transaction.

**Receipt**

When a trader receives cash from a customer against goods sold by him, issues a receipt containing the name of such customer, details of amount received with date.

**Invoice or Bill**

When a trader sells goods to a buyer, he prepares a sales invoice containing the details of name and address of buyer, name of goods, amount and terms of payments and so on. Similarly, when the trader purchases goods on credit receives a Invoice/bill from the supplier of such goods.

**Journals and Ledgers**

A **journal** is a record in which all business transactions are entered in a chronological order. A record of a single business transaction is called a **journal entry**. Every journal entry is supported by a voucher, evidencing the related transaction.

**Account**

An **account** is a statement of transactions affecting any particular asset, liability, expense or income.

**Ledger**

A **Ledger** is a book which contains all the accounts whether personal, real or nominal, which are entered in journal or subsidiary books.

**Chart of Accounts**

A **chart of accounts** is a list of all accounts used by an organisation. The chart of accounts also displays the categorisation and grouping of its accounts.

**Posting**

**Posting** is the process of transferring the entries recorded in the journal or subsidiary books to the respective accounts opened in the ledger i.e., grouping of all the transactions relating to a particular account to a single place.

**Accounting Period**

Generally, the financial statements are generated for a regular period such as a quarter or a year, for timely and accurate ascertainment of operating and financial position of the organisation.

**Trial Balance**

**Trial balance** is a statement which shows debit balances and credit balances of all Ledger accounts. As per the rules of double entry system, every debit should have a corresponding

credit, the total of the debit balances and credit balances should agree. A detailed trial balance has columns for

- Account name
- Debit balance
- Credit balance

### 1.1.6 Financial Statements

**Financial statements** are final result of accounting work done during the accounting period. Financial statement serves a significant purpose to users of accounting information in knowing about the profitability and financial position of the organisation. Financial statements normally include

- Trading
- Profit and Loss Account
- Balance Sheet

#### Trading Account

Trading refers to buying and selling of goods. The trading account displays the transactions pertaining to buying and selling of goods.

The difference between the two sides of the Trading Account indicates either Gross Profit or Gross Loss. If the credit side total is in excess of the debit side total, the difference represents Gross Profit. On the other hand, if the total of the debit side is in excess of the credit side total, the difference represents Gross Loss. Such Gross Profit / Gross Loss is transferred to Profit & Loss Account. The **Gross Profit** is expressed as :

$$\text{Gross Profit} = \text{Net Sales} - \text{Cost of Sales}$$

#### Profit and Loss Account

The profit and loss account helps to ascertain the net profit earned or net loss suffered during a particular period. after considering all other incomes and expenses incurred over a period. This helps the company to monitor and control the costs incurred and improve its efficiency. In other words, the profit and loss statement shows the performance of the company in terms of profits or losses over a specified period.

The **Net Profit** is expressed as :

$$\text{Net Profit} = (\text{Gross Profit} + \text{Other Income}) - (\text{Selling and Administrative Expenses} + \text{Depreciation} + \text{Interest} + \text{Taxes} + \text{Other Expenses})$$

A key element of the Profit and Loss Account, and one that distinguishes it from a balance sheet, is that the amounts shown on the statement represent transactions over a period of time, while the items represented on the balance sheet show information as on a specific date.

All revenue and expense accounts are closed once the profit and loss account is prepared. The Revenue and Expenses accounts will not have an opening balance for the next accounting period.

### Balance Sheet

The **balance sheet** is a statement that summarises the assets and liabilities of a business. The excess of assets over liabilities is the net worth of a business. The balance sheet provides information that helps in assessing

- ❑ A company's Long-term financial strength
- ❑ A company's Efficient day-to-day working capital management
- ❑ A company's Asset portfolio
- ❑ A company's Sustainable long-term performance

The balances of all the real, personal and nominal (capital in nature) accounts are transferred from trial balance to balance sheet and grouped under the major heads of assets and liabilities. The balance sheet is complete when the net profit/ loss is transferred from the Profit and Loss account.

### 1.1.7 Transactions

A **transaction** is a financial event that takes place in the course or furtherance of business and effects the financial position of the company. For example, when you deposit cash in the bank, your cash balance reduces and bank balance increases or when you sell goods for cash, your cash balance increases and your stock reduces.

Transactions can be classified as follows :

- ❑ Receipts – cash or bank
- ❑ Payments – cash or bank
- ❑ Purchases
- ❑ Sales

### 1.1.8 Recording Transactions

The important aspect of accounting is to record transactions promptly and correctly to ascertain the financial status of a company as on a particular date.

Generally, the business transactions may be of the following nature :

- ❑ Purchase of goods either as raw materials for processing or as finished goods for resale
- ❑ Payment of expenses incurred towards business
- ❑ Sale of goods or services
- ❑ Receipts (in Cash or by Cheques)
- ❑ Payments (in Cash or Cheques)

The Accounting information is useful to various interested parties, both internal and external viz.,

- ❑ Suppliers, who supply goods and services for cash or on credit
- ❑ Customers, who buy goods or services for cash or on credit
- ❑ Employees, who provide services in exchange of salaries and wages.
- ❑ Banks, with whom accounts are maintained
- ❑ Suppliers of equipment, buildings and other assets needed to carry on the business.
- ❑ Lenders from whom, you borrow money to finance your business
- ❑ Owners, who hold a share in the capital of your business

Figure 1.2 Parties dealt with in a business process

### Points to Remember

- ❑ Accounting is a comprehensive system to collect, analyse and communicate financial information.
- ❑ Double Entry accounting is a system of recording transactions in a way that maintains the equality of the accounting equation.
- ❑ The three types of accounts maintained for transactions are real accounts, personal accounts and nominal accounts.
- ❑ Entity is the organisational unit for which accounting records are maintained.
- ❑ Journal entry is a record of a single business transaction.
- ❑ Voucher is a document evidencing the details of a financial transaction.
- ❑ Ledger is a book in which accounts are maintained.
- ❑ Trial balance is a list of the balances of all the ledger accounts.
- ❑ Profit and loss statement shows the performance of the company in terms of profits or losses made by it over a specified period.
- ❑ Balance sheet gives an overview of the financial position of a company as on a specific date.

## Lesson 2: Fundamentals of Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ Salient Features of Tally.ERP 9
- ❑ Key Components of Tally.ERP 9
- ❑ How to start and exit Tally.ERP 9
- ❑ Setting up a company in Tally.ERP 9
- ❑ Working with companies in Tally.ERP 9

### 2.1 Introduction

Tally.ERP 9 is the world's fastest and most powerful concurrent Multi-lingual business Accounting and Inventory Management software. Tally.ERP 9, designed exclusively to meet the needs of small and medium businesses, is a fully integrated, affordable and highly reliable software. Tally.ERP 9 is easy to buy, quick to install, and easy to learn and use. Tally.ERP 9 is designed to automate and integrate all your business operations, such as sales, finance, purchasing, inventory, and manufacturing. With Tally.ERP 9, accurate, up-to-date business information is literally at your fingertips anywhere. The powerful new features and blazing speed and power of Tally.ERP 9 combined with enhanced MIS, Multi-lingual, Data Synchronization and Remote capabilities help you simplify all your business processes easily and cost-effectively.

#### 2.1.1 Salient Features of Tally.ERP 9

- ❑ **A leading accounting package:** The first version of Tally was released in 1988 and, through continuous development, is now recognised as one of the leading accounting packages across the world, with over a quarter million customers. Tally's market share is more than 90%.
- ❑ **No accounting codes:** Unlike other computerised accounting packages which require numeric codes, Tally.ERP 9 pioneered the 'no accounting codes' concept. Tally.ERP 9 users have the freedom to allocate meaningful names in plain English to their data items in the system.

- ❑ **Complete business solution:** Tally.ERP 9 provides a comprehensive solution to the accounting and inventory needs of a business. The package comprises financial accounting, book-keeping and inventory accounting. It also has various tools to extract, interpret and present data.
- ❑ **Integrated/ Non-integrated accounting and inventory:** With Tally.ERP 9, the user is able to choose between accounting and accounting with inventory. If accounting with inventory is opted for, the user can choose whether it should be integrated or not.
- ❑ **Flexible and easy to use:** Tally.ERP 9 is very flexible. It mimics the human thought process, which means that Tally.ERP 9 can adapt to any business need. Tally.ERP 9 users need not change the way their business is run to adapt to the package.
- ❑ **Speed :** Tally.ERP 9 provides the capability to generate instant and accurate reports, which assists the management to take timely and correct decisions for the overall productivity and growth of the company.
- ❑ **Power :** Tally.ERP 9 allows the user to maintain multiple companies and with unlimited levels of classification & grouping capabilities. It also allows drill down facility from report level to transaction level.
- ❑ **Flexibility :** Tally.ERP 9 provides flexibility to generate instant reports for any given period (month/year) or at any point of time besides providing the facility to toggle between Accounting & Inventory reports of the same company or between companies.
- ❑ **Concurrent multi-lingual capability :** Tally.ERP 9 offers you the exclusive capability of maintaining your accounts in any Indian language, viewing them in another language and printing them in yet another Indian language.
- ❑ **Real time processing :** Immediate posting & updation of books of accounts as soon as the transactions are entered, thereby facilitating instant statements & Reports. It also facilitates real-time multi-user environment.
- ❑ **Versatility:** Tally.ERP 9 is suitable for a range of organisations, from small grocery stores to large corporations with international locations and operations.
- ❑ **Multi-platform availability:** Tally.ERP 9 is available on Windows 95, 98, ME, 2000 and NT. It runs on a single PC or on a network. On a network, it supports access via any combination of platforms.
- ❑ **Online Help :** The Tally.ERP 9 Online Help (Alt+H) provides instant assistance on basic and advanced features or any other relevant topics of Tally.ERP 9.
- ❑ **Tally.NET :** is an enabling framework which establishes a connection through which the remote user can access the Client's data without copying / transferring the data.
- ❑ **Remote Access :** Tally.ERP 9 provides remote capabilities to access the data from anywhere and anytime.
- ❑ **Control Centre :** works as an interface between the user and Tally.ERP 9 installed at different sites and enables the user to centrally configure and administer Site/User belonging to an account.
- ❑ **Support Centre :** allows a user to directly post his support queries on the functional and technical aspects of the Product.

- **Auditor's Edition** : Tally.ERP 9 offers a special Auditors' Edition of Tally.ERP 9, which provides auditing and compliance capabilities exclusively for Chartered Accountants.

### 2.1.2 Functional Features of Tally.ERP 9

| BASIC ACCOUNTING                            | BASIC INVENTORY                                                                         |
|---------------------------------------------|-----------------------------------------------------------------------------------------|
| Complete book-keeping                       | Stock categories                                                                        |
| Books, registers and statements of accounts | Stock query by stock group, or stock category                                           |
| General ledgers                             | Multiple godowns                                                                        |
| Accounts receivable and accounts payable    | Stock transfers to godowns and branches                                                 |
| Flexible voucher numbering                  | Multiple stock valuation methods                                                        |
| Flexible classification of account heads    | Batch-wise/ Lot-wise, including expiry date handling                                    |
| Panoramic view                              | Alternate units of measure and tail units.                                              |
| Drill-down display                          | Tracking through receipt notes/ delivery notes/ rejections inwards/ rejections outwards |
| Database reporting                          | Additional costs incurred on purchase                                                   |
| Voucher and cheque printing                 | Movement/ Profitability analysis Party-wise/ Item-wise/ Stock Group-wise                |
| Columnar reports                            | Customisable sales invoices using price lists with multiple prices                      |
| Bank reconciliation                         | Sales and purchase order processing                                                     |

| ADVANCED ACCOUNTING                                | ADVANCED INVENTORY                                                       |
|----------------------------------------------------|--------------------------------------------------------------------------|
| Multiple companies                                 | Stock items classified as raw materials, work-in-process, finished goods |
| Multi-currency                                     | Bill of Material with auto-adjustment of stocks                          |
| Multiple financial years                           | Job-working concepts, including sub-contracting                          |
| Comparison of data using multi-columnar reporting. | Additional cost of manufacturing with notional value and percentage      |
| Memo vouchers                                      | CENVAT support                                                           |
| Post-dated vouchers                                | Reorder levels                                                           |
| User-defined voucher types                         | Stock ageing analysis                                                    |
| Sales and purchase extracts                        | Batch related stock reports                                              |
| Cash flow statement                                | Point of Sale (POS)                                                      |

|                                                              |                                                                                                                |
|--------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Daily balances and transaction values/ Interest calculations | Excise/ VAT/ Central Sales Tax (CST)/ Tax Collected at Source (TCS) related Inventory transactions and reports |
| Percentage-based reporting                                   |                                                                                                                |
| Ratio analysis                                               |                                                                                                                |
| Value Added Tax (VAT)                                        |                                                                                                                |
| Service Tax (ST)                                             |                                                                                                                |
| Fringe Benefit Tax (FBT)                                     |                                                                                                                |
| Tax Deducted at Source (TDS)                                 |                                                                                                                |
| Tax Collected at Source (TCS)                                |                                                                                                                |
| Excise                                                       |                                                                                                                |
| Payroll                                                      |                                                                                                                |

### 2.1.3 Technology Advantages

- ❑ **Simple and rapid installation:** Tally.ERP 9 has a simple, menu-driven installation procedure. The user can install the program files on any drive if the hard disk has partitions. The user can also specify the name and directory location of the program files. Tally.ERP 9 uses minimum hard disk space in the local drive. Its installation on the local disk takes just a few seconds.
- ❑ **Unlimited multi-user support:** A multi-user version of Tally.ERP 9 can be installed on a network, having any number of computers with different operating systems such as Win 95, 98, NT, 2000, XP and Linux.
- ❑ **Internal backup/ restore:** Tally.ERP 9 has an in-built, user-friendly 'backup and restore' option. It helps the user to take a backup of one or more companies or all companies, in a single directory, in the local hard disk, or in any external media.
- ❑ **Data reliability:** Tally.ERP 9 offers reliable data. It uses a flexi-field, flexi-length, self-indexed, weighted file structure for an extremely compact and fast database. Tally.ERP 9 is robust and even if there is a power failure or the computer is incorrectly shut down, data is not lost. Tally.ERP 9 uses signalling quality data integrity checks, at regular levels, to ensure the complete reliability of data.
- ❑ **User-defined security levels:** Tally.ERP 9 offers high levels of security. Users can define multiple levels of security according to their requirements. Every authorised user in the company can have an individual password, with rights to use specific features only. The user with the administrator level password will have full access and can set controls for other users.
- ❑ **Data security:** Tally.ERP 9's data integrity checks ensure that there are no external changes to the data. Tally.ERP 9 also uses a binary encoding format of storage to prevent devious grouping of information.
- ❑ **Tally audit:** The Tally.ERP 9 audit feature provides the user with administrator rights and the capability to check the entries made by the authorised users and alter these entries, if necessary. Once the entries are audited, Tally.ERP 9 displays the altered entries, if any,

along with the name of the user, who has altered the entry, and the date and time of the alteration.

- ❑ **TallyVault:** Tally.ERP 9 offers a data encryption option called TallyVault. Without the valid TallyVault password, the data cannot be accessed. Tally.ERP 9 follows the DES (Data Encryption Standard) encryption method to safeguard the data.
- ❑ **Removal of data into a separate company:** Tally.ERP 9 allows users to maintain a company for any number of financial years. Once the books of accounts have been completed for the earlier financial years, the user can split the company data into multiple companies as per financial periods required. Tally.ERP 9 also has a feature to split company data. The user can specify the date from which the company has to be split and Tally.ERP 9 will split the company to form two companies as per periods specified. Once the data has been split, the closing balance of the first period (first company) becomes the opening balance for the next period (second company).
- ❑ **Multi-directory for company management:** The user can create multiple directories to store data. The data stored in these directories can be accessed directly in Tally.ERP 9, by specifying the path.
- ❑ **Import/ Export of data:** Any transaction can be exported and imported to other software after suitably altering the current structures to accept the Tally.ERP 9 data structure. Data can also be imported to Tally.ERP 9 by writing a TDL program. The data which is to be exported from Tally.ERP 9 can be in XML, HTML or ASCII format.
- ❑ **Tally.ERP 9 Synchronization:** Synchronization is the process of exchanging Tally.ERP 9 data between two or more locations. This process enables a branch office to send its data to the head office, over the Internet or a private network.
- ❑ **Graphical analysis of data:** Tally.ERP 9 provides graphical analysis of data which helps the user to perform deeper analysis. The user can generate graphical analysis reports such as Sales register, Purchase register, Ledgers, Funds flow, Cash flow, Stock Item registers and so on. This helps the management to quickly judge performance and be better prepared for difficult times.
- ❑ **ODBC (Open Database Connectivity) compliance:** It allows other programs to use data from Tally.ERP 9, directly. Thus, any program such as MS-Excel or Oracle, which is ODBC compliant, can use data from Tally.ERP 9. Data connectivity is dynamic, which means that any update in Tally.ERP 9 is reflected in real time in other ODBC compliant software. The user can also extract data from Tally.ERP 9 and design his/ her own report formats in other ODBC compliant software.
- ❑ **Protocol support:** Tally.ERP 9 provides protocol support for HTTP, HTTPS, FTP, SMTP, ODBC and raw sockets with data interchange formats such as XML, HTML with XML islands, SOAP and related formats. Protocol refers to a mechanism by which information (data) can be put into or taken from Tally.ERP 9. Formats refer to the standard for information to be generated from Tally.ERP 9 or from other applications which can exchange data with Tally.ERP 9.
- ❑ **Direct web browser access:** While working on Tally.ERP 9, the user can directly log on to the Tally website, provided he/ she has access to the Internet. The website lists details of all the facilities offered by Tally.ERP 9. The user can also download the latest release of

Tally.ERP 9 as and when it is available. The Tally website also offers Tally Chat, by which a user can communicate with a Tally representative and get required information.

- ❑ **Ability to preview and publish reports and documents on the Internet:** Companies which want to publish reports and price lists on their website can do so directly from Tally.ERP 9.
- ❑ **E-mail Facility:** Tally.ERP 9 facilitates the mailing of any Tally.ERP 9 report or document.
- ❑ **Multilingual capability:** Tally is the world's first accounting and inventory software with multilingual capability. Currently, Tally.ERP 9's multilingual capability extends to 12 languages which include nine Indian languages (Hindi, Gujarati, Punjabi, Tamil, Telugu, Marathi, Kannada, Malayalam and Bengali), Bahasa Melayu and Bahasa Indonesia. Tally.ERP 9 enables you to enter data in one language and have it transliterated into different languages. You can generate invoices, purchase orders or delivery notes in the language of your choice after entering data for the same in any of the nine specified languages. Also, the phonetic keyboard allows you to spell the term phonetically based on how it sounds and Tally.ERP 9 displays the data in the language selected after transliteration.
- ❑ **Point of Sale (POS) :** POS is an acronym for Point of sale. Point of Sale can be a retail outlet, a check out counter in a shop, or any other location where a sales transaction takes place. It is a computerised cash register which adds up the sales totals, calculates the balance to be returned to buyer and automatically adjusts the inventory level to reflect the quantity sold. The equipment required for POS to work effectively are cash registers, card readers, bar-code scanners and so on.

## 2.1.4 Payroll

Tally.ERP 9 Payroll is integrated with Accounting and benefits the user by simplifying Payroll processing and accounting. Tally.ERP 9 Payroll enables users to set up and implement salary structures, ranging from simple to complex, as per the organisation's requirements. The user can also align and automate payroll processes and directly integrate them with main stream accounting applications. Tally.ERP 9 Payroll also supports configurable formats for payslip printing; flexible salary/wage, attendance, leave and overtime registers; gratuity and expat reports.

## 2.1.5 Data Migration Capability

Tally.ERP 9 has the ideal solution for those who have their data in Tally 7.2 and now want to use Tally.ERP 9. Tally.ERP 9 provides a migration tool which helps the user to migrate the data easily to the latest version and continue with day-to-day transactions. Tally 6.3 users can also use the migration tool which will rewrite the version to Tally 7.2 and then migrate the data to Tally.ERP 9. Tally 8.1 users and Tally 9 Release 2.14 users can rewrite the version of their data to Tally.ERP 9.

### 2.1.6 Features pertaining to Duties and Taxes

- ❑ The all-new package provides statutory reporting capability for VAT (Value Added Tax), Composite VAT, CST (Central Sales Tax), TDS (Tax Deducted at Source), ST (Service tax), TCS (Tax Collected at Source), FBT (Fringe Benefit Tax).
- ❑ State-specific statutory VAT returns and Annexures
- ❑ Various CST related reports
- ❑ Returns and challans for Service Tax
- ❑ TCS enabled with e-TCS capability, with facility for printing certificates/ challans
- ❑ Composition Monthly VAT Return
- ❑ Quarterly Return – Form II, in the case of Excise Dealer
- ❑ Periodic FBT Challans and Returns

## 2.2 Getting Functional with Tally.ERP 9

### 2.2.1 Tally.ERP 9 Start-up

Tally.ERP 9 can be started in any of the following ways :

- ❑ Click on **Start > Programs > Tally.ERP 9 > Tally.ERP 9** or double click on the **Tally.ERP 9** icon on your desktop

The welcome screen **Tally.ERP 9 – Power of Simplicity** appears while the software loads. You will be ready to explore Tally.ERP 9, the moment the Tally.ERP 9 start up screen appears.

The **Tally.ERP 9 Start-up** Screen appears as shown below:

Figure 2.1 Tally.ERP 9 Start - up screen

## 2.2.2 Tally.ERP 9 Screen Components

- ❑ **Title bar:** Displays the Tally.ERP 9 version number.
- ❑ **Horizontal button bar:** Selection of Language key, Keyboard Language and Tally.ERP 9 Help.
- ❑ **Close button:** Performs the standard Windows Operating Systems function (Windows 95 onwards), allowing you to minimise Tally.ERP 9 and work on other applications. To restore Tally.ERP 9, click the Tally.ERP 9 icon on the taskbar.

- ❑ **Gateway of Tally:** Displays menus, screens, reports and accepts the choices and options which you select to view data as required.
- ❑ **Buttons toolbar:** Displays buttons which provide quick interaction with Tally.ERP 9. Only buttons relevant to the current task are visible.
- ❑ **Calculator Area:** Used for Calculator functions.
- ❑ **Info Panel:** Displays Version number, License details, Configuration details.

### 2.2.3 Mouse/ Keyboard Conventions

While working with Tally.ERP 9, use the following conventions.

| MOUSE/ KEYBOARD CONVENTIONS |                                                                                               |
|-----------------------------|-----------------------------------------------------------------------------------------------|
| Action                      | Particulars                                                                                   |
| <b>Click</b>                | Press the left mouse button.                                                                  |
| <b>Double-click</b>         | Press and release the left mouse button twice, without moving the mouse pointer off the item. |
| <b>Choose</b>               | Position the mouse pointer on the item and click the left mouse button.                       |
| <b>Select</b>               | Position the mouse pointer on the item and double-click the left mouse button.                |
| <b>Press</b>                | Use the keys on the keyboard in the combination shown.                                        |
| <b>Fn</b>                   | Press the function key.                                                                       |
| <b>Fn</b>                   | Press <b>ALT + function key</b> .                                                             |
| <b>Fn</b>                   | Press <b>CTRL + function key</b> .                                                            |

### 2.2.4 Switching between Screen Areas

When Tally.ERP 9 first loads, the **Gateway of Tally screen** displays. To toggle between this screen and the Calculator/ ODBC server area at the bottom of the screen, press **Ctrl+N** or **Ctrl+M** as indicated on the screen. A green bar highlights the active area of the screen.

### 2.2.5 Quitting Tally.ERP 9

You can exit the program from any Tally.ERP 9 screen, but Tally.ERP 9 requires all screens to be closed before it shuts down.

To quit working on Tally.ERP 9,

- ❑ Press **Esc** until you see the message **Quit? Yes or No ?** Press **Enter** or **Y**, or click **Yes** to quit Tally.ERP 9.
- ❑ Alternatively, to exit without confirmation, press **Ctrl+Q** from **Gateway of Tally**.
- ❑ You can also press **Enter** while the option **Quit** is selected from **Gateway of Tally**.

## 2.3 Creation/ Setting up of Company in Tally.ERP 9

The first step towards understanding Tally.ERP 9 is to create a company in Tally.ERP 9. Create a company using the **Company Creation** screen.

### 2.3.1 Creation of a Company

Go to **Gateway of Tally > Company Info. > Create Company**

The **Company Creation** screen displays as shown.

Figure 2.2 Company Creation screen

Each field in the Company Creation screen is explained below. To navigate between the fields, use the enter key or the tab key or arrow keys or the mouse.

| Fields    | Description                                                                                                                                                                                                                                                                                                                              |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Directory | Tally.ERP 9 assumes that the company is to be created in the data path given in the <b>Tally.INI</b> file, which is displayed by default. This field is skipped by default. However, you can change this path, if you want to, by using the backspace key, so that Tally.ERP 9 saves the data to a different directory specified by you. |

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name                     | This specifies the name of the company as it appears in Tally.ERP 9. If you have several companies to create with similar names, you will have to distinguish between them to provide a unique name for Tally.ERP 9.                                                                                                                                                                                                                                                               |
| Mailing Name             | The company name given in the Name field automatically appears in this field. This can be changed according to your requirements. The correct name of the company for mailing purposes should be entered.                                                                                                                                                                                                                                                                          |
| Address                  | The address of the company (The mailing name and address details are picked from here for any report such as balance sheet and statement of accounts).                                                                                                                                                                                                                                                                                                                             |
| Statutory Compliance for | Select <b>India</b> from the list of countries.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| State                    | Select the appropriate State from the list of States.                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Pin Code                 | Enter the PIN code of the specified address.                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Telephone No.            | Enter the telephone number of the company.                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| E- Mail                  | E-mail address will be used to e-mail documents, reports and data from Tally.ERP 9.                                                                                                                                                                                                                                                                                                                                                                                                |
| Mobile No.               | Enter the mobile number of the company.                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Currency Symbol          | This refers to the currency symbol Tally.ERP 9 will use for monetary values. By default, Tally.ERP 9 displays <b>Rs.</b>                                                                                                                                                                                                                                                                                                                                                           |
| Maintain                 | Select the nature of the company i.e, <b>Accounts only</b> or <b>Accounts with Inventory</b> .                                                                                                                                                                                                                                                                                                                                                                                     |
| Financial Year From      | Specify the Financial Year (FY) for the company. Tally.ERP 9 considers 12 months from the date you give here as the Financial Year. For example, if you give 1 <sup>st</sup> April 2009, your FY will be April to March - in this case, ending with 31 <sup>st</sup> March 2010.                                                                                                                                                                                                   |
| Books Beginning From     | The date given for 'Financial Year From' is automatically displayed. However, we can specify the actual date on which the books of accounts start. In case our accounts are opened mid-way during the financial year specified, we can enter the required date and start the books of accounts accordingly.                                                                                                                                                                        |
| TallyVault Password      | TallyVault is an enhanced security feature utilised to protect company data in an encrypted form by means of a Password. The TallyVault password entered ensures that the data is maintained permanently in an encrypted form without retaining information of the password used. Data is not accessible without the TallyVault password. Remember to keep this password private and known only to those who need to know. If the password is lost, your data cannot be recovered. |
| Use Security Control     | Tally.ERP 9 has a range of security controls, which can define the authority of various users to access the information and to enter/ alter/delete the vouchers.                                                                                                                                                                                                                                                                                                                   |

- Tally.ERP 9 will automatically adjust the spacing between the characters and lines entered to ensure that the details fit the space available.
- **Accounts Only:** Financial Accounts of the company only
- **Accounts-with-Inventory:** Both Financial Accounts and Inventory of the company.
- Tally.ERP 9 recognises a wide range of date formats, e.g. 1-4-09, 01/04/09, 1 Apr 2009, and will convert what you enter, to a standard format.

### 2.3.2 Base Currency Information

Tally.ERP 9 needs to know the default currency for the company and how the amounts should be shown on the screen and in the reports.

| BASE CURRENCY INFORMATION                           |                                                                                                                                                                                         |
|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fields                                              | Description                                                                                                                                                                             |
| <b>Base currency symbol</b>                         | Pre-set as a default currency — <b>Rs.</b> (as specified earlier).                                                                                                                      |
| <b>Formal name</b>                                  | Complete name for the currency symbol. By default, this is set to <b>Indian Rupees</b> .                                                                                                |
| <b>Number of decimal places</b>                     | By default, this is set to 2.                                                                                                                                                           |
| <b>Is symbol suffixed to amounts?</b>               | By default, this is set to <b>No</b> . For example, in India, we place the <b>Rs</b> symbol in front of amounts.                                                                        |
| <b>Symbol for Decimal Portion</b>                   | Enter the decimal portion for the <b>currency</b> mentioned. Enter <b>Paise</b> .                                                                                                       |
| <b>Show amounts in millions?</b>                    | Tally.ERP 9 caters to currencies where the different parts of large amounts are called by special names. By default, this is set to <b>No</b> .                                         |
| <b>Put a space between amounts and symbol?</b>      | By default, this is set to <b>Yes</b> .                                                                                                                                                 |
| <b>Decimal Places for Printing Amounts in words</b> | You can specify the number of decimal places to print the amount in words. This number should be equal to or lesser than the number specified in <b>Number of Decimal places</b> field. |

*Base Currency Information is set to the default values as given in the Table. However, if the Multi-currency feature of Tally.ERP 9 is activated - then Tally.ERP 9 allows the user to alter the Base Currency Information as required.*

Let us create a company in Tally.ERP 9 taking the example of National Traders who purchases computer equipments, components and softwares and sells it to other companies and to the direct customers. Create a Company as per information provided below :

Go to the **Gateway of Tally > Company Info. > Create Company**

Enter the following information to create a company:

| Field                        | Data to be entered                                     |
|------------------------------|--------------------------------------------------------|
| Directory                    | Accept what is displayed on the screen                 |
| Name                         | National Traders                                       |
| Mailing Name                 | National Traders                                       |
| Address                      | No 24, Phase 1,<br>Peenya Industrial Area<br>Bangalore |
| Statutory Compliance for     | India                                                  |
| State                        | Karnataka                                              |
| Pin Code                     | 560089                                                 |
| Telephone No                 | 080 - 41237890                                         |
| Mobile No.                   | 9845293752                                             |
| E-mail                       | sales@national.com                                     |
| Currency Symbol              | Rs.                                                    |
| Maintain                     | Accounts with Inventory                                |
| Financial year from          | 1 April 2009                                           |
| Books beginning from         | 1 April 2009                                           |
| TallyVault Password (if any) | Skip the Field – don't enter any details.              |
| Use security control         | No                                                     |
| Formal name                  | Indian Rupees                                          |
| Number of decimal places     | 2                                                      |

|                                         |     |
|-----------------------------------------|-----|
| Show amounts in millions?               | No  |
| Is symbol suffixed to amounts?          | No  |
| Put a space between amounts and symbol? | Yes |

The completed company creation screen is displayed as shown below:

**Company Creation** Ctrl + M

Directory : C:\Tally.ERP9\Data  
Name : **National Traders**

**Mailing & Contact Details**

Mailing Name : **National Traders**  
Address : No 24, Phase 1,  
Peenya Industrial Area  
Bangalore

Statutory compliance for : **India**  
State : **Karnataka**  
PIN Code : **560089**  
Telephone No. : **080-41237890**  
Mobile No. : **9845293752**  
E-Mail : **sales@national.com**

**Company Details**

Currency Symbol : **Rs.**  
Maintain : **Accounts with Inventory**  
Financial Year from : **1-4-2009**  
Books beginning from : **1-4-2009**

Yes or No

Figure 2.3 Completed Company Creation screen — National Traders

- Press **Y** or **Enter** to accept the screen.

The **Gateway of Tally** screen will appear as shown below:

Figure 2.4 Gateway of Tally

### 2.3.3 Working with Multiple Companies

For a group of companies, you can maintain the details of each company separately. You can select the company to work with and close the company when it is not required. However, you can also open many companies at the same time and switch between companies without closing the application.

### 2.3.4 Exercise to Create another Company

Before looking at how to view and amend company details, let us create another company to experiment with. Name your company as **Indus Enterprises**, Financial Year as **1 April 2009** & Book beginning from **1 April 2009** and you may enter the company details as you like,

To create **Indus Enterprises** follow this procedure:

1. From the buttons bar select **Alt + F3: Create Cmp** or simply press **Alt + F3** to bring up the **Company Info.** Menu.
2. Select **Create Company** from the menu to bring up the **Company Creation** screen.
3. Enter **Indus Enterprises** in the **Name** field and experiment with entering other data of your choice (for example, the address details).
4. When you have finished, Press **Y** or **Enter** to accept the screen

The **Gateway of Tally** screen will now appear as shown below:

Figure 2.5 Gateway of Tally with the New Company — Indus Enterprises

Notice that **Indus Enterprises** is highlighted. This indicates that it is the currently selected company from the list of open companies.

You can now practice selecting, closing and altering company information.

*While working with Tally.ERP 9, you can press **Esc** to exit from any screen before the changes you have made take effect.*

### Practice Exercise

1. Select a Company
2. Shut a Company
3. Alter a Company

### To Select a Company

1. Go to the **Gateway of Tally > Alt + F3 > Company Info. > Select Company OR Press F1**. Tally.ERP 9 displays the **List of Companies** screen. All the companies created are displayed in an alphabetical order. Select the company name from the list given.
2. In case two or more companies are loaded (like National Traders and Indus Enterprises), click on the company which you need to work on so that the selected company will be highlighted and will appear on top of the list.

### To Shut a Company

Go to the **Gateway of Tally > Alt + F3 > Company Info. > Shut Company**. Select the Company which you need to shut from the **List of Companies**. You can also use **Alt + F1** to shut a Company from the Gateway of Tally screen.

### To Alter Company Details

Go to the **Gateway of Tally > Alt + F3 > Company Info. > Alter**. Select the company which you need to alter from the **List of Companies** and press **Enter** to view the **Company Alteration** screen. Alter the company details as required and accept the screen.

*You can also access these functions, by selecting the appropriate button from the button bar.*

### Points to Remember

- ❑ Tally.ERP 9 pioneered the 'no accounting codes' concept.
- ❑ Tally.ERP 9 mimics the human thought process.
- ❑ Tally.ERP 9 is multi-platform compatible and supports multi-user accessibility.
- ❑ Tally.ERP 9 has multilingual capability and new features such as Payroll and Point of Sale.
- ❑ Tally.ERP 9 is ODBC compliant.

## Lesson 3: Creating Accounting Masters in Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ The basic functions of Tally.ERP 9
- ❑ F11: Features & F12: Configurations
- ❑ Creating and Maintaining Chart of Accounts
- ❑ Entering the opening balances for Ledgers

After creating a Company with the required information, you can now enable/ modify Accounting & Inventory features and configurations.

### 3.1 F11:Features

The **F11: Features** are Company-specific and the F12: Configurations are applicable to all the companies in a data directory. The **F11: Features** is divided into the following major categories:

- ❑ Accounting Features
- ❑ Inventory Features
- ❑ Statutory & Taxation
- ❑ Tally.NET Features

You can press **F11** (functional key) from any screen of Tally.ERP 9 or you may also click on the **F11: Features** button available in the button bar, to enable the required features. The **F11: Features** are specific only to the company currently in use (for which the said feature is enabled), thereby allowing flexibility of independently enabling different features for each of the company.

Go to **Gateway of Tally** > press **F11: Features**

The **Company Features** screen is displayed as shown.

Figure 3.1 F11: Features Menu

There are various settings available under Accounting Features, Inventory Features and Statutory & Taxation Features, which facilitates the additional information to be entered during voucher entry.

### **F1: Accounting Features**

The Accounting Features consists of configurations/ functionalities, which generally affects Accounting transactions and reports. The Accounting features is further sub-divided into six sections, namely :

- General
- Outstandings Management
- Cost/ Profit Centres Management
- Invoicing
- Budgets/ Scenario Management
- Other Features

Go to **Gateway of Tally > F11: Features > Accounting Features** or click on **F1: Accounts**

The **Accounting Feature** screen is displayed as shown.

**Company Operations Alteration** Ctrl + M

Figure 3.6 General Configuration screen

### 3.2.2 Numeric Symbols

You can configure Number Styles and Symbols used to represent Positive Numbers, Negative Numbers, Debit Amounts and Credit Amounts by using Numeric Symbols. This is displayed on the Number Styles configuration screen.

Figure 3.7 Number Styles Configuration screen

### 3.2.3 Accts / Inventory Info.

The fields pertaining to both Accounting and Inventory Info. can be configured from this menu.

The screenshot displays the 'Master Configuration' dialog box within the 'National Traders' window. The dialog box is divided into two main sections: 'Accounts' and 'Inventory'. The 'Accounts' section is currently selected and shows the following settings:

| Option                                  | Value |
|-----------------------------------------|-------|
| Allow ADVANCED entries in Masters       | ? Yes |
| Use ADDRESSES for Ledger Accounts       | ? Yes |
| Use CONTACT DETAILS for Ledger Accounts | ? Yes |
| Add NOTES for Ledger Accounts           | ? No  |

The 'Inventory' section shows the following settings:

| Option                                           | Value |
|--------------------------------------------------|-------|
| Allow ADVANCED entries in Masters                | ? Yes |
| Use PART NUMBERS for Stock Items                 | ? No  |
| Use Description for Stock Items                  | ? No  |
| Use REMARKS for Stock Items                      | ? No  |
| Use ALTERNATE UNITS for Stock Items              | ? No  |
| Allow Std. Rates for Stock Items                 | ? Yes |
| Specify Default Ledger Allocation for Invoicing  | ? No  |
| Allow Component list details (Bill of Materials) | ? No  |
| Use ADDRESSES for Godowns                        | ? No  |

Figure 3.8 Accts / Inventory Info. screen

## Master Configuration

Additional information can be configured by setting the options to **Yes** which will accordingly appear in the masters.

- ❑ **Allow ALIASES along with names:** This configuration helps in identifying an account by another name.
- ❑ **Allow Language ALIASES along with names:** This configuration helps the user to give an alias in any local language.

## Accounts Masters

- ❑ **Allow ADVANCED entries in Masters:** This configuration displays the additional fields in the Accounting Masters such as:
  - **Group behaves like a Sub-Ledger ?**  
Set to **Yes**, the group behaves like a Control Account for the ledgers it contains, wherein only the group balance is displayed. This is useful while working on groups like the *Sundry Debtors* and *Sundry Creditors* (pre-set to **Yes**), where the ledger items are numerous.
  - **Nett Debit/Credit Balances for Reporting?**  
Set to **Yes**, this configuration displays the amount as a net figure instead of separate debit and credit balances as shown in the reports.

- ❑ **Use ADDRESSES for Ledger Accounts:** This Field can be used for giving the address and Income Tax Number of the ledger accounts.
- ❑ **Use CONTACT DETAILS for Ledger Accounts:** This Configuration gives the user an opportunity to fill details like Contact person, Telephone, Fax, E-Mail etc.
- ❑ **Add NOTES for Ledger accounts:** This field helps the user to add the additional notes for ledger accounts.

## Inventory Masters

- ❑ **Allow ADVANCED entries in Masters:** This Configuration will display additional field in Inventory masters.
- ❑ **Use PART NUMBERS for Stock Items:** You can enter the Part Number of the item being created for easy identification. (In certain industries, such as automobiles, their part numbers identifies various parts). You can alternatively use this field for the Bin Card Number, Code Number etc.
- ❑ **Use Description for Stock Items:** You can enter the description of the Stock Item that would appear in your invoices.
- ❑ **Use REMARKS for Stock Items:** This helps to identify the product and its applications. You can give some particulars of the Stock Item created. This will help you later when you post a query for the stock of this item, while you decide whether the item is suitable for a particular requirement or not.
- ❑ **Use ALTERNATE UNITS for Stock Items:** This is another unit, apart from the main unit, which you can use instead of the Stock Item. This is particularly useful when you need to handle different units at different times. For example, you buy *Data Cables* in pieces but sell them in packets of 5 pieces each. For alternate units, you are asked to give a conversion factor (e.g. 5) so that a link is maintained between the two. What you give here is simply a conversion factor that comes up as default during a voucher entry. You may specify a different factor during voucher entry.
- ❑ **Allow Std. Rates for Stock Items:** Standard rates enable the valuation of an inventory at standard purchase or standard sales prices. Moreover, these prices come up by default during voucher entry (you may choose to override them if required). The standards are effective from the specified dates and they continue to be used at these rates until the next date, where the standard rate changes.
- ❑ **Specify Default Ledger Allocation for Invoicing:** This configuration allows the user to allocate the ledgers to be used for Purchase and Sales Invoice.
- ❑ **Allow component list details (Bill of Materials):** The Bill of Materials contains a list of items that are required to make up another item. In other words, it is a list of constituent items.
- ❑ **Use ADDRESSES for Godowns:** This configuration enables the user to give the address for locations.

### 3.2.4 Voucher Entry

Both the Accounting and Inventory Vouchers can be configured from this menu for additional information.

| Voucher Entry Configuration                                  |                                                  |
|--------------------------------------------------------------|--------------------------------------------------|
| Accounts                                                     | Inventory                                        |
| Skip Date field in Create Mode (faster entry!) ? <b>Yes</b>  | Use Ref. Number in Stock Journal ? <b>No</b>     |
| Use Single Entry mode for Pymt/Rcpt/Contra ? <b>No</b>       | Warn on Negative Stock Balance ? <b>No</b>       |
| Use Payment/Receipt as Contra ? <b>No</b>                    | Honor Expiry Dates usage for Batches ? <b>No</b> |
| Use Cr/Dr instead of To/By during entry ? <b>Yes</b>         | Show Balances as on Voucher Date ? <b>No</b>     |
| Warn on Negative Cash Balance ? <b>Yes</b>                   | Show Godown-wise Details ? <b>No</b>             |
| Pre-Allocate Bills for Payment/Receipt ? <b>No</b>           | Show Batch-wise Details ? <b>No</b>              |
| Allow Cash Accounts in Journals ? <b>Yes</b>                 |                                                  |
| Allow Expenses/Fixed Assets in Purchase Vouchers ? <b>No</b> |                                                  |
| Allow Income Accounts in Sales Vouchers ? <b>No</b>          |                                                  |
| Show Inventory Details ? <b>Yes</b>                          |                                                  |
| Show Table of Bill Details for Selection ? <b>Yes</b>        |                                                  |
| Show Bill-wise Details ? <b>Yes</b>                          |                                                  |
| Expand into multiple lines ? <b>Yes</b>                      |                                                  |
| Show Ledger Current Balances ? <b>Yes</b>                    |                                                  |
| Show Balances as on Voucher Date ? <b>Yes</b>                |                                                  |

Figure 3.9 Voucher Configuration screen

### Accounting Vouchers

- ❑ **Skip Date field in Create Mode (faster entry!)**: Set to **Yes**, the Tally.ERP 9 cursor goes directly to the Dr or Cr field depending on the voucher type. However, if set to **No**, the Tally.ERP 9 cursor goes to the Date field. It is advantageous to set this option to **Yes** for a faster entry if there are many entries to be made on the same date.
- ❑ **Use Single Entry mode for Pymt/ Rcpt/Contra**: This configuration helps in selecting multiple debits or credits depending on the type of entry.
- ❑ **Use Payment/Receipt as Contra**: To indicate the transfer of funds from bank to cash, bank to bank and cash to bank, Tally.ERP 9 provides a voucher type called 'Contra'. This configuration is activated while using payment and receipt vouchers for a 'Contra' transaction.
- ❑ **Use Cr/Dr instead of To/By during Entry**: This configuration gives the flexibility to use Cr/ Dr or To/By in Vouchers as per the requirement or the understanding of the user.
- ❑ **Warn on Negative Cash Balance**: This option in Tally.ERP 9 displays a warning if the cash balance is NIL.

- ❑ **Pre-Allocate Bills for Payment/Receipt:** This Configuration enables the user to select the bills first before the total amount can be updated in the amount field. This option is extremely useful while Cheque Printing.
- ❑ **Allow Cash Accounts In Journals:** Journals are adjustment entries. However, in many cases companies require journals to account for day-to-day transactions involving cash or bank accounts.
- ❑ **Allow Expenses/Fixed Assets in Purchase Vouchers:** This configuration helps the user to enter the details of purchase of fixed assets in the Purchase Voucher.
- ❑ **Allow Income Accounts in Sales Vouchers:** This configuration helps the user to allocate the income accounts in the sales voucher.
- ❑ **Show Inventory Details:** This configuration when set to **Yes** shows the name of the stock item, quantity, rate and value details.
- ❑ **Show Table of Bills Details for Selection:** This configuration displays a table which lists out the references of the pending bills
- ❑ **Show Bill-wise Details:** This configuration enables the user to view the bill-wise details in the voucher.
- ❑ **Expand into multiple lines:** This configuration displays the due date of repayment based on the credit days given.
- ❑ **Show Ledger Current Balances:** This configuration displays the current balance of the ledger selected while an entry is made. This is a convenient feature to use since it helps to get the information without referring to the report.
- ❑ **Show Balances as on Voucher Date:** Set to **Yes**, a voucher that is viewed in the *alteration* mode displays the ledger balances on the voucher screen based on the voucher date.

### Inventory Vouchers

- ❑ **Use Ref. Number in Stock Journal:** This configuration provides an additional field called **Ref.** in the Stock journal, where the user can enter the reference number.
- ❑ **Warn on Negative Stock Balance:** This configuration warns the user in cases where the item selected reaches a negative balance in the Invoice mode.
- ❑ **Honor Expiry Dates usage for Batches:** This configuration hides the batch details that are redundant and have expired.
- ❑ **Show Balances as on Voucher Date:** This configuration enables the user to view the inventory balances according to the voucher date
- ❑ **Show Godownwise Details :** This configuration enables the user to view Godown details.
- ❑ **Show Batchwise Details :** This configuration enables the user to view Batch details.

### 3.2.5 Invoice / Orders Entry

The Invoice entry and Order entry screens can be configured for additional information such as export details, shipping details, etc.

### **3.2.6 Printing**

This configuration helps the user to configure the printing screens for the reports and transactions.

### **3.2.7 Data Configuration**

This configuration helps the user to define location of Language Files, Tally Configuration File, Export Files, Data Files and details of the companies to be loaded on startup.

### **3.2.8 TDL Configuration**

This screen provides details regarding TDL Configuration viz., Local TDLs, Account TDLs & Remote TDLs enabled for the product.

### **3.2.9 Advanced Configuration**

This configuration helps the user to specify Client/Server Configuration, Connection configuration and Proxy configuration for ODBC connectivity and Synchronisation of Data.

### **3.2.10 Licensing**

This configuration helps the user to update, surrender, reset license and also configure existing License.

## **3.3 Setting up Account Heads**

Tally.ERP 9 allows you to create Account heads and groups as per your requirements. The flexibility and ease of creating user-defined Account Heads and groups (Chart of Accounts) as per nature of business or business practice makes Tally.ERP 9 suitable for businesses across industries, verticals and geographies, without changing the way they do their business.

### **3.3.1 Chart of Accounts**

Tally.ERP 9 follows the Double Entry system of Accounting. It records accounting information by debiting and crediting different Ledger Accounts using different voucher types depending upon the nature of transaction. It automatically collates the debit and credit amounts and arrives at the closing balance of each ledger / group / report.

### **3.3.2 Pre-defined Groups of Accounts**

There are 28 predefined groups in Tally.ERP 9, which are widely used in the Chart of Accounts of many trading organizations. Out of these, 15 groups are Primary Groups and the remaining 13 are Sub-Groups.

Among the 15 predefined groups, 9 Groups are Balance Sheet items and the remaining 6 groups are Profit & Loss A/c items. However, you may also alter the nomenclature of these predefined 28 Groups

The **List of Accounts** screen is displayed as shown

**1. Capital Account**

Reserves & Surplus [Retained Earnings]

**2. Current Assets**

Bank Accounts

Cash-in-hand

Deposits (Asset)

Loans & Advances (Asset)

Stock-in-hand

Sundry Debtors

**3. Current Liabilities**

Duties & Taxes

Provisions

Sundry Creditors

**4. Fixed Assets**

**5. Investments**

**6. Loans (Liability)**

Bank OD A/c [Bank OCC A/c]

Secured Loans

Unsecured Loans

**7. Suspense A/c**

**8. Misc. Expenses (Asset)**

**9. Branch/Divisions**

Out of the **15 pre-defined primary groups**, the following are the six pre-defined groups that appear in the Profit & Loss Account.

1. Sales Accounts
2. Purchase Accounts
3. Direct Incomes [Income (Direct)]
4. Indirect Incomes [Income (Indirect)]
5. Direct Expenses [Expenses (Direct)]
6. Indirect Expenses [Expenses (Indirect)]

*The Items in square brackets are aliases for the Group Names. This is another powerful feature of Tally.ERP 9, which allows you to refer to the same item under several different names.*

### 3.3.3 Groups and Ledgers

Group is a collection of Ledgers of the same nature. In a business, expenditures like telephone expenses, electricity charges, conveyance etc., are commonly incurred. Ledgers based on these expenditures are created to be used while accounting vouchers are entered. To know the total of such expenses for any period (a week or a month), similar natured expense ledgers are grouped.

*Make sure all the options in the **F12: Configure** (Master configuration) are set to **No**. The function of each option will be explained as and when the topic is covered.*

Ledger account heads are the actual account heads with which we identify the transactions. All voucher entries have to be passed using ledgers. To Understand the concept of Groups and Ledgers, let us create **Ledgers** and **Groups** in **Indus Enterprises**.

1. **Proprietor's Capital Account** – under **Capital Account** with an opening balance of Rs.25000.
2. **Land & Building** – under **Fixed Assets** with an opening balance of Rs.60000.
3. **Milton & Co** – under **Sundry Debtors** because we have sold some goods to them – with an opening balance of Rs.15000.
4. **Kaltronic Ltd** – under **Sundry Creditors** – because we have purchased some goods from them with opening balance of Rs. 85000.
5. **Local Sales** – under **Sales Account** with no opening balance.
6. **Local Purchases** – under **Purchase Account** with no opening balance.
7. **State Bank of India** – under **Bank Accounts** with an opening balance of Rs. 35000.
8. **Conveyance** – under **Indirect Expenses** with no opening balance.
9. **Bank Interest** – under **Indirect Income** with no opening balance.

Notice that we have mentioned ledger names under groups i.e., under Capital Account, under Sundry Debtor, etc. which are referred to as **GROUP** names.

Ledgers are created in the following manner:

Go to the **Gateway of Tally > Accounts Info. > Ledgers > Create**.

The **Ledger Creation** screen appears as shown below:

Figure 3.10 Ledger Creation screen

Two of the nine ledger accounts will be created by us. As a practice exercise you will be creating the remaining seven ledgers.

1. **Proprietor's Capital Account under Capital Account with an opening balance of Rs. 25000.**
  - Enter **Name** as **Proprietor's Capital Account**.
  - Select **Capital Account** from the **List of Groups**.
  - Enter **25000** in the **Opening Balance (on 1-Apr-2009)** field.

| Ledger Creation                               |                | Indus Enterprises |
|-----------------------------------------------|----------------|-------------------|
| Name : Proprietor's Capital Account           | Total Op. Bal. |                   |
|                                               | 25,000.00 Cr   |                   |
|                                               | Difference     |                   |
|                                               | 25,000.00 Cr   |                   |
| Under : Capital Account                       |                |                   |
|                                               |                |                   |
| Opening Balance ( on 1-Apr-2009 ) : 25,000.00 |                | Accept ?          |
|                                               |                | Yes or No         |

Figure 3.11 Ledger Creation screen — Proprietor's Capital Account

- Press **Y** or **Enter** to accept the screen.

Notice that Tally.ERP 9 automatically capitalises the first letter for you.

## 2. Land & Building under Fixed Assets with an opening balance of Rs.60000.

- Enter **Name** as **Land & Building**.
- Select **Fixed Assets** from the **List of Groups**.
- Enter **60,000** in the **Opening Balance (on 1-Apr-2009)** field.

| Ledger Creation                                                                                    |                | Indus Enterprises |
|----------------------------------------------------------------------------------------------------|----------------|-------------------|
| Name : Land & Building                                                                             | Total Op. Bal. |                   |
|                                                                                                    | 60,000.00 Dr   |                   |
|                                                                                                    | 25,000.00 Cr   |                   |
|                                                                                                    | Difference     |                   |
|                                                                                                    | 35,000.00 Dr   |                   |
| Under : Fixed Assets                                                                               |                |                   |
| <div>Accept ?</div> <div>Opening Balance ( on 1-Apr-2009) : 60,000.00 <span>Yes or No</span></div> |                |                   |

Figure 3.12 Ledger Creation — Land & Building

- Press **Y** or **Enter** to accept the screen.

Tally.ERP 9 displays the total debit and credit opening balances while the ledgers are being created in the Ledger Creation screen. This is to avoid differences in the opening balance.

So far, we have used the default groups provided in Tally.ERP 9, but Tally.ERP 9 does allow us to create our own groups. To know how to do so, let us explore the options available under the creation of Groups using Tally.ERP 9's pre-defined groups.

Groups can be created in the following manner:

Go to the **Gateway of Tally > Accounts Info. > Groups**.

The Groups menu appears as shown below:

Figure 3.13 Groups Menu

*You can create one group at a time by pressing **Enter** on **Create** under **Single Group** menu. In case, you want to create multiple groups simultaneously, you can create them by pressing **Enter** on **Create** under **Multiple Groups**.*

Create the following Sundry Debtors Ledger accounts :

- ❑ **Groups - North Delhi Debtors** and **Bhopal Debtors** under **North India Debtors**.
- ❑ **Mysore Debtors** and **Secundrabad Debtors** under **South India Debtors**.
- ❑ **Renison & Co** and **Milton & Co** grouped under **North Delhi Debtors**.

### Solution

The solution is to first create two sub-groups **North India Debtors** and **South India Debtors** under Sundry Debtors.

Go to the **Gateway of Tally > Accounts Info. > Groups > Create**.

- ❑ Enter **Name** as **North India Debtors**
- ❑ Against the field **Under** select **Sundry Debtors** from the **List of Groups**

The **Group Creation** screen appears as shown below :

| Group Creation                                    |                     | Indus Enterprises | Ctrl + M                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Indus Enterprises                                 | No Vouchers Entered |                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

Figure 3.14 Group Creation — North India Debtors

- Press **Y** or **Enter** to accept the screen.

Similarly create the following Groups:

- **South India Debtors** under **Sundry Debtors**.
- **Mysore Debtors** and **Secundrabad Debtors** under **South India Debtors**.
- **North Delhi Debtors** and **Bhopal Debtors** under **North India Debtors**.

Tally.ERP 9 allows you to create any number of groups under all the default groups. We have now created two sub-groups under Sundry Debtors viz. North India Debtors and South India Debtors. Additionally, we have created two sub-groups each under North India Debtors and South India Debtors as per the requirements.

Let us now create the ledgers for **Renison & Co** and **Milton & Co** under **North Delhi Debtors**. Go to the **Gateway of Tally > Accounts Info. > Ledgers > Create (Multiple Ledgers)**.

Create **Renison & Co** and **Milton & Co** under **North Delhi Debtors**.

- Select **North Delhi Debtors** from **List of Groups**.
- Enter **Renison & Co** in the **Name of Ledger** field.

- Enter **Milton & Co** in the **Name of Ledger** field.

| Multi Ledger Creation             |                | Indus Enterprises   | Ctrl + M                                 |
|-----------------------------------|----------------|---------------------|------------------------------------------|
| Under Group : North Delhi Debtors |                | For 1-Apr-2009      |                                          |
| S.No.                             | Name of Ledger | Under               | Opening Balance Dr/Cr                    |
| 1.                                | Renison & Co   | North Delhi Debtors |                                          |
| 2.                                | Milton & Co    | North Delhi Debtors |                                          |
|                                   |                |                     | <div>Accept ?</div> <div>Yes or No</div> |

Figure 3.15 Multi-Ledger Creation

- **North Delhi Debtors** is automatically prefilled in the **Under** field, press **Enter** to accept
- Press **Enter** to accept the screen.

We have learnt to create ledgers in both the single and multiple mode under Tally.ERP 9's default pre-defined groups. We have also created our own sub-groups under Tally.ERP 9's predefined groups.

- Return to the **Gateway of Tally** and shut **Indus Enterprises** and select **National Traders**.

Given below is the **Trial Balance** of **National Traders** extracted from the Books of Accounts at the close of business on March 31, 2009.

| Trial Balance                     |       |               |               |
|-----------------------------------|-------|---------------|---------------|
| Particulars                       |       | Debit         | Credit        |
| Bank account                      |       | 35000         |               |
| Deposit Account                   |       | 40000         |               |
| Petty Cash                        |       | 500           |               |
| Opening Stock                     |       | 286150        |               |

| <b>Total</b>                      |       | <b>518950</b> | <b>518950</b> |

The Chart of Accounts to be prepared is based on the above Trial Balance of National Traders. This is to assist you in understanding the classification of ledgers. To help you, each account has been marked as :

- ❑ **P** - Pre-defined Tally.ERP 9 Group (no action)
- ❑ **L** - Ledger account required
- ❑ **NG** - New Group required
- ❑ **NPG** - New Primary Group required

### 3.3.4 Chart of Accounts of National Traders

#### 1. Capital Accounts as appearing in the Balance Sheet:

Figure 3.16 Chart of Accounts in Balance Sheet — Assets

Figure 3.17 Chart of Accounts in Balance Sheet — Liabilities

## 2. Revenue Accounts appearing in the Profit & Loss Account

Figure 3.18 Chart of Accounts in Profit & Loss account — Incomes

Figure 3.19 Chart of Accounts in Profit & Loss account — Expenses

### Tally.ERP 9 Walk-through to Create Group Names for National Traders.

Check the following:

1. Check whether the Current Date is **April 1, 2009**. To change the Current Date, click **F2: Date** on the button bar. Note that Tally.ERP 9 increments the date assuming that you want to change to the next day. You can accept it or change it. Type **1-4-2009** and press **Enter** to accept.
2. Press **Esc**, if you do not have the **Gateway of Tally** menu displayed.

Let us now get familiar with Tally.ERP 9's Display functions.

### Displaying groups in Single Group and Multiple Group in the chart of accounts

Go to the **Gateway of Tally > Accounts Info. > Groups > Display (Single Group) > Select Bank Accounts**.

| Group Display |   | National       |
|---------------|---|----------------|
| Name          | : | Bank Accounts  |
| Under         | : | Current Assets |
|               |   |                |

Figure 3.20 Group Display — Bank Account

You can now use the **Page Up** and **Page Down** keys to view different groups.

- *The Groups in Tally.ERP 9, serve to both classify and identify account heads (ledger accounts) according to their nature. This enables a presentation of summarised information.*
- *The Groups have a hierarchical organisation. At the top of the hierarchy are **Primary Groups** where accounts are classified into capital or revenue, more specifically into assets, liabilities, income and expenditure to determine the entire accounting and their presentation, i.e., whether a ledger affects Profit & Loss Account (as a revenue item) or goes into the Balance Sheet.*
- *Tally.ERP 9 provides a set of **reserved groups**, based on mercantile accounting principles, and allows you to modify their names or create **sub-groups** and **primary groups**.*

Let us now view the List of Groups in the **Multiple Display Mode**.

Go to the **Gateway of Tally > Accounts Info. > Groups > Display (Multiple Groups) > Select All Items**

| Multi Group Display |                          | National Traders                     | Ctrl + M |
|---------------------|--------------------------|--------------------------------------|----------|
| Under Group         |                          | : <input type="checkbox"/> All Items |          |
| S.No.               | Name of Group            | Under                                |          |
| 1.                  | Capital Account          | <input type="checkbox"/> Primary     |          |
| 2.                  | Loans (Liability)        | <input type="checkbox"/> Primary     |          |
| 3.                  | Current Liabilities      | <input type="checkbox"/> Primary     |          |
| 4.                  | Fixed Assets             | <input type="checkbox"/> Primary     |          |
| 5.                  | Investments              | <input type="checkbox"/> Primary     |          |
| 6.                  | Current Assets           | <input type="checkbox"/> Primary     |          |
| 7.                  | Branch / Divisions       | <input type="checkbox"/> Primary     |          |
| 8.                  | Misc. Expenses (ASSET)   | <input type="checkbox"/> Primary     |          |
| 9.                  | Suspense A/c             | <input type="checkbox"/> Primary     |          |
| 10.                 | Sales Accounts           | <input type="checkbox"/> Primary     |          |
| 11.                 | Purchase Accounts        | <input type="checkbox"/> Primary     |          |
| 12.                 | Direct Incomes           | <input type="checkbox"/> Primary     |          |
| 13.                 | Direct Expenses          | <input type="checkbox"/> Primary     |          |
| 14.                 | Indirect Incomes         | <input type="checkbox"/> Primary     |          |
| 15.                 | Indirect Expenses        | <input type="checkbox"/> Primary     |          |
| 16.                 | Reserves & Surplus       | Capital Account                      |          |
| 17.                 | Bank OD A/c              | Loans (Liability)                    |          |
| 18.                 | Secured Loans            | Loans (Liability)                    |          |
| 19.                 | Unsecured Loans          | Loans (Liability)                    |          |
| 20.                 | Duties & Taxes           | Current Liabilities                  |          |
| 21.                 | Provisions               | Current Liabilities                  |          |
| 22.                 | Sundry Creditors         | Current Liabilities                  |          |
| 23.                 | Stock-in-hand            | Current Assets                       |          |
| 24.                 | Deposits (Asset)         | Current Assets                       |          |
| 25.                 | Loans & Advances (Asset) | Current Assets                       |          |
| 26.                 | Sundry Debtors           | Current Assets                       |          |
| 27.                 | Cash-in-hand             | Current Assets                       |          |
| 28.                 | Bank Accounts            | Current Assets                       |          |

Figure 3.21 Multi-Group Display screen

### Adding groups to the chart of accounts

- ☐ **Depreciation** under **Primary Group**
- ☐ **Buildings** and **Office Equipment** under **Fixed Assets**

- ☐ Use **Multiple Groups Creation** to create **Buildings and Office Equipment**.
- ☐ Use **Single Group Creation** to create **Depreciation**.

*In the **F12: Group Configuration**, Allow **ADVANCED** entries in **Masters** when set to **Yes**, displays **Primary** as an option in addition to the other pre-defined Groups.*

We can access all the configuration options for the Masters from the **Gateway of Tally > F12: Configure > Accts / Inventory Info.**

Go to the **Gateway of Tally > Accounts Info. > Groups > Create** (Single Group).

Click on **F12: Configure** button and set **Yes** to:

- ❑ **Allow ALIASES along with Names**
- ❑ **Allow Language ALIASES along with Names.**
- ❑ **Allow ADVANCED entries in Masters.**

Accept the configuration screen and Tally.ERP 9 displays the Group Creation Screen in which you will notice additional information like:

1. **Alias** – This is a simple mechanism of identifying an account by another name.
2. **Group behaves like a Sub-Ledger** – The group behaves like a Control Account for the ledgers it contains when set to **Yes**. Only the group balance will be displayed, not the individual ledger balances. It is useful for groups such as *Sundry Debtors* and *Sundry Creditors* (which are pre-set to **Yes**) where there can be numerous ledger items.
3. **Nett Debit/Credit Balances for Reporting** – By setting this to **Yes**, amounts will be displayed as a net figure instead of separate debit and credit balances in reports.

### Create Group

1. **Name: Depreciation**
2. **(alias):** Type **Deprn** and press **Enter**. This allows you to refer to the group by either name. You will notice that there is a field to enter a second alias if required. If you enter a name here, another alias field will be displayed, and so on. Tally uses the main name on all displays and reports, but this multiple alias facility is extremely useful for data entry.
3. **Under:** Select **Primary** from the list of Groups
4. **Nature of Group:** Select **Expenses**

- ❑ ***Nature of Group** is displayed when the new Group is created under a **Primary Group**. It helps to distinguish whether the group is a part of assets, liabilities, income or expenses, to identify the correct group for the Balance Sheet or Profit & Loss A/c.*

### 5. Does it affect Gross Profits?: No

Since these are **Expenses** (and the same is true for **Income**) which affect the Profit & Loss A/c, Tally.ERP 9 needs to know if the group affects the gross profit. This field will not appear if you are adding a group to an existing group.

- For Primary Income and Expenses Groups, the field **Does it affect Gross Profit?** tells Tally.ERP 9 whether the item is above or below the line in the Profit & Loss A/c in terms of its effect on the gross or net profit. Direct items are pre-set to **Yes** and indirect items to **No**.

6. **Group behaves like a Sub-Ledger: No**
7. **Nett Debit/Credit Balances for Reporting: No.**
8. **Used for Calculation (eg. Taxes, Discounts): No**
9. **Method to Allocate when used in Purchase Invoice: Not Applicable**

The Group Creation Screen appears as shown below :

| Group Creation                                                           |                                             | National Traders                           |
|--------------------------------------------------------------------------|---------------------------------------------|--------------------------------------------|
| Name                                                                     | : <b>Depreciation</b>                       |                                            |
| (alias)                                                                  | : Depn                                      |                                            |
| Under                                                                    | : <input type="checkbox"/> <b>Primary</b>   |                                            |
| Nature of Group                                                          | ? <b>Expenses</b>                           |                                            |
| Does it affect Gross Profits                                             | ? <b>No</b>                                 |                                            |
| Group behaves like a Sub-Ledger                                          | ? <b>No</b>                                 |                                            |
| Nett Debit/Credit Balances for Reporting                                 | ? <b>No</b>                                 |                                            |
| Used for Calculation (eg. Taxes, Discounts)<br>(for Sales Invoice Entry) | ? <b>No</b>                                 |                                            |
| Method to Allocate when used in Purchase Invoice                         | ? <input type="checkbox"/> <b>Not Appli</b> | <b>Accept ?</b><br><b>Yes</b> or <b>No</b> |

Figure 3.22 Group Creation — Depreciation

10. Press **Y** or **Enter** to accept the screen.

### Altering Groups

Once created, groups can be altered by selecting the **Alter** option for single or multiple groups. The procedure is the same as used earlier to display groups, except that, here the data can be altered.

## Deleting Groups

You can delete a group via the **Group Alteration** (Single Mode) screen by pressing **Alt+D**. However, you cannot delete Tally.ERP 9's pre-defined groups, or groups with sub-groups or groups containing ledgers. **The lowest level must be deleted first.**

**Tally.ERP 9 walkthrough to create National Traders ledgers with opening balances.**

Go to the **Gateway of Tally > Accounts Info. > Ledgers > Create.**

## Adding Single Ledgers

1. **Name:** Mutual Trust Loan
2. **Alias:** Skip this field
3. **Under:** Secured Loans
4. **Inventory values are affected ?:** No
5. **Opening Balance (on 1-April-2009):** 50000 Cr

| Ledger Creation                                |                                        | National Traders |
|------------------------------------------------|----------------------------------------|------------------|
| Name                                           | : Mutual Trust Loan                    | Total Op. Bal.   |
| (alias)                                        | :                                      |                  |
|                                                |                                        | 2,86,150.00 Dr   |
|                                                |                                        | 50,000.00 Cr     |
|                                                |                                        | Difference       |
|                                                |                                        | 2,36,150.00 Dr   |
| Under                                          | : Secured Loans<br>(Loans (Liability)) |                  |
| Inventory values are affected                  | ? No                                   |                  |
| Opening Balance (on 1-Apr-2009) : 50,000.00 Cr |                                        |                  |

Figure 3.23 Ledger Creation — Mutual Trust Loan

- *Tally.ERP 9 automatically assumes this to be a credit balance (Cr) however, you can change it to debit (Dr) if required. Also note that Tally.ERP 9 currently displays a running total of the difference in the Opening Balance. This difference should be zero when all the balances have been entered.*

6. Press **Y** or **Enter** to accept the screen.

### **Adding Multiple Ledgers**

- **Under Group: Sundry Debtor**
- **Name of Ledger: Data Link Technologies**
- **Opening Balance: 26000 Dr**
- **Name of Ledger: Spectrum Computers**
- **Opening Balance: 12400 Dr**
- **Name of Ledger: Supreme Computers**
- **Opening Balance: 13500 Dr**
- Press **Y** or **Enter** to accept the screen.

### **Altering and Displaying Ledgers**

The procedures for altering and displaying ledgers are similar to those of groups. Now try this out on National Traders by altering the Tally.ERP 9 pre-defined ledger for Cash to Petty Cash and entering the opening balance:

- Select **Alter** from the **Single Ledger** option.
- Select **Cash** from the List of Ledgers.
- Change the **Name** from **Cash** to **Petty Cash**.
- Enter the **Opening Balance** of 500 Dr.
- Press **Y** or **Enter** to accept the screen.

If you use **Display** in **Single Ledger** now, you will see that the **List of Ledgers** shows Petty Cash instead of Cash.

### **Deleting Ledgers**

- You can delete a ledger, by pressing **Alt+D** in the Ledger Alteration screen.

You will not be able to delete a ledger, once the financial transactions (vouchers) have been entered (excluding the Opening Balance). If there is a need to delete a ledger with any financial transactions the lowest level must be deleted first by pressing **Alt+D**.

### Create other Ledgers given in the Trial Balance

1. Remember, you have already input the ledger details for the two Sundry Debtors, the Mutual Trust Loan and Petty Cash.
2. Work from the Trial Balance, referring to the Chart of Accounts for the group to select, and create the ledgers using the single or multiple options, depending on the number of ledgers you create.
3. For the ledgers under **Sales Accounts** and **Purchase Accounts**, set **Inventory values are affected?** to **No**. Reset it to **Yes** when you start Inventory Vouchers.
4. Please enter on the ledger names as per the Trial Balance.
5. Sundry Creditors should be set up using the multiple options in the same way as the Sundry Debtors, except that the opening balances will be credits.
6. Watch the debits and credits on the two accumulated depreciation ledgers as, Tally.ERP 9 assumes it to be a debit balance (Dr). You need to change this to Cr.
7. Create a ledger for Bank Interest even though its balance is zero.

### Verify the Ledgers and Opening Balances

In practical situations, that is all you have, the Chart of Accounts and the Trial Balance.

You need to match the Trial Balance ledger accounts with the Chart of Accounts. You might put the opening balance figures in the chart of accounts itself. Tally.ERP 9 needs to know the Group under which each account falls at the time you are creating the ledger account.

To ease your walk-through, the following **Multi Ledger Alteration** screen is taken from Tally.ERP 9 after entering the data. You can use them to verify your ledger accounts:

Go to the **Gateway of Tally > Accounts Info. > Ledgers > Multiple Alteration > Select All Items**.

| Multi Ledger Alteration                          |                          | National Traders                 |                 | Ctrl + M |    |
|--------------------------------------------------|--------------------------|----------------------------------|-----------------|----------|----|
| Under Group : <input type="checkbox"/> All Items |                          | For 1-Apr-2009                   |                 |          |    |
| S.No.                                            | Name of Ledger           | Under                            | Opening Balance | Dr       | Cr |
| 1.                                               | Bank Account             | Bank Accounts                    | 35,000.00       | Dr       |    |
| 2.                                               | Building Accum Deprn     | Buildings                        | 8,000.00        | Cr       |    |
| 3.                                               | Buildings                | Fixed Assets                     | 75,000.00       | Dr       |    |
| 4.                                               | Challenger Systems       | Sundry Creditors                 | 65,650.00       | Cr       |    |
| 5.                                               | Compu Care Systems       | Sundry Debtors                   | 5,400.00        | Dr       |    |
| 6.                                               | Data Link Technologies   | Sundry Debtors                   | 26,000.00       | Dr       |    |
| 7.                                               | Deposit Account          | Bank Accounts                    | 40,000.00       | Dr       |    |
| 8.                                               | Equity Capital           | Capital Account                  | 2,50,000.00     | Cr       |    |
| 9.                                               | Horizon Enterprises      | Sundry Creditors                 | 44,750.00       | Cr       |    |
| 10.                                              | Mutual Trust Loan        | Secured Loans                    | 50,000.00       | Cr       |    |
| 11.                                              | Office Equip Accum Deprn | Office Equipment                 | 4,500.00        | Cr       |    |
| 12.                                              | Office Equipment         | Fixed Assets                     | 25,000.00       | Dr       |    |
| 13.                                              | Petty Cash               | Cash-in-Hand                     | 500.00          | Dr       |    |
| 14.                                              | Profit & Loss A/c        | <input type="checkbox"/> Primary | 32,070.00       | Cr       |    |
| 15.                                              | Sales Tax                | Duties & Taxes                   | 13,600.00       | Cr       |    |
| 16.                                              | Silverplus Computers     | Sundry Creditors                 | 45,600.00       | Cr       |    |

| 18.                                              | Supreme Computers        | Sundry Debtors                   | 13,500.00       | Dr       |    |
| 19.                                              | Tax Deducted at Source   | Current Liabilities              | 4,780.00        | Cr       |    |

**Accept ?**  
 Yes or No

Figure 3.24 Multi-Ledger Alteration screen

- Press **Y** or **Enter** to accept the screen.

## Points to Remember

- ❑ F11: Features are company-specific. You are allowed to specify options that are specific to the selected company only.
- ❑ The Accounting Features helps the user to create Budgets & Scenarios, Currencies, Cost Centres, Cost Categories etc. in addition to Groups and Ledgers.
- ❑ The Inventory Features helps the user to create Stock categories, Multiple Godowns, Use Tracking Numbers, Order Processing, Price levels etc. in addition to Stock Groups, Stock Items and Units of Measure.
- ❑ The Statutory & Taxation Features helps the user to enable Value Added Tax (VAT), Excise, Service Tax, Tax deducted at Source(TDS), Tax Collected at Source (TCS), Excise Duty along with Tax information such as Local Sales Tax Number, Inter-state Sales Tax Number, PAN/Income - Tax Number.
- ❑ F12: Configuration options are applicable to all the companies in the same data directory.
- ❑ All financial entries are performed using ledgers or account heads.
- ❑ Group is a collection of Ledgers of the same nature.
- ❑ You can delete a ledger by pressing Alt+D in the Ledger Alteration screen.

## Lesson 4: Creating Inventory Masters in Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ The basic functions of the Tally.ERP 9 Inventory System
- ❑ Creating and maintaining Inventory Masters
- ❑ Creating and maintaining stock details
- ❑ Creating stock items and entering opening balances

Inventory accounting includes recording of stock details like the purchase of stock, the sale of stock, stock movement between storage locations or godowns and providing information on stock availability. Tally.ERP 9 makes it possible to integrate the inventory and accounting systems so that the financial statements reflect the closing stock value from the Inventory system.

The inventory system operates in much the same way as the accounting system.

- ❑ First you set up the inventory details, which is a similar operation to creating the chart of accounts although, in this case, there are **no pre-defined set of stock groups**.
- ❑ Second, you create the individual stock items, which is similar to setting up the ledgers.

In a newly created company the Inventory Info. menu comprises of four types of Masters, viz. Stock Groups, Stock Items, Units of Measure and Voucher Types.

Go to the **Gateway of Tally > Inventory Info.**

The Inventory info. menu is displayed as shown:

Figure 4.1 Inventory Info. Menu

The above Inventory Masters types are explained in detailed in the following sections.

□ Units of Measure

Let us take the example of **Indus Enterprises** that sells **Televisions** and **Music Systems**.

Given below is the structure of items being sold.

| Group A – Televisions |                             |
|-----------------------|-----------------------------|
| A1 – Sony             | A1a – Sony 29 inches TV     |
|                       | A1b – Sony 25 inches TV     |
| A2 – Philips          | A2a – Philips 29 inches TV  |
|                       | A2b – Philips 25 inches TV  |
| A3 – Videocon         | A3a – Videocon 29 inches TV |
|                       | A3b – Videocon 25 inches TV |

| Group B – Music Systems |                              |
|-------------------------|------------------------------|
| B1 – Sony               | B1a – Sony Tape-Recorder     |
|                         | B1b – Sony CD Player         |
| B2 – Videocon           | B2a – Videocon Tape-Recorder |
|                         | B2b – Videocon CD Player     |

The televisions are sold in numbers. Hence, the **Unit of Measure** will be **Nos.**

Indus Enterprises has **two Godowns**, the **Bangalore Godown** and the **Mumbai Godown**.

The grouping structure in Tally.ERP 9 is as follows:

### Stock Group

1. **Televisions** (main stock group)
  - Sony TV – stock group under Televisions
  - Philips TV – stock group under Televisions
  - Videocon TV – stock group under Televisions
2. **Music Systems** (main stock group)
  - Sony Music Systems – Stock Group under Music Systems
  - Videocon Music Systems – Stock Group under Music Systems

Under the stock group Televisions, let us create stock groups based on the different brands being sold viz. Sony, Philips and Videocon. This helps to find the total sales of a particular brand of televisions at any given point of time. In order to compare the total sales of the 29 and 25 inches televisions respectively, Tally.ERP 9's feature of Stock Categories for parallel classification can be used.

Experiment Creation of **Inventory Masters** in **Indus Enterprises**.

## 4.1 Stock Groups

Stock Groups are provided to help in the classification of stock items. Classification is done based on some common behaviour. Grouping stock items makes it easy to identify and report them in the statements. For example, items of a particular brand can be grouped together so that you can get the inventory details of all the items of that brand.

### 4.1.1 Creating Stock Group

#### i. Create the Stock Group – Television under Primary.

Go to the **Gateway of Tally > Inventory Info. > Stock Groups > Create** (under the Single Stock Group).

Ensure that the screen appears as shown below:

| Stock Group Creation             |                                           |
|----------------------------------|-------------------------------------------|
| Name                             | : <b>Television</b>                       |
| Under                            | : <input type="checkbox"/> <b>Primary</b> |
| Can Quantities of items be ADDED | ? <b>Yes</b>                              |

Figure 4.2 Stock Group Creation — Television

- Press **Y** or **Enter** to accept the screen.

Similarly, create **Music Systems** under **Primary**.

## ii. Create Sony TV under Televisions.

The screen is displayed as shown below:

| Stock Group Creation             |                     |
|----------------------------------|---------------------|
| Name                             | : <b>Sony TV</b>    |
| Under                            | : <b>Television</b> |
| Can Quantities of items be ADDED | ? <b>Yes</b>        |

Figure 4.3 Stock Group Creation — Sony TV

- Press **Y** or **Enter** to accept the screen.

## Practice Exercise

Create the following **Stock Groups** in the similar manner

| Name                   | Under         | Can Quantities of items be ADDED |
|------------------------|---------------|----------------------------------|
| Philips TV             | Televisions   | Yes                              |
| Videocon TV            | Televisions   | Yes                              |
| Sony Music Systems     | Music Systems | Yes                              |
| Videocon Music Systems | Music Systems | Yes                              |

## 4.2 Stock Categories

This is a feature, which offers a parallel classification of stock items. Like Stock Groups, Stock categories are also classified based on some similar behaviour. The advantage of using Tally.ERP 9 lies in categorising Stock items together, (based on functionality) across different stock groups. This enables you to obtain reports for alternatives or substitutes of a stock item.

- Set **Yes** to **Maintain Stock Categories** in **F11: Features (F2: Inventory Features)** to get an additional option **Stock Categories** under **Inventory Info**.

### 4.2.1 Creating Stock Category

Go to the **Gateway of Tally > Inventory Info. > Stock Categories > Create.**

#### i. Create Stock Category 29 inches TV Under Primary

| Stock Category Creation                  |                       |
|------------------------------------------|-----------------------|
| Name : 29 inches TV                      | Accept ?<br>Yes or No |
| Under : <input type="checkbox"/> Primary |                       |

Figure 4.4 Stock Category Creation — 29 inches TV

- Press **Y** or **Enter** to accept the screen.

Similarly , create Stock Category **25 inches TV** under **Primary**.

## 4.3 Godowns / Locations

A place where stock items are stored is referred to as Godowns. You can specify where the stock items are kept. For example: A warehouse, shelf or rack etc, and obtain stock reports for each Godown and account for the movement of stock between locations/Godowns.

- Set **Yes** to **Maintain Multiple Godowns** in **F11: Features (F2: Inventory Features)** to get additional option like **Stock Categories** under **Inventory Info.**

### 4.3.1 Creating a Godown

Go to the **Gateway of Tally > Inventory Info. > Godowns > Create.**

#### i. Create a Godown – Bangalore under Primary.

Ensure that the screen is displayed as shown below:

| Godown Creation                          |                       |
|------------------------------------------|-----------------------|
| Name : Bangalore                         | Accept ?<br>Yes or No |
| Under : <input type="checkbox"/> Primary |                       |
| Allow Storage of materials               |                       |

Figure 4.5 Godown Creation — Bangalore

- Press **Y** or **Enter** to accept the screen.

- *Godowns have a main location, by default because of which the options **Display** and **Alter** are functional even before you create a godown.*

Similarly create the godown – **Mumbai** under **Primary**.

## 4.4 Units of Measure

Stock Items are mainly purchased and sold on the basis of quantity. The quantity inturn is measured by units. In such cases, it is necessary to create the Unit of Measure. The Units of Measure can either be simple or compound. Examples of simple units are: nos., metres, kilograms, pieces etc. Examples for compound units are: a box of 10 pieces etc. Create the Units of Measure before creating the Stock Items.

### 4.4.1 Creating Units of Measure

Go to the **Gateway of Tally > Inventory Info. > Units of Measure > Create**.

The **Unit Creation** Screen appears as shown below:

A screenshot of the 'Unit Creation' screen in Tally.ERP 9. The screen has a green header bar with the text 'Unit Creation'. Below the header, there are four fields: 'Type' with a value of 'Simple', 'Symbol' with a value of '\_', 'Formal Name' which is empty, and 'Number of Decimal Places' with a value of '0'.

Figure 4.6 Units of Measure Creation screen

#### Type

Tally.ERP 9 has the option to create simple units as well as compound units. Examples: box, nos, pcs, etc. A Compound Unit is a combination of two simple units of measure. Example: A **box of 10 pcs** is a compound unit of measure.

#### Symbol

It is the abbreviated form by which a stock item is identified. For example, the abbreviation pcs indicates – pieces.

### Formal Name

This represents the complete or formal name of a symbol used while creating a unit. Different companies use different symbols to represent the same units. Formal names help you to match the symbols with their respective units. For example, the symbol for numbers (formal name) can be nos or num.

### Number of Decimal Places

A unit can be expressed as fractions. For example, a 3.15 Kg refers to 3Kg and 150 grams. The number of digits expressed in grams after the decimal places are three. Likewise, fractions up to four decimal places can be expressed in the same manner. For expressing numbers, without a decimal place, specify 0 in this option.

Let us create the unit **Nos**.

1. **Type: Simple**
2. **Symbol: Nos**
3. **Formal Name: Numbers**
4. **Number of Decimal Places: 0**

The **Unit Creation** screen is displayed as shown below:

| Unit Creation                       |                 |
|-------------------------------------|-----------------|
| Type                                | : <b>Simple</b> |
| Symbol                              | : <b>Nos</b>    |
| Formal Name                         | : Numbers       |
| Number of Decimal Places            |                 |
| <b>Accept ?</b><br><b>Yes or No</b> |                 |

Figure 4.7 Units of Measure Creation — Nos

5. Press **Y** or **Enter** to accept the screen.

## 4.5 Stock Items

Stock items are goods that you manufacture or trade (sell and purchase). It is the primary inventory entity. Stock Items in the Inventory transactions are similar to ledgers being used in accounting transactions. Therefore, Stock Items are important in an inventory just as ledgers are important in accounting.

### 4.5.1 Creating a Stock Item

Go to **Gateway of Tally > Inventory Info. > Stock Items > Create**.

The Stock Item Creation Screen appears as shown below:

| Stock Item Creation                                                                                                                                                    |  | Indus Enterprises                                                                                                                |                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|----------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Name : <span style="background-color: black; color: black;">XXXXXXXXXX</span>                                                                                          |  |                                                                                                                                  |                       |
| Under : <input type="checkbox"/> <b>Primary</b><br>Category : <input type="checkbox"/> <b>Not Applicable</b><br>Units : <input type="checkbox"/> <b>Not Applicable</b> |  | <u><b>Tax Information</b></u><br>Tariff Classification : <input type="checkbox"/> <b>Not Applicable</b><br>Rate of Duty (eg 5) : |                       |
| Opening Balance :                                                                                                                                                      |  | <b>Quantity</b>                                                                                                                  | <b>Rate per Value</b> |

Figure 4.8 Stock Item Creation screen

Enter the following details:

**Name:** The name of the stock item.

**Under:** The stock group under which you want to classify the stock item.

**Category:** The stock category you want to classify the stock item for parallel classification.

**Units:** The unit of measure for the stock item being created.

**Rate of Duty:** Enter the rate of duty charged on the item.

**Opening Balance:** The opening balance of a stock item, refers to the stock available with us. Godowns that have already been created, must have the opening balance quantity and the location specified.

**i. Create a Stock Item Sony 29 inches TV, under the Group Sony TV.**

Ensure that the details appear as shown below:

| Stock Item Creation      |                                                                                                                      | Indus Enterprises |                         |
|--------------------------|----------------------------------------------------------------------------------------------------------------------|-------------------|-------------------------|
| Name : Sony 29 inches TV |                                                                                                                      |                   |                         |

Figure 4.9 Stock Item Creation — Sony 29 inches TV

- Press **Y** or **Enter** to accept the screen.

**Practice Exercise**

Similarly, create the following Stock Items under **Televisions**

| Name                  | Under       | Category     | Units |
|-----------------------|-------------|--------------|-------|
| Sony 25 inches TV     | Sony TV     | 25 inches TV | Nos   |
| Philips 29 inches TV  | Philips TV  | 29 inches TV | Nos   |
| Philips 25 inches TV  | Philips TV  | 25 inches TV | Nos   |
| Videocon 29 inches TV | Videocon TV | 29 inches TV | Nos   |
| Videocon 25 inches TV | Videocon TV | 25 inches TV | Nos   |

Similarly, create the following Stock Items under **Music Systems**.

| Name                     | Under                  | Category       | Units |
|--------------------------|------------------------|----------------|-------|
| Sony Tape - Recorder     | Sony Music Systems     | Not Applicable | Nos   |
| Sony CD - Player         | Sony Music Systems     | Not Applicable | Nos   |
| Videocon Tape - Recorder | Videocon Music Systems | Not Applicable | Nos   |
| Videocon CD - Player     | Videocon Music Systems | Not Applicable | Nos   |

## 4.6 Creating Inventory Masters for National Traders

Before you start to create the inventory data for National Traders, there are some important functions of housekeeping that are to be taken care of.

- ❑ Make sure your screen displays the main menu of the **Gateway of Tally** and ensure that only National Traders is loaded.
- ❑ Set Tally.ERP 9's *Current Date* to **April 1, 2009** – select **F2: Date** at the **Gateway of Tally**.
- ❑ You also need to check whether the following features in Tally.ERP 9 are enabled for this module

i. In the **F11: Features (F2: Inventory Features)** set **Yes** to:

- ❑ Maintain Stock Categories
- ❑ Maintain Multiple Godowns

ii. In the **F12: Configure > Accts/Inventory Info.** set **Yes** to:

- ❑ Allow ALIASES along with Names
- ❑ Allow Language ALIASES along with Names
- ❑ Allow ADVANCED entries in Masters (Accounts)
- ❑ Use ADDRESSES for Ledger Accounts
- ❑ Use CONTACT DETAILS for Ledger Accounts
- ❑ Allow ADVANCED entries in Masters (Inventory)
- ❑ Allow Std. Rates for Stock Items

Let us now use Tally.ERP 9 to set up the basic inventory details for **National Traders** that sells computers, Printers and Peripherals. Create the stock groups and sub-groups as shown:

| Stock Group | Under       |
|-------------|-------------|
| Computers   | Primary     |
| Printers    | Primary     |
| Peripherals | Primary     |
| Accessories | Peripherals |
| Components  | Peripherals |

### 4.6.1 Create Stock Groups

You will now set up the stock groups using both the single and multiple create options.

#### i. Creating single stock groups

Go to the **Gateway of Tally > Inventory Info. > Stock Groups > Create.**

Create a **Stock Group - Computers**

1. **Name:** Computers
2. **Aliases:** Skip the field
3. **Under:** Primary
4. **Can quantities of items be ADDED?:** Yes

| Stock Group Creation             |                                           |
|----------------------------------|-------------------------------------------|
| Name                             | : <b>Computers</b>                        |
| Under                            | : <input type="checkbox"/> <b>Primary</b> |
| Can Quantities of items be ADDED | ? <b>Yes</b>                              |

Figure 4.10 Stock Group Creation — Systems

- *The field **Can quantities of items be added?** in the stock group creation screen pertains to information on measuring the units of the Stock Items that have been categorised under the Stock Group. The Stock Items categorised under the group should have similar units for them to be added up. You cannot add quantities in Kgs to quantities in Pcs.*

5. Press **Y** or **Enter** to accept the screen.

Similarly, create the following **Stock Groups**

| Name        | Under   | Can Quantities of items be ADDED |
|-------------|---------|----------------------------------|
| Peripherals | Primary | Yes                              |
| Printers    | Primary | No                               |

#### ii. Creating Multiple Stock Groups

Go to the **Gateway of Tally > Inventory Info. > Stock Groups > Create.**

### Create Accessories and Components under Peripherals.

Ensure that the **Multi Stock Group Creation** screen is displayed as shown below:

| Multi Stock Group Creation |                     |             |                         |
|----------------------------|---------------------|-------------|-------------------------|
| National Traders           |                     |             |                         |
| Ctrl + M                   |                     |             |                         |
| Under Group : Peripherals  |                     |             |                         |
| S.No.                      | Name of Stock Group | Under       | Items are Addable (Y/N) |
| 1.                         | Accessories         | Peripherals | Yes                     |
| 2.                         | Components          | Peripherals | Yes                     |
|                            |                     |             | Accept ?                |
|                            |                     |             | Yes or No               |

Figure 4.11 Multiple Stock Group Creation

- Press **Y** or **Enter** to accept the screen.

### 4.6.2 Displaying and Altering Stock Groups

Once created, stock groups can be displayed and altered in both the single and multiple mode. You can delete a stock group by using the option **Alter** under the **Single Stock Group** by pressing **Alt+D**. However, you cannot delete a stock group with sub-groups or stock items. The lower levels must be deleted first.

### 4.6.3 Creating Single Stock Categories

Go to the **Gateway of Tally > Inventory Info. > Stock Categories > Create**.

| Name     | Under   |
|----------|---------|
| National | Primary |

#### 4.6.4 Creating Multiple Stock Categories

Go to the **Gateway of Tally > Inventory Info. > Stock Categories > Create.**

| Under Category | Name of Category |
|----------------|------------------|
| Primary        | HCL              |
| Primary        | IBM              |
| Primary        | HP               |
| Primary        | Samsung          |

#### 4.6.5 Displaying and Altering Stock Categories

Once created, stock categories can be displayed and altered in single and multiple mode. You can delete a stock category via **Single Stock Category > Alter** by pressing **Alt+D**. However, you cannot delete a stock category with sub-categories. The lower levels must be deleted first.

#### 4.6.6 Creating Units of Measure

Go to the **Gateway of Tally > Inventory Info. > Units of Measure > Create.**

| Type   | Symbol | Formal Name | Number of Decimal Places |
|--------|--------|-------------|--------------------------|
| Simple | Nos    | Number Of   | 0                        |
| Simple | Box    | Boxes       | 0                        |

#### 4.6.7 Creating Compound Units of Measure

Go to the **Gateway of Tally > Inventory Info. > Units of Measure > Create.**

1. **Type:** Compound (press Backspace)
2. **First Unit:** Select **Box**
3. **Conversion:** Type **100**
4. **Second Unit:** Select **Nos**

Unit Creation

Type : **Compound**  
**Units with Multiplier Factors**  
*(example: Kgs of 1000 gms)*  
First Unit Conversion  
**Box** of **100**

Accept ?  
Yes or No

Figure 4.12 Compound Units of Measure Creation

5. Press **Y** or **Enter** to accept the screen.

#### 4.6.8 Displaying and Altering Units of Measure

Once created, the units of measure can be displayed and altered. You can delete a unit of measure in the alteration screen by pressing **Alt+D**. However, you cannot delete a unit of measure that is part of a compound measure. The compound measure must be deleted first.

#### 4.6.9 Creating Godowns

Ensure that **Maintain Multiple Godowns** is set to **Yes** in the **F11: Features (F2: Inventory Features)**.

The concept of **Godowns** is essentially to store the inventory and can be used as a location, warehouse, department, sub-contractor locations etc. Tally.ERP 9 permits any number of godowns that can be grouped and sub-grouped to match the structure you need.

To Create a Godown, go to the **Gateway of Tally > Inventory Info. > Godowns > Create**.

1. **Name: Warehouse**
2. **alias: Skip the field**
3. **Under: Primary**
4. **Allow Storage of materials: Yes**

Similarly, create **On-Site** as **Godown** under **Primary**.

1. **Name: On - Site**
2. **alias: Skip the field**
3. **Under: Primary**
4. **Allow Storage of materials: Yes**

#### 4.6.10 Displaying and Altering Stock Godowns

Once created stock Godowns can be displayed and altered in single and multiple mode.

Go to the **Gateway of Tally > Inventory Info. > Godowns > Alter**.

You can delete a stock Godown via **Single Godown > Alter** by pressing **Alt+D**. However, you cannot delete a stock Godown with sub-godowns. The lower levels must be deleted first.

#### 4.6.11 Create Stock Items

Go to the **Gateway of Tally > Inventory Info. > Stock items > Create**.

Create the stock items as on 1-4-2009, with the information provided below:

| Stock                   | Cost   | Ware-house | On - Site | Total Qty | Total Value     | Retail Price |
|-------------------------|--------|------------|-----------|-----------|-----------------|--------------|
| <b>COMPUTERS</b>        |        |            |           |           |                 |              |
| HCL PIV                 | 17,500 | 1          | 4         | 5 Nos     | 87,500          | 21,500       |
| IBM PIV                 | 17,100 | 0          | 4         | 4 Nos     | 68,400          | 24,785       |
| <b>PERIPHERALS</b>      |        |            |           |           |                 |              |
| <b>Accessories</b>      |        |            |           |           |                 |              |
| CD ROM Disks 100s       | 450    | 0          | 5         | 5 Box     | 2,250           | 500          |
| Dust Covers             | 35     | 2          | 8         | 10 Nos    | 350             | 40           |
| USB Pen Drives 64MB     | 1,250  | 0          | 10        | 10 Nos    | 12,500          | 1,600        |
| Wireless Keyboard       | 490    | 10         | 15        | 25 Nos    | 12,250          | 700          |
| Wireless Mouse          | 250    | 10         | 10        | 20 Nos    | 5,000           | 430          |
| <b>Printers</b>         |        |            |           |           |                 |              |
| HP Laserjet 1010 Series | 8,200  | 0          | 7         | 7 Nos     | 57,400          | 9,500        |
| Samsung Laserjet 1500   | 8,100  | 0          | 5         | 5 Nos     | 40,500          | 9,850        |
| <b>Total</b>            |        |            |           |           | <b>2,86,150</b> |              |

Ensure that **Allow ADVANCED entries in Masters** is set to **Yes** in the **F12: Stock Item Configuration**.

Create the stock item **HCL PIV** with the following details:

1. **Name:** HCL PIV
2. **alias:** Skip this field
3. **Under:** Computers
4. **Category:** HCL
5. **Units:** Nos
6. **Alter Standard Rates?:** Yes
7. Enter the details in the **Standard Rate screen** as shown below:

| Stock Item: <b>HCL PIV</b> |           |     |                        |           |     |
|----------------------------|-----------|-----|------------------------|-----------|-----|
| Standard Cost              |           |     | Standard Selling Price |           |     |
| Applicable From            | Rate      | per | Applicable From        | Rate      | per |
| 1-Apr-2009                 | 17,500.00 | Nos | 1-Apr-2009             | 21,500.00 | Nos |

Figure 4.13 Standard Rate screen for Stock Item — HCL PIV

8. Enter other details as given in the table:

|                                       |                 |
|---------------------------------------|-----------------|
| Rate Of Duty                          | 0               |
| Cost Method                           | Avg Cost        |
| Market Valuation Method               | Last Sale Price |
| Ignore Diff due to Physical Counting? | No              |
| Ignore Negative Balances?             | No              |
| Treat all Sales as New Manufacture?   | No              |
| Treat all Purchases as consumed?      | No              |
| Treat all Rejection Inward as scrap?  | No              |
| Opening Balance: Quantity             | 5 Nos           |
| Opening Balance: Rate                 | 17,500          |

9. Allocate the items as shown below:

11. Press **Y** or **Enter** to accept.

### Explanation for Behaviour

- ❑ **Costing Method:** This is the method by which stocks are valued. The value arrived at will be the stock value in the books. This method considers **Purchase costs** only.
- ❑ **Market Valuation Method:** This method considers the **Sale price** only for the valuation of stocks. The method selected, is not however, used for standard reporting.
- ❑ **Ignore Diff. due to Physical Counting?:** This requires you to enter information on whether Tally.ERP 9 should automatically account for stock difference by passing an appropriate entry or not.
- ❑ **Ignore Negative Balances?:** This requires you to enter information on whether Tally.ERP 9 should warn you if there is a negative balance. This however does not prevent you from entering vouchers.
- ❑ **Treat all Sales as New Manufacture?:** This requires you to enter information on whether on entering a sale voucher, the item will automatically be manufactured and brought in stock.
- ❑ **Treat all Purchases as Consumed?:** This requires you to enter information on whether on entering a purchase, the item is automatically issued from stock.
- ❑ **Treat all Rejections inward as Scrap?:** This requires you to enter information on whether the goods rejected and taken into stock should be shown as issued and hence valued nil.

Similarly, Create other Stock Items.

Once you have entered all the stock items, return to the main **Gateway of Tally** menu and select the **Stock Summary**. This should show a grand total of **2,86,150**, the break-up of which is, **Computers - Rs. 1,55,900, Peripherals - Rs. 32,350, Printers - 97,900 = Rs. 2,86,150**.

Ensure that the Stock Summary appears as shown :

| Stock Summary          |  | National Traders                   |                  | Ctrl + M           |
|------------------------|--|------------------------------------|------------------|--------------------|
| Particulars            |  | National Traders<br>For 1-Apr-2009 |                  |                    |
|                        |  | Closing Balance                    |                  |                    |
|                        |  | Quantity                           | Rate             | Value              |

Figure 4.16 Stock Summary from April 1, 2009 to May 1, 2009

### Points to Remember

- ❑ Inventory accounting includes recording stock details like the purchase of stock, the sale of stock, stock movement between storage locations or godowns and providing information on stock availability.
- ❑ Stock Groups are provided for the purpose of classification of stock items.
- ❑ Stock Items refers to goods that you manufacture or trade.
- ❑ Godowns/Location are places where stock items are stored.

## Lesson 5: Voucher Entry in Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to

- ❑ Describe the purpose of the Tally.ERP 9 Accounting Vouchers
- ❑ Create and alter Accounting Vouchers
- ❑ Use vouchers to enter Accounting transactions
- ❑ Describe the use of Non-Accounting Vouchers
- ❑ Describe the purpose of the Tally.ERP 9 Inventory vouchers
- ❑ Create and alter Inventory Vouchers
- ❑ Using vouchers to enter Inventory transactions

In accounting terms, a voucher is a document containing the details of a financial transaction. For example, a purchase invoice, a sales receipt, a petty cash docket, a bank interest statement, and so on. For every such transaction made, a voucher is used to enter the details into the ledgers to update the financial position of the company. This feature of Tally.ERP 9 will be used most often.

Tally.ERP 9 follows the Golden Rule of Accounting :

|        | <b>Real Accounts</b> | <b>Personal Accounts</b> | <b>Nominal Accounts</b> |
|--------|----------------------|--------------------------|-------------------------|
| Debit  | What Comes in        | The Receiver             | Expenses and Losses     |
| Credit | What Goes out        | The Giver                | Incomes and Gains       |

### 5.1 Accounting Vouchers

Tally.ERP 9 is pre-programmed with a variety of accounting vouchers, each designed to perform a different job. The standard Accounting Vouchers are:

- ❑ Contra Voucher (F4)
- ❑ Payment Voucher (F5)

- ❑ Receipt Voucher (F6)
- ❑ Journal Voucher (F7)
- ❑ Sales Voucher /Invoice (F8)
- ❑ Credit Note Voucher (CTRL+ F8)
- ❑ Purchase Voucher (F9)
- ❑ Debit Note Voucher (CTRL+ F9)
- ❑ Reversing Journals (F10)
- ❑ Memo voucher (CTRL+ F10)

- ❑ **Optional Voucher:** All the available vouchers in Tally.ERP 9 (except non-accounting vouchers) can be marked optional, if required.
- ❑ **Post-dated voucher:** All the available vouchers in Tally.ERP 9 can be marked post-dated, if required.

You can alter these vouchers to suit your company, and also create new ones. Read ahead to understand the function of each voucher type. The following exercises are sample entries for understanding Voucher entry in Tally.ERP 9, do not make these entries.

### 5.1.1 Contra Voucher (F4)

For example: withdrawing money from the bank for petty cash.

| Contra Voucher       |                                                       |               |               |
|----------------------|-------------------------------------------------------|---------------|---------------|
| <b>Description</b>   | Records funds transfer between cash and bank accounts |               |               |
| <b>Voucher Entry</b> | <b>Account</b>                                        | <b>Amount</b> | <b>Amount</b> |
|                      | State Bank of India<br>(Bank Accounts)                |               | Credit        |
|                      | Petty Cash<br>(Cash-in-hand)                          | Debit         |               |

**Use a Contra Voucher to record the entry.**

**Setup :**

In **Voucher entry mode**, press **F12: Contra Configuration** and set the following to **Yes**:

- ❑ Skip the Date field in Create Mode (faster entry!)
- ❑ Use Cr/Dr instead of To/By during entry
- ❑ Warn on Negative Cash Balance
- ❑ Show Ledger Current Balances
- ❑ Show Balances as on Voucher Date

Go to the **Gateway of Tally > Accounting Vouchers > F4: Contra.**

| Accounting Voucher Creation                                                            |          | Indus Enterprises       | Ctrl + M |

Figure 5.1 Contra Voucher

- Press **Y** or **Enter** to accept the screen.

### 5.1.2 Payment Voucher (F5)

For example, a company settles a creditor's bill by cheque.

| Payment Voucher      |                                                               |               |               |
|----------------------|---------------------------------------------------------------|---------------|---------------|
| <b>Description</b>   | Records all bank and cash payments                            |               |               |
| <b>Voucher Entry</b> | <b>Account</b>                                                | <b>Amount</b> | <b>Amount</b> |
|                      | Ledger account paid<br>Kaltronic Ltd.<br>(Sundry Creditors)   | Debit         |               |
|                      | Bank or cash account<br>State Bank of India<br>(Bank Account) |               | Credit        |

**Use a Payment Voucher to record the entry.**

Go to the **Gateway of Tally > Accounting Vouchers > F5: Payment.**

| Accounting Voucher Creation   |  | Indus Enterprises |                       | Ctrl + M                |  |

|                                                    |       |                   | Accept ?<br>Yes or No   |

Figure 5.3 Payment Voucher with Single Entry Mode

- Press **Y** or **Enter** to accept the screen.

The advantage of a single entry mode is that you can select multiple debits or credits depending on the type of entry. Similarly the transactions can be recorded in single entry mode even in Receipt and Contra vouchers.

### Warn on Negative Cash Balance

Tally.ERP 9 displays a warning if the cash balance is NIL when **Warn on Negative Cash Balance** is set to **Yes** in the **F12: Payment Configuration**. For example, a cash ledger account has no balance. A payment of Rs. 4,500 towards Telephone expenses is to be made. In the process of making the payment, Tally.ERP 9 displays a warning at the time of accepting the entry.

The entry made appears as shown below:

| Accounting Voucher Creation                          |          | Indus Enterprises       |  | Ctrl + M |

Figure 5.4 Payment Voucher with Warning on Negative Cash

In addition to the warning, Tally.ERP 9 also displays the negative balance amount in Red.

### 5.1.3 Receipt Voucher (F6)

For example, the company receives a bank advice that the interest has been credited to its deposit account.

| Receipt Voucher |                                                              |        |        |
|-----------------|--------------------------------------------------------------|--------|--------|
| Description     | Records all receipts into bank or cash accounts              |        |        |
| Voucher Entry   | Account                                                      | Amount | Amount |
|                 | Ledger account receiving Bank Interest<br>(Indirect Incomes) |        | Credit |
|                 | Bank or cash account<br>Deposit Account                      | Debit  |        |

**Use a Receipt Voucher to record the entry.**

Ensure in **F12: Payment Configuration**, **Use Single Entry mode for Pymt/Rcpt/Contra** is set to **No**.

Go to the **Gateway of Tally > Accounting Vouchers > F6: Receipt**.

The entry made appears as shown below:

| Accounting Voucher Creation                       |          | Indus Enterprises     | Ctrl + M                |
|---------------------------------------------------|----------|-----------------------|-------------------------|

### 5.1.9 Reversing Journal Voucher (F10)

Reversing Journals are special journals that are automatically reversed after the date of the journal. They exist only for a day and are effective on the date of the reversing journal. This voucher type is available only if the feature **Use Reversing Journals & Optional Vouchers** is set to **Yes** in the **F11: Features (F1: Accounting Features)**.

The entry made for this, is as follows:

| Reversing Journal Voucher |                                                                                                                             |               |               |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------|---------------|---------------|
| <b>Description</b>        | Records the voucher entries in a Reversing Journal Register, without affecting the ledger accounts and financial statements |               |               |
| <b>Voucher entry</b>      | <b>Account</b>                                                                                                              | <b>Amount</b> | <b>Amount</b> |
|                           | Ledger account                                                                                                              | Debit         |               |
|                           | Ledger account                                                                                                              |               | Credit        |

Go to the **Gateway of Tally > Accounting Vouchers > F10: Reversing Journal**.

*Reversing Journals are useful in Scenario Management.*

#### 5.1.10 Memo Voucher (Ctrl + F10)

Memo Voucher is a non-accounting voucher and the entries made using it will not affect your accounts. In other words, Tally.ERP 9 does not post these entries to ledgers but stores them in a separate **Memo Register**. You can alter and convert a Memo voucher into a regular voucher when you decide to bring the entry into your books.

**Memo vouchers are used for the following purposes :**

##### 1. Making suspense payments

For example, the company gives an employee cash to buy office supplies, the exact nature and cost of which are unknown. You could have entered a voucher stating petty cash advance, a voucher to record the actual expenditure details when they are known, and another voucher to record the return of surplus cash. However, a simpler way is to enter a Memo voucher when the cash is advanced, and then turn it into a Payment voucher for the actual amount spent, when known.

##### 2. Vouchers not verified at the time of entry

Sometimes it so happens that you do not understand the details of a voucher you are entering. In such cases, enter it as a Memo voucher and amend it when you get the details.

##### 3. Items given on approval

Usually, entries are made into the books only after a sales transaction is completed. Items given **on approval**, can be tracked by using a Memo voucher. It can either be converted into a proper Sales voucher or be deleted depending on the outcome.

| Memo Voucher         |                                                                                                                |               |               |
|----------------------|----------------------------------------------------------------------------------------------------------------|---------------|---------------|
| <b>Description</b>   | Records the voucher entries in a memo register, without affecting the ledger accounts and financial statements |               |               |
| <b>Voucher Entry</b> | <b>Account</b>                                                                                                 | <b>Amount</b> | <b>Amount</b> |
|                      | Ledger account                                                                                                 | Debit         |               |
|                      | Ledger account                                                                                                 |               | Credit        |

### 5.1.11 Optional Voucher

This is another **non-accounting** voucher which is available only if the feature **Use Reversing Journals & Optional Vouchers** is set to **Yes** in the **F11: Features (F1: Accounting Features)**. It differs from the Memo voucher in two respects:

- ❑ It is not a voucher type, since all the other voucher types can be marked as Optional during a voucher entry.
- ❑ You have the option to bring this voucher into your accounts **temporarily** and see its effect on financial reports. Any voucher type (except non-accounting voucher) can be designated as an Optional voucher.

| Optional Voucher     |                                                                                                             |               |               |
|----------------------|-------------------------------------------------------------------------------------------------------------|---------------|---------------|
| <b>Description</b>   | Records voucher entries temporarily, to help visualise the effect on reports, without affecting the ledgers |               |               |
| <b>Voucher Entry</b> | <b>Account</b>                                                                                              | <b>Amount</b> | <b>Amount</b> |
|                      | Ledger account                                                                                              | Debit         |               |
|                      | Ledger account                                                                                              |               | Credit        |

### 5.1.12 Post-dated Vouchers

Post-dated Vouchers are ignored by Tally.ERP 9 until the date in question. This is useful for entering transactions that take place on a regular basis. For example, if you pay for something by instalments, you can set-up the payments in advance, and Tally.ERP 9 will only enter them in the ledgers as and when they fall due. A voucher is marked as Post-dated while creating or altering it.

### 5.1.13 Creating a New Voucher Type

**National Traders** wants to record bank and petty cash payments differently and needs two new voucher types to replace the pre-defined Payment voucher. In order to do this:

Create a **Bank Payment** voucher

Go to the **Gateway of Tally > Accounts Info. > Voucher Types > Create.**

1. **Name: Bank Payment**
2. **Type of Voucher: Payment** (Specify the default Tally.ERP 9 voucher, whose functions the new voucher should copy).
3. **Abbr.: Bank Pymt** (Specify the abbreviation to denote this new voucher in reports)
4. **Method of Voucher Numbering: Automatic**

You can choose one of the following methods for numbering from the pop-up:

| Method of Numbering | Purpose                                                            |
|---------------------|--------------------------------------------------------------------|
| <b>Automatic</b>    | For Tally.ERP 9 to do it for you.                                  |
| <b>Manual</b>       | You do it. You can also specify if you wish to prevent duplicates. |
| <b>None</b>         | To disable numbering for this voucher type.                        |

5. **Use Advance Configuration: No**
6. **Use EFFECTIVE Dates for Vouchers: No**
7. **Make 'Optional' as default: No** (This is to set the voucher type as an Optional voucher, by default)
8. **Use Common Narration: Yes**
9. **Narrations for each entry: No**
10. **Print after saving Voucher: No**
11. **Name of Class: Skip.**

- *The voucher date is taken from the current date mentioned at the Gateway of Tally.ERP 9. However, the **effective date** for the voucher may be different. For example, entering a post-dated cheque.*
- *Tally.ERP 9 displays the narration field which applies to the whole voucher. By setting **Use Common Narration** option to **No**, we can have separate narration fields for each line on the voucher. Reversing Journals are used for Scenario Management.*
- *The **Name of Class** field enables creation of Voucher Classes for the respective voucher types. (The Voucher class is a template to customise voucher data entry).*

A **Bank Payment Voucher Type** Creation screen appears as shown below:

Figure 5.11 Voucher Type Creation Screen — Bank Payment

### 5.1.14 Displaying and Altering a Voucher Type

## Practice Exercise

Ensure that the details in the Voucher Type Creation screen are as shown below:

Figure 5.12 Voucher Type Creation — Petty Cash

- 

### 5.1.15 Recording Accounting Transactions

Let us record the following business transactions of National Traders for the month of April 2009 :

99

The basic steps to be followed while entering each voucher are:

- ❑ Check if the date is correct and use **F2: Date** to change it if necessary.
- ❑ Select the voucher type from the button bar and make a further selection from the supplementary list that Tally.ERP 9 displays, if necessary.
- ❑ Enter the appropriate reference for the **Purchase** and **Sales** vouchers.
- ❑ Select the ledgers and enter the amounts.
- ❑ Type the narration and check whether all the data is correct before accepting.

Create the following **Accounting Vouchers** in the books of National Traders :

| Date   | Voucher Type                       | Ledgers to be Selected                              | Debit     | Credit    |
|--------|------------------------------------|-----------------------------------------------------|-----------|-----------|
| 1-4-09 | <b>F5: Payment</b><br>Bank Payment | Dr - Challenger Systems<br>Cr - Bank Account        | 500.00    | 500.00    |
| 1-4-09 | <b>F5: Payment</b><br>Petty Cash   | Dr - Office Costs<br>Cr - Petty Cash                | 150.00    | 150.00    |
| 2-4-09 | <b>F5: Payment</b><br>Bank Payment | Dr - Wages<br>Cr - Bank Account                     | 600.00    | 600.00    |
| 5-4-09 | <b>F6: Receipt</b>                 | Cr - Data Link Technologies<br>Dr - Bank Account    | 5000.00   | 5000.00   |
| 6-4-09 | <b>F8: Sales</b>                   | Dr - Spectrum Computers<br>Cr - Computer Sales      | 24,785.00 | 24,785.00 |
| 6-4-09 | <b>F4: Contra</b>                  | Cr - Bank Account<br>Dr - Petty Cash                | 200.00    | 200.00    |
| 7-4-09 | <b>F9: Purchase</b>                | Cr - Silverplus Computers<br>Dr - Printer Purchases | 8,100.00  | 8,100.00  |

*In the **Purchase/Sales Ledger Masters**, set **Inventory Values** are affected to **No** and proceed with the above transactions. Enable the option to **Yes** in the **Inventory Transactions** section.*

A **Voucher Entry screen** comprises of the following :

#### **Type of voucher**

It is essential to check if you are using the right voucher for the transaction. You can change the voucher type by selecting a new type from the button bar, if required. For example on the selection of a payment voucher, Tally.ERP 9 automatically displays the **List of Voucher** types you have created. You can select the voucher type required.

#### **Voucher number**

Tally.ERP 9 automatically sets the voucher number for you. You can change the voucher number manually, if required.

#### **Reference**

You can enter a reference of your choice. A Purchase order number or an Invoice Number can be entered as a reference.

#### **Date of voucher**

The date of the voucher you enter is displayed at the top-right of the Voucher Creation screen. The date is taken initially from the Gateway of Tally - Current Date and you may need to change it frequently to ensure that the vouchers are dated as you want.

#### **Effective date**

A voucher type can be configured to allow for an **Effective date**. The line below the **Date of voucher** displays the date when the voucher will be effective.

#### **Particulars**

This is where you enter the ledger names and the debit and credit amounts. Each line displays a prompt of **Dr** or **By** for debit entries and **Cr** or **To** for credit entries.

Depending on the voucher type, Tally.ERP 9 selects either 'Dr' or 'Cr' for the first prompt, which you cannot change. Thereafter, you can change the prompt (if necessary) by typing over it with a **D** or a **C**. To select a ledger, type the first letter of its name. Tally.ERP 9 then displays a **List of Ledger Accounts** beginning with the letter highlighted. Only ledgers suitable for the voucher type are displayed. As you continue typing, the highlights reduce until a match is found. The current balance is displayed when you select the ledger, (if this option has been configured). The revised current balance is shown after the amount is entered. On selecting the next ledger, Tally.ERP 9 suggests the balancing amount as the value to be entered, which may be accepted or typed over. The voucher entry cannot be completed until the debits equal the credits.

### Narration

Here you type whatever appropriately describes the transaction. Remember, you can have a separate narration for each line of particulars, if you configure the voucher type in that way.

For Payment Vouchers, where a bank account has been credited, Tally.ERP 9 pre-sets the narration to **Ch.No.** expecting a cheque number to be entered. This can be over written if required.

- Once the narration is complete, press **Enter** to bring up the Accept? box.
- Once you accept the data, Tally.ERP 9 presents another data entry screen.

## 5.1.16 Trial Balance for April 2009

Go to the **Gateway of Tally > Display > Trial Balance**.

After making the above entries, the Trial Balance of National Traders will appear as shown :

| Trial Balance         |                          | National Traders |  | Ctrl + M |
|-----------------------|--------------------------|------------------|--|----------|
| P a r t i c u l a r s | National Traders         |                  |  |          |

Figure 5.14 Trial Balance From April 1, 2009 to June 30, 2009

## 5.2 Inventory Vouchers

Tally.ERP 9 inventory vouchers perform the same function in the inventory system as accounting vouchers do. They are the means by which you enter transactions relating to the Inventory. The vouchers record transactions relating to the issue and receipt of stock, the transfer of stock between godowns, and physical stock adjustments. The following inventory vouchers are available in Tally.ERP 9 :

- ❑ Purchase Order (Alt+F4)
- ❑ Sales Order (Alt+F5)
- ❑ Rejections Out (Alt+F6)
- ❑ Rejections In (Ctrl+ F6)
- ❑ Stock Journal (Alt+F7)
- ❑ Delivery Note (Alt+F8)
- ❑ Receipt Note (Alt+F9)
- ❑ Physical Stock (Alt+F10)

### 5.2.1 Purchase Order

A Purchase order entry has to be made in the books of the company to assist them in checking whether the goods have been received or not. The Purchase Order number can be used as a reference. For example, the company wishes to place an order with the supplier for some goods.

| Purchase Order          |                                                                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records placing an order for stock items to suppliers.                                                                                     |
| <b>Details recorded</b> | Supplier's Ledger account, Name and address, Order details, name of stock item, <b>Due on</b> , Godown, Quantity, Rate, Amount, Narration. |

### 5.2.2 Sales Order

A Sales Order entry has to be made to record this. The Sales Order number can be used as a reference. For example, a customer places an order with the company for purchasing some goods.

| Sales Order             |                                                                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records order details for stock items received from customers.                                                                             |
| <b>Details recorded</b> | Customer's Ledger account, Name and address, Order details, name of stock item, <b>Due on</b> , Godown, Quantity, Rate, Amount, Narration. |

### 5.2.3 Rejections Out

A Rejections Out entry is passed to record the rejected goods. This is a pure inventory voucher. For example: We have purchased some goods and have rejected a part of it.

| Rejections Out (Purchase Returns) |                                                                                                                                     |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>                | Records rejected stock details returned to suppliers.                                                                               |
| <b>Details recorded</b>           | Ledger Account, Suppliers name and address, stock item, Tracking details, Order details, Godown, Quantity, Rate, Amount, Narration. |

### 5.2.4 Rejections In

A Rejections In entry is passed to record the rejected goods. The Rejections In entry is a pure inventory voucher. For example a customer has rejected goods that was sold earlier.

| Rejections In (Sales Returns) |                                                                                                                                      |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>            | Records rejected stock details received from customers                                                                               |
| <b>Details recorded</b>       | Ledger account, Customer's name and address, stock item, tracking details, order details, Godown, Quantity, Rate, Amount, Narration. |

### 5.2.5 Stock Journal

To record the consumption of goods there is no need for entries on both sides of the voucher. Such entries can be entered in a stock journal voucher. For example: the company transfers items of stock from the warehouse to the shop.

| Stock Journal           |                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------|
| <b>Description</b>      | Essentially records the transfer of stock from one Godown to another.                |
| <b>Details recorded</b> | Names of from and to godowns, name of stock item, quantity, rate, amount, narration. |

### 5.2.6 Delivery Note

Goods that are being delivered to a customer are recorded in a Delivery Note voucher.

| Delivery Note           |                                                                                                                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records delivery of new stock to customers                                                                                                                                                                                                                                                |
| <b>Details recorded</b> | Reference, ledger account, supplier's (if supplementary details are set to yes in F12: Delivery Note Configuration) then, name and address, Order & dispatch details, name of stock item, Tracking details, Order details, Godown, Quantity, Rate(optional), Amount(optional), narration. |

### 5.2.7 Receipt Note

Goods that are received from the supplier are recorded in a Receipt Note (Goods Receipt Note – GRN) voucher.

| Receipt Note            |                                                                                                                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records receipt of new stock from suppliers                                                                                                                                                                                                                                     |
| <b>Details recorded</b> | Reference, ledger account, (If supplementary details are set to yes in F12: Receipt Note Configuration) then, Order details, Supplier's name and address, name of stock item, Tracking details, Order details, Godown, Quantity, Rate (optional), Amount (optional), narration. |

### 5.2.8 Physical Stock Voucher

Tally.ERP 9 considers the stock available based on the entry made in a physical stock voucher. For example, on conducting a stock-check, the company finds a discrepancy between the actual stock and the recorded stock figure.

| Physical Stock Voucher  |                                                           |
|-------------------------|-----------------------------------------------------------|
| <b>Description</b>      | Records the physical stock count as the new stock balance |
| <b>Details recorded</b> | Name of stock item, Godown, Physical stock quantity.      |

### 5.2.9 Pure Inventory Transactions

Pure inventory Transactions (vouchers) are those that do not affect financial records. They affect only the stocks. There will be a rise or fall in the stock when such vouchers are entered.

The different pure inventory vouchers are:

- ❑ Rejections Out (Alt+F6)
- ❑ Rejections In (Ctrl+F6)
- ❑ Stock Journal (Alt+F7)
- ❑ Delivery Note (Alt+F8)
- ❑ Receipt Note (Alt+F9)
- ❑ Physical Stock (Alt+F10)

#### Setup :

- ❑ To enable **Delivery Note** and **Receipt Note**, set **Yes** to **Use Tracking Numbers** and **Use Rejection Notes** in **F11: Features (F2: Inventory Features)**.
- ❑ Go to the **Gateway of Tally > F12: Configuration > Invoice/Orders Entry** – Set **Complete Accounting Allocations in Order/Delivery Note** to **Yes**.
- ❑ Make sure that **Inventory Values are affected?** is set to **Yes** in all ledger accounts under the groups Sales Accounts and Purchase Accounts.

An entry made in a purchase voucher can update the stocks. It is not necessary to make a separate entry in a Goods Receipt Note. This holds true for the goods delivered and recorded in the Sales Voucher itself.

We shall now learn how to enter pure inventory vouchers.

### 5.2.10 Recording Inventory Transactions

The inventory transactions of National Traders for April 2009 are:

| National Traders Inventory Transactions |                                                                                                         |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------|
| Date                                    | Transaction Details                                                                                     |
| 6-4-09                                  | Delivered 1 HCL PIV from On-Site to Spectrum Computers.                                                 |
| 7-4-09                                  | Received delivery of 2 HP Laserjet 1010 Series from Silver Plus Computers and stored in On-Site Godown. |
| 9-4-09                                  | Transferred 2 HCL PIV from On Site to Warehouse.                                                        |
| 13-4-09                                 | Returned 1 HP Laserjet 1010 Series (Faulty) to Silver Plus Computers.                                   |
| 15-4-09                                 | Supreme Computers returned 1 HCL Pentium IV which was ordered incorrectly                               |
| 16-4-09                                 | Stock check reveals physical stock of 3 Boxes of CD ROM Disks 100s in On-Site Godown.                   |

- ❑ In the **Purchase/Sales Ledger Masters**, set **Inventory Values are affected to Yes** and proceed with the above transactions.
- ❑ **Tracking numbers** must be activated and disabled after the exercise is completed. (Tracking numbers will be discussed later.)

Go to the **Gateway of Tally > Inventory Vouchers**.

The basic steps to enter the vouchers are:

- ❑ Change the date if necessary.
- ❑ Select the voucher type from the button bar menu.
- ❑ Type the details and check whether they are correct before accepting.
- ❑ Accept the default rates of items that appear according to the standard cost and standard selling price given in the workbook.

### Practice Exercise

Create the following transactions in the books of **National Traders**.

| Field                        | Details to be entered         |
|------------------------------|-------------------------------|
| <b>Voucher 1</b>             |                               |
| Voucher type                 | Alt +F8: <b>Delivery Note</b> |
| Current date                 | 6-4-2009                      |
| Ref:                         | ABC/DN/00654                  |
| Ledger account               | Spectrum Computers            |
| Order details                | Accept the default            |
| Name of item                 | HCL PIV                       |
| Tracking Number              | Not Applicable                |
| Godown                       | On-Site                       |
| Quantity                     | 1                             |
| Rate                         | 21,500 / Nos                  |
| Amount                       | 21,500                        |
| In Accounting Details Screen | Computer Sales                |
| Narration                    | Computer delivery             |
| Accept? Yes or No            | Yes                           |

| <b>Voucher 2</b>                |                               |
|---------------------------------|-------------------------------|
| Voucher type                    | <b>Alt +F9: Receipt Note</b>  |
| Current date                    | 7-4-2009                      |
| Ref:                            | USC/12089/Del                 |
| Ledger Account                  | Silver Plus Computers         |
| Order Details                   | Accept the default            |
| Name of item                    | HP Laserjet 1010 Series       |
| Tracking Number                 | Not Applicable                |
| Godown                          | On-site                       |
| Quantity                        | 2                             |
| Rate                            | 8,200 / Nos                   |
| Amount                          | 16,400                        |
| In Accounting Details Screen    | Printer Purchase              |
| Narration                       | Printer received              |
| Accept? Yes or No               | Yes                           |
| <b>Voucher 3</b>                |                               |
| Voucher type                    | <b>Alt +F7: Stock Journal</b> |

Figure 5.16 Stock Summary from April 1, 2009 to June 30, 2009

The **Total Stock value** should be **2,35,350** made up of **Computers - 1,03,800**, **Peripherals - 41,950** and **Printers - 89,600**.

### 5.2.13 Entering Inventory Details in Accounting Vouchers

Assume that the inventories have to be updated at the same time as entering the accounting vouchers. This is particularly useful for organisations that send and receive goods with a bill or invoice only. In other words, they do not want to update stocks with only a delivery note neither do they want to with a Goods Receipt Note. Tally.ERP 9 permits stock movement along with invoice. Therefore, you need to select the stock items that come in or move out at the time of purchase or sales voucher entry.

Apart from the Sales and Purchase Vouchers that record the inventory movements, the following vouchers are used to record the stock movements.

- Debit Note for Goods rejected and returned to supplier.
- Credit Note for Goods rejected and returned by customer.

Debit Notes and Credit Notes are used to record the return of goods and the corresponding reversal of sales and purchases.

Given below are examples of Purchase, Sales, Debit Note and Credit Note vouchers with inventory details :

#### Purchase voucher

For example: the company receives new stock from a supplier.

| Purchase Voucher        |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records receipt of new stock with invoice from suppliers.                                                                                                            |
| <b>Details recorded</b> | Reference, ledger account, supplier's name and address, name of stock item, godown, quantity, rate, amount, purchase ledger, other ledgers (if required), narration. |

#### Sales voucher

For example: the company delivers goods from its stock to a customer.

| Sales Voucher           |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records the delivery of goods and invoice to customers.                                                                                                              |
| <b>Details recorded</b> | Reference, ledger account, customer's name and address, name of stock item, godown, quantity, rate, amount, sales ledger, sales tax ledger (if required), narration. |

### Debit Note

For example: the company rejects and returns goods to the supplier.

| Debit Note              |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records the delivery of goods and debit note to supplier.                                                                                                            |
| <b>Details recorded</b> | Reference, ledger account, supplier's name and address, name of stock item, godown, quantity, rate, amount, purchase ledger, other ledgers (if required), narration. |

### Credit Note

For example: the company receives rejected goods from a customer.

| Credit Note             |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Records receipt of rejected goods with advice from customer. Company issues credit note.                                                                             |
| <b>Details recorded</b> | Reference, ledger account, customer's name and address, name of stock item, godown, quantity, rate, amount, sales ledger, sales tax ledger (if required), narration. |

Tally.ERP 9 permits the entries of these vouchers in Voucher Mode as well as in invoice mode. In this section, you will learn how to enter them in Voucher Mode.

### Set up :

- ❑ Set **Yes** to **Use Debit/Credit Notes** in **F11: Features (F1: Accounting Features)**. Do not activate the invoice mode.
- ❑ Make sure that **Inventory Values are affected?** is set to **Yes** in all ledger accounts under the groups Sales Accounts and Purchase Accounts.
- ❑ Set **Use Tracking Numbers** to **No** in **F11: Features (F2: Inventory Features)**.

Go to the **Gateway of Tally > Accounting Vouchers**.

- ❑ Ensure that in **F11: Features (F1: Accounting Features)** **Allow Invoicing** is set to **No**.

Create the following **Accounting Vouchers** with **Inventory details**.

**i. Sales voucher**

- Select **F8: Sales** from the button bar and enter.

| Field                | Details                                                                                                 |

| Credit Amount     | 85               |
| Narration         | Office cost paid |
| Accept? Yes or No | Yes              |

*Ensure that in the **F12: Payment Configuration**, **Use Single Entry mode** for **Pymt/Rcpt/Contra** is set to **No**.*

## 5.3 Invoicing

Tally.ERP 9 has an in-built system to create and print sales invoices. You will now record sales and purchase invoice details, adjust accounting and inventory balances.

To enable the option of invoicing, set **Yes** to **Allow Invoicing**, **Enter Purchases in Invoice Format** and **Separate Discount Column in invoices** in **F11: Features (Accounting Features/ Inventory Features)**.

- Ensure that the **Inventory values are affected?** is set to **Yes** in Purchases Ledger.
- Ensure that the **Inventory values are affected?** is set to **Yes** in Parts Sales, Software Sales and Computer Sales.

**Make the following entry of Sales in Voucher Mode.**

Go to the **Gateway of Tally > Accounting Vouchers > F8: Sales**.

- Ensure the button above the **Post-Dated** option reads **As Invoice**. This button enables you to toggle between the voucher and invoice format for data entry. The button visible is the format **NOT** in use.

- Enter the following data as on **1-7-2009** to record the sale of 2 Nos of USB Pen Drives 64 MB to Supreme Computers. (at the standard price) and update the accounting and stock records:

| Field             | Details              |
|-------------------|----------------------|
| Ref:              |                      |
| Dr                | Supreme Computers.   |
| Debit Amount      | 3,200                |
| Cr                | Component Sales      |
| Name of item      | USB Pen Drives 64 MB |
| Godown            | On-site              |
| Quantity          | 2 Nos                |
| Rate              | 1,600 (accept)       |
| Per               | Nos (accept)         |
| Amount            | 3,200.00             |
| Narration         | —                    |
| Accept? Yes or No | Yes                  |

**Make the following entry of Sales in Invoice Mode:**

1. **Date: 2-7-2009.**
2. **Voucher Type: Sales**
3. Click on the Toggle Button **As Invoice** (so it reads **As Voucher**)
4. Click on the Toggle Button **Item invoice** (so it reads **Acct Invoice**)
5. Enter the following to record the sale of two nos of USB Pen Drives 64 MB to Supreme Computers. (at the standard price) and update the accounting and stock records:

| Fields                                              | Details              |
|-----------------------------------------------------|----------------------|
| Ref:                                                |                      |
| Party's A/c Name                                    | Supreme Computers.   |
| Despatch Details                                    | Accept the default   |
| Address                                             | Ctrl+A to accept all |
| Name of item                                        | USB Pen Drives 64 MB |
| In Item Allocation for: USB Pen Drives 64 MB Screen |                      |
| Godown                                              | On-site              |
| Quantity                                            | 2 Nos                |
| Rate                                                | 1,600 (accept)       |
| Per                                                 | Nos (accept)         |
| Discount                                            | 10%                  |

|                                              |                                                                                                 |
|----------------------------------------------|-------------------------------------------------------------------------------------------------|
| Amount                                       | 2,880.00 (accept – then keep pressing <b>Enter</b> until the accounting details screen appears) |
| Particulars (Accounting allocation sub-form) | Component Sales                                                                                 |
| Amount                                       | 2,880.00 (accept)                                                                               |
| Narration                                    | —                                                                                               |
| Accept? Yes or No                            | Yes                                                                                             |

### 5.3.1 Item Invoice and Account Invoice

Tally.ERP 9 gives you an option called **Account Invoice** where you can select the ledgers instead of the stock items. An **Item Invoice** on the other hand, allows you to select stock items instead of ledgers.

Businesses that require an invoice raised with the item details, can select the Item Invoice option. Businesses that want to raise invoices for services rendered, can do so by selecting the Account Invoice.

At this point, it is understood that you already know how to enter an Item Invoice, by selecting items and entering their quantity, rate, discount, etc.

### 5.3.2 Walk-through to create an Item Invoice

1. Ensure that you are at the **Gateway of Tally of Indus Enterprises**.
2. Ensure **Allow Invoicing** option in **F11: Features (F1: Accounting Features)** is set to **Yes**.
3. Go to the **Gateway of Tally > Accounting Vouchers > F8: Sales**.
4. The invoice screen must display the columns - **Name of Item, Quantity, Rate, per, Amount**, etc.
5. **Party's A/c Name: Customer One** (create one, if it is not displayed in the list of ledgers).
6. Press **Enter** till you reach the 'Name of Item' field and press the spacebar to view the List of Stock Items.
7. The different stock items with their balances are displayed as follows:.

| Accounting Voucher Creation     |       | Indus Enterprises | Ctrl + M                             |
|---------------------------------|-------|-------------------|--------------------------------------|
| <b>Sales</b>                    | No. 2 |                   | List of Items                        |
| Ref. :                          |       |                   |                                      |
| Party's A/c Name : Customer One |       |                   |                                      |
| Current Balance :               |       |                   |                                      |
| <b>Name of Item</b>             |       |                   |                                      |
|                                 |       |                   | <input type="checkbox"/> End of List |
|                                 |       |                   | Philips 25 inches TV 0 Nos           |
|                                 |       |                   | Philips 29 inches TV 0 Nos           |
|                                 |       |                   | Sony 25 inches TV 0 Nos              |
|                                 |       |                   | Sony 29 inches TV 0 Nos              |
|                                 |       |                   | Sony CD-Player 0 Nos                 |
|                                 |       |                   | Sony Tape Recorder 0 Nos             |
|                                 |       |                   | Videocon 25 inches TV 0 Nos          |
|                                 |       |                   | Videocon 29 inches TV 0 Nos          |
|                                 |       |                   | Videocon CD-Player 0 Nos             |
|                                 |       |                   | Videocon Tape-Recorder 0 Nos         |

Figure 5.17 Sales Voucher In Item Invoice Mode

You already know how to enter an item invoice. Now, let us go to the **Gateway of Tally** to learn how Account Invoices are entered.

### 5.3.3 Walk-through to create an Account Invoice

Go to the **Gateway of Tally > Accounting Vouchers > F8: Sales**.

1. The invoice screen must display the following columns: **Name of Item, Quantity, Rate, per and Amount**.
2. Click on the **Acct Invoice** button. You will notice that Tally.ERP 9 now displays the columns as **Particulars, Rate, per and Amount**.
3. Select the **Party's A/c Name** as **Customer One**.
4. Press **Enter** till you reach the **Particulars** field. Press the Space Bar and Tally.ERP 9 displays the List of Ledgers.

| Accounting Voucher Creation |              | Indus Enterprises | Ctrl + M                             |
|-----------------------------|--------------|-------------------|--------------------------------------|
| <b>Sales</b>                | No. 2        |                   | List of Ledger Accounts              |
| Ref. :                      |              |                   |                                      |
| Party's A/c Name :          | Customer One |                   |                                      |
| Current Balance :           |              |                   |                                      |
| <b>Particulars</b>          |              |                   |                                      |
|                             |              |                   | <input type="checkbox"/> End of List |
|                             |              |                   | Advertising                          |
|                             |              |                   | Bank Interest                        |
|                             |              |                   | Conveyance                           |
|                             |              |                   | Local Sales                          |
|                             |              |                   | Office Costs                         |
|                             |              |                   | Postage                              |
|                             |              |                   | Telephone Expenses                   |

Figure 5.18 Sales Voucher In Accounting Invoice Mode

5. Select the **Consulting Fees** (create one if it is not displayed under Direct Income).
6. Specify the amount as **Rs. 45000** and press **Enter**.

### Points to Remember

- ❑ A voucher is a document containing the details of a financial transaction.
- ❑ As per accounting rules, any transaction indicating the transfer of funds from cash account to bank account; bank account to cash account and bank account to bank account is referred to as a Contra Entry.
- ❑ Reversing Journals are special journals that are automatically reversed after the date of the journal.
- ❑ A Memo Register is a non-accounting voucher and the entries made using it will not affect your accounts.
- ❑ An Optional voucher is not a voucher type. All other voucher types (except non-accounting vouchers) can be marked Optional during voucher entry.
- ❑ Inventory vouchers perform the same function in the inventory system as accounting vouchers in Tally.ERP 9.
- ❑ Tally.ERP 9 allows to create and print sales invoices.

## Lesson 6: Advanced Accounting in Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to

- ❑ Maintain Bill-wise Details
- ❑ Create and maintain Cost Centres
- ❑ Create and maintain Multiple Currencies
- ❑ Configure and compute Interest Calculations
- ❑ Create and maintain Budgets and Scenarios
- ❑ Generate and print various reports

### 6.1 Bill-wise Details

The details of all the sales and purchase transactions made with the debtors and creditors have to be maintained at the invoice level. In order to maintain these details Tally.ERP 9 provides a feature called as **Bill-wise details** for bill-wise accounting. In this section you will learn to:

- ❑ Maintain details of bills.
- ❑ Specify credit periods.
- ❑ Obtain receivable and payable reports.
- ❑ Relate every entry with the relevant transaction.

#### 6.1.1 Activating Bill-wise Details

Go to **Gateway of Tally > select National Traders** and shut **Indus Enterprises**

- ❑ Press **F11: Features (Accounting Features)**.
- ❑ Type **Yes** for **Maintain Bill-wise Details**.
- ❑ Retain **No** for **Non - Trading A/cs also**.

- Accept the settings, by pressing **Ctrl+A**.

On activation of this feature, all the ledgers previously created under the Groups Sundry Debtors and Sundry Creditors will automatically have their Bill-wise details set to **Yes**.

Let us view the ledger master of **Supreme Computers**.

| Ledger Alteration              |                                      | National Traders |
|--------------------------------|--------------------------------------|------------------|
| Name                           | : Supreme Computers                  |                  |
| (alias)                        | :                                    |                  |
|                                |                                      |                  |
| Under                          | : Sundry Debtors<br>(Current Assets) |                  |
| Maintain balances bill-by-bill | ? <b>Yes</b>                         |                  |
| Default Credit Period          | :                                    |                  |
| Inventory values are affected  | ? No                                 |                  |

Figure 6.1 Ledger Creation

1. In the above ledger alteration screen, the option **Maintain balances bill-by-bill** is displayed. This option helps to maintain details of our debtors and creditors at the invoice level.
2. An additional option termed **Default Credit Period** is displayed when the option **Maintain balances bill-by-bill** is set to **Yes**. This allows us to keep a track of the credit period allowed to sundry debtors and reminds us of our payables to the sundry creditors. In the process of recording transactions when the bill-wise details is set to Yes, Tally.ERP 9 prompts you to enter any of the following methods of adjustments:
  - **New Ref** - This is selected for new financial transactions.
  - **Advance** - This is selected when you receive or pay money in advance. Typically, when a bill is raised, part of the bill is adjusted against the advance (using Agst Ref) and the balance amount is carried as New Ref while making the sale or purchase entry.
  - **Against Ref** - This is selected to set-off payments against the previously entered New Ref.
  - **On Account** - This is used when you are not instructed about the bill against which the money should be adjusted.

Let us make a purchase entry for a new stock item HP - 27 Printer Cartridges and then a sales entry to sell the same. This will be purchased from a new supplier named Power Line Computers and sold to a new customer FirstCom Solutions.

### 6.1.2 New Reference

#### Entering Bill-wise details for a Purchase Voucher (New Reference)

*On 13-07-2009 received a goods invoice numbered PLC for 10 Nos HP - 27 Printer Cartridges from Power Line Computers at Rs. 850. The goods were stored in On-site godown.*

#### Setup :

- ❑ Create a new supplier account **Power Line Computers** under **Sundry Creditors** with **Maintain balances bill-by-bill** set to **Yes**.
- ❑ Create a new stock item with the following details:

| Name                       | Under    | Category       | Units | Standard Cost | Standard Price |
|----------------------------|----------|----------------|-------|---------------|----------------|
| HP - 27 Printer Cartridges | Printers | Not Applicable | Nos   | 850           | 1150           |

- ❑ Accept default settings for other fields.

#### Create Purchase Voucher :

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**.

1. Select **As Voucher** mode.
2. Enter PLC in the Reference field below the Purchase voucher number.
3. The Bill-wise details have to be given when Power Line Computers are credited.
4. On selecting **New Ref**, PLC is displayed automatically in the field and not the voucher number.
5. In the Credit period field enter **15**, which is 15 days from the effective date of the invoice.

The **Bill-wise Details** screen in the Purchase voucher is displayed as shown below:

| Bill-wise Details                                                                   |      |                                                 | National Traders |                    | Ctrl + M |                       |  |
|-------------------------------------------------------------------------------------|------|-------------------------------------------------|------------------|--------------------|----------|-----------------------|--|
| Purchase No. 5                                                                      |      | Supplier Invoice No. : PLC                      |                  | Date : 13-Jul-2009 |          | 13-Jul-2009<br>Monday |  |
|                                                                                     |      |                                                 |                  |                    |          |                       |  |

Figure 6.3 Purchase Voucher

9. At the Narration field, type in the details of the transactions.
10. Press **Y** or **Enter** to accept the voucher.

The details regarding the reference, name of the stock item, quantity, rate and value helps us to know what is being entered. These details can be printed, as per your requirements.

#### Entering Billwise details for Sales Invoice (New Reference)

**On 14-07-2009, sold 5 pcs of HP - 27 Printer Cartridges to FirstCom Solutions @ Rs. 1,150 from On-Site godown.**

#### Setup :

- ❑ Create new customer **FirstCom Solutions** (Under **Sundry Debtors** with **Maintain balances bill-by-bill** set to **Yes** and set **Default Credit Period** as 7).
- ❑ In **F12: Configure** and set **Yes** to **Accept Supplementary details** to view despatch details, buyer details etc.

### Practice Exercise

Let us now create one purchase and one sales voucher with the following data:

1. On 15-07-09, purchased 5 nos HP - 27 Printer Cartridges @ Rs. 850 from **Power Line Computers** with the invoice number - **PLC1**. Credit period allowed - 30 days.
2. On 16-07-09 sold 4 nos HP - 27 Printer Cartridges to FirstCom Solutions @ Rs. 1,150. Credit period allowed - 45 days, select **New Ref** and enter **FC 2** in **Name** field of **Bill wise details** screen. Allocate to **Sales - Printer**.

- During an invoice entry, to alter the credit period go to **Gateway of Tally > Accounting Vouchers > F8: Sales** (in invoice mode) > click on **F12: Configure** and set **Allow modification of ALL fields during entry** to **Yes** and then make the entry.
- Select **On-Site** wherever godown details are not specified.

**Power Line Computers** now has two outstanding purchase invoices and **FirstCom Solutions** has two outstanding sales invoices. This data can be viewed in Ledger outstanding statement.

Go to **Gateway of Tally > Display > Statements of Accounts > Outstandings > Ledger**

- Select **Power Line Computers** from **List of Ledgers** to show the outstanding purchase invoices.
- Press **Alt + F1** or **F1: Detailed** to show the Ledger outstandings in detail.

Figure 6.5 Ledger Outstandings

- Press **F4: Ledger** and change to **FirstCom Solutions** to view the outstanding sales invoices.

### 6.1.3 Against Reference

#### Entering a Bill-wise payment - Against Reference

*On 22-07-09, you pay Power Line Computers the full amount for their invoice numbered PLC.*

#### Setup :

- Click on **F12: Configure**. Set **Show Table of Bills for selection** (to view the list of pending bill references) and **Use Single Entry mode for Pymt/Rcpt/Contra** to **Yes**

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment > select Bank Payment**.

1. In the **Account** field, select **Bank Account** (note that we are crediting 'Bank Account')
2. Under **Particulars**, select **Power Line Computers**.
3. Enter **Rs. 8,500** in the amount column.

4. In the **Bill-wise details** screen, select **Agst Ref** and press **Enter**
5. Tally.ERP 9 displays list of pending bills. The screen appears as shown below:

Figure 6.6 Bill-wise Details — Power Line Computers

6. Select **PLC** and keep pressing **Enter** until the **Narration** field is highlighted.
7. In the **Narration** field, type Ch. No. 1234.

The **Bank payment** voucher appears as shown below:

Figure 6.7 Bank Payment Voucher

To ensure that the payment has been recorded against the correct invoice,

- 10

### Practice Exercise

- ❑ Delete the bank payment entry of 22-07-09 and make the same entry.
- ❑ In **F12: Configure**, set **Yes** to **Pre-allocate Bills for payment**, you will notice that the list of pending bills is displayed immediately after selecting **Power Line Computers**.
- ❑ Select **PLC** in bill-wise details and accept the entry (This feature is useful for cheque printing).
- ❑ Now, after completing the above entry, set the option **Pre-allocate Bills for payment** to **No**.

### Entering a Receipt Voucher with Bill-wise details

*FirstCom Solutions pays the full amount of their first invoice on 22-07-09.*

#### Setup :

- ❑ In **F12: Configure**, set **Use Single Entry mode for Pymt/Rcpt/Contra** to **No**.

### Create Receipt Voucher

Go to **Gateway of Tally > Accounting Vouchers > F6: Receipt**

1. In the Voucher Creation screen, credit **FirstCom Solutions** for **Rs. 5,750**
2. In the **Bill-wise Details** screen, select **Agst Ref** and adjust the receipt against the first entry in the list.
3. Keep pressing **Enter** until the next **Particulars** field is highlighted.
4. Select **Bank Account**.
5. Accept the entry and return to the Gateway of Tally main menu.

A detailed **Ledger Outstanding** screen of FirstCom Solutions with a history of all bills appears as shown below :

| Ledger Outstandings         |                                  | National Traders |                | Ctrl + M                  |                        |

Figure 6.10 Ledger Outstandings

### Practice Exercise

- ❑ Display **Outstandings - Receivables** for different periods to see the changes.
- ❑ View the **Age-wise Analysis** for receivables, payables and ledger.

### 6.1.4 Advance

*On 01-07-2009, make a Bank Payment (State Bank of India Account) for Rs. 15,000 against a purchase order PO/001/2009-10 raised on New Stocker.*

Go to **Gateway of Tally > shut National Traders** and select **Indus Enterprises**

#### Setup :

- ❑ Create **New Stockers** Ledger under **Sundry Creditors** and set the option, **Maintain balances bill-by-bill** to **Yes**.
- ❑ Create **Purchase Account** under **Purchase Accounts** and set **Inventory Values are Affected** to **Yes**.

#### Step 1 : Create Bank Payment Voucher

- ❑ In the **Bill-wise details** screen,
  - Select **Advance** as the **Type of Ref**
  - Enter **PO/001/2009-10** as reference.

#### Step 2 : Create Purchase Voucher

- ❑ Record a Purchase voucher entry on 1-07-2009 for Rs. 45,000
- ❑ In the **Bill-wise Details** screen, select **Agst Ref** to adjust the advance of **Rs. 15000**.
- ❑ Accept the purchase entry.

#### Display Ledger Outstanding Statement

Go to **Gateway of Tally > Display > Statement of Accounts > Outstandings > Ledger > New Stockers > F1: Detailed**.

The **Ledger Outstanding Statement** of **New Stocker** appears as shown below:

| Ledger Outstandings          |                          | Indus Enterprises |                | Ctrl + M                 |                        |
|------------------------------|--------------------------|-------------------|----------------|--------------------------|------------------------|
| Ledger : <b>New Stockers</b> |                          |                   |                | 1-Apr-2009 to 7-Jul-2009 |                        |
| Date                         | Ref. No.                 |                   | Opening Amount | Pending Amount           | Due on Overdue by days |

|                              |                          |                   | 15,000.00 Cr   | 30,000.00 Cr             |                        |

Figure 6.11 Ledger Outstandings

The **advance** appears next to the entry for easy identification.

To view all bills including settled bills, select '**All Bills**' as **Range of Bills to show in F12: Configuration**.

### 6.1.5 On Account

**On 1-07-2009, raise a sales invoice on New Buyer for 1 Nos of New Stock Item @ Rs. 1,000 vide Bill/001.**

Go to **Gateway of Tally** > shut **National Traders** and select **Indus Enterprises**

**Set up :**

- ❑ Create a ledger **New Buyer** under **Sundry Debtor**; Set **Yes** to **Maintain balances bill-by-bill**; **Credit Period** - leave it blank.
- ❑ Create an item **New Stock Item** under **Primary Stock Group** with an opening balance of **100 Nos** and rate **Rs. 500** stored in the Bangalore godown.

**Step 1 : Create Sales Invoice**

1. Raise a sales invoice on 1-07-2009 on **New Buyer** for Rs. 1,000
  - ❑ Select **New Stock Item - 1 Nos @ Rs. 1,000**.
  - ❑ Type bill reference as **New Ref - Bill/001**.
  - ❑ Create Sales ledger, if not created.
2. Similarly, create 3 sales invoices on **New Buyer**
  - ❑ On 2nd December for Rs. 8,000 (Bill reference - Bill/002)
  - ❑ On 3rd December for Rs. 14,000 (Bill reference - Bill/003)
  - ❑ On 6th December for Rs. 4,000 (Bill reference - Bill/004)
  - ❑ Stock Item will be **New Stock Item** and quantity for the above 3 sales bills will be **8 Nos, 14 Nos** and **4 Nos** respectively

**Step 2 : Create Receipt Voucher**

1. Make a Receipt entry on 7th July for Rs. 15,000 received by cheque. (This is to indicate money received from **New Buyer**).
2. In the **Bill-wise details** screen, select **On Account** as the details of the sales bills to be cleared are not provided.

**6.1.6 Bill-wise Outstandings Report**

After creating the sales and receipt entries, to display the Billwise outstandings report of **New Buyer**,

Go to **Gateway of Tally > Display > Account Books > Ledger > select New Buyer**.

- ❑ Select the **Bill-Wise** button to view the bill-wise details of the customer.

The **Billwise Outstandings Report** of the New Buyer appears as shown below :

| Ledger Outstandings      |                       | Indus Enterprises |                | Ctrl + M                 |                        |

Figure 6.14 Ledger Payment Performance

The ledger payment performance report gives the details of all invoices raised on the debtor and the dates when the payments were made, with the analysis of delays.

### 6.1.8 Bill-wise Details for Non-trading Accounts

Tally.ERP 9 has the option of maintaining bill-wise details for accounts other than Sundry Debtors and Sundry Creditors i.e., Non - trading accounts. This is useful to track instalment to be paid or loan amount to be received over a certain period of time.

## 6.2 Cost Centres and Cost Categories

### 6.2.1 Cost Centre

A cost centre is a unit of an organisation to which transactions can be allocated. Cost Centres are units to which costs or expenses are allocated and Profit Centres are units to which incomes are allocated. Tally.ERP 9's cost centres allow a dimensional analysis of financial information. Tally.ERP 9 gives you the cost centre break-up of each transaction as well as details of transactions for each cost centre.

### 6.2.2 Cost Categories

Cost Categories have been introduced specially for project oriented organisations as they require allocation of resources to parallel sets of cost centres. For example, the project is to construct an airport. The airport is the cost centre. For this project certain expenses are incurred by the project head. A simultaneous allocation of the amount has to be made for both the project and the project head. This requirement can be achieved using Tally.ERP 9's Cost Category feature. Any number of parallel allocations can be done as per requirements.

### 6.2.3 Activating Cost Category and Cost Centre

Ensure that you are at the Gateway of Tally of **National Traders**. To activate the cost centre and cost category,

- ❑ Set **Yes** to the following in the **F11: Features (Accounting Features)**:
  - **Maintain Cost Centres**
  - **More than ONE Cost Category**

### 6.2.4 Creating Cost Categories

Go to **Gateway of Tally > Accounts Info. > Cost Categories > Create**.

- ❑ **Name: Projects & Assignments**
- ❑ **Allocate Revenue Items: Yes**
- ❑ **Allocate Non-Revenue Items: No**

| Cost Category Creation     |                                     |
|----------------------------|-------------------------------------|
| Name                       | : <b>Projects &amp; Assignments</b> |
| (alias)                    | :                                   |
| Allocate Revenue Items     | ? <b>Yes</b>                        |
| Allocate Non-Revenue Items | ? <b>No</b>                         |

Figure 6.15 Cost Category Creation

- Press **Y** or **Enter** to accept the screen.

Similarly, create **Salesmen** as a Cost Category .

**Allocate Revenue Items:** Enable this option to allocate all sales, purchase, expenses and income related transactions to cost centres and cost categories.

**Allocate Non-Revenue Items:** Enable this option to allocate capital items to cost centres. This helps in monitoring the capital expenditure incurred on cost centres and measuring them against the revenue earned.

### 6.2.5 Creating Cost Centre

Go to **Gateway of Tally > Accounts Info. > Cost Centres > Create.**

- **Category:** Select **Projects & Assignments**.
- **Name:** **Projects**.
- **Under:** **Primary**.

| Cost Centre Creation |                                           |
|----------------------|-------------------------------------------|
| Category             | : <b>Projects &amp; Assignments</b>       |
| Name                 | : <b>Projects</b>                         |
| (alias)              | :                                         |
| Under                | : <input type="checkbox"/> <b>Primary</b> |

Figure 6.16 Cost Centre Creation

Similarly create the following Cost Centres,

- **Buildings, Roads and Airports**, by selecting **Projects and Assignments** as **Cost Category** and **Projects** for **Under**.
- **Amar and Barry**, by selecting **Salesmen** as **Cost Category** and **Primary** for **Under**.

### 6.2.6 Applying Cost Centres to Ledger Accounts

Create the following Ledger accounts,

- ❑ **Conveyance** and **Postage** under **Indirect Expenses**
- ❑ **Consulting Fees** under **Direct Incomes**.

*By default, Tally.ERP 9 activates Cost Centre feature for ledgers created under **Sales Accounts** and **Purchase Accounts** groups.*

#### Create Payment Voucher :

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment > Select Petty Cash** from **List of Types**

1. **Date: 13-07-09**
2. You will notice that Tally.ERP 9 displays the **Dr** field. This is because the option **Use Single Entry mode for Pymt/Rcpt/Contra** is set to **No** in **F12: Configuration**, while making the bill-wise receipt entry.
3. Debit **Conveyance Rs. 20** and press **Enter**.
4. The **Cost Centre Allocation** sub-screen appears on entering the amount.
  - ❑ Select the Category as **Projects & Assignments**.
  - ❑ Allocate the expense to Buildings.
  - ❑ Press **Enter** for the entire amount of 20.00 for Buildings.
5. Since you have completed the allocation of the full amount, the cursor moves back to the main voucher screen.
6. Credit **Petty Cash 20**
7. Type the **Narration** as **Paid to Amar for travelling to Brigade Road for the Buildings Project**.
8. Accept the voucher.

The completed **Payment Voucher Creation** will appear as shown :

| Accounting Voucher Creation                                        |          | National Traders |        | Ctrl + M              |
|--------------------------------------------------------------------|----------|------------------|--------|-----------------------|
| <b>Petty Cash</b> No. 4                                            |          |                  |        | 13-Jul-2009<br>Monday |
| Particulars                                                        |          | Debit            | Credit |                       |

Figure 6.17 Petty Cash Voucher

Now, create one more Payment Voucher.

Go to the **Gateway of Tally > Accounting Vouchers > F5: Payment > Select Petty cash.**

1. **Date: 17-07-09**
2. Debit **Conveyance: Rs. 50.00.**
3. The **Cost Centre Allocation** sub-screen appears after you enter the amount
  - ❑ Select **Projects & Assignments** as **Cost Category**.
  - ❑ Allocate Rs. 30 to **Buildings** and Rs. 20.00 to **Roads**.
  - ❑ Press **Enter** to accept
  - ❑ The cursor moves to the **Cost Category** field, select **Salesmen (Cost Category) > Amar** and enter the amount as **Rs. 50**
  - ❑ Press **Enter** to accept

*Tally.ERP 9 displays only **Amar** and **Barry** (Cost centres under **Salesmen Cost Category**) to facilitate error free selection during Voucher Entry.*

- The cursor moves to the Cost Category field, press **Enter** and the Voucher screen appears.
- 4. Credit **Petty Cash Rs. 50**
- 5. Type the **Narration** as **Paid to Amar for travel to Brigade Road for the Buildings Project.**
- 6. Before accepting the voucher, press **F12: Configure** and ensure that the option **Show Cost Centre Details** is set to **Yes**.

The completed **Payment Voucher Creation** screen appears as shown below:

| Accounting Voucher Creation                                       |          | National Traders |        | Ctrl + M              |

Figure 6.19 Receipt Voucher

- Press **Y** or **Enter** to accept the screen.

### Practice Exercise

- On 16-07-09, purchased for **Projects**, 2,50,000 worth **Cement** from **Navketan Cement** to be shared equally between **Roads** and **Buildings** on credit for 30 days.
- On 20-07-09, purchased for **Projects**, 3,50,000 worth **Steel** from **Monnet Steels**. Allocate 50,000 to **Roads** and the rest to **Buildings**. Credit received for 45 days.
- On 20-08-09, project sales of **Buildings** were made to **WinLab Technologies** for Rs. 9,00,000. 10% receivable after 5 days and balance after 15 days.
- The next day, **Roads project** was completed and an invoice was raised on **Civic Centre Association** for Rs. 15,00,000. Credit period allowed - 25% with 7 days and the balance after 60 days of the date of the invoice.

### Setup :

- Create ledgers **Project Sales** under **Sales Account** and **Project Purchases** under **Purchase Accounts**. Set the options as shown below for both the accounts:
  - Set **Cost Centres are applicable** to **Yes**.

- Set **Inventory Values** are affected to **No**.
- Create the following **Suppliers/ Buyers** with **Bill-wise details** activated and default credit period left blank. **Cost Centres** are **Not Applicable**.
  - **Navketan Cement** under **Sundry Creditors**
  - **Monnet Steels** under **Sundry Creditors**
  - **WinLab Technologies** under **Sundry Debtors**
  - **Civic Centre Association** under **Sundry Debtors**
  - **Parvathi Stockers** under **Sundry Creditors**

- *Select **New Ref.** in the **Bill-wise details** screen*
- *Allocate purchases to **Project Purchases ledger** and sales to **Project Sales ledger**.*
- *In the narration field type **Barry** as these transactions are carried by him.*
- *You may give different references (for e.g., **WT/1**, **WT/2**) while accounting for bill-wise details based on the credit periods.*
- *For dynamic cost centre allocation, pass the entry in **Voucher mode**. The **Invoice mode** is used for inventory items where **Cost centre allocation** is either pre-classified through **Cost Centre Classes** or is not required.*

### Advanced Practice Exercises

Enter the following transactions in voucher mode:

1. On 20-09-09, purchased **Cement** from **Navketan Cement** for Rs. 4,00,000 (200 bags at Rs. 2,000 per bag). Half of it is for **Roads** and the other half for **Buildings**. Entire lot was stored in **On-site**. Received credit of 30 days.
2. On 20-09-09, purchased 20 Tons of **Steel** from **Monnet Steels** @ Rs. 4,000 per ton and was stored in Warehouse. It was equally divided between **Roads** and **Buildings**. Received credit of 30 days.
3. One month later on 20-10-09, **Project Sales** of **Buildings** for Rs. 4,50,000 were made to **Win-Lab Technologies**. A credit of 60 days was given since they are old buyers.
4. On the same date (i.e., 20-10-09), **Project Sales** of **Buildings** for Rs. 7,65,000 were made to **Civic Centre Association**. A credit of 60 days was given. At the same time, they took over the **Roads** built for them at Rs. 2,35,000 with a credit period of 20 days. Only one invoice was prepared for **Civic Centre Association** for both **Buildings** and **Roads**.

### Setup :

- Ensure that in **F12: Accts/Inventory Info.** Configuration, **Allow Advanced Entries in Masters** is set to **Yes**.

- ❑ Create **Building Material** as a Stock group.
- ❑ Create the following Stock Items under Stock Group **Building Materials**.
  - Cement with Unit of measurement - **Bags**
  - Steel with Unit of measurement - **Tons**.
  - For both items, set **Yes** to **Treat all Purchases as Consumed** (This option is useful in case of consumable items)
  - Accept the rest as set by default.
- ❑ Alter the **Project Purchase accounts** to affect Inventory items.

### 6.2.7 Display Cost Centre Reports

Go to **Gateway of Tally > Display > Statements of Accounts > Cost Centres**.

The Cost Centres Menu comprises of the following sub menus :

- ❑ Category Summary
- ❑ Cost Centre Break-up
- ❑ Ledger Break-up
- ❑ Group Break-up

#### Category Summary

This report displays the summarised position of the cost centres. You can drill down to the list of vouchers. In the above exercises while entering the vouchers, we held 'Amar' responsible for some of the expenses and incomes and 'Barry' for some. The purpose of mentioning their names in the Narration was to record their performance for later analysis and possible bonus payments.

The **Cost Category Summary** report for the period 1-4-2009 to 20-10-2009 appears as shown below:

| Cost Category Summary  |                           | National Traders |                 | Ctrl + M |
|------------------------|---------------------------|------------------|-----------------|----------|
| Particulars            | National Traders          |                  |                 |          |
|                        | 1-Apr-2009 to 20-Oct-2009 |                  |                 |          |
|                        | Transactions              |                  | Closing Balance |          |
| Debit                  | Credit                    |                  |                 |          |

| Projects & Assignments | 10,80,070.00              | 38,51,000.00     | 27,70,930.00    | Cr       |
| Projects               | 10,80,070.00              | 38,51,000.00     | 27,70,930.00    | Cr       |
| Buildings              | 6,65,050.00               | 21,16,000.00     | 14,50,950.00    | Cr       |
| Roads                  | 4,15,020.00               | 17,35,000.00     | 13,19,980.00    | Cr       |
| Salesmen               | 50.00                     |                  | 50.00           | Dr       |
| Amar                   | 50.00                     |                  | 50.00           | Dr       |

Figure 6.20 Cost Category Summary

- ❑ Select **Buildings** and press **Enter**. You are now drilling down into the **Month-wise Cost Centre Statement** of Buildings. You have the option to add a new column, select another cost centre, access **F12: Configure** and view the configured details.
- ❑ Press **Enter** on any month (select December here) and you will get the **Cost Centre Vouchers report**. This displays the list of vouchers pertaining to a cost centre for the selected month.

- ❑ Click on **F12: Value** and filter the information by using vouchers having narrations containing **Amar**. Similarly give the filter condition Voucher having narration containing **Barry**.
- ❑ Experiment with the different button options, such as **New Column**, **Auto Column**, and **F12: Configure**.

### Cost Centre Break-up

This report displays a summarised information on Ledgers and Groups for the selected cost centre. You can drill down to the list of vouchers.

Now, go back to the **Display Cost Centres** menu > select **Cost Centre Break-up**

- ❑ Select **Buildings**, from the list of Cost Centres
- ❑ Press **F2** and change the period from 1-4-2009 to 20-10-2009.

The screen appears as shown below :

| Breakup of Cost Centre |                                                                         | National Traders |                    | Ctrl + M |

|                        |                                                                         |                  |                    |          |
|                        |                                                                         |                  |                    |          |
|                        |                                                                         |                  |                    |          |
|                        |                                                                         |                  |                    |          |

Figure 6.21 Breakup of Cost Centre

In this report we shall display the net profits made by the selected **Cost Centre Buildings**.

- ❑ Click on **F1: Detailed** button or [Shift]+[Enter] keys on Indirect expenses to explode the group.
- ❑ Now click on **New Column** button to bring up data for Roads alongside Buildings.
- ❑ With your cursor on **Indirect Expenses** under the **Particulars** column, drill down to view further details. Are the columns retained?

### Ledger Break-up

This report displays the summarised information of all Cost Centres for the selected Ledger. You can drill down to the list of vouchers.

Now, go back to the **Display Cost Centres** menu

- ❑ Select **Ledger Break-up**
- ❑ Select **Conveyance Ledger**.

The screen appears as shown below:

| Cost Breakup of Ledger |                           | National Traders |        | Ctrl + M | x  |
|------------------------|---------------------------|------------------|--------|----------|----|
| P a r t i c u l a r s  | Ledger: Conveyance        |                  |        |          |    |
|                        | National Traders          |                  |        |          |    |
|                        | 1-Apr-2009 to 20-Oct-2009 |                  |        |          |    |
|                        |                           | Transactions     |        | Closing  |    |

| Amar                   |                           | 50.00            |        | 50.00    | Dr |

Figure 6.22 Cost Breakup of Ledger

From the above report, you can press **Alt+C**, to insert a new column and display the cost centre details for **Consulting Fees**.

### Group Break-up

This report displays the summarised information of all Cost Centres for the selected Group. You can drill down to the list of vouchers.

Similar to **Ledger Break-up** explore the **Group Break-up of Cost Centres**.

### Practice Exercises

1. Alter the conveyance and consulting fees vouchers created for cost centre allocation. Allocate to the relevant salesmen mentioned in the voucher narration.
2. Display the Category Summary.
3. Display the Cost Centre Break up and see the individual Salesmen performance.
4. Can you bring up each salesman's figures side by side to see who is performing better?

## 6.3 Voucher Class and Cost Centre Class

### 6.3.1 Voucher Class

Voucher class is a novel way of automating accounting allocations during transactions. This is particularly useful in sales invoice where the nominal ledger account, to be credited for each item of sale, is defined once. During voucher entry, the accounting credits for items sold are done automatically. Additional accounting entries like tax, freight, and other charges can be predefined to be carried out during actual invoicing.

Voucher class permits:

- ❑ Automation of entries to predefined ledger accounts.
- ❑ Automatic rounding off to preset value limits.

Voucher Classes can be created for the following voucher types.

- ❑ Contra
- ❑ Payment
- ❑ Receipt
- ❑ Journal
- ❑ Sales
- ❑ Credit Note
- ❑ Purchases
- ❑ Debit Note
- ❑ Sales Order
- ❑ Purchase Order
- ❑ Delivery Note

- Receipt Note
- Stock Journal

### Setup :

Go to **Gateway of Tally > select Indus Enterprises** and shut **National Traders**.

- In the **F11: Features (Accounting Features)**, activate Invoicing for both sales and purchase vouchers (for **Indus Enterprises**).
- In the **F11: Features (Inventory Features)** set **Maintain Multiple Godowns** to **Yes**.
- In the **Local Sales** ledger, set **Inventory Values are affected** to **Yes**.
- Create **Bangalore** godown under **Primary** and set **Yes** to the field **Allow Storage of materials**.
- Press **F12: Accts / Inventory Info** and set **Specify Default Ledger Allocation for Invoicing** to **Yes**.
- Create the following stock items with unit of measure as **Nos** and Cost Category as **Not Applicable**:

| Name     | Opening balance | Godown    | Rate  | Set/Modify Default Ledgers for Invoicing |
|----------|-----------------|-----------|-------|------------------------------------------|
| Monitor  | 10 Nos          | Bangalore | 5000  | No                                       |
| Keyboard | 10 Nos          | Bangalore | 1250  | No                                       |
| CPU      | 10 nos          | Bangalore | 15000 | Yes                                      |

- Specify the details for stock item **CPU** in the Stock Default screen as shown below :

| Indus Enterprises                                   |              |                 |                |  | Ctrl + M                                |
|-----------------------------------------------------|--------------|-----------------|----------------|--|-----------------------------------------|
| Name of Item : CPU                                  |              |                 |                |  | List of Ledger Accounts                 |
| Default Accounting Allocations for Sales Invoice    |              |                 |                |  | <input type="checkbox"/> Not Applicable |
| Ledger Name                                         | Percentage % | Rounding Method | Rounding Limit |  | <b>Local Sales</b>                      |
|                                                     |              |                 |                |  | Sales                                   |
| <b>Local Sales</b>                                  | <b>100</b>   |                 |                |  |                                         |
| Default Accounting Allocations for Purchase Invoice |              |                 |                |  |                                         |
| Ledger Name                                         | Percentage % | Rounding Method | Rounding Limit |  |                                         |
| <input type="checkbox"/> Not Applicable             |              |                 |                |  |                                         |

Figure 6.23 Accounting Allocation for Sales Item

- Press **Y** or **Enter** to accept the screen.

### Step 1 : Create a voucher class for Sales Voucher Type

Return to the **Gateway of Tally > Accounts Info. > Voucher Types > Alter.**

1. Select **Sales Voucher**
2. Press **Enter** till you reach the **Name of Class** field.
3. Type the name as **Sales Class**.

| Voucher Type Alteration                                                                                                                                              |  | Indus Enterprises                                                                                                                            |  | Ctrl + M E                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|----------------------------------------------------------------------------------------------------------------------------------------------|--|--------------------------------------------|
| Name : <b>Sales</b>                                                                                                                                                  |  |                                                                                                                                              |  |                                            |

|                                                                                        |                     |                      |                 |                                                                                                                                                                                                                                                                                                  |                |

Figure 6.25 Voucher Type - Sales Class

**Voucher Class screen comprises of the following three sections :**

**I. Restriction of groups for which Class can be used**

**Exclude these Groups and Include these Groups:** This section means that while making the invoice entry and selecting the voucher class the parameters given in the class will be applicable only for those ledger accounts under the selected groups.

For example, if we have 10 sub-groups (region-wise) under one group, say Sundry Debtors group and we want the voucher class to be applicable only for 9 sub-groups of Sundry Debtors. It is easier to include the entire Sundry Debtors group and exclude the one sub-group that we do not require instead of selecting 9 sub-groups one-by-one.

In this example in **Indus Enterprises** select **End of List** under **Exclude these Groups** since there are no sub-groups and **Sundry Debtors** under **Include these Groups**.

## II. Default accounting allocations for each item in Invoice

Under this section, there are five sub-sections which are as follows:

- ❑ **Ledger Name** – Press the spacebar to view the list of ledgers. Since we are viewing the class in Sales voucher type, Tally.ERP 9 displays only the ledgers under Sales Accounts group.
- ❑ **Select Sales Account** (Press Alt+C to create it under Sales Accounts, if it doesn't exist). On selecting Sales Account, Tally.ERP 9 prompts for details regarding the percentage of allocation. This is because more than one ledger can be affected for each item. For example, in case of tax inclusive items, the ledgers to be credited will be sales and tax in a definite proportion.
- ❑ **Percentage** – This is useful in cases where tax is inclusive of the price. You can specify the sales ledger account as, say 82.5%, and in the next line, the tax account with the balance as 17.5%. Normally, for tax exclusive prices, you will give 100% for the sales account. The percentage symbol is required to be mentioned.
- ❑ **Rounding Method** – This may be used only where the Percentage allocated to the Sales ledger is not 100%. Calculated amounts may be required to be rounded-off by either using upwards, downwards or normal rounding method. You can set your own rounding-off rule.
- ❑ **Rounding Limit** – The limit for rounding off the amount can be specified to the next whole number after selecting the rounding method. For example, to round-off upwards to the nearest 50P, set it to 0.50. If selected as 100% it will skip this field.
- ❑ **Override using Item Default** – This is a question which is to be answered as Yes or No. Let us take the example of the stock item CPU for which **Set/Modify Default Ledgers for Invoicing** is set to **Yes**. **Override using Item Default** when set to **Yes**, the Sales accounts gets overridden by Local Sales account for CPU (Default Accounting Allocation is set as Local Sales in the Stock Item Master). Hence the Local sales account will be selected in the voucher class as credit. **Override using Item Default** when set to **NO**, results in the sales account being selected in the voucher class as credit. This is irrespective of whether the item has default ledger allocation or not since we are not defining it to be overridden.

## III. Additional Accounting Entries

This part is relevant for tax and other charges like freight etc.

- ❑ **Ledger Name** – This is self-explanatory. You can create any number of ledgers. Select VAT on sales. (Create VAT on sales ledger under duties and taxes ledger, if not created).
- ❑ **Type of Calculation** – Different calculation methods are provided. Select the one suitable. The value basis that you will provide in the next column will be calculated using the type of calculation specified.

- ❑ **Value Basis** – Give the amount, which is to be used for the Type of Calculation. For percentage, you must use the symbol %.
- ❑ **Rounding Method and Rounding Limit** – Rounding method and Rounding Limit have been explained already.
- ❑ **Remove if Zero** – This is a question to be answered as Yes or No, essentially to permit Tally.ERP 9 to ignore the account and not make any entry if its value is Zero. Select **Yes**.

6. Enter the details as displayed below in the **Sales Class** screen

| Indus Enterprises                                                                      |                     |                                             |                      |                               |                  |

Figure 6.26 Voucher Type — Sales

7. Accept the voucher class and press **Enter** to accept the voucher type screen.

### Effect of Voucher Class on Cost Centres

The manual allocation of an entry to a cost centre is not possible, if a voucher class is used. Let us now make an invoice entry with voucher class.

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales.**

- The completed **Sales voucher** appears as shown below :

| Accounting Voucher Creation    |          | Indus Enterprises           |     | Ctrl + M               |
|--------------------------------|----------|-----------------------------|-----|------------------------|
| <b>Sales</b>                   | No. 2    | Voucher Class : Sales Class |     | 2-May-2009<br>Saturday |

| Narration:                     |          |                             |     | 3 Nos                  |
| Sales entry with voucher class |          |                             |     | 35,750.00              |

Figure 6.27 Sales Invoice

8. Type the narration and press **Enter** to accept the screen.

The Sales Account ledger is automatically credited in the voucher for Monitor and Keyboard. To display the Sales Account ledger: Go to **Gateway of Tally > Display > Account Books > Ledger > Sales Account**.

The **Sales Account Ledger** appears as shown below:

| Ledger Vouchers       |             | Indus Enterprises |         | Ctrl + M                 |           |
|-----------------------|-------------|-------------------|---------|--------------------------|-----------|
| Ledger: Sales Account |             |                   |         | 1-May-2009 to 7-Jul-2009 |           |
| Date                  | Particulars | Vch Type          | Vch No. | Debit                    | Credit    |
| 2-5-2009              | XYZ Ltd     | Sales             | 2       |                          | 10,000.00 |
|                       |             |                   |         | Opening Balance :        |           |
|                       |             |                   |         | Current Total :          | 10,000.00 |
|                       |             |                   |         | Closing Balance :        | 10,000.00 |

Figure 6.28 Sales Account Ledger

Total Sales Account allocation in the invoice is Rs. 10,000 (Monitor Rs. 7500 + Keyboard Rs. 2,500).

Use **Alt+R** keys to hide the other entries, if required from the screen

The **Local Sales ledger** appears as shown below:

| Ledger Vouchers            |             | Indus Enterprises |         | Ctrl + M                 |                  |
|----------------------------|-------------|-------------------|---------|--------------------------|------------------|
| Ledger: <b>Local Sales</b> |             |                   |         | 1-May-2009 to 7-Jul-2009 |                  |
| Date                       | Particulars | Vch Type          | Vch No. | Debit                    | Credit           |
| 2-5-2009                   | XYZ Ltd     | Sales             | 2       |                          | 22,500.00        |
|                            |             |                   |         | Opening Balance :        | 4,600.00         |
|                            |             |                   |         | Current Total :          | 22,500.00        |
|                            |             |                   |         | <b>Closing Balance :</b> | <b>27,100.00</b> |

Figure 6.29 Local Sales Ledger

The total Local Sales allocation in the invoice is Rs. 22,500 (CPU Rs. 22,500). This is the advantage of setting **Override using Item Default** to **Yes**. A different sales ledger had to be credited only for one item out of 3.

The balance of Rs. 3,250 (Rs. 35,750 - Rs. 32,500) will appear in the VAT ledger. The **VAT ledger** appears as shown below:

| Ledger Vouchers      |             | Indus Enterprises |         | Ctrl + M                 |          |
|----------------------|-------------|-------------------|---------|--------------------------|----------|
| Ledger: VAT On Sales |             |                   |         | 1-May-2009 to 7-Jul-2009 |          |
| Date                 | Particulars | Vch Type          | Vch No. | Debit                    | Credit   |
| 2-5-2009             | XYZ Ltd     | Sales             | 2       |                          | 3,250.00 |
| Opening Balance :    |             |                   |         |                          |          |
| Current Total :      |             |                   |         |                          | 3,250.00 |
| Closing Balance :    |             |                   |         |                          | 3,250.00 |

Figure 6.30 VAT on Sales Ledger

The **Voucher Class** layout for **Purchase Voucher Type** is similar to Sales. Record a purchase entry in Indus Enterprises, with additional accounting entries. Choose the stock items to be purchased and view the reports.

### 6.3.3 Payment Voucher using Voucher Class

#### Step 1: Create Payment Voucher Class

Let us now create a voucher class for Payment Voucher type.

Go to **Gateway of Tally > Accounts Info. > Voucher Types > Alter > Payment**.

1. Specify Class name as **Payment Voucher Class**.
2. Press **Enter** and the **Payment Voucher Class** screen appears.
3. Enter the details as shown below:

| Indus Enterprises                                                                             |                      |
|-----------------------------------------------------------------------------------------------|----------------------|
| Class : <b>Payment Voucher</b>                                                                |                      |
| <i>If you wish to restrict the groups to which this class can be used, specify them here.</i> |                      |
| Exclude these Groups                                                                          | Include these Groups |
| <input type="checkbox"/> End of List                                                          | <b>Bank Accounts</b> |
| <i>Specific Ledger for which this Class is created (e.g. Cash, or a Bank Account)</i>         |                      |
| Ledger Name                                                                                   |                      |
| <b>State Bank of India</b>                                                                    |                      |

Figure 6.31 Payment Voucher Class

4. Accept the **Voucher Class** and the **Voucher Type** screen by pressing **Enter**.

### Step 2: Create Payment Entry using Voucher Class

***On 2-5-09, make a payment entry for freight charges (create the ledger freight charges under indirect expenses if not present) of Rs. 4,500.***

The Payment Voucher screen looks similar to Payment Voucher in Single Entry Mode. Make a payment of **Rs. 4,500** towards **Freight charges**.

The **Payment voucher** screen with Voucher Class appears as shown below :

| Accounting Voucher Creation                                   |          | Indus Enterprises                        | Ctrl + M               |
|---------------------------------------------------------------|----------|------------------------------------------|------------------------|
| <b>Payment</b>                                                | No. 3    | Voucher Class : <b>Payment Voucher</b>   | 2-May-2009<br>Saturday |
| Account : <b>State Bank of India</b><br>Cur Bal: 25,000.00 Dr |          |                                          |                        |
| Particulars                                                   | Amount   |                                          |                        |
| <b>Freight Charges</b><br>Cur Bal: 4,500.00 Dr                | 4,500.00 |                                          |                        |
| Narration:<br>Ch. No. :2345                                   |          |                                          |                        |
|                                                               |          | <div>Accept ?</div> <div>Yes or No</div> |                        |

Figure 6.32 Payment Voucher

- Press **Y** or **Enter** to accept the screen.

*The Voucher Class for Receipt and Contra voucher types is similar to the Payment voucher type. Explore with more entries.*

### 6.3.4 Stock Journal using Voucher Class

#### Step 1 : Create Stock Journal Voucher Class

To create a **Voucher Class** for **Stock Journal** voucher type,

Go to **Gateway of Tally > Accounts Info. > Voucher Type > Alter > Stock Journal >**

1. In **Name of Class**, type **Stk Jrnl Voucher Class**
2. Press **Enter** and the screen appears as shown below:

| Voucher Type Class                                                                                                                                                                                                                                                                                 |  | Indus Enterprises                                                            |  | Ctrl + M                                      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|------------------------------------------------------------------------------|--|-----------------------------------------------|
| Name : Stock Journal<br>(alias) :                                                                                                                                                                                                                                                                  |  |                                                                              |  |                                               |

|                                                                                                                                                                                                                                                                                                    |  | Class : Stk Jnl Voucher Class<br>Use Class for Inter- Godown Transfers ? Yes |  |                                               |

Figure 6.33 Voucher Type Class

- ❑ To get the **Voucher Class** facility for **Stock Journal**, ensure that you have atleast 2 godowns.
  - In this above case, create a new godown as **Delhi**.
- ❑ **Voucher class** for **Stock Journal** voucher type is available only for the purpose of an **Inter-godown Transfer**.

3. Accept the voucher class for Stock Journal.

## Step 2 : Create Stock Journal with Voucher Class

Make a transfer entry for 2 Nos of CPU, Monitor and Keyboard from Bangalore to Delhi.

1. Create a Stock Journal without Voucher class, the screen appears as shown below:

Figure 6.34 Stock Journal

- The completed **Stock Journal Voucher** with voucher class appears as shown below:

Figure 6.35 Stock Journal

44

### 6.3.5 Cost Centre Class

Cost Centre Classes are used to automate Cost Centre allocations in transactions. On creating a cost centre class, you need to select it in the voucher screen before making the entry. You can also use cost centre classes when Voucher Classes are being used.

#### Setup :

- Activate the **Cost Centre** feature in the **F11: Features (Accounting Features)**.

#### Step 1 : Create Cost Centre Class

1. Activate **Use Predefined Cost Centre allocations during Entry**.
2. Press **Enter** to view the **Auto Cost Allocation** screen.
3. Type **Cost Class** in the **Class Name**.
4. Press **Enter** and specify the details
5. Select **Cost Category** as **Primary Cost Category** and set Cost Centre - **Marketing** - 45%; **Finance** - 35% and **Administration** - 20%. (Create the Cost centres if they do not exist, by using **Alt+C**.)

The **Cost Centre Class** appears as shown :

| Auto Cost Allocations        |                   |
|------------------------------|-------------------|
| <b>Cost Centre Classes</b>   |                   |
| Name:                        | Indus Enterprises |
| Class Name                   |                   |
| <b>Cost Class</b>            |                   |
| <b>Primary Cost Category</b> |                   |
| Marketing                    | 45 %              |
| Finance                      | 35 %              |
| Administration               | 20 %              |

Figure 6.36 Auto Cost Allocations

Once a portion of expenses is allocated to **Marketing**, while selecting **Finance**, Tally.ERP 9 does not display **Marketing** cost centre again to avoid erroneous selection of same cost centre twice.

6. Press **Enter** to accept the allocations and go to **Gateway of Tally** after accepting the **F11: Features (Accounting Features)** screen.

### Step 2 : Create Cash Payment using Cost Centre Class

Make a cash payment entry on 16-5-09 for Rs. 4,500 towards Stationery expenses.

1. Debit the ledger **Stationery expenses** (create it under Indirect Expenses with Cost Centre applicable set to Yes) for Rs. 4500 and credit **Cash** ledger for Rs. 4500.
2. Select **Voucher class** as **Payment voucher class**
3. Select **Cost centre** class as **Cost Class**.

Remember that the above entry is made in **Indus Enterprises**.

### Step 3 : Display Cost Category Summary

To view the Category Summary,

Go to **Gateway of Tally > Display > Statement of Accounts > Cost Centres > Category Summary**

- Press **F2** and change the period from **1-4-2009** to **16-5-2009**. The report appears as shown

| Cost Category Summary |                                                | Indus Enterprises |  | Ctrl + M           |
|-----------------------|------------------------------------------------|-------------------|--|--------------------|
| Particulars           | Indus Enterprises<br>1-Apr-2009 to 16-May-2009 |                   |  | Closing<br>Balance |
|                       | Transactions                                   |                   |  |                    |
|                       | Debit                                          | Credit            |  |                    |
|                       |                                                |                   |  |                    |
| Primary Cost Category | 4,500.00                                       |                   |  | 4,500.00 Dr        |
| Administration        | 900.00                                         |                   |  | 900.00 Dr          |
| Finance               | 1,575.00                                       |                   |  | 1,575.00 Dr        |
| Marketing             | 2,025.00                                       |                   |  | 2,025.00 Dr        |

Figure 6.37 Cost Category Summary

The cost centres are allocated automatically in the percentage of 45%, 35% and 20% for Marketing, Finance and Administration respectively.

### Practice Exercises

Go to **Gateway of Tally > Shut Indus Enterprises** and select **National Traders**

Make an Invoice Entry on 21-11-2009 with voucher class selected for FirstCom Solutions for sale of **HP - 27** Printer Cartridges - 1 nos at Rs. 300. Select godown as **On-site**.

#### Setup :

- ❑ In **National Traders**, create a sales ledger **New Sales** with **Inventory values are affected** and **Cost Centres are applicable** set to **Yes**.
- ❑ Create a **Voucher Class – NewSales** for Sales Voucher Type and select New Sales ledger for Default Accounting allocations.
- ❑ The cost centres to be allocated to are **AMAR** and **BARRY** - 45% and 55% (of the sales amount) respectively.

## 6.4 Multiple Currencies

Due to the globalisation of business, many organisations have found the necessity to work with more than one currency. Transactions are often made in currencies other than the home currency.

Tally.ERP 9's multi-currency feature is very powerful and allows you to :

- ❑ Record transactions with different currencies by allowing you to specify and change the currency rate of exchange.
- ❑ Maintain the balance of the specified account in a foreign currency.

Tally.ERP 9 uses the term base currency for the currency in which your account books are maintained (typically in the home currency). Foreign Exchange is used interchangeably with foreign currency.

### 6.4.1 Creating Foreign Currencies

All amounts in your books are maintained in the base currency which is specified during company creation to facilitate easy analysis of data. Hence, whenever you record a transaction in a currency other than the base currency, Tally.ERP 9 prompts for an exchange rate and then displays the information in the base currency.

#### Setup :

Ensure that you are at the **Gateway of Tally of National Traders**.

- ❑ Activate the feature **Allow Multi-Currency** in **F11: Features (Accounting Features)**.

### Step 1 : Create Foreign Currency

Go to **Gateway of Tally > Accounts Info. > Currencies > Create.**

1. **Symbol:** \$.
2. **Formal name:** US Dollars.
3. **Number of Decimal Places:** 2
4. **Show Amounts in Millions:** No.
5. **Is symbol SUFFIXED to Amounts:** No.
6. **Put a SPACE between Amount and Symbol:** Yes.
7. **Symbol for Decimal Portion of Amount:** Cents.
8. Press **Y** or **Enter** to accept the screen.

Similarly, create the following currencies:

- **Pounds Sterling** by using **Alt+156 = £**
- **Yen symbol** by using **Alt + 0165 = ¥**
- **Euro symbol** by using **Alt + 0128 = €**

### 6.4.2 Altering Currencies

Go to **Gateway of Tally > Accounts Info. > Currencies > Alter >**

- Select \$, you find a different screen with many fields (You can alter input dates and the relevant exchange rate of currency).
- Enter the following exchange rates for **1-12-09** and accept the screen.

| Standard  | Selling   | Buying    |
|-----------|-----------|-----------|
| Rs. 45/\$ | Rs. 46/\$ | Rs. 43/\$ |

- **Standard Rate** is the current rate of exchange.
- **Selling Rate** is the rate at which your bank will buy Dollars from you. It is used when invoicing or receiving money.
- **Buying Rate** is the rate at which you will buy dollars from the Bank. It is used when purchasing or paying money in foreign currency.
- During voucher entry, the rates predefined in the currency masters are prefilled automatically.

### 6.4.3 Deleting Currencies

Use the key combination **Alt + D** in the alteration screen to delete. However, you will not be able to delete a currency that has been used in any transaction.

### 6.4.4 Creating Bank Ledger

Go to **Gateway of Tally > Accounts Info. > Ledgers > Create**

1. **Name:** Bank Account
2. **Under:** Bank Accounts
3. **Currency:** Rs.
4. Accept the screen.

### 6.4.5 Voucher Entry using Foreign Currency

**Setup :**

- ❑ Create following two ledger accounts in **Base currency** without **Cost centres** and set **Bill-wise** to **Yes**.
  - **Prism Fabrication** under **Sundry Debtors** group
  - **Mirage Systems Pvt Ltd.** under **Sundry Creditors** group
- ❑ Create the Stock Item as **Wheat** with the following information
  - Stock Group - **Foodstuffs**
  - Stock Category - **Cereals**
  - Unit - **Bags**
- ❑ Create **Export Sales** under **Sales Account** and activate Inventory values and cost centre options

#### Step 1: Create Sales Voucher

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**.

1. **Date:** 15-12-09.
2. Select **As Invoice** from the buttons bar.
3. **Party's A/c Name:** Prism Fabrication, accept the Name and address as default.
4. **Name of Item:** Wheat
5. **Godown:** Warehouse.
6. **Quantity:** 100 Bags.
7. **Rate:** \$25 per Bag (Prefix the foreign currency symbol)
8. **Rate of Exchange:** Accept the default selling rate which is **Rs. 46/\$**.

The **Stock Item Allocations** screen appears as shown :

Figure 6.38 Stock Item Allocations

9. Accept the **Item Allocation** screen.
10. In **Accounting Allocation**, select **Export Sales**
11. Select **Amar** in **Cost Centre Allocation**
12. In **Bill-wise details** screen,
  - Enter **New Ref** as **Type of Reference**
  - Type **Export/1** in **Name**
  - Type **7** days in **Credit Days**
  - Enter **\$2500** (Prefix the Foreign Currency Symbol)
13. Accept the screen

While entering the amount in foreign currency, use the **Currency Symbol**. Any amount without a symbol will be assumed to be in the base currency.

### 6.4.6 Displaying Forex Gain/Loss

Go to **Gateway of Tally > Balance Sheet**.

- Press **Enter** on the **Unadjusted Forex Gain/ Loss** field and drill down to the **Ledger Forex Gain/ Loss** Screen.
- This screen gives you the bill-wise information of the reference **Export/1** and difference amount of **US\$ 2500**

The Gain/Loss is calculated because the transacted rate is Rs.46/\$ whereas the current standard rate is Rs. 45/\$. The difference between the transaction rate and the current standard rate is Re.1/\$ i.e., Rs. 2500. [ $\$2500 \times (46 - 45) = 2500 \times 1 = \text{Rs. } 2500 \text{ Cr.}$ ]

### 6.4.7 Adjusting Forex Gain/Loss

*Prism Fabrication pays you \$2500 which is deposited in the Bank Account. The Bank charges were \$50.*

**Setup :**

- Before making the receipt entry, ensure that the cost centre option is disabled in **Bank Charges** ledger.
- Go to **Gateway of Tally > Accounts Info. > Currencies > Alter > Select \$** and change the rate to **Rs. 48/\$** on **15-12-09**

#### Step 1 : Create Receipt Voucher

Go to **Gateway of Tally > Accounting Vouchers > F6: Receipt**

1. **Date: 15-12-09.**
2. Credit **Prism fabrication: \$2500.**
3. Bill-wise: **Agst Ref. Export/1 \$2500.**
4. Debit **Bank Account: \$2450. Rate of Exchange: Rs. 48/\$.**
5. Debit **Bank Charges: \$50** with the same rate of exchange.

Now, display the foreign exchange gain/loss again as explained earlier. The **Unadjusted Gain/ Loss** in the Balance Sheet is **5,000 (Dr)**

- Press **Enter** and you will see **Current Assets** with 5,000 in the credit column.
- Drill down on **Current Assets** and the screen appears as shown below:

| Forex Gain/Loss Statement |  | National Traders          |        | Ctrl + M |  |
|---------------------------|--|---------------------------|--------|----------|--|
| Particulars               |  | Current Assets            |        |          |  |
|                           |  | National Traders          |        |          |  |
|                           |  | 1-Apr-2009 to 15-Dec-2009 |        |          |  |
|                           |  | Closing Balance           |        |          |  |
|                           |  | Debit                     | Credit |          |  |
| Sundry Debtors            |  |                           |        | 5,000.00 |  |
| Grand Total               |  |                           |        | 5,000.00 |  |

Figure 6.39 Forex Gain/ Loss Statement

- Press **Enter** on **Sundry Debtors** to display **Prism fabrication**.
- Drill down one level and press **Alt+F1** to view the Ledger **Forex Gain/ Loss** report as shown below:

| Ledger Forex Gain/Loss                     |                     | National Traders |                | Ctrl + M                  |                 |
|--------------------------------------------|---------------------|------------------|----------------|---------------------------|-----------------|
| Ledger : Prism Fabrication                 |                     |                  |                | 1-Apr-2009 to 15-Dec-2009 |                 |
| (Gain/Loss due to Exchange Rate variation) |                     |                  |                |                           |                 |
| Date                                       | Ref. No.            |                  | Opening Amount | Pending Amount            | Gain/Loss       |
| 15-Dec-2009                                | Export/1            |                  | \$ 2,500.00 Dr |                           | Rs. 5,000.00 Dr |
|                                            | 15-Dec-2009 Sales   | 15               | \$ 2,500.00 Dr |                           |                 |
|                                            | 100 Bags Wheat      |                  | \$ 25.00/Bags  |                           |                 |
|                                            | 15-Dec-2009 Receipt | 6                | \$ 2,500.00 Cr |                           |                 |
|                                            |                     |                  | \$ 2,500.00 Dr |                           | Rs. 5,000.00 Dr |

Figure 6.40 Ledger Forex Gain/Loss

We first raised a sales invoice for \$2500 @ Rs. 46/\$ and received \$2500 @ Rs. 48/\$ against it. The difference of Rs. 2/\$ (48-46) is a gain. The calculation is done as:  $\$2500 \times \text{Rs. } 2/\$ = \text{Rs. } 5000 \text{ Dr}$ . Therefore, the unadjusted forex gain/ loss for the ledger at this point is **Rs. 5,000 Dr**.

## Step 2 : Adjust Forex Gain or Loss

The forex gain or loss must be adjusted depending on standard rates of exchange. A journal entry must be made at the end of the accounting period for writing-off the gain/loss to Profit & Loss account.

### Setup :

- Create a ledger account **Forex Gain/Loss** under the group **Indirect Expenses** (do not activate Cost Centres)

### Step 1 : Create Forex Class

Go to **Gateway of Tally > Accounts Info. > Voucher Types > Alter > Journal.**

1. Tab down to the **Name of Class** field, type **Forex Gain/Loss** and press **Enter**
2. Type **Yes** in the **Use Class for Forex Gain/Loss Adjustments?** field
3. Under **Ledger Name**, select **Forex Gain/ Loss** (this is the account that will be used for adjustments)

The **Forex Voucher Type Class** screen appears as shown :

| Voucher Type Class                                 |                                                        | National Traders | Ctrl + M                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------------------------|--------------------------------------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name : <b>Journal</b><br>(alias) :                 | Class : <b>Forex Gain/Loss</b>                         |                  | List of Ledger Accounts                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|                                                    | Use Class for Forex Gain/Loss Adjustments ? <b>Yes</b> |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                                    | Forex Gain/Loss Ledger Account to use :                |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

Figure 6.41 Journal Voucher - Forex Class

4. Press **Enter** to go back to **Voucher Type Alteration** screen
5. Press **Enter** to accept.

### Step 2: Create Journal Voucher

Go to **Gateway of Tally > Accounting Vouchers > Press F7: Journal.**

1. You now get **Voucher Type** and **Voucher Class List** where you select **Journal** and **Forex Gain/Loss** respectively for the automatic adjustment of forex gain/loss
2. Change the date to **31-12-09**.
3. Select **Prism Fabrication** from the list of ledgers.

4. In the **Bill-wise details** screen,
  - ❑ Select the invoice **Export/1** (only those invoices involved in foreign exchange gain/loss will be displayed).
  - ❑ The amount displayed will be the gain/loss amount.
  - ❑ Accept the amount
5. Press **Enter** until you reach the narration field.
6. In Narration field, type **Party's accounts adjusted for exchange gain and loss** in the **Narra-**  
**tion** field.

The completed **Forex Gain / Loss Adjustment entry** using Voucher Class appears as shown below :

Figure 6.42 Journal Voucher - Forex Gain/Loss

7. Press **Y** or **Enter** to accept the voucher.

### Practice Exercise

1. On 12-12-09, purchased 200 bags of wheat from Mirage Systems Pvt Ltd. @ **£5 /bag**. The Rupee was being traded @ **Rs. 82/£**.

2. On 21-12-09, paid Mirage Systems Pvt Ltd., **£1000** at the rate of **Rs. 83/£**. The bank charges incurred were Rs. 2,000. Adjust the outstanding bill '**Wheat**' with the payment from your Bank Account.

### Setup :

- In the currency alteration screen for **Pound**, enter these rates as on 1-12-09:
  - Standard rate - **Rs. 80/£**
  - Selling Rate - **Rs. 81/£**
  - Buying Rate - **Rs. 82/£**

#### For Purchase Voucher on 12-12-09 :

- Select the **Godown as Warehouse**
- In Accounting allocation, select **Purchases, New Ref as Wheat**
- Type **Credit period as 15 days**

#### For Payment Voucher on 21-12-09 :

- Enter **Forex amount as £1000 = Rs. 83,000** in the amount field.

The completed **Bank Payment** voucher appears as shown below:

| Accounting Voucher Creation                                                                                                                       |           | National Traders | Ctrl + M              |

Figure 6.43 Bank Payment Voucher

- Type the narration and press **Y** or **Enter** to accept the screen.

You will note an **Unadjusted forex Gain / Loss** of Rs. 1,000 in the Balance Sheet. Since, we first passed a purchase invoice for £1000 at Rs. 82/£ and paid £1000 at Rs. 83/£ against it. The difference of Rs. 1/£ (83-82) is a loss. The calculation is done as: £1000 x Rs. 1/£ = Rs. 1000 Cr.

### Practice Exercise

To adjust **Forex Gain/Loss**, make a Forex Gain/ Loss adjustment entry using a voucher class on December 31, 2009.

## 6.5 Bank Reconciliation

Reconciling the Company's Bank Accounts with the Bank Statement is a fundamental and regular task of accounting. This process is referred to as Bank Reconciliation.

In this section, you will learn to reconcile the company's bank accounts with your banker's statement.

### 6.5.1 Reconciling Bank Accounts

The bank where you hold a current account has sent you a bank statement for the week ended April 7, 2009 showing the following entries:

#### Bank Statement of National Traders - Bank Account for April 2009

| Date   | Particulars                          | Deposits | Withdrawals | Balance   |
|--------|--------------------------------------|----------|-------------|-----------|
| 1-4-09 | Balance b/f                          |          |             | 38,700.00 |
| 1-4-09 | Cheque 12789 ref Employee Wages      |          | 600.00      | 34,400.00 |
| 2-4-09 | Cheque 12790 ref Challenger Systems. |          | 500.00      | 33,900.00 |
| 7-4-09 | Balance c/f                          |          |             | 33,900.00 |

To view and reconcile the transactions relating to **Bank Account** for the month of **April 2009** :

Go to **Gateway of Tally > Display > Account Books > Cash/Bank Book(s) > Bank Account**

1. Select **April 2009**.
2. Press **F12: Configure** and activate **Show Narration** to view the cheque numbers and other details of all the transactions of April 2009.
3. Click **F5: Reconcile** (In **Bank Account** ledger display, an additional button **F5: Reconcile** will be available on the button bar).
4. The display now becomes an **Edit** screen in the reconciliation mode. The primary components are:

- A column for the **Banker's Date**.
  - The Reconciliation at the bottom of the screen, showing: **Balance as per Company Books, Amounts not reflected in Bank** and **Balance as per bank**.
5. Enter the **Bank date** for the two payment vouchers of **Rs. 500** and **Rs. 600**. (As the dates are entered, you will find the Bank Balance as per Company books is effected).

The **Bank Reconciliation** screen appears as shown below :

| Bank Reconciliation  |                        | National Traders |           | Ctrl + M                        |                      |
|----------------------|------------------------|------------------|-----------|---------------------------------|----------------------|
| Ledger: Bank Account |                        | (Reconciliation) |           | 1-Apr-2009 to 30-Apr-2009       |                      |
| Date                 | Particulars            | Vch Type         | Bank Date | Debit                           | Credit               |
| 1-4-2009             | Challenger Systems     | Bank Payment     | 5-4-2009  |                                 | 500.00               |
| 2-4-2009             | Wages                  | Bank Payment     | 5-4-2009  |                                 | 600.00               |
| 5-4-2009             | Data Link Technologies | Receipt          |           | 5,000.00                        |                      |
| 6-4-2009             | Petty Cash             | Contra           |           |                                 | 200.00               |
|                      |                        |                  |           | Balance as per Company Books :  | 38,700.00            |
|                      |                        |                  |           | Amounts not reflected in Bank : | 5,000.00      200.00 |
|                      |                        |                  |           | <b>Balance as per Bank :</b>    | <b>33,900.00</b>     |

Figure 6.44 Bank Reconciliation

6. Leave the dates blank for other vouchers and press **Enter** till you accept the screen.
7. To view the reconciled vouchers, press **F12: Configure** and activate **Show reconciled vouchers also**.

When you view the **Bank Reconciliation** again, only the vouchers which are unreconciled will appear.

### Practice Exercises

The following is the **Bank Statement of National Traders** received for the period **1-05-09** to **31-05-09**:

**Bank Account for May 2009 :**

| Date    | Particulars            | Deposits | Withdrawals | Balance   |
|---------|------------------------|----------|-------------|-----------|
| 1-5-09  | Balance b/f            |          |             | 36,700.00 |
| 9-5-09  | Data Link Technologies | 5,000.00 |             | 38,900.00 |
| 9-5-09  | Petty Cash             |          | 200.00      | 38,700.00 |
| 19-5-09 | Salaries               |          | 2,500.00    | 36,200.00 |

Reconcile your bank book as per the Bank Statement.

## 6.6 Interest Calculations

Interest is a legitimate return on money invested and chargeable in the business world on loans and also on delayed payments. Interest can be calculated on the basis of simple interest or compound interest. In Tally.ERP 9 you can calculate interest in two ways :

- ❑ Simple Mode
- ❑ Advanced Mode

### Setup :

- ❑ Ensure that you have selected **National Traders** and set **Activate Interest Calculation** to **Yes** in **F11: Features (Accounting Features)**.
- ❑ Do NOT activate **use advanced parameters** (under Interest Calculations), accept the changes and return to the Gateway of Tally.

### 6.6.1 Calculating Interest in Simple Mode

#### Interest Calculation on Outstanding Balances

Interest can be calculated on outstanding balances for any ledger account by specifying the interest rate and style of calculation in ledger master. The interest will be calculated automatically during voucher entry.

*Simple Parameters is different from Simple Interest calculation. The latter is a commonly used method to calculate interest and Simple Parameters are the parameters defined in Tally.ERP 9 for the purpose of calculating interest.*

**Setup :**

In **National Traders**,

Go to **Gateway of Tally > Accounts Info. > Ledgers > Alter (Single mode) > Bank Account**.

- ❑ Set **Activate Interest Calculation?** to **Yes** and press **Enter**.
- ❑ Now you have to set the **Interest Parameters**, on the basis of which interest will be calculated for this ledger account. The screen appears as shown below:

| Interest Para |              | Interest Style      |
|---------------|--------------|---------------------|
| Rate :        | 15 % per     | 30-day Month        |
|               | 365-Day Year | <b>365-day Year</b> |
|               |              | Calendar Month      |
|               |              | Calendar Year       |

Figure 6.45 Interest Parameters screen

- **Rate** - This is the rate at which the interest has to be calculated. Specify a rate of 15%.
- **Interest Style** - Select **365-day Year** and accept the screen (This is the basis at which the rate is applied).

**Tally.ERP 9 comprises of the following 4 Interest Styles :**

- ❑ **30-day month** - Interest will be calculated assuming that all months have 30 days. For example: Month Feb 2001; Amount - 1000; Rate of interest - 2%; Period of interest - 5 days. Interest amount will be  $1000 \times 5 / 30 \times 2\% = 3.33$
- ❑ **365-day Year** - Interest will be calculated assuming 365 days in a year.
- ❑ **Calendar Month** - Based on the calendar with 28/29 days for Feb and 30/31 days for other months. For example: Month - Feb 2001; Amount - 1000; Rate of interest - 2%; Period of interest - 5 days. Interest amount will be  $1000 \times 5 / 28 \times 2\% = 3.57$
- ❑ **Calendar Year** - Based on the calendar year i.e., 365 days or 366 days Interest amount will be calculated.

**Step 1 : Display Interest Calculation Reports**

To view Interest Calculated on Bank Account,

Go to **Gateway of Tally > Display > Statements of Accounts > Interest Calculations > Ledger > Bank Account**.

- ❑ Change the period from **1-4-09** to **30-6-09**.

The **Ledger Interest** screen appears as shown below:

| Ledger Interest             |             |             | National Traders                 |        |                    |

Figure 6.46 Ledger Interest

Experiment by changing the period of the above report and notice the difference. Tally.ERP 9 automatically calculates the interest amount! (Remember that the interest is calculated with respect to changes made in the balance figures).

### Practice Exercise

1. Set up interest calculation for **Mutual Trust Loan Account @ 2% per 30-day month**. View the interest for the period **1-4-09 to 30-6-09**.

## 6.6.2 Booking Interest to Ledgers

We have set the interest parameters for ledger accounts. The calculated interest amounts must be recorded using Debit Notes and Credit Notes with Voucher Classes. **Debit notes** are used for Interest receivable and **Credit Notes** for Interest payable.

In Tally.ERP 9, interest is calculated on a **Simple** or **Compound** basis and hence separate classes should be used for them.

Let us now create Voucher Class for Interest Entries.

### Setup :

- Create class for **Debit Notes** Voucher Type, go to **Gateway of Tally > Accounts Info. > Voucher Types > Alter > Debit Note**
  - Tab down to **Name of Class** field.
  - Type **Simple Interest** and press **Enter**.

| National Traders                           |              |
|--------------------------------------------|--------------|
| Class : <u>Simple Interest</u>             |              |
| Use Class for Interest Accounting          | ? <b>Yes</b> |
| Amounts to be treated as Compound Interest | ? <b>No</b>  |

Figure 6.47 Simple Interest Class

- In the **Class** screen, set the other options as shown in the figure above. You will return to the **Debit Note Voucher Type Alteration** screen.
- Type **Compound Interest** for the second class and press **Enter**
- In the **Class** screen, set **Yes** to both **Use Class for Interest Accounting** and **Amounts to be treated as Compound Interest**.
- Accept the **Voucher Type** and return to the **Gateway of Tally**.
- Create two classes, **Simple Interest** and **Compound Interest** for **Credit Notes**.
- Create the following ledger accounts by setting **Cost Centres, Inventory** and **Interest calculation** to **No** –
  - **Interest Accrued** under **Group Indirect Income**.
  - **Interest Due** under **Group Indirect Expenses**.
  - **Interest Receivable** under **Group Current Assets**.
  - **Interest Payable** under **Group Current Liabilities**.

### Step 1 : Create Debit Note Voucher

To book Compound Interest on Balances,

Go to **Gateway of Tally > Accounting Vouchers > press Ctrl+F9 > Debit Note > Class > Compound Interest**.

1. **Date: 30-6-09**
2. Debit **Bank Account** (the amount is automatically filled up with the calculated interest) - **Rs. 1,241.07**.
3. Credit **Interest Accrued** - **Rs. 1241.07**.
4. In the **Narration** field, type **Interest accrued upto 30th June 2009 on balances**.
5. Accept the voucher.

Transactions involving **simple interest** can be recorded using the **Simple Interest voucher class**.

### Practice Exercise

1. Make an entry for booking the compound interest of **Rs. 3,033.33**, due to **Mutual Trust Loan account** upto 30-6-09.

### 6.6.3 Calculating Interest on Invoices

The outstanding interest for every invoice can be calculated for each transaction during a particular period if the bill-wise details is activated for the company and the party.

#### Setup :

For calculating Interest **Transaction-by-Transaction (bill-by-bill)**,

Go to **Gateway of Tally > Accounts Info. > Ledgers > Alter > FirstCom Solutions**.

- ❑ Set **Activate Interest Calculation** to **Yes**.
- ❑ In the **Interest parameters** screen, set **Calculate Interest Transaction-by-Transaction** to **Yes**.
- ❑ Set **Override Parameters for each Transaction** to **No** (This option when set to **No** does not allow you to change interest parameters in voucher/ invoice entry. You can change the interest parameters during an entry when it is set to **Yes**. Any vouchers entered before activating the feature of interest calculation will not be considered unless they are modified)..
- ❑ Specify **Rate** as **1% per 30-Day Month**. The **Interest parameters** screen appears as shown below:

| <u>Interest Parameters</u>                    |              |
|-----------------------------------------------|--------------|
| Calculate Interest Transaction-by-Transaction | ? <b>Yes</b> |
| Override Parameters for each Transaction      | ? <b>No</b>  |
| Rate : <b>1 % per 30-Day Month</b>            |              |

Figure 6.48 Interest Parameters

- ❑ Accept the change and return to the **Gateway of Tally**.

### Step 1 : Display Interest Calculation Report

Go to **Gateway of Tally > Display > Statements of Accounts > Interest Calculations > Ledger > FirstCom Solutions.**

| Ledger Interest                                  |          | National Traders |  |  |                |                | Ctrl + M                  |  |
|--------------------------------------------------|----------|------------------|--|--|----------------|----------------|---------------------------|--|
| Ledger : FirstCom Solutions                      |          |                  |  |  |                |                | 1-Apr-2009 to 31-Dec-2009 |  |
| Date                                             | Ref. No. |                  |  |  | Opening Amount | Pending Amount | Interest                  |  |

- ❑ Press **Y** or **Enter** to accept the screen.

### 6.6.4 Calculating Interest in Advanced Mode

The advanced parameters are particularly useful where interest rates change from time to time. In this section, you will be shown the use of advanced mode.

#### Setup :

- In the **F11: Features (Accounting Features)** of **National Traders**
  - Set **Use Advanced Parameters** to **Yes**
  - Accept the settings and return to the **Gateway of Tally**.

#### Step 1 : Alter Ledger account of Supreme Computers

- Set **Activate Interest Calculations** to **Yes**
- Set **No** to **Calculate Interest Transaction-by-Transaction** to calculate interest based on the rate specified in the ledger master on the cumulative amount (If this option is set to **Yes**, the interest will be calculated for all the transactions individually based on the parameters defined in the master).
- Specify the **Rate** as **10%** on **365-day year** and accept the ledger alteration screen.

#### Step 2 : Display Interest Calculation Report

Go to **Gateway of Tally > Display > Statement of Accounts > Interest Calculations > Ledger > Data Link Technologies**.

The **Ledger Interest** screen as on 31-12-09 appears as shown below :

| Ledger Interest                |             |             | National Traders          |        |             |
|--------------------------------|-------------|-------------|---------------------------|--------|-------------|
| Ledger: Data Link Technologies |             |             | 1-Apr-2009 to 31-Dec-2009 |        |             |
| Balance                        | From:       | To:         | Total Days                | Rate % | Interest    |
| 26,000.00 Dr                   | 31-Mar-2009 | 5-Apr-2009  | 5 days                    | 10 %   | 35.62 Dr    |
| 21,000.00 Dr                   | 5-Apr-2009  | 31-Dec-2009 | 270 days                  | 10 %   | 1,553.42 Dr |
| Grand Total                    |             |             |                           |        | 1,589.04 Dr |

Figure 6.51 Ledger Interest

The opening balance of the debtor Data Link Technologies is Rs. 26,000. The interest is calculated for 5 days (31-3-2009 to 4-4-2009) because we received Rs. 5,000 (on 5-4-2009) and the resultant balance became Rs. 21000. Interest on Rs. 26,000 is displayed as Rs. 35.62 Dr (to be received by us from our debtor) '  $(26000 * 5/365 * 10/100)$ . Likewise, the interest is calculated for the rest of the transactions based on the parameters given in the ledger master.

We have viewed the interest calculation reports in **National Traders**. Let us now shut **National Traders** and select **Indus Enterprises**.

1. Make a receipt entry on 5-4-2009 for Rs. 5,000 received by cheque against the opening balance (of **Rs. 15,000** vide **Bill No. OB New Consumer**).
2. As on 10-4-09, sold 3 nos of **Computer-PIII** @ Rs. 30,000 each to **New Consumer** (vide **Bill No. NB/001**, Credit Period - Nil).
3. As on 16-4-09, sold for 4 nos of **Computer-PIII** @ Rs.30,000 each to **New Consumer** (vide **Bill No. NB/002**, Credit Period - Nil).

#### Setup :

- Create a debtor account **New Consumer**.
  - Ensure that **Maintain balances bill-by-bill** is set to **Yes**
  - Enter the opening balance as **Rs. 15,000 Dr**
  - Enter the bill-wise reference name as **OB New Consumer** and accept the screen.
- Create a Stock item with the following details:

| Item Name     | Stock Group | Category       | Units | Quantity | Rate   | Godown    |
|---------------|-------------|----------------|-------|----------|--------|-----------|
| Computer-PIII | Primary     | Not applicable | Nos   | 10 Nos   | 25,000 | Bangalore |

- Alter Ledger Account of **New Consumer** in Indus Enterprises
  - Set **Activate Interest Calculations** and **(use advanced parameters)** to **Yes**
  - Set **Calculate interest Transaction-by-Transaction** to **No**
  - Set Rate as **10% per 365-day year** on **All Balances** and accept the master.
- Create a Receipt Entry on 5-4-09 for Rs. 5,000
- Create a Sales Invoice on 10-4-09 for 3 Nos of Computer - PIII @ Rs.30,000 each
- Create a Sales Invoice on 16-4-09 for 4 nos of Computer-PIII @ Rs.30,000 each

Select **Second Sales** in the **Sales Ledger** field (Create the ledger using **Alt+C**, if does not exist).

### Step 1 : Display Interest Calculation Report

Go to **Gateway of Tally > Display > Statement of Accounts > Interest Calculations > Ledger > New Consumer**.

| Ledger Interest              |             |             | Indus Enterprises                |        |                  |
|------------------------------|-------------|-------------|----------------------------------|--------|------------------|
| Ledger : <b>New Consumer</b> |             |             | <b>1-Apr-2009 to 17-Apr-2009</b> |        |                  |
| Balance                      | From:       | To:         | Total Days                       | Rate % | Interest         |
| <b>15,000.00 Dr</b>          | 31-Mar-2009 | 5-Apr-2009  | <b>5 days</b>                    | 10 %   | <b>20.55 Dr</b>  |
| <b>10,000.00 Dr</b>          | 5-Apr-2009  | 10-Apr-2009 | <b>5 days</b>                    | 10 %   | <b>13.70 Dr</b>  |
| <b>1,00,000.00 Dr</b>        | 10-Apr-2009 | 16-Apr-2009 | <b>6 days</b>                    | 10 %   | <b>164.38 Dr</b> |
| <b>2,20,000.00 Dr</b>        | 16-Apr-2009 | 17-Apr-2009 | <b>1 days</b>                    | 10 %   | <b>60.27 Dr</b>  |

Figure 6.52 Ledger Interest

Now, in order to calculate Interest using advanced parameters, go to Gateway of Tally and alter the ledger of **New Consumer**

- ❑ Set **Calculate interest Transaction-by-Transaction** to **Yes**
- ❑ Set **Override Parameters for each Transaction** to **No**
- ❑ Enter **Rate** as **10% per 365-day year** on **All balances**
- ❑ Select **Due date of Invoice/Ref** in **Calculate From** field

Calculate From : **Due Date of Invoice/Ref**

| Interest Appl From             |
|--------------------------------|
| Date of Applicability          |
| Date Specified during Entry    |
| <b>Due Date of Invoice/Ref</b> |
| Eff. Date of Transaction       |

Figure 6.53 Interest Calculation screen

- ❑ Accept the screen

Go to **Gateway of Tally > Display > Statement of Accounts > Interest Calculations > Ledger > New Consumer**.

- ❑ Use **Alt+F1** to view the interest calculation report in detailed mode for the period 1-4-2009 to 17-4-2009.

| Ledger Interest       |                                     | Indus Enterprises         |  |                |                | Ctrl + M  |  |

Figure 6.54 Ledger Interest

The interest in this report is reflected separately for every transaction for the specified period. This is because we have defined that the interest has to be calculated transaction-by-transaction in the debtor Master.

To view Interest calculations using **Override Advanced Parameters**,

Go to **Gateway of Tally > Display > Statement of Accounts > Interest Calculations > Ledger > New Consumer**.

- ❑ Set **Override Advanced Parameters** to **Yes** (When Override Advanced Parameters option is set to Yes, it allows you to redefine the interest rate for every transaction. The interest amount is then calculated based on the rate defined while entering the transaction. This overrides the rate defined in the master).
- ❑ Accept the the advanced interest parameters and accept the master
- ❑ Re-accept the 2 Sales Entries and 1 Receipt entry passed earlier.
- ❑ View the **Ledger Interest Calculation** report for the **New Consumer**.

### **Explanations for Advanced Interest Parameters:**

#### **Interest Balances**

You can choose to calculate interest on All balances or Debit Balances or Credit Balances. Why is this required? In case of ledgers grouped under Sundry Debtors to whom we primarily sell but occasionally purchase, we would like to set the interest parameters only for the debit balances and NOT for the credit balances. However, in case of a Bank OD (over draft) account, we can set the interest parameters only on the Credit balances.

#### **Applicability**

This is an advanced parameter. There are two options **Always** and **Past Due**

- **Always** - To calculate the interest from the date of entry (for Bank Accounts)
- **Past Due Date** - To calculate the interest after the credit period ( for Sundry Debtors)

#### **Calculate From**

Tally.ERP 9 displays the following four options in accordance to the screen shown below:

- **Date of Applicability:** Tally.ERP 9 calculates the interest from the date of entry and allows you to enter the 'To' date which is, the date till when the specified rate of interest is valid. For example, you can specify 15% for one month and 18% thereafter.
- **Date Specified During Entry:** This option allows you to define the interest parameters for any specified period. You can give both FROM and TO dates - that is, the date range from which the specified rate of interest will be calculated AND till the date the same rate of interest is valid. For example, you can specify 15% for one month and the subsequent 2 months at 18% and 22% thereafter.
- **Due Date of Invoice / Ref:** The interest is calculated from the Due Date specified in the bill-by-bill details. You will be able to define variable rates for the same period. For example, the surcharge or penalty can be calculated for past due dates.
- **Effective Date of Transaction:** This is similar to the Date of Applicability.

#### **Rounding**

Choose upward, normal or downward rounding as required.

### Practice Exercise

- On 21-08-2009, a Sales Invoices for 15,00,000 Project Sales with two reference namely, **CCA** for **Rs. 3,75,000** and **CA1** for **Rs. 11,25,000**. Calculate Interest from Dates Specified during Voucher Entry.

### Setup :

Go to **Gateway of Tally**, select **National Traders** and shut **Indus Enterprises**

- Go to Ledger alteration screen of **Civic Centre Association** (Customer Account) and set **Activate Interest Calculation** to **Yes**
- Set up the **Interest Parameters** (ensure that the advanced parameters are activated in **F11: Features (Accounting Features)** as shown below:

| Interest Parameters                                                                                                                                                                                                                  |              |

Figure 6.55 Interest Parameters

- In the **Calculate From** field to obtain the option **Date Specified during Entry**, set **Override advanced parameters** to **Yes**. This option is used when the interest is to be calculated at different rates for different periods.
- Options to **Override parameters** when set to **Yes** during voucher/invoice entry, results in the information on interest being provided after the bill-wise details have been entered.

## Step 1 : Create/Alter Sales Invoice

- In the **Interest parameters** subscreen,
  - Set the interest parameters for **New Ref. CCA** of Rs. 3,75,000 as shown below:

| Interest Parameters                                                                                                                                                                                                                                                                                                                                                                                                                                         |              | National Traders | Ctrl + M              |

Figure 6.58 Ledger Interest

## Practice Exercise

1. Make an entry on 21-09-09 in debit note voucher to adjust the interest accrued from **Civic Centre Association (Compound Interest)**.

## 6.7 Budgets & Controls

The main purpose of Budgeting is to control the expenditure. This is possible by creating budgets and comparing the budgeted figures against the actual figures. You can generate reports based on this need and view the variances or differences between the actual and budgeted figures. Tally.ERP 9 allows you to create multiple budgets and also maintain budgets for specific purposes, e.g. for the Bank, for the Head Office, Marketing Budget, Finance Budget etc.

### Setup :

To activate **Budgets**,

- In **F11: Features (Accounting Features)**, set **Maintain Budgets and Controls** to **Yes**

In Tally.ERP 9, you can create **Budgets** for **Groups of ledger accounts** or for **Ledger** accounts individually or for **Cost centres** or all of them

### 6.7.1 Creating a Group Budget

Go to **Gateway of Tally > Accounts Info. > Budgets**

Figure 6.59 Budgets Menu

1. Press **Enter** on **Create** and give the **Name** as **Corporate Budget**.
2. Press **Enter** and select **Primary**. The screen appears as shown below:

| Budget Creation  |                                             | National Traders       |         |              | Ctrl + M                                    |
|------------------|---------------------------------------------|------------------------|---------|--------------|---------------------------------------------|
| Name :           | Corporate Budget                            |                        |         |              | List of Budgets                             |
| Under :          | <input checked="" type="checkbox"/> Primary |                        |         |              | <input checked="" type="checkbox"/> Primary |
| Period of Budget |                                             | Set / Alter Budgets of |         |              |                                             |
| From:            | To:                                         | Groups                 | Ledgers | Cost Centres |                                             |
|                  |                                             |                        |         |              |                                             |

Figure 6.60 Corporate Budget

3. Specify the period of the Budget as **1-4-2009** to **31-3-2010** (The period could be a Month, a Year or any period starting from one date to the other).
4. Under the column **Set/ Alter Budgets of**, type **Yes** under **Groups**.

□ You can create budgets under budgets i.e sub - budgets under each Primary budget.

5. Press **Enter**, the **Group Budget** subscreen appears,

| National Traders                                                           |             |                |        | Ctrl + M                             |

Figure 6.61 Group Budget Subscreen

6. In **Group Budget** subscreen,

- ❑ Select **Indirect Expenses** in the **Account Name** field
- ❑ Select **Not Applicable** in **Cost Centre** field
- ❑ Select **On Closing Balance** in Type of Budget field
- ❑ Enter the budget amount as **Rs. 20,000**. The screen appears as shown below :

| National Traders                                                           |                                         |                    |           |
|----------------------------------------------------------------------------|-----------------------------------------|--------------------|-----------|
| Group Budgets Under 'Corporate Budget'<br>(From 1-Apr-2009 to 31-Mar-2010) |                                         |                    |           |
| Account Name                                                               | Cost Centre                             | Type of Budget     | Amount    |
| Indirect Expenses                                                          | <input type="checkbox"/> Not Applicable | On Closing Balance | 20,000.00 |

Figure 6.62 Group Budgets

The **Group Budget** screen comprises of the following :

- ❑ **Account Name:** It is compulsory to select Groups for which the budget is being defined. You can select any number of groups.
- ❑ **Cost Centres:** Tally.ERP 9 displays the list of Cost Centres available. Select the required Cost Centre. However, if you select Not Applicable then the budget will not be applicable to any particular cost centre but for the company as a whole.
- ❑ **Type of Budget:** Under the Type of Budget a pop-up of two different kinds of Budgets appear, namely **On Closing Balance** and **On Nett Transactions**.
- ❑ **On Closing Balance:** This is used for comparing the closing balance figures in the final statements.
- ❑ **On Nett Transactions:** This is used for comparing transactions against budgets.

7. Press **Enter** repeatedly and accept the budget creation screen.

### Practice Exercise

1. Create another Budget with the following Details
  - ❑ **Budget Name - New Corporate Budget**
  - ❑ **Group - Indirect Expenses Group**
  - ❑ **Type of Budget - On Nett Transactions**
  - ❑ **Period - 1-4-2009 to 31-3-2010**
  - ❑ **Budget Amount - Rs. 500.**
  - ❑ **Set/Alter Budgets of Ledgers and Cost Centres to No.**

### 6.7.2 Display Budgets and Variances for Group Budget

Budgets can be displayed in new columns in most financial statements like the Balance Sheet and Profit & Loss Account. The Trial Balance and Group Summaries have a Budget Variance button **Alt+B** that is activated even when there is a single budget set up for the company.

In the earlier section, we have created **Corporate Budget**. Let us now view the report displaying the Budget values and the variances (difference between actual transactional values and the budgeted figures) for that Budget.

Before displaying the **New Corporate Budget** in the Trial Balance, press **F12: Configure** and set **Show Transactions, Show Nett transactions only to Yes** and **Show Closing Balance to No**, as the type of budget selected is **On Nett Transactions**.

Go to **Gateway of Tally > Display > Trial Balance**

- Press **Alt+B** (or **Budget Variance** button from the button bar)
- Tally.ERP 9 displays the **Budget Analysis** screen and the list of Budgets that have been created, select **Corporate Budget**

The Report appears as shown below :

| Trial Balance       | National Traders                                                  |           | National Traders                                         |              | National Traders                                                           |            | Ctr       |

Figure 6.63 Trial Balance with Budget Figures

The Budget amount is Rs.20,000 and Actuals is Rs. 6,722.83 (which is 33.61% of budgeted amount). The variance (difference) is also displayed i.e Rs.13,277.17 which is 66.38% below the budgeted amount.

**Apportionment of budget specified for periods longer than a month:**

- ❑ **Group Budgets** do not get apportioned. Hence Budget for Current Assets will not automatically flow to the sub-groups.
- ❑ **Ledger Budgets** get apportioned for each month.
- ❑ In **Closing Balances Budget**, each month will have the same budget value except that the actual Opening Balance is also taken into account.
- ❑ **Nett transactions Budgets** specified for a period get equally apportioned over the period.

### 6.7.3 Altering a Budget

Like any other master in Tally.ERP 9, budget can also be viewed in alteration mode.

Go to **Gateway of Tally > Account Info. > Budget > Alter**

- ❑ Select **New Corporate Budget** from the **List of Budgets**
- ❑ Press **Enter** on the required field and make necessary changes

### 6.7.4 Deleting a Budget

To delete a Budget,

Go to **Gateway of Tally > Account Info. > Budget > Alter**

- ❑ Select the required Budget from the **List of Budgets**
- ❑ Press **Alt+D** to delete it.

### 6.7.5 Creating a Ledger Budget

Create a new Budget – **Corporate Budget (Ledger)** for the period **1-4-2009 to 31-3-2010**

To create a Budget for Ledger Accounts,

Go to **Gateway of Tally > Accounts Info. > Budgets > Create**

1. Type **Corporate Budget (Ledger)** in the **Name** field
2. Select **Primary** in **Under** field
3. Specify the period of the Budget as **1-4-2009 to 31-3-2010**
4. Under the column **Set/ Alter Budgets of**, type **Yes** under **Ledgers**
5. Enter the budget details for ledgers as shown below:

| National Traders                                                                     |                                         |                    |        |

|                 |                                                                                                 |                  |                                                                               | </       |                                                                                                          |          |  |

Figure 6.65 Corporate Budget (Ledger) Variance

The Budget amount for Office Costs is Rs. 250, Closing Balance and the Actuals is Rs. 635 (which is 254% of budgeted amount of Rs. 250 -  $[(254/100) \times 250]$ ). The variance (difference) is also displayed i.e Rs. 385 which is 154% in excess of the Budgeted amount of Rs. 250.

### Practice Exercise

#### 1. Create an **Office budget** under **Primary Budget**.

- ❑ Specify the period of the **Budget** as **1-4-09** to **31-12-09**.
- ❑ Select **Yes** for **Groups**.
- ❑ Enter the details as given below:

| Group             | Cost Centre    | Type of Budget      | Amount   |
|-------------------|----------------|---------------------|----------|
| Capital Account   | Not Applicable | On Closing Balances | 1,50,000 |
| Loans (Liability) | Not Applicable | On Closing Balances | 50,000   |
| Fixed Assets      | Not Applicable | On Closing Balances | 1,00,000 |
| Current Assets    | Not Applicable | On Closing Balances | 1,00,000 |

- ❑ Press **Enter** on the next blank field and accept the settings for **Groups**.
- ❑ Select **Yes** for **Ledgers** and enter the details as given below:

| Ledger            | Cost Centre    | Type of Budget       | Amount |
|-------------------|----------------|----------------------|--------|
| Salaries          | Not Applicable | On Nett Transactions | 25000  |
| Wages             | Not Applicable | On Nett Transactions | 10000  |
| Conveyance        | Not Applicable | On Nett Transactions | 4500   |
| Office Costs      | Not Applicable | On Nett Transactions | 12000  |
| Profit & Loss A/c | Not Applicable | On Closing Balance   | 50000  |

#### 2. Displaying Budgets and Variances

- ❑ Go to **Gateway of Tally > Balance Sheet**, specify **Date** as **31-12-09**
- ❑ Select the **New Column** Button and Enter the details as given below:
  - **From: 1-4-09**
  - **To: 31-12-09**
  - **Currency: Base Currency**
  - **Method of Stock Valuation: Default**
  - **Type of Value to show: Office Budget**
  - **Show Variances: No**

The **Balance Sheet** with the **Office Budget** column appears as shown below:

| Balance Sheet                 | National Traders                                 |                                                        | Ctrl + M |

Figure 6.66 Balance Sheet with Budget Figures

Alternatively, you can view the above budget from Trial Balance also,

Go to **Gateway of Tally > Display > Trial Balance (National Traders)**

- ❑ Specify the period as **31-12-09**.
- ❑ Select **Indirect Expenses** and press **Enter**.
- ❑ Press **F12: Configure** and set
  - **Opening and Closing Balances to No**
  - **Transactions and Nett transactions to Yes**
  - **Set Show Percentage to No**
- ❑ Use **Alt+R** to hide the ledgers which are not appearing as per this screen (Advertising, Bank charges, Forex Gain/Loss and Interest due).
- ❑ Use the **Budget Variance** button to see the **Office budget figures** and the **variances**.

The **Transaction Budgets for Indirect Expenses** appears as shown below:

| Group Summary |                                                                                     | National Traders                                                              |                                                                                              | Ctrl + M |  |

Figure 6.67 Office Budget Variance

From this report we can understand that the budget for conveyance is **Rs. 4,500** on **Nett Transactions** while our Actuals is Rs. 70. Therefore, we have a balance of **Rs. 4,430**.

- Alter **Office Budget** and change the amount for **Conveyance ledger** to **Rs. 50** and view the report.

Figure 6.68 Budget Variance

4. Create a new budget named as **Office Balances Budget** for the period **1-4-2009 to 31-12-2009**.

| Group             | Cost Centre    | Type of Budget     | Amount   |
|-------------------|----------------|--------------------|----------|
| Capital Account   | Not Applicable | On Closing Balance | 2,50,000 |
| Loans (Liability) | Not Applicable | On Closing Balance | 1,50,000 |
| Fixed Assets      | Not Applicable | On Closing Balance | 1,50,000 |
| Current Assets    | Not Applicable | On Closing Balance | 1,20,000 |

### Budget figures for Ledgers:

| Ledger                | Cost Centre    | Type of Budget     | Amount |
|-----------------------|----------------|--------------------|--------|
| Salaries              | Not Applicable | On Closing Balance | 20,000 |
| Wages                 | Not Applicable | On Closing Balance | 10,000 |
| Conveyance            | Not Applicable | On Closing Balance | 4,500  |
| Office Cost           | Not Applicable | On Closing Balance | 15,000 |
| Profit & Loss Account | Not Applicable | On Closing Balance | 50,000 |

5. Display the **Balance Sheet** as on **31-12-09** with a new column for Office Balances Budget.
6. Display variances for **Indirect Expenses** from the **Office Balances Budget**.

## 6.8 Scenario Management

A scenario can be understood as an imagined sequence of events. In other words, if some action is carried out, we can foresee the result of carrying out that action. In today's context of managing businesses, Tally.ERP 9's Scenario Management is an effective management tool that enables comparison of actual as well as projected provisional figures of accounts related information.

### Advantage of using Scenarios

Scenario Management is useful for generating reports with provisional figures as the entries are actually not passed through the main books of accounts. It is also useful for forecasting by entering forecast figures in provisional vouchers and including them to get forecasted figures.

For example, it is 30th June and you want to view the Balance Sheet as of today but the salaries for the month of June are not paid until the first week in July. There is, therefore, a large liability, which would not be reflected in the Balance Sheet as on 30th June.

Through Tally.ERP 9's scenario, you can make the required provisional entry and retain it even after printing the generated report because the entry will not reflect in your books of accounts.

In order to explore the Scenario Management tool you need to first make entries which will not affect the books of accounts. Tally.ERP 9 provides the vouchers: Reversing Journal, Memorandum Voucher and Optional vouchers for this purpose. You have to then create a scenario for the vouchers to be used and finally, generate the required report. For example, Balance Sheet, Trial Balance, etc. You have to use the New Column facility to generate a new column with the Scenario details.

### 6.8.1 Creating a Scenario

#### Setup :

Ensure that you are in **National Traders**

- In **F11: Features (Accounting Features)** set **Use Rev. Journals and Optional Vouchers** to **Yes**

### Reversing Journals

Reversing Journal is a separate voucher type - like a journal voucher. Reversing Journal, similar to journal, is an adjustment entry, but unlike a journal it reverses its effect in the books of accounts after one day (Tally.ERP 9 allows you to specify the date of applicability at the time of entry as per your requirements (any number of days, or weeks, etc.).

By default, Reversing Journal entries do NOT affect your books of accounts. They are non-accounting vouchers. Tally.ERP 9 does not post these entries to ledgers. It stores them in a separate register called Reversing Journal Register. For example, you make a reversing journal debiting a customer account and crediting miscellaneous income. This entry will not appear in both the ledgers. It is recorded in the Reversing Journal Register.

Reversing journals are special journals which are effective only when called for in reports, like the Balance Sheet, Trial Balance, etc. Applicability is specified during the entry and they affect the reports only till that specified date. Reversing Journals are used in interim reporting in the course of the financial year where accruals are required to be reported. These accruals are usually short term and are cleared in the subsequent period. However, to get a proper perspective, decision makers require the reports with full impact of all aspects and transactions.

Another example is the provision for depreciation. Depreciation is usually provided for at the end of the year. However, for monthly reporting, including it would give a more accurate status.

In order to include Reversing Journals in Reports, you need to create Scenarios.

### Memorandum Vouchers

Like Reversing Journal, Memorandum is a separate voucher type which is a non-accounting voucher. The entries made using it will not affect your books of accounts. Tally.ERP 9 does not post these entries to ledgers but stores them in a separate Memo Register. You can alter and convert a Memo voucher into a regular voucher type when you decide to pass an entry in your books. However, if you wish to include these entries temporarily, you can do so, by creating Scenarios.

### Optional Vouchers

Optional voucher is NOT a separate Voucher Type. Several voucher types in Tally.ERP 9 (Payment, Receipt, Sales, etc.) can be marked optional. Optional vouchers are non-accounting vouchers, i.e, the entries made using it will not affect your books of accounts. Tally.ERP 9 does not post these entries to ledgers but stores them in a separate Optional Register. You can alter and convert an Optional voucher into a regular voucher when you decide to bring the entry into your books. However, if you wish to include these entries temporarily, you can do so by creating Scenarios.

Let us now create a Scenario. We have a liability of Salaries - Rs. 45,000, to be accounted for as on February 7, 2010. However, we need to generate a report as on January 31, 2010. Since the entry of 7th February will not reflect in our books of accounts as on 31-1-2010, we will be making an incorrect analysis. To temporarily include the entry of 7th February 2010 we have to create a scenario.

To create a scenario,

Go to **Gateway of Tally > Accounts Info. > Scenarios > Create** and enter the following details:

1. **Name:** New Scenario
2. **Include Actuals:** Yes
3. **Exclude Forex Gain / Loss Calculations:** No (this appears if Multi-currency is activated and Unadjusted Forex Gain/Loss appears in the reports)
4. **INCLUDE:** Select **Bank Payment (Optional Vouchers only)**, Only provisional vouchers are available for selection.
5. **EXCLUDE:** Select **End of List** (displays the list of vouchers that you DO NOT want to affect this scenario) and press **Enter**.
6. **Accept** the screen. The screen appears as shown below:

| Scenario Creation                                   |  | National Traders   |                        |
|-----------------------------------------------------|--|--------------------|------------------------|
| Name : <b>Scenario One</b>                          |  | Date               |                        |
| Include Actuals ? <b>Yes</b>                        |  | Dec, 2009          |                        |
| EXCLUDE Forex Gain/Loss Calculations ? <b>No</b>    |  |                    |                        |
| EXCLUDE Inventory Tracking Calculations ? <b>No</b> |  |                    |                        |
| <b>Include :</b>                                    |  | Date of Last Entry |                        |
| <input type="checkbox"/> End of List                |  | 31-Dec-2009        |                        |
| <b>List of Voucher Types</b>                        |  |                    |                        |
| <input type="checkbox"/> <b>End of List</b>         |  |                    |                        |

Figure 6.71 Bank Payment Voucher

The procedure to enter a payment voucher does not change, you can mark it as **optional** by clicking on the **Optional** button or use of **Ctrl + L** keys. Accept the entry and return to the Gateway of Tally.

Now, verify whether the payment entry is appearing in the ledger Salaries or not.

Go to **Gateway of Tally > Display > Account Books > Ledger > Salaries**

- Press **Alt + F2** to view the entries for the entire year **1-4-2009 to 31-3-2010**.

There should be only one entry for Rs. 2,500 in the month of June i.e., the optional vouchers do not affect the books of accounts and are displayed only in Day Book as Optional Vouchers. To view Day Book,

Go to **Gateway of Tally > Display > Day Book**

- Press **Alt + F1** to view in detailed mode, you will find the **Optional vouchers** are displayed in *italics* as shown below:

| Day Book  |                 | National Traders |              | Ctrl + M        |               |

Figure 6.72 Day Book

This voucher is stored in the Optional Voucher Register. To view **Optional Voucher Register**, go to **Gateway of Tally > Display > Exception Reports > Optional Vouchers**.

Now let us learn how to temporarily include this optional voucher transaction in our books for generating provisional reports. Since we have credited the deposit ledger account, proceed to view the Cash/Bank Books statement.

Go to **Gateway of Tally > Display > Account Books > Cash/Bank Book(s)** and the report displays these values as on 31-1-2010.

1. Petty Cash – Rs. 10,695 Dr.
2. Bank Account – Rs.1,39,961.07 Dr
3. Deposit Account – Rs.46,000 Dr

- Press **Alt+C** (New Column) and specify the details as shown below:

|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |
|                   |                                                                           |                  |                                                                                |          |  |

Figure 6.74 Cash/Bank Summary

The Deposit Account shows a debit balance of **Rs. 46,000** excluding the Optional Voucher. On the inclusion of the **Optional Bank Payment** entry of **Rs. 45,000**, there is a debit balance of **Rs. 1,000** ( $46,000 \text{ Dr} - 45,000 \text{ Dr} = \text{Rs. } 1,000 \text{ Dr}$ ).

### 6.8.2 Alterating a Scenario

To alter a scenario, go to **Gateway of Tally > Account Info. > Scenario > Alter**

- ❑ Select **New Scenario from the List of Scenarios**
- ❑ Under **Include**, reselect **Payment (Optional Vouchers only)**, select **Receipt (Optional Vouchers only)** and accept the screen.

### 6.8.3 Deleting a Scenario

To delete a Scenario, go to **Gateway of Tally > Account Info. > Scenario > Alter**

- ❑ Select **New Scenario** and press **Alt+D**

### Practice Exercise

1. Create Scenarios in **Indus Enterprises** using Memorandum Vouchers, Reversing Journals and other Optional Vouchers and experiment !

### Points to Remember

- ❑ Bill-wise details are specified while creating vouchers to allocate payments to invoices. The Outstandings Statements can be generated using bill-wise details.
- ❑ A Cost centre is a unit of an organisation to which expenses as well as incomes are allocated. Cost categories are used when the organisations have to allocate resources to parallel sets of cost centres.
- ❑ Accounting ledgers can be automatically allocated to transactions with the help of Voucher Class facility. The voucher class also enables inter-godown transfer of stocks, adjustment of forex gain / loss, interest calculations etc.
- ❑ The Cost centre class enables automatic allocation of cost centres, while recording transactions.
- ❑ Tally.ERP 9's multi-currency feature allows the recording of transactions involving more than one currency and also helps in adjusting the foreign exchange gain/ loss.
- ❑ Bank reconciliation refers to the reconciliation of company's bank accounts with the bank statement. In Tally.ERP 9 the vouchers can be reconciled by just entering the appropriate dates in the reconciliation screen.
- ❑ In Tally.ERP 9, the interest can be calculated by specifying the interest parameters in the ledgers masters, which can be altered while entering the transactions. The interest can be recorded using debit / credit notes with the help of relevant voucher classes.
- ❑ Budgets are used to control the expenditure. In Tally.ERP 9 budgets can be created for any account group, ledger and cost centre to generate a budget variance statement.
- ❑ Scenario reports are used for the comparison of actual as well as projected provisional figures of accounts related information.

## Lesson 7: Advanced Inventory in Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to

- ❑ Record orders placed/received
- ❑ Make a reorder analysis of inventory
- ❑ Create and maintain batch wise details, bill of materials and price lists
- ❑ Display reports on various stock valuation methods and inventory ageing analysis
- ❑ Record zero valued entries
- ❑ Record transactions using different actual and billed quantities

### 7.1 Order Processing

Order Processing refers to placing orders with suppliers for purchasing from them or receiving orders from customers for the purpose of selling.

In Tally.ERP 9, Order Processing is linked to Inventories. Using Order processing you can:

- ❑ Track the order position of a stock item;
- ❑ Know whether the goods ordered have arrived or not;
- ❑ Know whether the orders have been delivered on time and the reasons for the delay if any.

In this lesson, you will learn the method of recording and linking purchase orders to purchase invoice and sales orders to sales invoices. You will also learn how to display outstanding orders and the effect of orders on stocks.

**Setup :**

Ensure that you are at the Gateway of Tally of **National Traders**. In the **F11: Features (Inventory Features)**, activate the following features:

- ❑ **Allow Purchase Order Processing.**
- ❑ **Allow Sales Order Processing.**
- ❑ **Use Tracking Numbers (Delivery / Receipt Notes)**

- ❑ *Orders do not affect financial records nor do they update inventories.*
- ❑ *In this section, set the **Tracking Numbers** to **Not Applicable**.*

**7.1.1 Purchase Order Processing**

*Raise a Purchase Order on 15-12-2009 on Navketan Bricks (vide Order No. 1) for 5,000 pcs of Bricks @ Rs.3 /brick. (Godown - Warehouse). The due date is 26-12-2009 and additional Freight charges @ 3% is applicable.*

**Setup:**

- ❑ Create a Supplier - **Navketan Bricks** Under **Sundry Creditors** with **Maintain Balances bill-by-bill** set to **Yes**.
- ❑ Create a **Stock Item - Bricks** under **Building Materials** Stock Group, and select **Not Applicable** for the Stock category and specify the unit of measure as **Pcs** (If not listed create using **Alt+C**).
- ❑ Press **F12: Purchase Order Configuration** and ensure that:
  - **Accept Supplementary Details** is set to **No**.
  - **Complete Accounting Allocations in Order/Delivery Note** is set to **Yes**.
  - **Use Common Ledger for Item allocation** is set to **No**.

**Step 1: Create Purchase Order**

Go to **Gateway of Tally > Inventory Vouchers > F4: Purc. Order**.

1. **Date: 15-12-09.**
2. **Party's A/c Name: Navketan Bricks**
3. **Order No: 1** This particular Order No. field is an additional field to record the order number if different from the voucher number.
4. **Name of the item: Bricks.** Press **Enter** and the **Item allocation** sub-screen appears.
  - ❑ **Due on: 26-12-09** (It is the due date for the delivery of the item. This will enable the monitoring of outstanding deliveries. The order can be split for delivery on different dates).
  - ❑ **Location: Warehouse.** (Only when the multiple location feature is active, this field is required to be given, else it does not appear.)

- The completed **Stock Item Allocation** sub-screen appears as shown below :

Figure 7.1 Item Allocation for Bricks

- ### 7.1.2 Altering a Purchase Order

Go to **Gateway of Tally > Display > Day Book > F4: Chg Vch** and select **Purchase Orders** or  
Go to **Gateway of Tally > Display > Inventory Books > Purchase Order Book**.

### 7.1.3 Sales Order Processing

*Enter a Sales Order on 16-12-2009 on WinLab Technologies (vide Order No. WT/5) for 4,000 pcs (godown - Warehouse) of Bricks @ Rs. 5 /brick. The due date is 27-12-2009 and tax @ 17.5% is applicable.*

#### Step1: Create Sales Order

Go to **Gateway of Tally > Inventory Vouchers > F5: Sales Order.**

1. **Date: 16-12-09.**
2. **Party's A/c Name: WinLab Technologies**
3. **Order No:** Enter **WT/5** - The voucher number is automatically displayed here but you are allowed to change it, because this particular Order No. field is for the customer's order number which is most likely to be different from the voucher number.
4. **Name of the item: Bricks.** Press **Enter** and the **Item allocation** sub-screen appears.
  - **Due on: 27-12-09.** The due date for delivery of the item. This will enable monitoring of out-standing deliveries. The order can be split for delivery on different dates.
  - **Location: Warehouse.**
  - **Quantity, Rate and Amount – 4000 Pcs @ 5 per Pc** allocate to **Sales Account** (create it if not present)
5. Press **Enter** on the blank field to take the cursor to the tax/ expense field.
6. Select **Tax @ 17.5%** (Create it under **Duties & taxes** to be charged on the total sales).
7. Type the narration as **Sales Order entry as on 16th December 2009.**

The completed **Sales Order** appears as shown below :

| Inventory Voucher Creation                                                  |           | National Traders |         | Ctrl + M                                                      |

| Party's A/c Name : WinLab Technologies<br>Current Balance : 13,50,000.00 Dr |           | Order No. : WT/5 |         |                                                               |
| Name of Item                                                                | Quantity  | Rate per         | Disc. % | Amount                                                        |
| Bricks                                                                      | 4,000 Pcs | 5.00 Pcs         |         | 20,000.00                                                     |
| Tax @ 17.5%                                                                 |           | 17.50 %          |         | 3,500.00                                                      |
| Narration:<br>Sales Order Entry as on 16th December 2009                    |           |                  |         | <div>4,000 Pcs</div> <div>Accept ?</div> <div>Yes or No</div> |

Figure 7.2 Sales Order Entry

8. Press **Y** or **Enter** to accept the screen and return to the Gateway of Tally.

#### 7.1.4 Altering a Sales Order

To Alter a Sales Order,

Go to **Gateway of Tally > Display > Day Book > F4: Chg Vch** and select **Sales Orders** or Go to **Gateway of Tally > Display > Inventory Books > Sales Order Book**.

#### 7.1.5 Display Order Position

Now that we have raised one purchase order and one sales order, let us view the order position to know the amount of stock that is in the process of order both inward and outward:

Go to **Gateway of Tally > Stock Summary**.

- ❑ Press the **F7: Orders** button or press **Alt + F7**.
- ❑ Select **Sales Orders Outstanding**, set **No** to **Use Due orders only?**

- ❑ Select **Building Materials** field and drill down to the **Order Details** screen, by pressing enter twice.
- ❑ In the **Sales Order Outstanding** screen. Press **Alt+F1** to view the report in detailed format.

The **Order Details** screen appears as shown below :

| Order Details             |              |                     | National Traders          |                  |               | Ctrl + M  |                  |  |
|---------------------------|--------------|---------------------|---------------------------|------------------|---------------|-----------|------------------|--|
| Item: Bricks              |              |                     | 1-Apr-2009 to 20-Dec-2009 |                  |               |           |                  |  |
| Sales Orders              |              |                     |                           |                  |               |           |                  |  |
| Date                      | Order Number | Name of Party       | Ordered Quantity          | Balance Quantity | Rate (Disc %) | Value     | Due on (overdue) |  |
| Sales Orders Outstanding: |              |                     |                           |                  |               |           |                  |  |
| 16-Dec-2009               | WT/5         | WinLab Technologies | 4,000 Pcs                 | 4,000 Pcs        | 5.00          | 20,000.00 | 27-Dec-2009      |  |
| 16-Dec-2009 Sales Order 1 |              |                     | 4,000 Pcs                 |                  |               |           |                  |  |
|                           |              |                     | 4,000 Pcs                 | 4,000 Pcs        | 20,000.00     |           |                  |  |

Figure 7.3 Order Details screen

The Order Details report is generated as on December 20, 2009. Change the period to a different month and observe what happens. You will discover that the entry appears in the report based on the due date given in the order.

- ❑ Press **F12: Configure** and set **Yes** to all the fields.

The report now shows the **Outstanding positions** of the Sales and Purchase Orders for the stock item **Bricks**.

| Order Details                       |              |                     | National Traders          |                  |               | Ctrl + M  |                  |  |
|-------------------------------------|--------------|---------------------|---------------------------|------------------|---------------|------------------------------------------------------------------------------------------------|------------------|--|

Figure 7.4 Order Details screen

- The **Sales Order Outstanding** screen, by default will show the report as on last date of the voucher entry. Hence, change the period to view the report of the desired period
- The value and magnitude of information changes online depending on the date filter you use. This is Tally.ERP 9's Power of Real Time Report Generation.

### 7.1.6 Display Columnar Orders & Stock Details

To view Columnar Order Position, return to the **Stock Summary** screen.

- Press **F1: Detailed** and view the report as on **31-12-2009**.
- Press **Alt + N** or **Auto-Column** Button, select **Orders & Stock Details**.
- Remove **Rate** and **Value** from display, by configuring it in **F12: Configuration** (This will enable all the columns to fit in one screen).

The screen appears as shown below :

| Stock Summary              |                                                                          | National Traders                                                                                |                                                                                 |                                                                                                    | Ctrl + M                                                                 |  |

Figure 7.5 Stock Summary

- You may further drill down each column to view it in detail.
- In the Stock Summary screen, you can even bring up a new column using the New Column button and get more options for more details.
- Experiment with the different Types of Values to get familiar with them and Return to the Gateway of Tally.

### 7.1.7 Adjusting Orders

Orders are adjusted at the time of raising delivery notes and invoices.

#### Step 1: Create Purchase Invoice

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase > select As Invoice.**

1. In the **Supplier Invoice No.** field enter **NB/6**.
2. **Date: 26-12-09.**
3. Press **F12: Configure** and set **Accept Supplementary Details** to **Yes**.
4. **Party's A/c Name: Navketan Bricks.**
5. Press **Enter** to view the **Receipt Details** screen as shown below:

| Party Details                      |                    | National Traders |             | Ctrl + M    |
|------------------------------------|--------------------|------------------|-------------|-------------|
| Purchase No. 11                    |                    |                  |             | 26-Dec-2009 |
| Supplier Invoice No. : NB/6        | Date : 26-Dec-2009 |                  |             | Saturday    |
| Party's A/c Name : Navketan Bricks |                    |                  |             |             |
| Current Balance :                  |                    |                  |             |             |
| Name of Item                       | Quantity           | Rate             | per Disc. % | Amount      |
|                                    |                    |                  |             |             |

 1      15-Dec-2009

**Supplier's Details**  
 Supplier : Navketan Bricks  
 Address :  
 Sales Tax No. :

Figure 7.6 Receipt Details screen

6. In the **Receipt Details** screen, select **1** from the **List of Orders** in the **Order No(s)** field and accept the screen.
7. The stock item **Bricks** appears automatically. Press **Enter** and the **Item Allocations** sub-screen is displayed with the quantity details.
8. **Tracking number: Not Applicable** (as goods are accompanying the bill) and re-accept the order number.
9. Select **Purchases** in the **Accounting Allocation** screen.
10. Select **Freight** at **3%** on the item values.
11. Enter the rest of the details and accept the screen.

### Practice Exercise

1. Enter a sales invoice on 27-12-2009 and link it to the sales order of 16-12-2009 and view the Orders position (including the cleared orders).
2. Raise a Purchase Order on 20-12-2009 on **Navketan Bricks** with the order number - **PO/001**. Give the due date as 28-12-2009 and quantity as 4500 pcs (godown - Warehouse) @ Rs. 4 per brick piece. Add Freight charges @ 3%.
3. Enter another Purchase Order on 26-12-2009 on **Navketan Bricks** with the order number as **PO/002**, due date as 31-12-2009 and quantity as 5500 pcs (godown - Warehouse) @ Rs. 4 per Pc. Add Freight charges @ 3%.
4. On 22-12-2009 and 27-12-2009 raise two Sales Orders on **WinLab Technologies (WT/001 and WT/002)**. Give the due date as 29-12-2009 and 3-1-2010 and quantity as 3000 pcs and 4,250 pcs respectively @ Rs. 6 per Pc. Tax @ 17.5% for both orders.
5. View the Order Position and then return to the Gateway of Tally.

## 7.2 Reorder Levels

Reorder level is the level on reaching which an order has to be placed for a stock item. The importance of a reorder level arises from the desire to have sufficient stocks to service customer orders and at the same time not to have unnecessarily high stocks. Therefore, the points to be considered in deciding reorder levels are:

- ❑ Lead time for suppliers to deliver stock
- ❑ Delivery time specified by the customer
- ❑ The stock in hand to satisfy orders in the meantime.

### 7.2.1 Defining Reorder Levels

Reorder Levels can be defined in either **Simple Mode** or **Advanced Mode**.

Go to **Gateway of Tally > Inventory Info. > Reorder Levels**

- ❑ Select **Building Materials** and press **Enter**
- ❑ The **Specify Reorder Levels** screen appears where all the Stock Items (Bricks, Cement and Steel) under the Stock Group (Building Materials) are displayed.

The **Simple Reorder Level** appears as shown:

| Specify Reorder Levels                  |  | National Traders          |                        | Ctrl + M |
|-----------------------------------------|--|---------------------------|------------------------|----------|
| Under Group : <b>Building Materials</b> |  | 1-Apr-2009 to 31-Dec-2009 |                        |          |
| Name of Item                            |  | Reorder Quantity          | Minimum Order Quantity |          |
| <b>Bricks</b>                           |  |                           |                        |          |
| <b>Cement</b>                           |  |                           |                        |          |
| <b>Steel</b>                            |  |                           |                        |          |

Figure 7.7 Simple Reorder Level screen

*The Reorder Level screen appears based on the books beginning from and the date of last entry.*

- ❑ Click **Alt+R** : **Adv Reorder** button
- ❑ Click **Alt+M** : **Adv Min Qty** button

*The following buttons are used in **Reordering**:*

- ❑ **Ctrl + F4**: **New Parent** (to change the Stock Group).
- ❑ **Alt + R** : **Simple Reorder** (toggles with Advanced Reorder).
- ❑ **Alt + M**: **Simple Minimum Quantity** (toggles with Advanced Minimum Quantity).

*The latter two buttons allow you to define the reorder levels using either simple parameters or advanced parameters.*

The **Advanced Reorder Level** screen appears as shown below :

| Specify Reorder Levels                  |                  | National Traders                                                  |          | Ctrl + M               |                                                                   |          |
|-----------------------------------------|------------------|-------------------------------------------------------------------|----------|------------------------|-------------------------------------------------------------------|----------|
| Under Group : <b>Building Materials</b> |                  | 1-Apr-2009 to 31-Dec-2009                                         |          |                        |                                                                   |          |
| Name of Item                            | Reorder Quantity | Advance Parameter for Reorder Level<br>(Consumption for the last) |          | Minimum Order Quantity | Advance Parameter for Minimum Order<br>(Consumption for the last) |          |
|                                         |                  | Period                                                            | Criteria |                        | Period                                                            | Criteria |
| <b>Bricks</b>                           |                  |                                                                   |          |                        |                                                                   |          |
| <b>Cement</b>                           |                  |                                                                   |          |                        |                                                                   |          |
| <b>Steel</b>                            |                  |                                                                   |          |                        |                                                                   |          |

Figure 7.8 Advanced Reorder Level screen

*The **Advanced parameters** allow you to specify the quantities for the **Reorder level** and the **minimum order quantity**. The reorder and minimum order quantity is defined based on **consumption patterns**.*

***Consumption patterns** are decided based on a stipulated time period. Tally.ERP 9 allows you to choose from the time parameters of **Days, Weeks, Months** and even **Years**.*

- ❑ Set the **Reorder Level** and **Minimum Order Quantity** for the stock item **Bricks** using advanced partameters as shown below :

| Specify Reorder Levels |                  | National Traders                                                  |          |                        |                                                                   | Ctrl + M                  |  |
|------------------------|------------------|-------------------------------------------------------------------|----------|------------------------|-------------------------------------------------------------------|---------------------------|--|
| Under Group            |                  | : Building Materials                                              |          |                        |                                                                   | 1-Apr-2009 to 31-Dec-2009 |  |
| Name of Item           | Reorder Quantity | Advance Parameter for Reorder Level<br>(Consumption for the last) |          | Minimum Order Quantity | Advance Parameter for Minimum Order<br>(Consumption for the last) |                           |  |
|                        |                  | Period                                                            | Criteria |                        | Period                                                            | Criteria                  |  |
| Bricks                 |                  |                                                                   |          |                        |                                                                   |                           |  |
|                        | 4,500 Pcs or     | 5 Days                                                            | Higher   | 1,500 Pcs or           | 5 Days                                                            | Higher                    |  |
| Cement                 |                  |                                                                   |          |                        |                                                                   |                           |  |
|                        | [REDACTED]       |                                                                   |          |                        |                                                                   |                           |  |
| Steel                  |                  |                                                                   |          |                        |                                                                   |                           |  |

Figure 7.9 Reorder Level screen

- ❑ Set the **Reorder level** at **4,500** pcs (user-defined) or you may also consider the consumption pattern for the last 5 Days and accept the value computed as the Reorder Level.
- ❑ Press **Ctrl+A** to accept the screen and return to the Gateway of Tally.

***Consumption patterns** can be given only if you specify a user-defined quantity as the **Reorder level** and **Minimum Order quantity**. Tally.ERP 9 then compares the two values and considers the lower or higher of the two figures as per our specifications.*

## 7.2.2 Display Reorder Status

We have so far defined the Reorder Levels. However, since the actual analysis is possible only through the Reorder Status report, let us view the same.

Go to **Gateway of Tally > Display > Statements of Inventory > Reorder Status**

- ❑ Select **Building Materials**
- ❑ Press **F2** and change the period from **1-4-2009** to **30-1-2010**

The **Inventory Reorder Status** screen appears as shown below :

| Inventory Reorder Status National Traders Ctrl + M                       |               |                     |                 |                |                |            |                 |                    |  |
|--------------------------------------------------------------------------|---------------|---------------------|-----------------|----------------|----------------|------------|-----------------|--------------------|--|
| Items Under : <b>Building Materials</b> as at 30-Jan-2010<br>(all items) |               |                     |                 |                |                |            |                 |                    |  |
| Name of Item                                                             | Closing Stock | Purc Orders Pending | Sale Orders Due | Nett Available | Re-order Level | Short fall | Min Reorder Qty | Order to be Placed |  |
| <b>Bricks</b>                                                            | 1,000 Pcs     | 10,000 Pcs          | 7,250 Pcs       | 3,750 Pcs      | 4,500 Pcs      | 750 Pcs    | 1,500 Pcs       | 1,500 Pcs          |  |
| <b>Cement</b>                                                            |               |                     |                 |                |                |            |                 |                    |  |
| <b>Steel</b>                                                             |               |                     |                 |                |                |            |                 |                    |  |

Figure 7.10 Inventory Reorder Status

- Click the **A: Reorder Only** button (**A: Reorder Only** button toggles with the **A: Show All** button).

| Name of Item                                                                                    | Closing Stock | Purc Orders Pending | Sale Orders Due | Nett Available | Re-order Level | Short fall | Min Reorder Qty | Order to be Placed |  |
| <b>Bricks</b>                                                                                   | 1,000 Pcs     | 10,000 Pcs          | 7,250 Pcs       | 3,750 Pcs      | 4,500 Pcs      | 750 Pcs    | 1,500 Pcs       | 1,500 Pcs          |  |
|                                                                                                 |               |                     |                 |                |                |            |                 |                    |  |

Figure 7.11 Inventory Reorder Status

A report is displayed giving the details of only Bricks, since the report is configured to display only those items which are below the reorder level. To analysis the Inventory Reorder Status Report, place the cursor on any of the details given in the above report and press **Enter**. You can view the details to verify its correctness.

#### i. Name of Item

The list of stock items are displayed which are grouped under the selected stock group. Highlight the required item and press **Enter** to arrive at the Movement Inward details. This gives us the details of the stock items in terms of the quantity, rate and value. You can drill down to the last level of voucher details.

## ii. Closing Stock

Remember, in the section on Order Processing we first raised a Purchase Order for 5000 pcs which we then purchased. After that, we raised a Sales Order for 4000 pcs which we subsequently sold - this resulted in a closing quantity of 1000 pcs. The column next to the name of the item displays the closing quantity as per the date specified in the report.

Press **Enter** on the value shown under closing stock and you will get a monthly inward-outward-closing balance report of the selected stock item.

## iii. Purchase Orders Pending

This quantity is arrived at on the basis of the total purchase orders pending. Remember we raised 2 Purchase Orders for 4500 pcs and 5500 pcs. The total of 10000 pcs appears in the Purchase Orders Pending column.

Press **Enter** on the value shown under Purchase Orders Pending and you will get a report displaying outstanding purchase orders.

## iv. Sales Orders Due

This quantity is arrived at on the basis of the total sales orders due. Remember, we raised 2 Sales Orders for 3000 pcs and 4250 pcs. The total of 7250 pcs appears in the Sales Orders Due column.

Press **Enter** on the value shown under Sales Orders Due and you will get a report of the outstanding sales orders.

## v. Nett Available

The quantity given here is arrived at based on the formula: **Closing Quantity + Purchase Orders Pending - Sales Orders Due** i.e.,  $1000 + 10000 - 7250 = 3750$  pcs.

## vi. Reorder Level

As per our definition, if we select the greater of 4500 pcs or the level of Consumption over the last 5 days then the reorder level will be displayed as 4500.

To define consumption pattern as lower, highlight the Reorder Level column and press **Enter** to view the Specify Reorder Level screen.

## vii. Shortfall

Shortfall is displayed as on 31-1-2010 with the specifications:

- ❑ **Reorder level** being 4500 pcs or consumption of last 5 days whichever is higher.
- ❑ **Minimum order quantity** of 1500 pcs or consumption of last 5 days whichever is higher.

The quantity is arrived at based on  $4500$  (reorder level) -  $3750$  (nett available) =  $750$  pcs shortfall. The reorder level if more than the nett available, the difference will be shown as Shortfall.

#### viii. Minimum Order Quantity

The minimum order quantity is the level below which when the quantity of stock falls, an order has to be placed. Press **Enter** on Minimum Order Quantity to view the reorder level and minimum order quantity definition screen of the selected stock item.

#### ix. Order to be Placed

The amount is arrived at based on the following interpretations:

- ❑ **Shortfall > Minimum Order Quantity.** The quantity displayed in Shortfall column will be displayed in the column Order to be Placed or
- ❑ **Shortfall < Minimum Order Quantity.** The quantity displayed in Minimum Order Quantity column will be displayed in the column Order to be Placed.

In our example, Shortfall (750 pcs) is less than Minimum Order Quantity (1500 pcs) hence, minimum order quantity of 1500 pcs is the order to be placed as on 31-1-2010.

### Practice Exercise

1. In **Indus Enterprises** experiment by giving your own values for reorder level and minimum order quantity and observe the report as on various dates (depending on the entry dates). Discover and analyse the stock status.

## 7.3 Tracking Numbers

Many businesses deliver stock with a delivery note or a challan and the bill is raised later. There may be a situation where you raise a bill first and then deliver the goods against the bill raised or receive the goods against a purchase bill. In such cases, it is important to 'Track' the delivery or receipt of inventory against the bill. Tally.ERP 9 has a feature called Tracking Numbers to achieve the same.

**'Tracking'** the delivery or receipt of inventory, is purely an inventory-related activity. Tally.ERP 9 helps in bringing such entries into the accounting statements to help the user in ascertaining the profit or loss for a stipulated period. In case sales bills are to be raised an additional element in the detailed Profit & Loss statement appears as **Sales bills pending** and for Purchases the same will appear as **Purchase Bills pending**.

### 7.3.1 Using Tracking Numbers

**On 28-12-09 Ref GRN/NB - 1,000 Pcs of Bricks received from Navketan Bricks @ Rs. 4 /Pc at the warehouse.**

In the earlier sections, we have recorded two Purchase Orders on 20-12-2009 and 25-12-2009 with due dates 28-12-2009 and 31-12-2009 respectively. The above receipt of 1,000 pcs is received against the ordered quantity of 4,500 pcs.

Let us raise a **Receipt Note** for the **PO/001** raised on 20-12-2009 with due date 28-12-2009.

**Setup:**

In the **F11: Features (Inventory Features)**, activate

- ❑ **Use Tracking Numbers** to enable the **Receipt Note (Goods Receipt Note)** and **Delivery Note (Delivery Challan)**.
- ❑ **Use Rejection Notes** to enter **Rejections In** vouchers and **Rejections Out** vouchers.

**Step 1: Create Receipt Note**

Go to **Gateway of Tally > Inventory Vouchers > F9: Receipt Note**.

1. Date: **28-12-09**
2. Party's A/c Name: **Navketan Bricks**
3. Purchase Ledger : **Project Purchases**
4. Name of the item: **Bricks**
5. In **Item Allocations** for screen, Select **Tracking No.** as **GRN/NB**, **Order No.** as **PO/001** and **Due on:** **28-12-09**
6. In the main voucher screen, enter **3%** for **Freight charges** and the value gets calculated automatically.
7. Enter the remaining details and accept the voucher.

**7.3.2 Display Purchase Bill Pending**

Go to **Gateway of Tally > Display > Statements of Inventory > Purchase Bills Pending >**

- ❑ Press **Alt + F1** for a **detailed** view.

The **Purchase Bills Pending** report appears as shown below :

| Purchase Bills Pending            |                 |              | National Traders          |               | Ctrl + M |
|-----------------------------------|-----------------|--------------|---------------------------|---------------|----------|
| Purchase Bills Pending            |                 |              | 1-Apr-2009 to 31-Dec-2009 |               |          |
| Date                              | Tracking Number | Name of Item | Pending Quantity          | Rate (Disc %) | Value    |
| Goods Recd. but Bills not Recd. : |                 |              |                           |               |          |
| 28-Dec-2009                       | GRN/NB          | Bricks       | 1,000 Pcs                 | 4.00          | 4,000.00 |

Figure 7.12 Purchase Bills Pending

Tally.ERP 9 tracks down the details of goods received for which bills have not been received. To view effect of above report,

Go to **Gateway of Tally > Profit & Loss Account** and view the **Purchase Accounts**.

You will find that the value of goods received (recorded through Receipt Note) are included in the Purchase Accounts under **Purchase Bills to come**, for ascertaining the profits accurately. Also

view **Sundry Creditors** from **Balance Sheet**, you will find that liability is created under **Purchase Bills to come**.

- Ensure that in **F11: Features (Accounting Features)**, **Integrate Accounts with Inventory** is set to **Yes**.
- For details on **Original Quantity**, drill down the **Purchase Bills pending** and activate the option **Show Original Quantity** in **F12: Configure**. You will get an additional field called **Initial Quantity**.

**On 28-12-09, you receive the purchase Bill No. NB/15 from Navketan Bricks for their Delivery Note No. GRN/NB for 1,000 Pcs of Bricks @ Rs.4 /Pc. A credit of 30 days is allowed.**

**Setup :**

- Activate **Cost Centre** for **Freight charges** Ledger

### **Step 1: Create Purchase Voucher**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. **Ref: NB/15**
2. Credit **Navketan Bricks: Rs. 4,120**
3. Bill-wise Details: **NB/15 30 days 4,120**
4. Debit **Purchases: Rs. 4,000**
5. **Tracking Number:** Select **GRN/NB** and give the required inventory allocation.
6. Debit **Freight Charges: Rs. 120**
7. Select **Projects and Assignments** Category and **Buildings** Cost centre
8. Accept the **Purchase voucher**.

After completing the above entry, view **Purchase Bills Pending**.

### **Practice Exercise**

Make the following voucher entries:

1. On 1-2-2010, you received an order from **FirstCom Solutions** for 25 Nos of **HP - 27 Printer Cartridges** to be delivered on 15-2-2010 @ Rs. 250 each. Order number **FCS/9**. You propose to deliver from On-Site, allocate to Sales-Printer, Cost Centre Amar.
2. On 13-2-2010, received 22 Nos of **HP - 27 Printer Cartridges** @ Rs. 200 from **Power Line Computers** and stored in On-Site. The invoice **PLC12** was also received. Credit period was 30 days.
3. On 15-2-2010, National Traders delivered 20 Nos of **HP - 27 Printer Cartridges** from On-Site to **FirstCom Solutions** against their Order **FCS/9**.
  - Since you will raise the invoice later, give a new tracking number as **Ex1**.

- The terms are Credit period of 45 days from the date of invoice. The sale price is Rs. 250 each. No interest is to be charged.
- 4. On 17-2-2010, **FirstCom Solutions** returned 2 defective pcs of **HP - 27 Printer Cartridges**, track it against **Ex1**.
- 5. On 1-3-2010, National Traders raised the invoice for the 18 pcs of goods retained by **FirstCom Solutions**. Link the invoice with the delivery note.
  - Display **Sales Bills Pending** on 28-2-2010. and view **Profit & Loss A/c** on 28-2-2010 to view changes in **Sales Bills to make**.
  - Change the date to 2-3-2010 and check, are there any **Sales Bills to Make**
- 6. Prepare a Purchase invoice on 13-2-2010 and track it against the receipt note dated 13-2-2010.

- Activate **Rejection Notes** in the **F11: Features (Inventory features)**, if not activated.
- Create a Receipt Note for Exercise 2, and give the tracking number as **PLC12**.
- For **Exercise 4**, create **Rejections In Voucher**
- For **Exercise 5**, raise a Invoice for 18 Pcs only.
- After completing the above practical exercises, return to Gateway of Tally and disable tracking numbers in the **F11: Features (Inventory Features)**.

Once entries are recorded using **Rejections In** and **Rejections Out Notes**, the option **Use Rejection Inward/Outward Notes** in **F11: Features (Inventory Features)** cannot be set to **No**.

## 7.4 Batch-wise Details

Batch details are used to identify the movement of inventory in batches or lots. Although this is a requirement primarily of the pharmaceutical industry, the same can be used by other industries that maintain or manufacture perishable goods. Many organisations also purchase in batches in order to monitor the result of the batch purchased individually. Hence, Tally.ERP 9 has used the term Batch/Lot.

Batches/Lots are also often used to monitor the date of manufacture, date of receipt or the date of expected time when it cannot be further used (perished or expired). Tally.ERP 9 makes provisions to enter both the manufacturing date and the expiry date to take decisions as required.

In this section the following topics are discussed :

- Activate **Batch-wise Details** and enter vouchers using them.

- ❑ Set **Manufacturing Date & Expiry Date** for Batches.

- ❑ *Manufacturing Date & Expiry Date for Batches is useful for businesses that deal in goods that have expiry dates like medicines, food and other perishables.*
- ❑ *During Voucher entry, the date of manufacture of the product, by default takes the date of the voucher, this can however be changed subject to*
  - *Date of Manufacture is not later than the Voucher Date.*
  - *Expiry Date is not earlier than the Date of Manufacture.*

### 7.4.1 Activating Batch-wise Details

Batch-wise details are given for maintaining batch information pertaining to stock items. The **Manufacturing date** and **expiry date** can also be set for batch wise details.

To activate Batchwise Details,

Go to **Gateway of Tally > press F11: Features (Inventory Features)**.

- ❑ Set **Maintain Batch-wise details** and **set Expiry Dates for Batches** to **Yes**.

### 7.4.2 Using Batch-wise Details in Purchase Invoice

*On 15-12-09, purchased Saridon - 250 nos from GetWell Pharmacy @ 5.50 each with batch number ST/101 having Manufacturing date as 15-8-2009 and Expiry Date as 14-8-2010.*

**Setup:**

- ❑ Create **GetWell Pharmacy Ledger** under **Sundry Creditors**
- ❑ Create the following Stock Item
  - **Name: Saridon**
  - **Under: Medicines** (create the group under primary)
  - **Category: Pain Killers** (create the category under primary).
  - **Maintain in Batches: Yes.**
  - **Track date of Mfg: Yes**
  - **Use expiry dates: Yes**
  - **Alter Standard Rates: No**
  - **Rate of Duty: 5**
  - Retain all the other fields as default and accept the stock item creation screen.
  - Return to the Gateway of Tally.

1. Enter the item as per the transaction details.
2. After you enter **Saridon**, an **Item Allocation** screen will appears,
  - Enter the batch no. as **ST/101** having manufacturing date as **15-8-09** and **Expiry Date** as **14-8-10**.
3. Select **Onsite** in Godown field. The **Batch details** appears as shown below :

Figure 7.13 Item Allocations for Saridon

- 111

Go to **Gateway of Tally > Stock Summary > Medicines** > press **F1**: **Detailed** as on 15-12-2009. You will see the batch details of Saridon 250 nos with the rate and the total closing value.

### 7.4.3 Using Batch-wise Details in Sales Invoice

**On 27-12-09 , raise a Cash Sales Invoice for 200 nos of Saridon @ Rs. 7.50 from the above Batch No.ST/101.**

#### Setup :

- ❑ Create **Cash Ledger** under **Cash-in-Hand** group
- ❑ Activate Cost Centre for **Export Saes Ledger**

#### Step 1: Create Sales Voucher

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

1. Enter the item as per the transaction details.
2. Select the Batch as **ST/101**
3. Select Godown as **Onsite**
4. Select the **Sales Ledger** as **Export Sales**
5. Allocate the Sales to Cost Centre : **Amar**

#### Step 2 : View Stock Summary

Go to **Gateway of Tally > Stock Summary > Medicines**

- ❑ Specify the date as 27-12-2009
- ❑ Press **F1: Detailed**, you will find that the stock balance is **50 nos**.

#### Practice Exercise

1. On 28-12-09, raise another purchase invoice on **GetWell Pharmacy** with the following details
  - ❑ Batch No. : **ST/102**
  - ❑ Quantity : **300 nos**
  - ❑ Rate : **Rs. 6 per nos**
  - ❑ Godown : **On-site**
  - ❑ Manufacture date : **15-8-09**
  - ❑ Expiry date : **31-12-09**
  - ❑ Purchase Ledger : **Purchases**

- Total Invoice Value : **Rs. 1,800**
- 2. On 1-1-10, make a Cash Sales Invoice for Saridon - **50 nos** from batch **ST101** and **200 nos** from batch **ST102** @ Rs. 7.50 each.

| Stock Item Allocations                             |                       |                                                                                                                                                                             |      | National Traders                                        |         | Ctrl + M             |

| Order No. : <input type="checkbox"/> Not Applicable |                 |             |          |                                                         |                  |         |                         |  |
| On-Site                                             |                 |             | ST/101   | 14-Aug-2010                                             | 50               | Nos     |                         |  |
|                                                     |                 |             | ST/102   | 31-Dec-2009                                             | 300              | Nos     |                         |  |

Figure 7.15 Item Allocation screen

Tally.ERP 9 does not display batch ST/102 when we make the entry on **1-1-2010** because the expiry date of ST/102 was **31-12-2009**. But when we changed the entry date to **31-12-2009** the batch is displayed! This is because the option **Honor Expiry Dates usage for Batches** is set to **Yes** in the **F12: Configuration**.

When **Honor Expiry Dates usage for Batches** is set to **Yes** in the **F12: Configuration**, Tally.ERP 9 does not allow selection of expired batches during voucher entry (i.e., Batches for which, the expiry dates falls before the voucher date).

## 7.5 Additional Cost Details

The cost of an item is the rate at which the item is purchased. However, there are other expenses like Packing charges, Freight charges, Cartage incurred, etc. which add to the cost of purchasing the item. Thus, the additional cost details are required to be added to the actual cost of purchase.

Let us now see how Tally.ERP 9 handles this requirement.

### 7.5.1 Activating Additional Cost Details

- ❑ Ensure that you are at the **Gateway of Tally of National Traders**.
- ❑ Press **F11: Features (Inventory Features)**, set **Track Additional Costs of Purchases** to **Yes**.

### 7.5.2 Creating Purchase Voucher with Additional Cost Details

#### Setup :

- ❑ Create a **ledger – Stationery House** under **Sundry Creditors** with only the bill-wise details set to **Yes**.
- ❑ Create the following stock items:

| Name of Item | Under   | Category       | Units | Maintain in Batches |
|--------------|---------|----------------|-------|---------------------|
| Stapler      | Primary | Not Applicable | Nos   | No                  |
| Stapler Pins | Primary | Not Applicable | Nos   | No                  |

- ❑ Create a new group **Expenses on Purchases** under the default group **Purchase Accounts** and select **Not Applicable** for **Method to Allocate when used in Purchase Invoice**.

*The option **Method to Allocate**, when used in **Purchase Invoice** will not appear, if the feature **Enter Purchases in Invoice format** is set to **No** in **F11: Features (Accounting Features)**.*

- ❑ Create the following ledgers under the newly created group **Expenses on Purchases** with the option **Inventory Values are Affected** and **Maintain Cost centres** set to **No**.
  - **Packing Charges on Purchases**
  - **Cartage Charges**

#### Step 1: Create Purchase Voucher

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. Press **Ctrl+V** for **Voucher Mode**
2. **Date: 1-3-2010**
3. Credit **Stationery House: Rs. 7,500**
4. Debit **Purchases: Rs. 7,500** and press **Enter**
5. Tally.ERP 9 prompts for the **Item details** (as **Inventory values are affected** is set to **Yes**)
6. Select item **Stapler** and press **Enter**
7. In the **Item allocation** screen,

- The **Additional Cost Details** screen appears as shown below :

[illegible]

11. Press **Enter**, Tally.ERP 9 prompts for the tracking number details  
12. Select **End of List**.

116

| Inventory Allocations for : <b>Purchases</b> |                |                  |                 |
|----------------------------------------------|----------------|------------------|-----------------|
| Name of Item                                 | Quantity       | Rate per         | Amount          |
| <b>Stapler</b>                               | <b>100 Nos</b> | <b>20.00 Nos</b> | <b>2,000.00</b> |
| Actuals:                                     |                | 22.00 Nos        | (2,200.00)      |

Figure 7.17 Inventory Allocations for Purchases

13. Select the Item **Stapler Pins** in the **Item Allocation** screen and
  - ❑ **Order number: Not Applicable**
  - ❑ **Godown: On-Site**
  - ❑ **Quantity: 200 nos**
  - ❑ **Rate: Rs. 25 each**
  - ❑ Press **Enter** till you reach the **additional cost details** screen.
14. Select **Packing Charges** on **Purchases** and enter the balance amount of Rs. 180.
15. Select the ledger **Cartage Charges** and enter the balance amount of Rs. 120.
16. Press **Enter** till you reach the narration field.

- ❑ *In the invoice, we have incurred the total packing charges of Rs. 290 for both items. Out of which Rs. 110 is already specified the previous stock item **Stapler**. Hence, Rs. 180 is entered for **Stapler Pins**.*
- ❑ *(In the invoice, we have incurred a total of Rs. 210 as cartage charges for both items. Out of which Rs. 90 is entered for the previous stock item **Stapler**. Hence, Rs. 120 is entered for **Stapler Pins**.*
- ❑ *Ensure that the option **Show Inventory Details** is set to **Yes** in the **F12: Configuration**.*

The completed **Purchase voucher** appears as shown below:

| Accounting Voucher Creation           |             | National Traders |                       | Ctrl + M             |

Figure 7.18 Purchases Voucher

You will notice an additional line displaying the actual value of the item. The item value appearing here will also be appearing in the stock reports.

17. Press **Y** or **Enter** to accept the screen and return to the Gateway of Tally.

### Display Stock Summary Report

Go to **Gateway of Tally > Stock Summary**

- Highlight the item **Stapler**, you will find closing balance of 100 nos @ Rs. 22 each worth Rs. 2,200.
- Return to the Gateway of Tally.

### Display Stock Voucher Report

Cross verify the stock details of stock summary with the Stock Vouchers report as shown below :

Go to **Gateway of Tally > Display > Inventory Books > Stock Item**

- Select **Stapler** and press **Enter** till you reach a report displaying the list of vouchers as shown below:

| Stock Vouchers             |                         |                 |         | National Traders          |       |          |          |      |       | Ctrl + M |       |          |

|                            |                         |                 |         |                           |       |          |          |      |       |          |       |          |
| <b>Totals :</b>            |                         |                 |         | 100 Nos                   | 22.00 | 2,200.00 |          |      |       | 100 Nos  | 22.00 | 2,200.00 |

Figure 7.19 Stock Vouchers

*Purchased Stapler 100 nos at Rs. 20/no., total being Rs. 2000. Additional expenses of Rs. 200 i.e.,*

- *Packing Charges - Rs. 110*
- *Cartage Charges - Rs. 90*

*The total **Purchase Cost** is arrived as shown below :*

***Purchase total + Additional Expenses total** (Rs. 2,000 + Rs. 200) = Rs. 2,200. This is divided by quantity of 100 nos > Rs. 2,200/100 nos = Rs. 22/nos.*

*The **Additional Cost** details option will be available only in the **Purchase Voucher** and not in **Purchase Invoice**.*

### 7.5.3 Creating Purchase Invoice with Additional Cost Details

#### Setup:

- Ensure that **Enter Purchases in Invoice Format** in **F11: Features (Accounting Features)** is set to **Yes**

#### Step 1: Create Purchase Invoice

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. Select **As Invoice**
2. Change the date to 3-3-2010 and make the entry as per the purchase voucher details dated 1-3-2010.

The **purchase invoice** appears as shown below:

| Accounting Voucher Creation                |          | National Traders |     | Ctrl + M   |                  |
|--------------------------------------------|----------|------------------|-----|------------|------------------|
| <b>Purchase</b> No. 20                     |          |                  |     | 3-Mar-2010 |                  |
| Supplier Invoice No. :                     |          | Date :           |     | Wednesday  |                  |
| Party's A/c Name : <b>Stationery House</b> |          |                  |     |            |                  |
| Current Balance : 20,000.00 Cr             |          |                  |     |            |                  |

Figure 7.21 Stock Vouchers

### 7.5.4 Appropriate Additional Costs

In the entry dated 1-3-2010, we gave the additional cost details for each item (Stapler and Stapler Pins). This additional cost was calculated and added to the cost of the item. The additional costs are not added to the cost of the items, when the entry is made in the invoice format.

To appropriate the additional costs to purchase invoice of **3-3-2010**,

Go to **Gateway of Tally > Accounts Info. > Groups > Single > Alter**

- ❑ Select **Expenses on Purchases**

The screen appears as shown below:

Figure 7.22 Group Alteration

*The option **Method to Allocate when used in Purchase Invoice** allows you to apportion or appropriate or allocate additional cost details entered in Invoice mode, based on the purchase value or purchase quantity.*

- ❑ Select **Appropriate by Qty** from the **Allocation Methods** list.
- ❑ Accept the screen and return to the Gateway of Tally
- ❑ Similarly, select the option **Appropriate by Qty** in the **Purchase Accounts** group also.

*To use the **Appropriate by Qty** option, ensure that the items in the purchase invoice have the same unit of measure.*

## Display Stock Voucher Report

Go to **Gateway of Tally > Display > Inventory Books > Stock Item**

- Select **Stapler**
- Press **Enter** till you reach the stock voucher screen
- Select the purchase voucher dated **3-3-2010** and re-accept the voucher for the additional cost to take effect

The **Stock Vouchers with additional cost details** for Stapler appears as shown below :

| Stock Vouchers             |                         |                 |         | National Traders          |       |                 |          |      |       | Ctrl + M |       |                 |

Figure 7.24 Stock Vouchers Report

*In the entry dated 3-3-2010:*

- i. **Total Additional Cost = Rs. 500 (290 + 210)**
- ii. **Total Quantity = 300 nos (Stapler 100 nos+ Stapler Pins 200 nos)**
- iii. **Cost per Unit (Nos) = Rs. 500 / 300 Nos - Rs. 1.67**
- iv. **Stapler Pins rate for 1 nos = Rs. 25 + Rs. 1.67 = Rs. 26.67**

### 7.5.5 Additional Costs incurred after Purchases

#### Setup :

- Create the following stock item:

| Name of Item               | Under   | Category       | Units | Maintain in Batches | Track Date of Mfg | Use expiry dates |
|----------------------------|---------|----------------|-------|---------------------|-------------------|------------------|
| Batch Additional Cost Item | Primary | Not Applicable | Nos   | Yes                 | Yes               | Yes              |

- Alter the ledger **Packing Charges on Purchases** and set the option **Inventory Values are Affected** to **Yes**.

#### Step 1: Create Purchase Invoice

On 1-3-10, make a purchase entry for 10 nos of **Batch Additional Cost Item** (Batch/ 001) @ Rs. 100 from **Stationery House**.

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchases**

1. Select Party as **Stationery House**
2. Select Stock item as **Batch Additional Cost Item**
3. Select Godown as **Onsite** and select the **Batch details** as shown below

| Item Allocations for : <b>Batch Additional Cost Item</b> |                  |             |               |        |             |          |
|----------------------------------------------------------|------------------|-------------|---------------|--------|-------------|----------|
| Godown                                                   | Batch / Lot No.  |             | Quantity      | Rate   | per Disc. % | Amount   |
|                                                          | Mfg Dt.          | Expiry Date |               |        |             |          |
| Order No.: □ Not Applicable                              |                  |             |               |        |             |          |
| On-Site                                                  | <b>Batch/001</b> |             | <b>10 Nos</b> | 100.00 | Nos         | 1,000.00 |
|                                                          | Mar-2010         | 31-Mar-2010 |               |        |             |          |

Figure 7.25 Item Allocations for Batch Additional Cost Item

4. Enter the **Qty** and **Rate** and allocate it to **Purchases ledger**.
5. Enter the required bill-wise details and accept the entry.

#### Step 2: Create Purchase Invoice

**On 2-3-10, make a purchase entry for 20 nos of Batch Additional Cost Item (Batch/ 002) @ Rs. 200 from Stationery House.**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchases**

1. Select Party as **Stationery House**
2. Select Stock item as **Batch Additional Cost Item**
3. Select Godown as **Onsite** and select the **Batch details** as shown below

| Item Allocations for : <b>Batch Additional Cost Item</b> |                  |             |          |        |     |         |          |
|----------------------------------------------------------|------------------|-------------|----------|--------|-----|---------|----------|
| Godown                                                   | Batch / Lot No.  |             | Quantity | Rate   | per | Disc. % | Amount   |
|                                                          | Mfg Dt.          | Expiry Date |          |        |     |         |          |
| Order No.: <input type="checkbox"/> Not Applicable       |                  |             |          |        |     |         |          |
| On-Site                                                  | <b>Batch/002</b> |             | 20 Nos   | 200.00 | Nos |         | 4,000.00 |
|                                                          | 2-Mar-2010       | 31.3.2010   |          |        |     |         |          |

Figure 7.26 Item Allocations for Batch Additional Cost Item

**Step 3 : Create Payment Voucher**

*On 3-3-10, make a Bank Payment entry for payment of Rs. 900 (Rs. 300 for Batch/001 and Rs. 600 for Batch/002) towards Packing charges on Purchases.*

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment**

1. Debit the ledger **Packing Charges on Purchases**.
2. Select the item **Batch Additional Cost Item**
3. In **Item Allocations for** screen,
  - Select **Batch/001** and enter **300** in Amount field
  - Select **Batch/002** and enter **600** in Amount field. The screen appears as shown below :

| Item Allocations for : <b>Batch Additional Cost Item</b> |                  |             |          |          |        |
|----------------------------------------------------------|------------------|-------------|----------|----------|--------|
| Godown                                                   | Batch / Lot No.  |             | Quantity | Rate per | Amount |
|                                                          | Mfg Dt.          | Expiry Date |          |          |        |

Figure 7.27 Item Allocations for Batch Additional Item

4. Credit **Bank Account** for the same amount (Rs. 900) and accept the entry.

**Step 4 : Display Stock Summary**

Go to **Gateway of Tally > Stock Summary**

- Press **F12: Range** and specify details as shown below :

**Range of Information in Report**  
(show only those lines satisfying the given conditions)

|               |             |            |                  |
|---------------|-------------|------------|------------------|
| Stock Item    | having Name | containing | Batch Additional |
|               |             |            |                  |
| Condition     |             |            |                  |
| □ End of List |             |            |                  |
| and           |             |            |                  |
| or            |             |            |                  |

Figure 7.28 Range details

- Accept the **Range of information** to return to the **Stock Summary** screen.
- The report now displays only one stock item **Batch Additional Cost Item**, press **Shift + Enter** to view the batch details.

The **batch details** will be displayed as shown below :

| Stock Summary              |  | National Traders |        | Ctrl + M                 |          |
|----------------------------|--|------------------|--------|--------------------------|----------|
| Particulars                |  | National Traders |        | 1-Apr-2009 to 3-Mar-2010 |          |
|                            |  | Closing Balance  |        | Quantity                 | Rate     |
|                            |  |                  |        |                          | Value    |
| Batch Additional Cost Item |  | 30 Nos           | 196.67 |                          | 5,900.00 |
| Batch/001 On-Site          |  | 10 Nos           | 130.00 |                          | 1,300.00 |
| Batch/002 On-Site          |  | 20 Nos           | 230.00 |                          | 4,600.00 |

Figure 7.29 Stock Summary

The figures have been calculated as follows:

- **Batch/001 - 10 nos**
  - i. Purchased 10 nos at Rs.100 = Rs.1000 + Additional Cost Rs.300 = Rs.1,300
  - ii. Rs.1,300 / 10 nos = Rs.130
- **Batch/002 - 20 nos**
  - i. Purchased 20 nos at Rs 200 = Rs.4000 + Additional Cost Rs.600 = Rs.4,600
  - ii. Rs. 4,600 / 20 nos = Rs. 230

## Practice Exercise

Ensure that you are in **Indus Enterprises**,

1. Enter a purchase invoice on **15-10-2009** for 10 Nos of **Item One** @ Rs. 100 each and 20 nos of **Item Two** - @ **Rs. 200** each from the **Supplier**.

**Setup :**

- Create two stock items **Item One** and **Item Two** with the unit of measure as **nos**.
- Create the ledgers - **Supplier** (Sundry Creditors), **Delivery Charges on Purchases** and **Tax on Purchases** (under Purchase Accounts).
- Alter the group **Purchase Accounts** and select **Appropriate by Value** as the method of appropriation.

- Enter a purchase invoice on **15-10-2009**, select party as **Supplier** and select **Item One** - 10 nos at **Rs. 100 each** and **Item Two** - 20 nos at **Rs. 200 each**.
- Select **Delivery Charges on Purchases** and **Tax on Purchases** ledgers and enter the amounts as **Rs. 50** and **Rs. 250** respectively and accept the entry.
- View the **Stock Item** report.

After completing the above exercise, in **F11: Features (Inventory Features)** disable the option **Track Additional Cost of Purchases**.

## 7.6 Bill of Materials (BoM)

A Bill is termed as an authenticated document for the materials which are taken out from the stock either for sale or for transfer to other godowns or for manufacturing, etc. In order to avoid this continuous process of issuing a bill at every stage, a system has been evolved wherein the items with their quantity details can be allotted towards manufacturing a certain product or by-product. This facilitates the immediate reduction in stock of the item automatically. This process of listing the items that make up another item is termed as the **Bill of Materials (BoM)**.

### 7.6.1 Creating Bill of Materials

You can create a Bill of Material (BoM) for any stock item. Typically, a BoM can be created at the time of manufacturing/ assembling the item. You may specify a BoM at the time of creating a stock item or altering its master.

**National Traders** is engaged also in the business of assembling and manufacturing **Televisions**.

To enable **Bill of Materials** feature,

**Setup:**

Ensure that you are in **National Traders**,

Go to **Gateway of Tally > F12: Configure > Accts / Inventory Info.**

- set **Allow Component list details (Bill of Materials)** to **Yes**

**Step 1 : Creating Bill of Materials**

- Create the following stock item (Final Goods) :

| Name of Item       | Under            | Category       | Units | Maintain in Batches | Set Components (BoM) |
|--------------------|------------------|----------------|-------|---------------------|----------------------|
| Television Flatron | Home Electronics | Not Applicable | Nos   | No                  | Yes                  |

- In the **Components of: Television Flatron**, enter the **Unit of manufacture** (the number of items to be manufactured) as **1**.
- In the **Item details** section, create these items without any opening balances. Select **1** unit of these items and store them in the **On-site** godown.

| Name of the Item | Stock Group        | Standard Cost (in Rs.)<br>Applicable from<br>1-12-2009 | Units of Measure |
|------------------|--------------------|--------------------------------------------------------|------------------|
| VDU              | Television Flatron | 2,000                                                  | Nos              |
| Picture Tube     | Television Flatron | 3,750                                                  | Nos              |
| IC Chips         | Television Flatron | 5,000                                                  | Nos              |
| Sound card       | Television Flatron | 500                                                    | Nos              |
| Aerial           | Television Flatron | 300                                                    | Nos              |

The **Bill of Material component screen** of Television Flatron appears as shown below :

**Stock Item Components (BoM)** National Traders Ctrl + M

Name : **Television Flatoron**

Figure 7.30 Stock Item Components (BoM)

- Accept the above settings for the item Television Flatoron.

The purpose of creating a bill of material is to enable the consumption of the materials in the ratio specified, when the product is manufactured. Tally.ERP 9 allows us to use a Manufacturing Journal to enter the goods manufactured with the bill of materials.

## 7.6.2 Creating a Manufacturing Journal

To create a new **Manufacturing Journal**,

Go to **Gateway of Tally > Accounts Info. > Voucher Type > Create**

1. Type **Manufacturing Journal** as the **Name**
2. Under **Voucher Types**, select **Stock Journal**
3. Type **Mfg Jrnl** for abbreviation and select automatic voucher numbering
4. Select **Yes** for **Use as Manufacturing Journal** and accept the screen

The **Manufacturing Journal voucher type** creation screen appears as shown

| Voucher Type Creation                                                                                                                                                                                                                                                                                                                                                                       |  | National Traders                                                     | Ctrl + M |

|                                                                                                                                                                                                                                                                                                                                                                                             |  | <b>Name of Class</b>                                                 |          |

Figure 7.31 Voucher Type Creation — Manufacturing Journal

- Press **Ctrl+A** to accept the above screen and return to the Gateway of Tally.

*The **Manufacturing journal** is a variant of the **Stock Journal**, where the **Bill of Material** comes up automatically. Hence, the manufacturing journal should be used where a BoM situation exists.*

### 7.6.3 Using Bill of Materials

**On 21-12-09, bought 10 pcs of each of the following items from Star Electronics @ standard cost as mentioned below :**

| Name of the Item | Standard Cost (in Rs.)<br>Applicable from<br>1-12-2009 |
|------------------|--------------------------------------------------------|
| VDU              | 2,000                                                  |
| Picture Tube     | 3,750                                                  |
| IC Chips         | 5,000                                                  |
| Sound card       | 500                                                    |
| Aerial           | 300                                                    |

The total purchase invoice value amounted to **Rs. 1,15,500**. The above goods are stored in **On-Site**. A Cheque was paid from **Bank Account** immediately.

On the same day, 5 Nos of **Television Flatoron** is manufactured in **On Site** godown. Additional expenses of **Rs. 3,000** and **Rs. 2,000** was incurred towards **Wages** and **Power** respectively.

### Step 1: Create Purchase Invoice

Go to **Gateway of Tally > Inventory Vouchers > F9: Purchase**

1. Select the Party as **Star Electronics**
2. Allocate to **Purchases** Account
3. Select the items with the quantity and standard rates as given in the table above
4. Select the Godown as **Onsite**
5. Accept the entry

### Step 2: Create Manufacturing Journal

Go to **Gateway of Tally > Inventory Vouchers > Alt+F7: Stock Journal**.

1. Select the **Manufacturing Journal** and ensure that the date is **21-12-2009**.
2. Under the **Name of Product** to be manufactured, type **Television Flatoron** (you will notice the items given in the master as Bill of Materials appear automatically).
3. Manufacture it in **On-Site**.
4. **Quantity** to be manufactured - **5** (you will notice the rates of the items appear automatically).

*Under **Components (consumption)** the items to be used in proportionate quantity for manufacturing **Television Flatoron** is picked up automatically from the stock item master. The default location as specified in the BoM is also given for each component. The standard cost is picked up for each item. Tally.ERP 9 also allows you to alter these details.*

5. Under **Additional Cost Components**, specify additional cost of **Wages - 3,000** and **Power - 2,000** (If the ledger accounts for these expenses do not exist, create them under **Direct Expenses**).

*The additional costs entered for the ledgers, do not reflect in the relevant ledgers with the amount but only add to the cost of the item.*

The completed **Manufacturing Journal** as shown below

| Inventory Voucher Creation                                                           |               | National Traders |              | Ctrl + M                                            |                                |

| <b>Picture Tube</b>                                                                  | On-Site       | 5 Nos            | 3,750.00/Nos | 18,750.00                                           | Power 2,000.00                 |
| <b>IC Chips</b>                                                                      | On-Site       | 5 Nos            | 5,000.00/Nos | 25,000.00                                           |                                |
| <b>Sound Card</b>                                                                    | On-Site       | 5 Nos            | 500.00/Nos   | 2,500.00                                            |                                |
| <b>Aerial</b>                                                                        | On-Site       | 5 Nos            | 300.00/Nos   | 1,500.00                                            |                                |
|                                                                                      |               |                  |              | <b>Total Addl. cost</b>                             | : 5,000.00                     |
|                                                                                      |               |                  |              | <b>Effective Cost</b>                               | : 62,750.00                    |
|                                                                                      |               |                  |              | <b>Effective Rate</b>                               | : 12,550.00/Nos                |
|                                                                                      |               | 25 Nos           |              | 57,750.00                                           |                                |
| Narration:                                                                           |               |                  |              |                                                     |                                |

Figure 7.32 Manufacturing Journal

6. Type the narration and press **Y** or **Enter** to accept the screen.
7. Return to the Gateway of Tally.

### Display Stock Summary

Go to **Gateway of Tally > Stock Summary**

- Press **Enter** on **Home Electronics**

You will find that the closing quantity, rate and value details for the stock item - **Television Flatoron**.

### Practice Exercise

Load **Indus Enterprises**, make the following entries

1. Create a **Manufacturing Journal** for manufacturing 1 Nos of **Computer** from the following components :

| Name of the Item  | Qty   |
|-------------------|-------|
| Hard Disk Drive   | 1 Nos |
| Floppy Disk Drive | 1 Nos |
| CPU               | 1 Nos |
| Monitor           | 1 Nos |
| Keyboard          | 1 Nos |
| Mouse             | 1 Nos |

**Setup :**

- Create a **BOM** for stock item **Computer** which requires the following items.
  - Hard Disk Drive - 1 Nos
  - Floppy Disk Drive - 1 Nos
  - CPU - 1 Nos
  - Monitor - 1 Nos
  - Keyboard - 1 Nos
  - Mouse - 1 Nos
- Store them in the **Bangalore** godown.

Enter a **manufacturing journal** to indicate the consumption of goods at the time of manufacture.

## 7.7 Price Levels and Price Lists

A **Price List** refers to a list of items maintained by an organisation along with their price details. A price list is generally used by organisations which deal in multiple products. **Price Lists** are maintained in various structures for different types of buyers (customers), viz., Wholesalers, Dealers, Retailers, etc. The price list is structured based on the classification of buyers and is referred to at the time of making sales. Whenever the sale prices change (on the basis of time), the changes reflect in the Price List also. In case of bulk sales, discounts can also be given to the buyers.

Let us now see how Tally.ERP 9 handles such a situation through the Price List feature.

### 7.7.1 Activating Price Lists and Defining Price Levels

**Setup:**

Go to **Gateway of Tally > F11: Features (Inventory Features)**

- Set **Use Multiple Price Levels for Invoicing** to **Yes**. (This will appear only if the feature **Allow Invoicing** is set to **Yes**.)

- ❑ Tally.ERP 9 takes you to the **Company Price Levels** screen, type different price levels for National Traders as
  - Retail Sales
  - Export Sales
  - Wholesale
- ❑ Accept the screen and return to the Gateway of Tally.

### Step 1: Creating a Price List

Go to **Gateway of Tally > Inventory Info. > Price List**

1. Select the Group **Components** (you will notice that all the items grouped under **Components** appear automatically).
2. Select **Retail Sales** as **Price Level** and specify **1-1-2010** in the **Applicable From** field
3. For **USB Pen Drives 100MB** give the details as follows:
  - ❑ Less than - 10 nos - Rs.1,250/- and no discount
  - ❑ From 10 nos and Less than 25 nos - Rs.1,250/- and 5% discount
  - ❑ From 25 nos onwards - Rs.1,250/- and 7.5% discount
4. Specify the price details for other items as it appears in the **Price List** screen below :

Figure 7.33 Price List

The explanation of the fields appearing in the **Price List** is given below:

- ❑ **Under Group** – The screen displays the name of the selected Stock Group (Components) whose stock items are being displayed.
- ❑ **Price Level** – Tally.ERP 9 displays a pop-up list displaying the price levels defined in the F11: Features (Inventory Features). The price levels displayed are Export Sales, Retail Sales and Whole Sale. We have selected Retail Sales.
- ❑ **Applicable From** – The date from which the defined Price List is applicable. For example, we have designed two Price Lists - one as on 1-3-2010 and the second as on 15-3-2010. The Invoices raised during the period 1-3-2010 to 14-3-2010 will reflect the price list details of 1-3-2010. Similarly, the invoices raised on or after 15-3-2010 will reflect the price list details of 15-3-2010. Any number of Price Lists can be defined for any of the stock items.
- ❑ **Quantities** – There are two columns: From and Less Than. Here you can define the quantity range of the items as per your requirements.
- ❑ **Rate** – The Rate for the item based on the quantity range given.
- ❑ **Discount % (if any)** – You can define a discount percentage in the Price List which will be taken automatically in the sales invoice.
- ❑ **Historical Details** – There are two columns: Rate and Disc %. Tally.ERP 9 provides the historical details of the sale rate and discount percentage of any previously created Price Lists. Therefore, you can define the current price details based on the information given in the Historical details.
- ❑ **Cost price** – In this column, Tally.ERP 9 displays the cost price of the item calculated based on the stock valuation method given in the item master. This has been provided to assist the user in giving the appropriate sale price. By viewing the historical price details of an item, we can accordingly define the sale price for the new Price List.

For the discount percentage to be taken in the **Price List**, you should activate the feature **Separate Discount Column on Invoices** in the **F11: Features (Inventory Features)**.

5. Accept the **Price List** Details
6. Similarly, create another **Retail Sales Price List** as on 3-1-2010 with the following rates:
  - ❑ **USB Pen Drives 100MB - Rs.1,500**

- ❑ **Wireless Keyboard - Rs.500**
  - ❑ **Wireless Mouse - Rs. 300**
7. The **Quantity** and **Discount** details are similar to the price list screen given previously. Ensure the price details are as shown below :

### 7.7.2 Using Price Lists

**On 2-1-10 raise a sales Invoice on Beltron Computers for the following Items :**

| Name of the Item     | Qty    |
|----------------------|--------|
| USB Pen Drives 100MB | 30 Nos |
| Sound Card           | 10 Nos |

The Invoice amounted to **Rs. 35,687.50**.

**Setup:**

- Create a **New customer** called **Beltron Computers** with the following details.

| Pricing Level Applicable | Maintain balances bill-by-bill | Cost Centres are applicable | Activate Interest Calculation |
|--------------------------|--------------------------------|-----------------------------|-------------------------------|
| Retail Sales             | Yes                            | No                          | No                            |

- In the **F11: Features (Inventory Features)** activate **Separate discount column on invoices**.

**Step 1: Create Sales Invoice**

- On **2-1-10** raise a **sales Invoice** on **Beltron Computers**
- Select the stock item **USB Pen Drives 100MB** from **On-site**
- Specify quantity as **30 nos**.
- Rate** and **discount** automatically appears as **Rs. 1,250** and **7.5%** respectively (as the required price level is selected in the ledger master of Beltron Computers).
- Ignore negative stock and allocate to **Sales- Components**
- Select **Amar** as **Cost Centre**.
- Now, select another item - **Sound Card**
- Type the quantity as **10 nos** (here in this case, the cursor prompts in the **Rate** field since price lists is not defined for this item)
- Specify **Rs. 100** as **Rate**
- Press **Enter** to skip the **discount** field
- Allocate to **Sales- Components** and select **Amar** as **Cost Centre**.
- Give the bill-wise details as required and accept the entry

*Tally.ERP 9 provides you flexibility to select items with and without the Price List in the same invoice. For example, in the above case, for the item which had the Price List defined, Tally.ERP 9 took the details automatically. Whereas for the stock item which did not have a Price List defined, Tally.ERP 9 prompted for the same.*

**Step 2: Create Sales Invoice**

**On 5-1-10 raise a sales Invoice on Beltron Computers for the following Items :**

| Name of the Item     | Qty    |
|----------------------|--------|
| USB Pen Drives 100MB | 30 Nos |
| Sound Card           | 10 Nos |

The Invoice amounted to **Rs. 41,500**.

- Similar to invoice dated **2-1-10** select the item **USB Pen Drives 100MB**

2. Specify quantity as **30 nos.**
3. Rate as **Rs. 1,500** and discount of **10%** appears automatically (as we have defined it in the Price List dated **3-1-10**)

*Tally.ERP 9 automatically applies the Price list for the specific period. For example, when we entered the invoice as on 2-1-10, Tally.ERP 9 displayed the discount percentage as 7.5% and as on 5-1-10, 10% is displayed.*

4. Ignore the negative stock and allocate to **Sales- Components**. Select **Amar** as **Cost Centre**.
5. Accept the quantity details of the **USB Pen Drives 100MB** stock item
6. Select another item, **Sound Card** and give the quantity as **10 nos**
7. Specify **Rs.100** as the **Rate**.
8. Tally.ERP 9 prompts for the discount information. Let us leave it blank (you already know that you can specify as required or simply leave it blank).
9. Allocate to **Sales- Components** ledger
10. Give the bill-wise details as required.
11. Accept the entry

- *The party details, item details, and quantity details provided are the same, different rates have been taken automatically by only changing the date of the invoice.*
- *After completing the above exercise, go to **Gateway of Tally > F11: Features (Inventory Features)** and set **Separate Discount column on Invoices** to **No**.*

## 7.8 Stock Valuation

As per accounting rules, the final results of a company's working depend on the valuation of inventory (stocks). As per norms, there are many concepts of evaluating the company's stock. Tally.ERP 9 goes one step ahead, by providing all the required stock valuation methods for you to choose from. In addition, Tally.ERP 9 allows you to choose different valuation methods for different items.

### 7.8.1 Stock Valuation Methods

The **Stock Valuation / Costing Methods** provided in Tally.ERP 9 are:

- ❑ **Average Cost**
- ❑ **At Zero Cost**
- ❑ **First In First Out (FIFO)**
- ❑ **Last Purchase Cost**
- ❑ **LIFO Annual (Last In First Out Annual)**
- ❑ **LIFO Perpetual (Last In First Out Perpetual)**
- ❑ **Monthly Avg. Cost**
- ❑ **Standard Cost**

*The selection of an appropriate stock valuation/ costing method is essential as this helps in knowing the value of the closing stock for a specified date range based on the purchase rates/ cost.*

In addition, Tally.ERP 9 provides the following **Market Valuation Methods**:

- ❑ **At Zero Price**
- ❑ **Average price**
- ❑ **Last Sale Price**
- ❑ **Std. Price**

Depending on the **Market Valuation Method** defined in the stock item master, Tally.ERP 9 displays the rate/ price automatically at the time of Invoice entry. The **Market Valuation Method** is set as **Average Price** by default. The **Average Price** displays the average of all the sales prices given in the previous sales entries, as the selling rate/ price while the current sales entry is being made.

*The valuation of **Closing Stock** is done based on the **Costing / Stock Valuation Methods** and is not based on the **Market Valuation Methods**.*

Let us now examine the result of the different stock valuation methods.

## 7.8.2 Display Stock Summary

**Setup :**

- Go to **Gateway of Tally > F12: Configure > Accts / Inventory Info.**
  - Set **Allow Advanced Entries in Masters** in Inventory Masters to **Yes**.
- Go to **Gateway of Tally > Inventory Info. > Stock Item > Alter**,
  - Select **HP - 27 Printer Cartridges**, you will find that the details of **Costing Method** and **Market Valuation Method** under **Behaviour**

| 15-7-2009                              | Power Line Computers | Purchase | 6       | 5 Nos                     | 850.00 | 4,250.00  |          |          |           | 10 Nos   | 850.00 | 8,500.00 |  |
| 16-7-2009                              | FirstCom Solutions   | Sales    | 9       |                           |        |           | 4 Nos    | 1,150.00 | 4,600.00  | 6 Nos    | 850.00 | 5,100.00 |  |
| Totals :                               |                      |          |         | 15 Nos                    | 850.00 | 12,750.00 | 9 Nos    | 1,150.00 | 10,350.00 | 6 Nos    | 850.00 | 5,100.00 |  |

Figure 7.41 Stock Vouchers

We have a purchase entry first, followed by a sale and again another purchase and a sales entry as given below:

- ❑ Purchased 10 nos HP - 27 Printer Cartridges @ Rs. 850 = Rs. 8,500
- ❑ Sold 5 nos HP - 27 Printer Cartridges @ Rs. 1,150 = Rs. 5,750
- ❑ Purchased 5 nos HP - 27 Printer Cartridges @ Rs. 850 = Rs. 4,250
- ❑ Sold 4 nos HP - 27 Printer Cartridges at Rs. 1150= Rs. 4600

We have purchased a total of 15 nos for Rs. 12750. The average now is **Rs. 12,750 / 15 = Rs. 850** with a closing balance of **6 nos x 850 = Rs. 5,100** (Average cost method of valuation)

### **FIFO**

*FIFO Stands for First-In-First-Out. This is one of the systems of costing where the value is calculated after an outward (consumption or sale) is made for the first purchase entry. The outwards consumption is taken from the stock that is purchased first.*

### **LIFO Perpetual & LIFO Annual**

*LIFO stands for Last-In-First-Out which means that the outwards (consumption or sale) quantity is taken out from the stock that is purchased last.*

- **LIFO Annual:** All the entries of the current financial or specified year are considered.
- **LIFO Perpetual:** All the entries of the company i.e from the books beginning date specified while the creation of a company are considered.

*For example: Suppose a company's books begin on 1-4-2009 and the data is present till 31-3-2010. LIFO Perpetual considers the entries from 1-4-2009 onwards, whereas LIFO Annual considers the entries for the year selected/ current year.*

### **Average Cost & Average Price**

*Average Cost is calculated after each purchase or sale entry for whole year.*

### **Total Inward Value/Total Inward Quantity = Average Cost**

*Average Price is the average of all the outward entries which are displayed at the time of recording a new sales entry.*

### **At Zero Cost**

*The stock is valued at zero cost.*

### **Last Purchase Cost / Sale Price**

- **Last Purchase Cost:** The stock is valued based on the last purchase cost given in the Purchase entry.
- **Last Sale price:** The stock is valued based on the last sales price given in the Sales entry.

### **Monthly Avg. Cost**

*This is the Average Cost where the period is month-wise. Tally.ERP 9 calculates the average value after each purchase or sale for the whole month.*

### **Standard Cost**

*Standard Cost is a pre-determined cost, based on which you would like to value your closing stock. The standard cost details have to be given in the stock item master.*

You can decide which method of stock valuation is most appropriate for your business and accordingly define that in the item master. **FIFO (First In First Out)** and **Average Cost** are the most popular stock valuation methods used in today's business.

## 7.9 Zero Valued Entries

Zero valued entries in vouchers are required when, for example: you need to despatch inventory as free samples or free replacements, etc.

You can make an entry of issue with the required quantity details but enter the value as zero. This is done so that the entry is reflected only in the Inventory books and not in the Accounting books.

### 7.9.1 Creating Zero Valued Entries

*On 28-02-10, make a Sales invoice on Prism fabrication for 1 Nos of Television Flatoron without value.*

#### Setup:

In **National Traders**,

- ❑ Activate the feature **Allow Zero valued entries** in the **F11: Features (Inventory Features)** and accept the other settings.
- ❑ Create a ledger account **Samples** under the group **Sales Accounts** and set **Cost Centres are applicable** to **No** and **Inventory values are affected** to **Yes**.

#### Create Sales Invoice

1. Raise a sales invoice dated 28-02-10 on **Prism fabrication** for 1 Television Flatoron with no value.
2. **Price levels** is to be set as **Not applicable**
3. Allocate it to **Samples**

After passing the above zero valued entries, if you display the Sales Register you may not find this entry. But however, if you display the **Television Flatoron** Stock Item, you will find the quantity sold.

*Zero valued entries do not reflect in accounting books but affect only our inventory books.*

## 7.10 Inventory Ageing Analysis

A very important function of Working Capital Management is the monitoring of stocks. Money locked up in stocks can adversely affect the liquidity of a company. Every company strives or should strive to reduce stock levels to the optimum. Most businesses would prefer to dispose off older stocks as they might deteriorate with time, go out of fashion, or simply get forgotten.

Tally.ERP 9's Stock Ageing analysis enables you to know the age of stocks in hand according to when they were received and their purchase value.

### 7.10.1 View Inventory Ageing Report

Go to **Gateway of Tally > Display > Inventory Books > Ageing Analysis**

- ❑ Select **Medicines**
- ❑ Press **Enter** and change the date to **3-3-2010**
- ❑ **Saridon** with batch number **ST-102** and expiry date is displayed
- ❑ Click on the button **Expired Batches** to view only those items which have expired (The button **All Batches** appears when the expired batches are on display)
- ❑ Press the button **Hide Amounts**, which toggles with **Show Amounts** to view the report with or without values
- ❑ Set ageing style as **By Expiry Date** and the screen appears as shown below :

| Stock Ageing Analysis                  |             | National Traders |             |       |                | Ctrl + M                        |                     |
|----------------------------------------|-------------|------------------|-------------|-------|----------------|---------------------------------|---------------------|
| Items Under : <b>Medicine</b>          |             |                  |             |       |                | as at 3-Mar-2010                |                     |
| All Batches (Aged by Date of Purchase) |             |                  |             |       |                | Valued based on Actual Purchase |                     |
| Particulars                            | Expiry Date | Total            | (< 45 days) |       | 45 to 90 days  |                                 | 90 to 180 days      |
|                                        |             | Quantity         | Quantity    | Value | Quantity       | Value                           | Quantity Value      |
| <b>Saridon</b>                         |             | <b>100 Nos</b>   |             |       | <b>100 Nos</b> | <b>600.00</b>                   | <b>2 more ... →</b> |
| ST/102 (On-Site)                       | 31-Dec-2009 | 100 Nos          |             |       | 100 Nos        | 600.00                          |                     |
| <b>Grand Total</b>                     |             | <b>100 Nos</b>   |             |       | <b>100 Nos</b> | <b>600.00</b>                   |                     |

Figure 7.42 Stock Ageing Analysis

You will find that the **Ageing Periods** are displayed as <45 days, 45-90 days, 90-180 days and >180 days. These are the ageing period that Tally.ERP 9 displays by default. However, you change the ageing period by using **F6: Ageing Periods**.

*The Ageing period for Negative Stock Items cannot be determined and are shown in separate column.*

- You can view **Inventory ageing report** based on the following **Ageing Styles** :
  - *By Date of Purchase*
  - *By Expiry Date*
  - *By Mfg. Date*
  - *To Be Expired*
- **Monthwise Inward/Outward Quantity Report** : Press **Enter** on **Total Quantity** to view the **month-wise inward, outward and closing quantity** report.
- **Item Inward Details** : Press **Enter** on any of the **Ageing Period** columns to view the **Item Inward Details**. This report shows the inward movement of the item for the date range calculated from the age period. Ageing Analysis is done for the stock-in-hand based on when they were purchased. Hence, while viewing the Ageing Analysis Report, the Item Inwards details statement is very useful and relevant. It provides further information of aged stock like date of purchase and supplier. It also provides a drill down facility to the actual transaction voucher.

Experiment by choosing different ageing styles and observe the changes in the report.

### Practice Exercise

1. Select **By Mfg. Date** as **Ageing Style** and view the report as on **31-12-2009**.

## 7.11 Different Actual and Billed Quantities

The need for different actual and billed quantities may arise in several instances. For example if an extra inventory is sent to cover up for any stock that reaches in a damaged condition or Inventory sent as extra samples or the Stock is despatched to the customer as quantity discount.

### Setup:

Ensure that you are in the **Gateway of Tally of National Traders**.

- Go to **F11: Features (Inventory Features)** and set **Use Different Actual & Billed Qty** to **Yes**.

### 7.11.1 Using different Actual and Billed Quantities

**Go to Gateway of Tally > Accounting Vouchers > F8: Sales.** You will notice that the Quantities column is divided into two columns, viz. Actual and Billed.

**On 3-3-2010, make a purchase invoice from Parvathi Stockers for the following items :**

| Name of the Item | Actual Qty | Billed Qty | Rate (in Rs.) |
|------------------|------------|------------|---------------|
| Rice             | 100 Kgs    | 90 Kgs     | 10            |
| Wheat            | 50 Kgs     | 50 Kgs     | 100           |

**Setup :**

- Create a new stock item as **Rice** with the following details :
  - Group it under stock group **Foodstuffs**.
  - Stock category - **Not Applicable**
  - Unit of Measure - **kgs (kilos)** with **decimal places - 3** (create if not present).
  - Accept the master creation without any opening balance and return to the Gateway of Tally.

**Step 1 : Create Purchase Invoice**

1. Enter a **Purchase invoice** on **3-3-2010** on **Parvathi stockers**.
2. Price level - **Not Applicable**
3. Select **Rice** under Name of Item
4. Order number - **Not Applicable**
5. Select the godown as **Onsite**
6. Type **Actual Quantity** as **100 kgs** and **Billed Quantity** as **90 kgs**
7. Specify the **Rate** as **Rs. 10** and the value appears as **Rs. 900** (billed quantity \* rate). The screen appears as shown below :

| Item Allocations for : <b>Rice</b>                 |             |            |           |         |        |
|----------------------------------------------------|-------------|------------|-----------|---------|--------|
| Godown                                             | Quantity    |            | Rate per  | Disc. % | Amount |
|                                                    | Actual      | Billed     |           |         |        |
| Order No.: <input type="checkbox"/> Not Applicable |             |            |           |         |        |
| On-Site                                            | 100.000 Kgs | 90.000 Kgs | 10.00 Kgs |         | 900.00 |

Figure 7.43 Item Allocations for Rice

8. Allocate to **Purchases** ledger and press **Enter**.
  - Select another item **Wheat** and enter the following details

- ❑ **Tracking number and Order number - Not Applicable**
  - ❑ **Select Godown as Onsite**
  - ❑ **Type Actual and Billed quantity - 50 bags**
  - ❑ **Specify Rate as Rs. 100**, the amount is defaulted as **Rs. 5,000**
9. Press **Enter** and accept the purchase invoice with the default bill-wise details. The Purchase invoice amounts to **Rs. 5,900** (Rice - Rs. 900 and Wheat - Rs. 5,000).

### Step 3 : Display Stock Summary

Go to **Gateway of Tally > Stock Summary**

- ❑ **Select Foodstuffs as stock group and press Enter**

| Stock Summary |  | National Traders         |        | Ctrl + M  |  |
|---------------|--|--------------------------|--------|-----------|--|
| Particulars   |  | Foodstuffs               |        |           |  |
|               |  | National Traders         |        |           |  |
|               |  | 1-Apr-2009 to 3-Mar-2010 |        |           |  |
|               |  | Closing Balance          |        |           |  |
|               |  | Quantity                 | Rate   | Value     |  |
| Rice          |  | 100.000 Kgs              | 9.00   | 900.00    |  |
| Wheat         |  | 150 Bags                 | 306.67 | 46,000.00 |  |

Figure 7.44 Stock Summary

Tally.ERP 9 displays **100 kgs** of **Rice** stock item because this is the quantity that we have actually received from the party. In case of **Wheat** the quantity appears as **150 kgs**.

Go to **Gateway of Tally > Display > Account Books > Purchase Register**

- ❑ **Select March month**
- ❑ **Press F12: Value button**,
  - **Specify the range as Voucher - Having - Ledgers - With - Name - Containing - Parvathi stockers** (party name in purchase entry of 5-3-2010)
  - **Press Enter.**
- ❑ **Press Alt+F1** to display the stock summary in detailed format
- ❑ **Press F12: Configure** and activate the option **Show Inventory Details also**

Tally.ERP 9 displays **Voucher Register** as shown below :

| Voucher Register              |                   | National Traders |             | Ctrl + M                  |               |
|-------------------------------|-------------------|------------------|-------------|---------------------------|---------------|
| List of All Purchase Vouchers |                   |                  |             | 1-Mar-2010 to 31-Mar-2010 |               |
| Date                          | Particulars       | Vch Type         | Vch No.     | Debit Amount              | Credit Amount |
| 3-3-2010                      | Parvathi Stockers | Purchase         | 21          | 5,900.00                  |               |
|                               | Purchases         |                  |             | 5,900.00 Dr               |               |
|                               | Rice              | 90.000 Kgs       | 10.00/Kgs   | 900.00                    |               |
|                               | Wheat             | 50 Bags          | 100.00/Bags | 5,000.00                  |               |

Figure 7.45 Voucher Register

The inventory details display **90 kgs** for the stock item **Rice**, because this is the quantity that the party has billed us for. (We have received 100 kgs of Rice i.e, the actual quantity. We will be making the payment for only 90 kgs i.e., the billed quantity). Therefore, the actual quantity affects the inventory books while the billed quantity reflects in the accounting books.

### Points to Remember

- ❑ Order processing includes purchase and sales order processing. Here the details of purchase orders placed and sales orders received can be obtained.
- ❑ Reorder level and order processing are linked to each other. The purchase orders are placed and sales orders are accepted based on the reorder level specified.
- ❑ Tracking numbers are used to track the delivery or receipt of inventory against the sales and purchase bills respectively. Tracking numbers are required to know the status of pending sales and purchase bills.
- ❑ Batch-wise details are maintained mainly for perishable goods. The manufacturing and expiry dates can be set for batch-wise details. Tally.ERP 9 has an option to display only those batches which have not expired and hide the expired batches.
- ❑ The additional costs which add to the cost of the actual cost of purchase of an item can be recorded in Tally.ERP 9. Hence, the additional costs on purchases can be apportioned based on the purchase value as well as on the purchase quantity. Additional cost details can be specified even for goods which require batch-wise details.
- ❑ Bill-of-Material is a term generally associated with the manufacturing of goods. Tally.ERP 9's Manufacturing journal records the item manufactured with the use of bill-of-material and enables an automatic reduction in the quantity of stock items consumed.
- ❑ Price list is generally used by organisations which deal in multiple products. It can be created for different dates and can be maintained for different kinds of buyers. Tally.ERP 9 facilitates the setting of different price levels while creating price lists for multiple stock items.
- ❑ For the valuation of inventory, Tally.ERP 9 provides various stock valuation methods. It values stocks based on the costing methods. The rate/price of the item will be displayed depending on the market valuation method defined in the stock item master.
- ❑ Inventory ageing analysis is an important aspect of working capital management. It helps in knowing the age of stocks. Tally.ERP 9 displays stock ageing analysis for items with respect to the date of purchase, expiry date, manufacture date and stocks to be expired.
- ❑ Tally.ERP 9's feature of recording transactions with different actual and billed quantities updates the accounting books based on the value of invoice and inventory books based on the actual quantity purchased or sold.

## Lesson 8: Value Added Tax (VAT)

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ How to activate VAT, Composite VAT in Tally.ERP 9.
- ❑ Create ledgers and vouchers using different classifications relating to VAT, Composite VAT.
- ❑ Record transactions relating to purchase/ sales returns, inter-state trade, inter-state branch transfers and account for input credit on capital goods.
- ❑ Generate and print VAT as well as Composite VAT Computation report.

**Value Added Tax (VAT)** is an indirect tax on goods, introduced in lieu of sales tax, to ensure transparency and greater compliance. The basic premise of VAT is to levy tax on the 'true value' added to the goods, at each stage in the transaction chain. This ultimately reduces:

- ❑ Tax paid to the government.
- ❑ Cost/ tax passed on to the consumer.

VAT is a multi-point tax as against sales tax, which is a single-point tax. Under the sales tax regime, the 'value' of goods to be taxed at each stage is computed as basic cost + profit margin + sales tax paid at the earlier stage. The advantages of implementing VAT are:

- ❑ Enhancement of competitiveness by the removal of the cascading effect of taxes.
- ❑ Simplifying the process of taxation.
- ❑ Self-regulatory mechanism ensuring greater compliance.

### 8.1 Configuring VAT in Tally.ERP 9

Let us create a new company called **Universal Traders**, a dealer of electrical items, to enter VAT related transactions.

### 8.1.1 Company Setup

Enter the details as shown below in the company creation screen:

| Company Creation                      |                       | Ctrl + M                                                                        |                           |
|---------------------------------------|-----------------------|---------------------------------------------------------------------------------|---------------------------|
| Directory                             | : C:\Tally.ERP9\Data  |                                                                                 |                           |

Figure 8.1 Company Creation – Universal Traders

- Press **Enter** twice to accept the company creation screen.

### 8.1.2 Enabling Value Added Tax (VAT)

To enable **VAT**, press **F11: Features (Statutory & Taxation Features)** and

- Set **Yes** to **Enable Value Added Tax (VAT)**
- The VAT classifications are different for each State in India. In order to activate and view the various VAT classifications, set the option **Set / Alter VAT details** to **Yes**.
- On activating **Set / Alter VAT details** the screen appears as shown below:

**Company VAT Details** Ctrl + M

Current Period: 1-4-2009 Current Date: 1-4-2009

**VAT Details**

State : Karnataka ? No  
 Type of Dealer : Regular ? No  
 Regular VAT Applicable From : 1-4-2009 ? No

**Additional Information**

LVO/VSO Code : 256  
 Authorised Person : Ramesh  
 Status / Designation : CTO  
 Place : Bangalore

Background text: Name of Company, Enable Excise, Set/Alter Excise D, (Note: 'Enable Ma for Multiple Excise, Follow Excise rules fo, Enable Value Added T, Set/Alter VAT Deta, Enable Service Tax, Set/Alter Service T

Bottom tabs: F11: Accounts, F12: Inventory, F13: Customer, F14: Sales

Figure 8.2 VAT Details

- ❑ In this screen you have to select the State, the type of dealer and specify the date of applicability to view the VAT classifications of the required specifications.
- ❑ In **F11: Features (Accounting Features)**, set **Maintain Bill-wise details** to **Yes**.

### 8.1.3 VAT Classifications

It is a list of VAT rates which describes the nature of the business activity and the type of transaction. These classifications are in-built in the system and will be updated as and when any statutory changes take place.

Some of the classifications are:

- ❑ Input VAT @ 4%
- ❑ Input VAT @ 1%
- ❑ Input VAT @ 12.5%
- ❑ Output VAT @ 1%
- ❑ Output VAT @ 4%
- ❑ Output VAT @ 12.5%
- ❑ Purchases - Capital Goods @ 4%

- ❑ Purchases - Exempt
- ❑ Purchases from Composition Dealers
- ❑ Purchases - From Unregistered Dealers
- ❑ Inter-state Purchases

Depending on the type of business, type of transaction, and statutory requirements of your state, you need to select the appropriate classifications from the list.

You can define your classification:

- ❑ At the time of ledger creation.
- ❑ At the time of voucher entry.

**Input VAT:** This is a tax paid on purchases

**Output VAT:** This is a tax paid on sales.

**VAT Rates:** According to the White Paper, there are 550 categories of goods under the VAT system. They are classified into VAT @ 4%, VAT @ 12.5%, VAT @ 1% and those exempted from VAT, depending on the VAT Rate.

## 8.2 Creating Masters

The ledgers that are affected by VAT are:

- ❑ Purchase Ledger
- ❑ Sales Ledger
- ❑ Input VAT Ledger
- ❑ Output VAT Ledger
- ❑ Party Ledger

### 8.2.1 Creating Purchase Ledger

Go to Gateway of Tally > Accounts Info. > Ledger > Create.

| Ledger        | Under                | Inventory val-<br>ues are affected | Used in VAT<br>Returns | VAT/Tax Class  |
|---------------|----------------------|------------------------------------|------------------------|----------------|
| Purchase @ 4% | Purchase<br>Accounts | Yes                                | Yes                    | Purchases @ 4% |

- ❑ Select the **VAT/Tax class** as **Purchases @ 4%** as shown below:

Figure 8.3 Default VAT/Tax Class

- Retain the other fields as default and accept the screen.

*The drop down list in the **VAT/Tax Class** of purchase ledgers consists of the purchase classifications pertaining to your state. If you do not wish to select a classification at the ledger level, you can set this field to **Not Applicable**.*

### Practice Exercise

Create the following purchase ledger

| Ledger           | Under             | Inventory values are affected | Used in VAT Returns | VAT/Tax Class     |
|------------------|-------------------|-------------------------------|---------------------|-------------------|
| Purchase @ 12.5% | Purchase Accounts | Yes                           | Yes                 | Purchases @ 12.5% |

## 8.2.2 Creating Sales Ledger

Create the following Sales Ledgers

| Ledger Name   | Under         | Inventory values are affected | VAT/Tax Class | Used in VAT Returns |
|---------------|---------------|-------------------------------|---------------|---------------------|
| Sales @ 4%    | Sales Account | Yes                           | Sales @ 4%    | Yes                 |
| Sales @ 12.5% | Sales Account | Yes                           | Sales @ 12.5% | Yes                 |

## 8.2.3 Creating Input VAT Ledger

Go to Gateway of Tally > Accounts Info. > Ledger.

- ❑ Create the ledger Input VAT @ 4% under Duties and Taxes.
- ❑ Select Input VAT @ 4% from the drop down list of VAT classification

The ledger **Input VAT @ 4%** appears as shown below :

The screenshot shows the 'Ledger Creation' window for 'Universal Traders'. The 'Name' field is 'Input VAT @ 4%'. The 'Under' field is 'Duties & Taxes (Current Liabilities)'. The 'Type of Duty/Tax' is 'VAT', and the 'VAT/Tax Class' is 'Input VAT @ 4%'. The 'Inventory values are affected' field is 'No'. The 'Percentage of Calculation (eg 5)' is '4 %'. The 'Method of Calculation' is 'On VAT Rate'. The 'Rounding Method' is 'Not Applicable'. The 'Mailing Details' section includes fields for Name, Address, State, and PIN Code. The 'Tax Information' section includes a field for PAN / IT No. The 'Opening Balance (on 1-Apr-2009)' is displayed as a blacked-out field. The 'Total Op. Bal.' field is empty.

Figure 8.4 Ledger Creation — Input VAT @ 4%

The Percentage of Calculation field displays the VAT rate that you have selected in the VAT/Tax Class field and the Method of Calculation displays **On VAT Rate** if you have selected **VAT** under Type of Duty/Tax.

- ❑ After entering the details as displayed in the above ledger creation screen, press **Ctrl+A** to accept the screen.

*On enabling **TDS** and **Service Tax** in the **F11: Features (Statutory & Taxation Features)**, the list will also include **TDS** and **Service Tax**.*

### **Practice Exercise**

Create the following ledgers:

#### **1. Input VAT @ 12.5%**

- ❑ Name: Input Vat @ 12.5%
- ❑ Under: Duties & Taxes
- ❑ Type of Duty/Tax: VAT
- ❑ VAT/Tax Class: Input VAT @ 12.5%
- ❑ Percentage of Calculation: 12.5%
- ❑ Method of Calculation: On VAT Rate
- ❑ Inventory values are affected: No

#### **2. Output VAT @ 4%**

- ❑ Name: Output Vat @ 4%
- ❑ Under: Duties & Taxes
- ❑ Type of Duty/Tax: VAT
- ❑ VAT/Tax Class: Output VAT @ 4%
- ❑ Percentage of Calculation: 4%
- ❑ Method of Calculation: On VAT Rate
- ❑ Inventory values are affected: No

#### **3. Output VAT @ 12.5%**

- ❑ Name: Output Vat @ 12.5%
- ❑ Under: Duties & Taxes
- ❑ Type of Duty/Tax: VAT
- ❑ VAT/Tax Class: Output VAT @ 12.5%
- ❑ Percentage of Calculation: 12.5%
- ❑ Method of Calculation: On VAT Rate
- ❑ Inventory values are affected: No

## 8.2.4 Creating Party Ledger

Create the following party ledgers:

| Ledger         | Under            | Maintain<br>balances bill-by-bill |
|----------------|------------------|-----------------------------------|
| Sujan Ltd.     | Sundry Creditors | Yes                               |
| Chahak Traders | Sundry Debtors   | Yes                               |
| Somi Telicomm  | Sundry Debtors   | Yes                               |

## 8.2.5 Creating Stock Items

Create a stock item **Surya Lamps** as shown below :

| Stock Item Creation                        |  | Universal Traders                                                                                                                                                                                  |                                     |
|--------------------------------------------|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| Name : <b>Surya Lamps</b><br>(alias) :     |  |                                                                                                                                                                                                    |                                     |
| Under : <b>Bulbs</b><br>Units : <b>Nos</b> |  | <b>Tax Information</b><br>Tariff Classification : <b>Not Applicable</b><br>Rate of Duty (eg 5) : <b>0</b><br><b>VAT Details</b><br>Commodity : <b>Not Applicable</b><br>Rate of VAT (%) : <b>4</b> |                                     |
| Opening Balance :                          |  | <b>Quantity</b>                                                                                                                                                                                    | <b>Rate per</b>                     |
|                                            |  |                                                                                                                                                                                                    | <b>Accept ?</b><br><b>Yes or No</b> |

Figure 8.5 Stock Item — Surya Lamps

- Press **Y** or **Enter** to accept the screen.

- Create a Stock group **Bulbs** under **Primary**.
- Create **Nos** with formal name as **Numbers** under simple Unit of Measure.
- The value entered in the field **Rate of VAT** will be picked up when invoicing if you have selected the Method of Calculation as Tax Based on the Item Rate in your relevant accounting ledger.

### Practice Exercise

Create the following Stock Items under the stock group **Bulbs** with units of measure as **Nos.**:

- **Philips Lamps** with a VAT rate of **4%**.
- **GE Lamps** with a VAT rate of **12.5%**.
- **Bajaj Lamps** with a VAT rate of **4%**.

## 8.3 Entering Transactions

### 8.3.1 Creating Purchase Voucher without Inventory

*On 1-6-09, Universal Traders purchased from Sujan Ltd., Bangalore, Surya Lamps 20 nos at Rs. 300 each & Philips lamps 30 nos at Rs. 500 each. (Input VAT - 840.)*

**Enter the details of the transaction in voucher mode (without Inventory)**

**Go to Gateway of Tally > Accounting Vouchers > F9: Purchase.**

1. **Date: 1-6-2009.**
2. Credit **Sujan Ltd.: Rs. 21840** (Purchase + VAT amount).
3. In the bill-wise details give the new reference as **S/01**.
4. Debit **Purchase @ 4%**. Select **End of List** in the **Inventory Allocation** screen as you will not be entering any inventory details. A sub screen asks for **VAT/Tax Class**. Select **Purchase @ 4%**. Total amount of Purchases is Rs. 21000.
5. Select the **Input VAT** Ledger and in the sub screen that appears, select **Input VAT @ 4%** in **VAT/Tax Class**. Enter the total cost **Rs. 21000**, in **Assessable Value** and press **Enter** to return to the voucher.
6. Tally.ERP 9 displays the **Input VAT** amount as **Rs. 840** (4% of Rs. 21000) by default. You can also choose to enter this amount.

The completed Purchase voucher appears as shown below:

| Accounting Voucher Creation |              | Universal Traders |  | Ctrl + M             |           |
|-----------------------------|--------------|-------------------|--|----------------------|-----------|
| <b>Purchase</b> No. 1       |              | Date :            |  | 1-Jun-2009<br>Monday |           |

Figure 8.6 Purchase Voucher

7. Type the narration and press **Y** or **Enter** to accept the screen.

### 8.3.2 Creating Purchase Invoice with default VAT Class

*On 3-6-09, Universal Traders purchased from Sujan Ltd. Bangalore, Surya Lamps 30 Nos. at Rs. 300 each. VAT @ 4% was charged additionally.*

#### Setup :

- Select **As Invoice** and press **F12: Configure** button to set the options as under:
  - **Accept Supplementary Details – No.**
  - **Use Common Ledger A/c for Item Allocation – No.**
  - **Allow selection of VAT/Tax Class during entry – No.**

**Enter the details of the transaction in the purchase invoice**

**Go to Gateway of Tally > Accounting Vouchers > F9: Purchase.**

1. In the **Accounting Allocation** screen, select **Purchase @ 4%** and the **VAT Classification** entered in the Purchase Ledger is displayed.
2. On selecting **Input VAT @ 4%**, the VAT amount will be calculated automatically.

### 8.3.4 Creating Purchase Invoice with Multiple VAT Rates

*On 5-6-09, Universal Traders purchased the following lamps from Sujan Ltd.*

| Item       | Quantity | Rate | VAT % |
|------------|----------|------|-------|
| GE Lamp    | 15 Nos   | 100  | 12.5  |
| Bajaj Lamp | 5 Nos    | 150  | 4     |

#### Setup :

Click on **Item Invoice** button and change the following settings in **F12: Configuration**.

- **Use Common Ledger A/c for Item allocation – No.**
- **Allow selection of VAT/Tax class during entry – No.**

**Enter the details of the transaction in the purchase invoice**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**.

- ❑ In the **Accounting Details** screen of **GE Lamps**, select **Purchase 12.5%** under **Particulars**. **Purchase @ 12.5%** will be selected automatically in the **VAT/Tax Class**.
- ❑ In the **Accounting Details** screen of **Bajaj Lamps**, select **Purchase @ 4%** under **Particulars**. **Purchase @ 4%** will be selected automatically in the **VAT/Tax Class**.
- ❑ Select the ledgers **Input VAT @ 12.5%** and **Input VAT @ 4%**. The **Input VAT** amount would be automatically calculated and displayed in the amount columns.

The completed **Purchase Invoice** appears as shown :

Figure 8.13 Invoice Printing Configuration

- Press **Y** or **Enter** to print.

On configuring the settings, the following new sections appear in all the VAT invoices:

- VAT Amount (in words)
- Company's VAT TIN No.
- Company's CST No.
- Buyer's TIN/Sales Tax No.

The printed **VAT Tax Invoice** appears as shown below:

| Tax Invoice                                                                                                                              |                      |                                                          |          |                             |                  |            |

- Type the narration and accept the screen.

### 8.3.9 Creating Sales Invoice with Multiple VAT Rates

*Universal Traders sells the following lamps to Somi Telicomm on 19-6-09.*

| Sales Item | Quantity | Rate | VAT % |
|------------|----------|------|-------|
| GE Lamp    | 10 Nos   | 150  | 12.5  |
| Bajaj Lamp | 5 Nos    | 150  | 4     |

You can use multiple ledgers pre-defined with a different VAT rate, or choose to select each rate at the time of voucher entry.

### Setup :

Press **F12: Configure** and change the following settings:

- ❑ **Use Common Ledger A/c for Item allocation – No.**
- ❑ **Allow selection of VAT/Tax class during entry – No.**

### Enter the details of the transaction in a sales invoice.

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**.

1. In the Accounting Details screen of GE Lamps, select **Sales @ 12.5%** under **Particulars**. The **Sales @ 12.5%** will be selected in the **VAT/Tax Class**.
2. In the Accounting Details screen of Bajaj Lamps, select **Sales @ 4%** under **Particulars**. The **Sales @ 4%** will be selected in the **VAT/Tax Class**.
3. Select the ledgers **Output VAT @ 4%** and **Output VAT @ 12.5%**. The **Output VAT** amount would be automatically calculated and displayed in the amount columns.

The completed **sales invoice** appears as shown below :

| Accounting Voucher Creation             |          | Universal Traders |          | Ctrl + M    |

4. Type the narration and press **Y** or **Enter** to accept the screen.

### 8.3.10 Creating Sales Invoice using Voucher Class

**On 20-6-09, Universal Traders sold 1 Surya lamp at Rs. 350 to Chahak Traders. The goods are taxable @ 4% VAT.**

Tally.ERP 9 provides 16 different, specific, predefined voucher formats to facilitate an easy recording and analysis of transactions.

#### Step 1: Create Voucher Class – Sales @ 4% for sales voucher.

Go to **Gateway of Tally > Accounts Info. > Voucher Types > Alter > Select Sales.**

1. Type **Sales @ 4%** under **Name of Class** (the rest of the fields will be complete as the voucher is in alteration mode).
2. Press **Enter**.
3. Enter the details in the **Voucher Type Class** screen as shown below:

| Universal Traders                                                                      |                     |                     |                      |                |                               |  |
|----------------------------------------------------------------------------------------|---------------------|---------------------|----------------------|----------------|-------------------------------|--|
| Class : Sales @ 4%                                                                     |                     |                     |                      |                |                               |  |
| If you wish to restrict the groups to which this class can be used, specify them here. |                     |                     |                      |                |                               |  |
| Exclude these Groups                                                                   |                     |                     | Include these Groups |                |                               |  |
| J End of List                                                                          |                     |                     | J End of List        |                |                               |  |
| Default Accounting Allocations for each Item in Invoice                                |                     |                     |                      |                |                               |  |
| Ledger Name                                                                            | VAT/Tax Class       | Percentage %        | Rounding Method      | Rounding Limit | Override using Item Default ? |  |
| Sales @ 4%                                                                             | Sales @ 4%          | 100 %               |                      |                | No                            |  |
| Additional Accounting Entries (e.g. Taxes / Other charges) to be added in Invoice      |                     |                     |                      |                |                               |  |
| Ledger Name                                                                            | Type of Calculation | Value Basis         | Rounding Method      | Rounding Limit | Remove if Zero ?              |  |
| Output VAT @ 4%                                                                        | On VAT Rate         | 4% J Not Applicable |                      |                | Yes                           |  |

Figure 8.17 Sales @ 4% Class

4. Press **Enter** to accept the **Voucher Type Class** screen.
5. Press **Ctrl+A** to accept the voucher type alteration screen.

## Step 2 : Enter the details of the transaction in a Sales Invoice

Go to Gateway of Tally > Accounting Vouchers > F8: Sales.

- Select **Sales @ 4%** in **Voucher Class List**.

The completed **sales invoice** appears as shown below:

## 8.4 VAT Reports

In Tally.ERP 9, you can generate VAT Reports & statutory returns in prescribed format. In this lesson, we will discuss about the books of accounts, reports and registers related to VAT.

### 8.4.1 VAT Computation Report

Depending on the Input VAT paid during purchases and the output VAT availed on sales, VAT Refundable or Payable is calculated in this section by Tally.ERP 9.

**The difference between Input VAT and Output VAT = VAT Refundable.**

Go to **Gateway of Tally > Display > Statutory Reports > VAT Reports > VAT Computation.**

The **VAT Computation report** appears as shown below:

| VAT Computation                       |  | Universal Traders                              |                 | Ctrl + M |
|---------------------------------------|--|------------------------------------------------|-----------------|----------|
| Particulars                           |  | Universal Traders<br>1-Jun-2009 to 30-Jun-2009 |                 |          |
|                                       |  | Assessable<br>Value                            | Tax<br>Amount   |          |
| <b>Sales</b>                          |  |                                                |                 |          |
| <b>A. Output Tax</b>                  |  |                                                |                 |          |
| Output VAT @ 12.5%                    |  | 1,500.00                                       | 187.50          |          |
| Output VAT @ 4%                       |  | 11,800.00                                      | 472.00          |          |
| <b>Total Output Tax</b>               |  | <b>13,300.00</b>                               | <b>659.50</b>   |          |
| <b>Purchases</b>                      |  |                                                |                 |          |
| <b>B. Input Tax</b>                   |  |                                                |                 |          |
| Excess Input Credit Brought Forward   |  |                                                |                 |          |
| Input VAT @ 12.5%                     |  | 1,500.00                                       | 187.50          |          |
| Input VAT @ 4%                        |  | 33,750.00                                      | 1,350.00        |          |
| <b>Total Input Credit</b>             |  | <b>35,250.00</b>                               | <b>1,537.50</b> |          |
| <b>VAT Refundable/Carried Forward</b> |  |                                                | <b>878.00</b>   |          |

Figure 8.19 VAT Computation

The VAT Computation screen is divided into two sections: Output and Input Tax. Each section is further subdivided into VAT Classifications: Output VAT @12.5%, Output VAT @ 4%, Input VAT @12.5% and Input VAT @ 4%.

Here the Input VAT is Rs. 1,537.50 and the Output VAT is Rs. 659.50. Therefore, Rs. 878 is the VAT Refundable/ Carried Forward.

### 8.4.2 VAT Returns

To view a VAT Form, Go to **Gateway of Tally > Display > Statutory Reports > VAT Reports > VAT Forms > VAT Return Forms > Form VAT 100.**

|                                                                                                                                                                                                                                               |                                       |                   |                                         |

## 8.5 Accounting for Return of Goods

In a business, customers may return goods due to numerous reasons such defectiveness, expired or short delivered and so on. Similarly, even the defective goods may also be returned to the vendors.

In this section, we will look into the entries of such transactions through Credit Notes and Debit Notes.

### Setup :

To enable **Debit/Credit**, set the following fields to **Yes** in **F11: Features (Accounting Features)** screen:

- ☐ **Use Debit/Credit Notes**
- ☐ **Use Invoice Mode for credit note**
- ☐ **Use Invoice Mode for debit note**

### 8.5.1 Sales Returns

*On 20-6-09, Somi Telicomm returned 1 No. Surya Lamp to Universal Traders.*

#### Enter the details of the transaction in Credit Note

Go to **Gateway of Tally > Accounting Vouchers > F8: Credit Note**.

- ☐ Enter the details of the transaction as shown below in a credit note voucher.

Figure 8.27 VAT Computation

**Sales Returns Entry** – The Assessable Value reduces by Rs. 350 (the price of the returned item) and the Output VAT by Rs. 14 (4% of Rs. 350).

Therefore Output VAT is now Rs. 645.5 (659.5 - 14) and the Assessable Value is **Rs. 12,950** (13,300-350).

**Purchase Returns Entry** – The Assessable value reduces by Rs. 300 (the price of the returned item) and the Output VAT by Rs. 12 (4% of 300).

Therefore the Input VAT is now Rs. 1,525.5 (1,537.5 - 12) and Assessable Value is **Rs. 34,950** (35,250 -300).

- The VAT Refundable is **Rs. 880**, press **Enter** on **Input VAT @ 4%** in the VAT Computation report.

The **VAT Classification Vouchers** screen with Input VAT @ 4% appears as shown below:

## 8.6 Rate Difference in Purchase / Sales

In course of business, price variations may arise in respect of the prices of commodities due to inflation or deflation in the market or competition, proper accounting of such transactions is essential for accurate computation of tax liability and outstanding receivables or payables from the customer / vendors respectively.

Debit/ Credit Notes can be used in case of changes in rates after the purchase and sales transactions.

### 8.6.1 Rate Differences in Purchases

**On 21-6-09, Sujan Ltd. allowed a rate difference on lamps purchased by Universal Traders for the stock available at Rs. 50. VAT @ 4% was charged additionally.**

**Universal Traders** raised a **Debit Note** as shown below:

Figure 8.34 VAT Classification Vouchers

## 8.7 Accounting for Interstate Transactions

### 8.7.1 Inter-state Purchases

Inter-state Purchases attract Central Sales Tax (CST), which is not set-off against Output VAT on sales within the state or Output CST in inter-state sales. The CST paid is treated as a part of procurement cost.

Create the following purchase voucher for the Inter-state Purchase transaction

| Date     | Party                            | Item        | Quantity | Rate | Tax    |
|----------|----------------------------------|-------------|----------|------|--------|
| 24-06-09 | Saarthak Enterprises<br>(Kerala) | Surya Lamps | 50 Nos   | 200  | CST 4% |

#### Setup :

Create the following Ledgers :

**i. Inter-state Purchase ledger**

| Name                 | Under             | Inventory values are affected | Used in VAT Returns | VAT/Tax Class        |
|----------------------|-------------------|-------------------------------|---------------------|----------------------|
| Inter-state Purchase | Purchase Accounts | Yes                           | Yes                 | Inter-state Purchase |

**ii. Purchase Ledger**

| Name      | Under                                                                            | Inventory values are affected | Percentage of Calculation | Method of Calculation | Used in VAT Returns | VAT/Tax Class         |
|-----------|----------------------------------------------------------------------------------|-------------------------------|---------------------------|-----------------------|---------------------|-----------------------|
| Input CST | Purchase Accounts<br>(Under this group, set <b>Used for Calculation - Yes</b> ). | Yes                           | 4%                        | On Total Sales        | Yes                 | Inter-state Purchases |

*The **Input CST** ledger is grouped under **Purchase account** since it is treated as purchase cost.*

**iii. Party Ledger**

| Name                 | Under            | Inventory Values are affected |
|----------------------|------------------|-------------------------------|
| Saarthak Enterprises | Sundry Creditors | No                            |

**Enter the details of the transaction in the Purchase Invoice**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

The completed **Purchase Invoice** appears as shown :

Figure 8.35 Purchase Invoice

- ### 8.7.2 Inter-state Sales

Create the following Sales voucher for the Inter-state Sales transaction

### Setup :

190

**i. Sales Ledger**

| Name              | Under          | Inventory Values are affected | Used in VAT Returns | VAT/Tax Class     |
|-------------------|----------------|-------------------------------|---------------------|-------------------|
| Inter-State Sales | Sales Accounts | Yes                           | Yes                 | Inter-State Sales |

**ii. Tax Ledger**

| Name       | Under            | Type of Duty | VAT/Tax Class     | Percentage of Calculation | Method of Calculation |
|------------|------------------|--------------|-------------------|---------------------------|-----------------------|
| Output CST | Duties and Taxes | CST          | Inter-state Sales | 4%                        | On Total Sales        |

**iii. Party Ledger:**

| Name                | Under          | Inventory Values are affected |
|---------------------|----------------|-------------------------------|
| Business Automation | Sundry Debtors | No                            |

**Enter the details of the transaction in the Sales Invoice**

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

- ▣ Select the ledger **Inter-State sales** for accounting allocation.

The completed **Sales Invoice** appears as shown below:

| Accounting Voucher Creation                   |          | Universal Traders                     |     | Ctrl + M              |          |
|-----------------------------------------------|----------|---------------------------------------|-----|-----------------------|----------|
| <b>Sales</b>                                  | No. 6    | Voucher Class : <b>Not Applicable</b> |     | 26-Jun-2009<br>Friday |          |
| Ref. :                                        |          |                                       |     |                       |          |

| <b>Purchases</b>                      |  |                                                |                 |               |
| <b>B. Input Tax</b>                   |  |                                                |                 |               |
| Excess Input Credit Brought Forward   |  |                                                |                 |               |
| Input VAT @ 12.5%                     |  | 1,500.00                                       | 187.50          |               |
| Input VAT @ 4%                        |  | 33,400.00                                      | 1,336.00        |               |
| <b>Others (VAT Not Applicable)</b>    |  |                                                |                 |               |
| Inter-State Purchases                 |  | 10,400.00                                      |                 |               |
| <b>Total Input Credit</b>             |  | <b>45,300.00</b>                               | <b>1,523.50</b> |               |
| <b>VAT Refundable/Carried Forward</b> |  |                                                |                 | <b>544.00</b> |

Figure 8.37 VAT Computation

You will find that the Tax Amount column is nil in **Interstate Purchases** but Rs. 350 is seen under the heading **Inter-state Sales**.

## 8.8 Exempt Transactions under VAT

Under the VAT Act, few commodities comprising of natural and unprocessed products, which are produced in the unorganized sectors, and legally barred from taxation, are placed under the Exempted goods list. Transactions for these items do not carry any VAT charge. The list of exempt goods vary from state to state.

### 8.8.1 Exempted Purchases

Consider the following transaction of Universal Traders:

| Date    | Party           | Books                   | Quantity | Rate |
|---------|-----------------|-------------------------|----------|------|
| 27-6-09 | Anil Book Depot | World of Cutting Tools  | 8 Nos    | 480  |
|         |                 | World Book Encyclopedia | 25 Nos   | 50   |

**Setup :**

Create the following ledgers,

**i. Purchase Ledger**

| Name            | Under             | Inventory values are affected | Used in VAT Returns | VAT/Tax Class    |
|-----------------|-------------------|-------------------------------|---------------------|------------------|
| Purchase Exempt | Purchase Accounts | Yes                           | Yes                 | Purchases Exempt |

**ii. Party Ledger**

| Name            | Under            | Inventory Values are affected |
|-----------------|------------------|-------------------------------|
| Anil Book Depot | Sundry Creditors | No                            |

**iii. Create the following Stock Items under Primary group with units of measure as Nos.:**

- ❑ World of Cutting Tools.
- ❑ World Book Encyclopedia.

**Enter the details of the transaction in a Purchase Invoice**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

- ❑ In **F12: Configuration**, set **Use Common Ledger A/c for Item Allocation** to **Yes**.

The completed **Purchase Invoice** appears as shown :

| Accounting Voucher Creation                                                                                                                            |          | Universal Traders |                 | Ctrl + M    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------|-----------------|-------------|

Figure 8.40 VAT Computation

In the **VAT Computation** screen, the value of exempted Purchases and Sales will appear under **Others (VAT not applicable)** column. It will not form part of the taxable turnover in VAT Computation.

## 8.9 Purchases from Unregistered Dealers

A dealer whose turnover is below a certain threshold can be called as an unregistered dealer. Unregistered dealers cannot issue a Tax Invoice required for claiming the Input Credit.

Thus, purchases from unregistered dealers, are not entitled for input credit and have to be recorded separately.

Consider the following transaction:

**On 29-6-09, Universal Traders purchased Surya Lamps, 10 nos. at Rs.150 each from an unregistered dealer Payal Travels.**

### 8.9.1 Display VAT Computation Report

The Purchase transaction from unregistered dealer appears under **VAT not applicable** and no Input Credit is allowed on it.

## 8.10 Claiming ITC on Capital Goods

Under VAT laws, the Input Tax Credit is allowed on capital goods from the date of its commercial production. The extent of credit is at the discretion of the Assessing Officer and is deferred over 12 months.

Consider the following transaction:

**On 29-6-09, Universal Traders purchased a Laser marking machine at Rs. 15,00,000 + VAT @ 4% from Pandit Engineering. On 30-6-09 the Tax authorities allowed a tax credit of Rs. 30000 to be set-off in 12 monthly instalments.**

#### Setup :

In the **F11: Features (Accounting Features)** set:

- ☐ **Maintain Bill-wise Details to Yes.**
- ☐ **for Non-trading A/cs also** (under **Maintain Bill-wise Details.**) to **Yes.**

Create the following ledgers:

#### i. Fixed Asset Ledger

| Name              | Under        | Maintain balances bill-by-bill | Inventory Values are affected | Used in VAT Returns |
|-------------------|--------------|--------------------------------|-------------------------------|---------------------|
| Laser Marking M/c | Fixed Assets | No                             | No                            | No                  |

#### ii. Current Assets Ledger

| Name                      | Under          | Maintain balances bill-by-bill | Inventory Values are affected |
|---------------------------|----------------|--------------------------------|-------------------------------|
| Tax Paid on Capital Goods | Current Assets | Yes                            | No                            |

*This ledger is used to record the tax set aside for future amortization.*

### iii. Tax Ledger

| Name                       | Under          | Type of Duty/Tax | VAT/Tax Class                  | Maintain balances bill-by-bill | Inventory Values are affected |
|----------------------------|----------------|------------------|--------------------------------|--------------------------------|-------------------------------|
| Input VAT on Capital Goods | Duties & Taxes | VAT              | Purchases - Capital Goods @ 4% | No                             | No                            |

*This ledger is created and used for the purpose of debiting monthly instalments of input credit allowed on Capital goods, over a period of 12 months.*

### iv. Party Ledger

| Name               | Under            | Maintain balances bill-by-bill | Inventory Values are affected |
|--------------------|------------------|--------------------------------|-------------------------------|
| Pandit Engineering | Sundry Creditors | Yes                            | No                            |

*Follow the steps given below:*

- ❑ *Create a Purchase Voucher to capitalise the full value of the capital goods purchased.*
- ❑ *For the Input Credit allowed by the Assessing Officer, pass a journal entry to account for it.*
- ❑ *Pass a journal entry for claiming the instalment of credit for the month. Create a Voucher Class, so that the journal entry affects the final VAT computation.*

### Step1: Create Purchase Voucher

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. Press **Ctrl+V** if the screen appears in the Invoice mode.
2. **Date: 29-6-09.**
3. Credit **Pandit Engineering: Rs. 15,60,000.**
4. Debit **Laser Marking M/c: Rs. 15,60,000** (If you don't find this ledger account in the drop down list, press **F12: Configure** and set the feature **Allow Expenses/Fixed Assets in Purchase Vouchers** to Yes).

The completed **Purchase Voucher** appears as shown below:

| Accounting Voucher Creation     |  | Universal Traders |              | Ctrl + M     |              |
|---------------------------------|--|-------------------|--------------|--------------|--------------|
| <b>Purchase</b> No. 8           |  |                   |              | 29-Jun-2009  |              |
| Supplier Invoice No. :          |  | Date :            |              | Monday       |              |
| Particulars                     |  | Debit             | Credit       |              |              |
| Cr <b>Pandit Engineering</b>    |  |                   | 15,60,000.00 |              |              |
| <i>Cur Bal: 15,60,000.00 Cr</i> |  |                   |              |              |              |
| New Ref: PE/01                  |  | 15,60,000.00      | Cr           |              |              |
| Dr <b>Laser Marking M/c</b>     |  | 15,60,000.00      |              |              |              |
| <i>Cur Bal: 15,60,000.00 Dr</i> |  |                   |              |              |              |
| Narration:                      |  |                   |              | 15,60,000.00 | 15,60,000.00 |

Figure 8.42 Purchase Voucher

5. Press **Y** or **Enter** to accept the screen.

**Step 2: Create Journal Voucher** (to record the installment amount to be claimed as input credit)

1. Go to **Journal** voucher.
2. **Date: 30-6-09.**
3. Debit **Tax paid on Capital Goods:** Rs. 30,000 (amount allowed as credit by the tax authorities).
4. In the **Bill-wise Details** screen,
  - Select **New Ref** under **Type of Ref**,
  - **Instalment Number** under **Name**
  - Enter **Rs. 2,500** (i.e. 30,000/12) under **Amount**.
5. Similarly, create **12** new references for the monthly installments.
6. Credit **Laser Marking M/c: Rs. 30000.**

The completed **Journal Voucher** appears as shown below:

| Accounting Voucher Creation                      |             | Universal Traders |  | Ctrl + M               |  |

Figure 8.43 Journal Voucher

7. Press **Y** or **Enter** to accept the screen.

### Step 3: Journal entry (for claiming the installment of credit)

#### Setup :

Create the **Voucher class** for the journal entry.

Go to **Gateway of Tally > Accounts Info. > Voucher type > Alter > Select Journal**.

- Most of the fields are already completed as the voucher type is in the alteration mode. Hence tab down to the field **Name of Class**.
- Enter **VAT Adjustment Class** under the **Name of Class** field and press **Enter**. In the voucher type class screen, set **Use Class for VAT Adjustments** to **Yes**.

| Universal Traders                   |              |
|-------------------------------------|--------------|
| Class : <u>VAT Adjustment Class</u> |              |
| Use Class for VAT Adjustments       | ? <b>Yes</b> |
| <u>Ledger account to use</u>        |              |

Figure 8.44 VAT adjustment Class

- ❑ As mentioned before, you will need to do this if the Journal entry is to be considered in VAT Computation.
- ❑ Press **Enter** and return to the Voucher class screen and save it.

### Create Journal Voucher

Go to **Gateway of Tally > Accounting Vouchers > F7: Journal**

1. Select **VAT Adjustment class**.
2. Press **F2** and change the date to **30-6-09**.
3. Debit **Input VAT on Capital Goods**.
4. Enter **Purchases-Capital Goods @ 4%** and **1560000** respectively, in the screen prompting for the **VAT/ Tax Class** and **Assessable value**.
5. Return to the voucher screen and enter **2500** in the **Amount** column.
6. Credit **Tax Paid on Capital Goods: Rs. 2500**.
7. In the **Bill-wise** details, select **Agst-Ref** in **Type of Ref** and **1** as **Name of Reference**. The amount will appear automatically. (Ensure that **Show Table of Bill Details for Selection** is set to **Yes** in the **F12: Voucher Configuration**).

## 8.11 Inter-State Branch Transfers

Inter-state Branch transfers do not attract any tax. The Input Credit on stocks transferred outside the state is allowed only to the manufacturers. However, to put stock transfers and inter-state trade broadly on the same competitive level, 4% of the Input Credit on stock transfer is disallowed.

Branch Transfer transactions can be both Transfer Inwards and Transfer Outwards. Tally.ERP 9 provides specific VAT classes for these transactions.

### 8.11.1 Branch Transfer Outwards

*On 30-6-2009 a local purchase was made – 10 Bajaj Lamps were purchased at Rs. 150 each from Sujan Ltd. and Input VAT of 12.5% was paid on the items. These goods were transferred to a branch outside the state i.e. to the Mumbai Branch.*

**Setup :**

Create the following Ledgers

**i. Branch Ledger**

| Name                                 | Under              | Inventory values are affected | Maintain balances bill-by-bill |
|--------------------------------------|--------------------|-------------------------------|--------------------------------|
| Universal Traders - Mumbai Branch    | Branch / Division  | No                            | Yes                            |
| Universal Traders - Hyderabad Branch | Branch / Divisions | No                            | Yes                            |

**ii. Sales Ledger**

| Name         | Under | Maintain balances bill-by-bill | Inventory values are affected | Used in VAT Returns | VAT/Tax Class                           |
|--------------|-------|--------------------------------|-------------------------------|---------------------|-----------------------------------------|
| Transfer Out | Sales | No                             | Yes                           | Yes                 | Consignment/<br>Branch Transfer Outward |

**iii. Purchase Ledger**

| Name        | Under             | Maintain balances bill-by-bill | Inventory values are affected | Used in VAT Returns | VAT/Tax Class                          |
|-------------|-------------------|--------------------------------|-------------------------------|---------------------|----------------------------------------|
| Transfer In | Purchase Accounts | No                             | Yes                           | Yes                 | Consignment/<br>Branch Transfer Inward |

**iv. Direct Expenses Ledger**

| Name                  | Under           | Maintain balances bill-by-bill | Inventory values are affected | Used in VAT Returns |
|-----------------------|-----------------|--------------------------------|-------------------------------|---------------------|
| Tax paid on Purchases | Direct Expenses | No                             | No                            | No                  |

Create a purchase voucher for the purchases made from Sujan Ltd.

Enter the details of the transaction in a sales invoice.

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**.

1. **Party's A/c Name: Universal Traders – Mumbai Branch**
2. **Sales Ledger - Transfer Out.** The **Consignment/ Branch Transfer Outward** will be automatically selected.
3. Select the stock item as per the transaction details.

The completed **Sales Invoice** appears as shown below :

4. Press **Y** or **Enter** to accept the screen.

### 8.11.2 Adjustment of ITC on Branch Transfers

Input Credit on stocks transferred outside the state is allowed for manufacturers, except for 4% credit, which is disallowed. The disallowed amount has to be transferred to either the Purchase Accounts or into a separate ledger under Direct Expenses.

After passing the Sales Transfer Out entry, pass the journal entry illustrated below to account for the disallowed amount:

Go to **Gateway of Tally > Accounting Vouchers > F7: Journal** and select **VAT Adjustment Class**.

1. Change the date to **30-6-09**. Select **Others** in the field **Used for**.
2. Debit **Tax paid on purchases: Rs. 60** (1,500 \* 4%).
3. Credit **Input VAT @ 12.5%**. Select **Input VAT @12.5%** in the **VAT/Tax Class** column.
4. Enter the amount as **Rs. 60** in the credit column.

The completed **Journal voucher** appears as shown below:

| Accounting Voucher Creation     |       | Universal Traders                    | Ctrl + M               |
|---------------------------------|-------|--------------------------------------|------------------------|
| <b>Journal</b>                  | No. 3 | Voucher Class : VAT Adjustment Class | 30-Jun-2009<br>Tuesday |

5. Press **Y** or **Enter** to accept the screen.

### 8.11.3 Branch Transfer Inwards

A separate ledger account called **Transfer In** is used to account for the stock received from the Branch Office. Purchase Invoices for the same are created using this ledger.

**On 30-6-09 consider the transfer of 5 Surya Lamps @ Rs. 300 per No. from Universal Traders - Hyderabad Branch.**

### Enter the details of the transaction in Purchase Voucher

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**.

1. **Party's A/c Name:** Universal Traders – Hyderabad Branch
2. **Purchase Ledger:** Transfer In. The **Consignment/Branch Transfer Inward** will be automatically selected.
3. Select the stock item as per the transaction details.

The completed **Purchase Invoice** appears as shown below:

| Accounting Voucher Creation                             |          | Universal Traders |          | Ctrl + M    |

### 8.12.2 eVAT Returns

The term **e-Filing of Returns** refers to the process of electronically filing your tax returns through the Internet. The salient features of e-filing are:

- ❑ Reduces compliance cost for deductors
- ❑ Offers convenience of time & place to tax payers
- ❑ Reduces interface between assessee and tax officials
- ❑ Helps to correlate deduction of taxes against deposit of the deducted tax in the Government A/c
- ❑ Helps to correlate deduction of tax by the deductors with the corresponding credits claimed by the deductees

To export eVAT Annexures,

Go to **Gateway of Tally > Display > Statutory Reports > VAT Reports > E-VAT Annexures > EVAT Purchases**

### Practice Exercise

Create a new company called **Aman Motors**, an Automobile dealer and also a manufacturer of Automobile Spare parts. Create the following masters and VAT related transactions:

#### i. Party Ledgers

| Ledger            | Under             | Maintain balances bill-by-bill | Inventory values are affected | Used in VAT Returns |
|-------------------|-------------------|--------------------------------|-------------------------------|---------------------|
| Jyoti Automobiles | Sundry Creditors  | Yes                            | No                            | No                  |
| Joy Autos         | Sundry Creditors  | Yes                            | No                            | No                  |
| Susmit & Son's    | Sundry Creditors  | Yes                            | No                            | No                  |
| Impact Automation | Sundry Debtors    | Yes                            | No                            | No                  |
| Purchases @ 4%    | Purchase Accounts | No                             | Yes                           | Yes                 |
| Sales @ 4%        | Sales Accounts    | No                             | Yes                           | Yes                 |

## ii. VAT Ledgers

| Ledger            | Under          | Type of Duty/Tax | VAT/Tax Class     |
|-------------------|----------------|------------------|-------------------|
| Input VAT @ 4%    | Duties & Taxes | VAT              | Input VAT @ 4%    |
| Output VAT @ 4%   | Duties & Taxes | VAT              | Output VAT @ 4%   |
| Input VAT @ 12.5% | Duties & Taxes | VAT              | Input VAT @ 12.5% |

## iii. Stock Items

| Item                    | Under        | Units | Opening Balance | Rate  | Rate of VAT (%) |
|-------------------------|--------------|-------|-----------------|-------|-----------------|
| Honda Bikes             | Two Wheelers | Nos   | 2 nos           | 50000 | 4               |
| Honda Moped             | Two Wheelers | Nos   | 4 nos           | 30000 | 4               |
| Honda Engine Crank      | Two Wheelers | Nos   | 5 nos           | 4000  | 12.5            |
| Vertical Honing machine | Assets       | Nos   | Nil             | Nil   | 4               |

## Enter the following Transactions

| S.No | Date    | Particulars                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

(Remember being a manufacturing company upto 4% of Input VAT is disallowed)<br><i>Hint: Enter the above entry in three transactions, first pass a local purchase voucher then enter a sales invoice for Branch Transfer and finally pass the journal entry for Adjustment of Input credit on Transfers Outward</i> |
| 7.   | 30-6-09 | Pass the VAT Adjustment Entry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### 8.13 VAT for Composite Dealers

All dealers with gross annual turnover above the prescribed limit (e.g. Rs. 5 lakh) are required to be registered under the VAT Act of their respective State. All existing dealers are automatically registered under the VAT Act, while a new dealer is allowed thirty days from the date of liability to get registered.

Small dealers with gross annual turnover not exceeding the prescribed limit (e.g. Rs. 5 lakh) are not liable to pay VAT. This limit may vary from State to State.

Dealers with an annual gross turnover not exceeding a prescribed limit (e.g. Rs. 50 lakh) who are otherwise liable to pay VAT, can opt for a Composition Scheme with the payment of tax at a small percentage of gross turnover. Dealers opting for this scheme are not entitled to Input Tax Credit and are required to submit their VAT Returns in a separate format.

#### 8.13.1 Enabling VAT for Composite Dealers

Tally.ERP 9 offers a VAT facility for regular registered dealers as well for dealers registered under the composition scheme of VAT.

Using this unit, you can print VAT Composite Returns for any State that has implemented VAT. Tally.ERP 9 recognises the Composite rate of VAT based on the turnover automatically. The tax payable is calculated and displayed by default in the Return Form.

Consider the example of United Traders, a confectionery retailer. Assume that the turnover in the preceding financial year was below the threshold limit of Rs. 50 lakh and has opted for the composition scheme of VAT.

1. Enter the details in the company creation screen for United Traders as shown below :

Figure 8.58 Company Creation — United Traders

2. Press **Y** or **Enter** to accept the company creation screen.
3. Press **F11: Features (Statutory & Taxation Features)** and enter the following settings:
  - ❑ Set **Enable Value Added Tax (VAT)** to **Yes**.
  - ❑ Set **Enable Set /Alter VAT Details** to **Yes** and press **Enter**.
  - ❑ In the VAT details screen that is displayed, select the relevant State (the State by default is selected as Karnataka, as it is defined during company creation. The same can be also configured) and press **Enter**.
  - ❑ Select the **Type of VAT Dealer** as **Composition** from the list.
  - ❑ In the **Composition Scheme Applicable From** field, specify the date of registration as 1-4-2009 under the composition scheme of VAT.
  - ❑ Enter the **Additional Information**
  - ❑ Press **Enter** to accept the screen and return to the Company Operations Alteration screen.
  - ❑ Tab down and specify the Tax Payer's Identification No. in the **VAT TIN (Composition)** field. Tally.ERP 9 automatically skips VAT TIN (Regular) and Local Sales Tax Number field.
  - ❑ Specify the Inter-state Sales Tax Number and the PAN / Income - Tax No. details of the company.

The completed **F11: Features (Statutory & Taxation Features)** screen appears as shown below:

Figure 8.59 F11: Features

- Press **Y** or **Enter** to accept the screen.

*If the turnover exceeds the threshold limit of **Rs. 5 lakh** in the current financial year, in that case the dealer is automatically registered as a regular VAT dealer.*

*In such cases, specify the date of application in the **Regular VAT Applicable From** field and the new **TIN number** in the **VAT TIN (Regular)** field.*

### 8.13.2 Composite VAT Classifications

The statutory masters for both Composite and regular VAT dealers get automatically loaded into Tally.ERP 9 when a company is enabled for VAT. VAT Classifications are pre-defined, based on the tax rate. They are categorised on the basis of nature of the business and the type of transaction and are built into the system.

The Tally.ERP 9 system-generated VAT Classifications for the Composite VAT enabled company, United Traders situated in Karnataka, are listed below. The Sales and Purchase transactions are segregated based on the classification selected during ledger creation or voucher entry. The proper selection of VAT class in transactions is vital to accurately ascertain the tax and classification-wise turnover.

Go to **Gateway of Tally > Display > Statutory Info. > VAT Classifications.**

### Classification for Purchases

| Name                                             | Rate | Is Sales | Type of Tax | Used in Composite Returns |
|--------------------------------------------------|------|----------|-------------|---------------------------|
| Purchase from URDs - Taxable Goods (Composition) | 0%   | No       | Exempt      | Yes                       |

The **Purchase from URDs - Taxable Goods (Composition)** screen appears as shown below:

| VAT Classification Display |                                                  | Unit |
|----------------------------|--------------------------------------------------|------|
| Name                       | Purchase From URDs - Taxable Goods (Composition) |      |
| Rate                       | : 0 %                                            |      |
| Is Sales                   | : No                                             |      |
| Type of Tax                | : Exempt                                         |      |
| Sub Type                   | : Not Applicable                                 |      |
| Used in Composite Return   | : Yes                                            |      |

Figure 8.60 VAT Classification Display

### Classification for Sales

Some of the classifications of sales are shown below:

| Name                                                | Rate  | Is Sales | Type of Tax | Used in Composite Return |
|-----------------------------------------------------|-------|----------|-------------|--------------------------|
| Sales - Composition tax @ 1%                        | 1%    | Yes      | VAT         | Yes                      |
| Sales - Imported Goods (Composition) @ 12.5%        | 12.5% | Yes      | VAT         | Yes                      |
| Sales - Purc from other State (Composition) @ 12.5% | 12.5% | Yes      | VAT         | Yes                      |
| Sales - Traded Goods (Composition) @ 4%             | 4%    | Yes      | VAT         | Yes                      |
| Sub Work Contract                                   | 0%    | Yes      | Exempt      | Yes                      |
| Works Contract - Composition Tax @ 4%               | 4%    | Yes      | VAT         | Yes                      |

The **Sales - Composition Tax @ 1%** screen appears as shown below :

| VAT Classification Display |                                | United |
|----------------------------|--------------------------------|--------|
| Name                       | : Sales - Composition Tax @ 1% |        |
| Rate                       | : 1 %                          |        |
| Is Sales                   | : Yes                          |        |
| Type of Tax                | : VAT                          |        |
| Sub Type                   | : Not Applicable               |        |
| Used in Composite Return   | : Yes                          |        |

Figure 8.61 VAT Classification Display

*Only when Composition VAT is enabled in the F11: Features (Statutory & Taxation Features) and **Used in Composite Return** is set to **Yes** in the VAT Classifications, can the classifications be assigned to the ledgers.*

### 8.13.3 Creating Masters

#### i. Purchases Ledger

| Ledger    | Under              | Inventory Values are affected | Used in VAT Returns | VAT/Tax Class  |
|-----------|--------------------|-------------------------------|---------------------|----------------|
| Purchases | Purchases Accounts | Yes                           | Yes                 | Not Applicable |

- On setting **Used in VAT Returns** to **Yes**, only VAT Classifications pertaining to the composition scheme is displayed in the VAT/Tax Class list.

Figure 8.62 VAT/Tax Class

- Press **Enter** to accept the VAT/Tax class and then press **Ctrl+A** to accept the Purchase ledger.

*In case of purchases from unregistered dealers, select the **VAT Classification** as **Purchase from URDs – Taxable Goods (composition)**. Tally.ERP 9 also allows you to select the VAT classification during a voucher entry.*

## ii. Sales Ledger

Create the Sales Ledger with the details given below:

| Ledger | Under          | Inventory values are Affected | Used in VAT Returns | VAT/Tax Class                |
|--------|----------------|-------------------------------|---------------------|------------------------------|
| Sales  | Sales Accounts | Yes                           | Yes                 | Sales - Composition Tax @ 1% |

## iii. VAT Ledgers

For Composite dealers, the VAT charged on purchases is generally grouped under direct Expenses or Purchases as they are not allowed Input Credit on their purchases. Hence, it is appropriated to the purchases cost. Ultimately, a Composite Tax on Sales ledger has to be created under the Indirect Expenses group for the composite tax payable on the total sales turnover.

#### iv. Expense ledger

| Ledger                        | Under             | Inventory values are Affected |
|-------------------------------|-------------------|-------------------------------|
| Composite Tax on Sales Ledger | Indirect Expenses | No                            |

#### v. Stock Item

| Name of Item             | Under   | Units |
|--------------------------|---------|-------|
| Cadburys Hazelnut - 150g | Primary | Nos   |

#### vi. Party Ledgers

| Ledger                 | Under            | Maintain balances bill-by-bill |
|------------------------|------------------|--------------------------------|
| Galaxy Confectioneries | Sundry Creditors | Yes                            |
| Mars Bakery Products   | Sundry Debtors   | Yes                            |

### 8.13.4 Creating Purchases

As per VAT rules, a dealer opting for composition of tax is not allowed to claim input tax on purchases made. Hence, as discussed earlier, the tax paid on purchases is added to the purchase cost and the VAT charge is not separately shown in the Invoice.

The following illustration explains the purchase and Sales transactions of a VAT Composite dealer.

***On 5-4-2009, United Traders purchased the following items from Galaxy Confectioneries vide B.No. 586.***

| Item Description         | Quantity | Rate |
|--------------------------|----------|------|
| Cadburys Hazelnut - 150g | 100 Nos  | 35   |

The rates are inclusive of 4% VAT.

**Enter the details of the transaction in a Purchase Invoice.**

**Setup :**

- In **F12: Configuration**, set **Use common ledger A/c for Item Allocation** to **Yes**.

**Create Purchase Invoice**

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. **Date: 5-4-09.**
2. **Party's A/c Name: Galaxy Confectioneries**
3. Press **Enter** to accept the **Supplier Details** screen.
4. **Purchase Ledger: Purchases**
5. **VAT/Tax Class: Not Applicable**
6. **Name of Item: Cadburys Hazelnut - 150g**
7. Specify the **Quantity** as **100** and **Rate** as **35**.
8. In the **Bill-wise Details for: Galaxy Confectioneries** screen:
  - Select **New Ref** as the **Type of Ref** and **Name** as **586**
  - Accept the bill-wise details screen.
9. Type the details of the transaction in the **Narration** field.
10. Press **Enter** to accept the Purchase invoice.

**8.13.5 Creating Sales**

*On 7-4-2009, United Traders sold the following items to Mars Bakery Products, Bangalore.*

| Item Description         | Quantity | Rate |
|--------------------------|----------|------|
| Cadburys Hazelnut - 150g | 45 Nos   | 40   |

**Enter the details of the transaction in a Sales Invoice.**

1. **Date: 7-4-09**
2. **Party's A/c Name: Mars Bakery Products** and press **Enter** to accept the **Despatch Details** screen.
3. **Sales Ledger: Sales** and press **Enter**.
4. **VAT/Tax Class: Sales - Composition Tax @ 1%.**
5. **Name of Item: Cadburys Hazelnut - 150g** and press **Enter**.
6. Specify the **Quantity** as **45** and **Rate** as **40**.
7. In the **Bill-wise Details** screen accept the default bill allocations.

| Accounting Voucher Creation                 |          | United Traders |          | Ctrl + M              |

| Narration:                                  |          | 45 nos         |          | 1,800.00              |

Figure 8.63 Sales Invoice

8. Type the narration and press **Y** or **Enter** to accept the screen.

### 8.13.6 Purchases from Unregistered Dealers

The transaction is treated as exempt from VAT when a VAT composite dealer purchases from an unregistered dealer. The VAT composite dealer has to report this in the VAT return form under Karnataka VAT rules.

Consider the following transaction:

**On 8-4-2009, United Traders purchased the following items from M/s. Arvind Food Products, an unregistered dealer vide B.No. 422.**

| Item Description            | Quantity | Rate |
|-----------------------------|----------|------|
| Cadburys Fruit & Nut - 200g | 100 Nos  | 19   |

**Setup :**

Create the following masters :

**i. Stock Item**

| Item Description            | Group   | Units |
|-----------------------------|---------|-------|
| Cadburys Fruit & Nut - 200g | Primary | Nos   |

**ii. Party Ledger**

| Ledger               | Under            | Maintain Balances<br>bill-by-bill |
|----------------------|------------------|-----------------------------------|
| Arvind Food Products | Sundry creditors | Yes                               |

**Step 1 : Enter the details of the transaction in Purchase Invoice.**

- In **F12: Configure**, set **Allow selection of VAT/Tax class during entry** to **Yes**.

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

The completed **Purchase Invoice** appears as shown below :

| Accounting Voucher Creation                                                                                                                                    |          | United Traders |          | Ctrl + M   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|----------------|----------|------------|
| <b>Purchase</b>                                                                                                                                                | No. 2    |                |          | 8-Apr-2009 |
| Supplier Invoice No. :                                                                                                                                         | Date :   |                |          | Wednesday  |

- Type the details of the transaction in the **Narration** field and accept the screen.

*In the **bill-wise allocation** screen select **New Ref** as the type of reference and type the Name as **423**.*

### 8.13.7 VAT Reports

Tally.ERP 9 helps the assessee to generate and print VAT Computation Reports and State-specific VAT Composition forms, as prescribed under VAT rules.

#### VAT Composition Computation Report

The VAT Computation Report provides the aggregate of taxable and exempt turnover of the dealer and computes composite tax at the prescribed rate.

Go to **Gateway of Tally > Display > Statutory Reports > VAT Composition Reports > VAT Composition Computation**.

- Press **F12: Configure** and Set **Show Purchase VAT Classifications** to **Yes** to view purchases from unregistered dealers.

The **VAT Composition Computation Report** of **M/s. United Traders** for April 2009, appears as shown below :

| VAT Composition Computation                      |  | United Traders                              |          |               | Ctrl + M     |

| <b>VAT Payable</b>                               |  |                                             |          |               | <b>80.40</b> |

Figure 8.66 VAT Composition Computation

You will find that the computation report shows the Sales turnover taxable at various rates under composition scheme of VAT. In this case, the total sales turnover taxable @ composition 1% and 4% amounts to Rs. 1800 and Rs. 1560 respectively. The composite tax at 1% & 4% is automatically computed on the respective turnover and reported in the tax amount column (i.e. Rs. 18 and Rs. 62.40 respectively). The computation report also displays other items which are non-taxable under the composition scheme i.e purchases made from unregistered dealers during the given period.

The report provides a drill down facility for each item right down to the voucher level. The **VAT Classification Vouchers** for **Sales Composition tax @ 1%** appears as shown below:

| VAT Classification Vouchers                       |                      | United Traders            |              |                |                        | Ctrl + M         |
|---------------------------------------------------|----------------------|---------------------------|--------------|----------------|------------------------|------------------|
| VAT Classification : Sales - Composition Tax @ 1% |                      | 1-Apr-2009 to 30-Apr-2009 |              |                |                        |                  |

- To print the computation report, press **Alt+P**. You can further drill down to the voucher level in the alteration mode by pressing **Enter** on the required voucher listing.

### VAT Composition Returns

In Tally.ERP 9, you can generate and print State-specific monthly, quarterly or annual VAT Composite Returns. In Karnataka, Form VAT 120 is the statutory form used for filing monthly returns by a registered Composite dealer. For VAT Composition Forms in Tally.ERP 9, Go to **Gateway of Tally > Display > Statutory Reports > VAT Composition Reports > VAT Composition Return**.

In the **VAT Composition Return print configuration** screen:

- Type the period of the return as **1-4-09 to 30-4-09**.
- Enter the name of the **person** responsible for filing the return.
- Specify the **Status/ Designation** of the person.
- Specify the name of the **place**.
- Enter the **date of filing** of the return.

### 8.13.8 Payment of Composite VAT

Use a **Payment Voucher** to record the payment of Composite VAT for April 2009

#### Create Payment Voucher

- Press **F12: Configure** and set **Use Single Entry Mode for Pymt/Rcpt/Contra** to **Yes**.

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment**

1. Press **F2** and change the date to **20-5-09**.
2. Select **HDFC Bank** in the **Account** field and press **Enter**. (Create ledgers if not present).
3. Select **Composite Tax** on **Sales ledger** in the **Particulars** field.
4. Specify **80** as amount (as shown in the VAT Return Form).
5. Specify the cheque details in the **Narration** field.

The completed **Payment Voucher** appears as shown below:

| Accounting Voucher Creation                                          |       | United Traders | Ctrl + M                 |

| Composite Tax on Sales | Indirect Expense  | No                             | No                            | Not Applicable               |

**ii. Stock Items**

| Item       | Under     | Units | Opening Balance | Rate |
|------------|-----------|-------|-----------------|------|
| Tea Bags   | Beverages | Nos   | 60 Nos          | 55   |
| Coffee Tin | Beverages | Nos   | 100 Nos         | 219  |

**iii. Transactions**

| S.No | Date    | Particulars                                                                                                                                                                   |
|------|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.   | 6-4-09  | Purchased Tea Bags 100 nos at Rs. 55 each (inclusive of VAT) from Darjeling Plantation vide Bill .No. 786.                                                                    |
| 2.   | 8-4-09  | Sold Tea Bags 50 nos at Rs. 75 each to Chanchal Tea House, VAT/Tax class as Sales-Composition Tax @1%.                                                                        |
| 3.   | 12-4-09 | Purchased Coffee Tin 200 nos at Rs. 219 each from m/s BEC Foods (an Unregistered Dealers) vide bill no.BEC009 Vat/Tax Class as Purchase from URDs-taxable goods (Composition) |
| 4.   | 21-4-09 | Sold Coffee Tin 165 nos to Chennai Tea Hubs at Rs. 254 each (inclusive of VAT), VAT/Tax class as Sales-Composition Tax @4%                                                    |
| 5.   | 29-5-09 | Payment of Composite VAT through HDFC bank vide cheque no.20414263                                                                                                            |

### Points to Remember

- ❑ Value Added Tax (VAT) is an indirect tax on goods, introduced in lieu of sales tax.
- ❑ Tally.ERP 9 provides State specific classification as per VAT Act for all sales and purchase transactions. You can select the classification at the time of ledger creation or at the time of voucher entry.
- ❑ Interstate purchases attract Central Sales Tax (CST), which is not set off against Output VAT on sales within the state or Output CST in inter-state sales. The CST paid is treated as a part of procurement cost.
- ❑ Branch transfer transactions can be both Transfer Inwards and Transfer Outwards. Tally.ERP 9 provides specific VAT classes for these transactions.
- ❑ Tally.ERP 9 calculates VAT Refundable or Payable depending on the Input VAT paid during purchases and the output VAT availed on sales.
- ❑ The dealer whose gross annual turnover does not exceed the prescribed limit can opt for the Composition Scheme of VAT.
- ❑ VAT Composite dealers are not entitled to input tax credit.
- ❑ Tally.ERP 9 provides State specific classifications in VAT Composition scheme for dealers.
- ❑ The VAT Composition computation report as well as VAT Composition Returns Form can be generated and printed in Tally.ERP 9.

## Lesson 9: Central Sales Tax (CST)

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ How to activate CST in Tally.ERP 9.
- ❑ Create ledgers and vouchers using different classifications relating to CST.
- ❑ Record transactions relating to inter-state trade
- ❑ Generate and print reports on the Forms Receivable and Forms Issuable for CST transactions.

Sales Tax is a tax levied on the sale of goods. In India, the law for levying sales tax is provided in the Central Sales Tax Act of 1956 which applies to the entire country.

Generally, the CST Act does not deal with intra-state or import or export sales. However, with respect to certain declared goods such as oil seeds, sugar, pulses, crude oil etc., the CST Act imposes restrictions on the powers of state governments to levy sales tax even in the case of intra-state sales.

Accordingly, sales can broadly be classified into three categories.

- ❑ Intra-State sales, i.e, sales within the state.
- ❑ Sales during import and export.
- ❑ Inter-State sales.

The Act also provides for the levy, collection and distribution of taxes on sale of goods in the course of inter-state trade or commerce.

### 9.1 Basics of Central Sales Tax (CST)

It is important to understand the meaning of certain terms used in the CST Act.

### Inter-State Sale

Inter-state sale is deemed to take place if there is:

- (i) Movement of goods from one state to another or
- (ii) Transfer of documents of title to the goods during their movement from one State to another.

The above two modes are mutually exclusive.

### Declared Goods

Declared Goods means goods declared under Section 14 to be of special importance in inter-state trade or commerce. Some of the important items are cereals, iron and steel, jute, oil seeds, pulses, man-made fabrics etc.

### Registration under CST Act

Every dealer who carries out the inter-state sales is liable to pay Central Sales Tax. As per the CST Act, every dealer who carries out inter-state sales has to be registered with the Sales Tax Authority. Intermediaries like agents and transporters are not required to be registered, since they do not affect sales. Registered dealers can purchase goods at concessional rates by issuing the **C Form**.

### Rate of Central Sales Tax

Different rates are prescribed depending upon the nature of inter-state sale such as:

- a. Sale to registered dealers.
- b. Sale to unregistered dealers.
  - (i) Sale of declared goods to unregistered dealers.
  - (ii) Sale of goods other than declared goods to unregistered dealers.

CST rates to various categories are discussed below:

#### a. Sale to Registered Dealers

Sale to registered dealer is @ 4% or sales tax rate for sale within the State, whichever is lower, if the goods are **eligible** and are specified in the Registration Certificate issued to the purchasing dealer. The Purchasing dealer has to submit the declaration in the prescribed **C Form** to the selling dealer.

#### b. Sale to Unregistered Dealers

The rate is twice the rate applicable to sale or purchase of such goods within the State with regard to declared goods. In case of goods other than declared goods, the rate applicable for sale within the state or 10%, whichever is higher. The purchaser is not required to give any declaration as he is not a registered dealer.

### Forms for Declarations under CST Scheme

A registered dealer has to issue certain declarations in prescribed forms to buyers/ sellers. The Dealer has to issue declarations in the forms such as C, E-I, E-II, F and H which are printed and supplied by the Sales Tax Authorities. These forms are generally in triplicate.

Figure 9.1 Chart Showing Incidence of Various Forms in the Course of Inter-state Trade

### Form C

As per CST Act, sales tax on inter-state sales is 4% or sales tax rate for sale within the state, whichever is lower, is applicable, when the sale is made to a registered dealer and the goods are covered in the registration certificate of the purchasing dealer. Otherwise, the tax is higher, i.e 10% or tax leviable on sale of goods inside the state, whichever is higher. This concessional rate is applicable only if the purchasing dealer submits a declaration in prescribed **C Form**.

One **C Form** covers all the transactions in a whole financial year, irrespective of the total amount or value of transactions during the year. However, for transactions exceeding one financial year separate **C Form** is required for each financial year.

### Forms E1 and E2

According to Section 6(2) of the CST Act, only the first inter-state sale is taxable and the subsequent sale during movement of goods by transfer of documents is exempt from tax, if the purchasing dealer is a registered dealer.

Usually, the transfer of a document refers to the document of title to goods which is endorsed and transferred in favour of the purchaser and is duly signed by the endorser. The document can be further transferred by subsequent endorsements.

The subsequent sellers have to obtain a declaration in **C Form** from the dealers who sold them the goods. The selling dealer has to make a declaration in **E1 Form** in case of the first sale and **E2 Form** in case of subsequent sales.

### Form F

Under CST Act, **F Form** is used for Branch transfers and Consignment transfers. Goods when transferred from one place to another under the same principal, is known as Branch Transfer and when it is transferred to agents, it is termed as Consignment Sale. Here the dealer has to furnish a declaration in **F Form** received from the consignment agent or branch office in another state to prove that the interstate movement of goods is not a sale.

One **F Form** covers all transactions in one month, irrespective of the number of transactions and the total amount.

### Form H

A sale during the course of export is exempt from CST and also the penultimate sale is deemed to be in course of exempt from CST under the CST Act. The dealer exporting the goods must have documents in proof of export such as an airway bill, bill of lading, shipping bill, customs documents, bank certificate etc. However, if the penultimate seller is not having any proof evidencing that the sale is exempt, the actual exporter is required to issue a certificate in **H Form** to the penultimate seller.

### Form I

Special Economic Zone (SEZ) is a specifically delineated duty free enclave and shall be deemed to be foreign territory for the purposes of trade operations, duties and tariffs.

Under the CST Act, supplies made by a registered dealer to a unit in the Special Economic Zone (SEZ) will not be subject to CST, provided such unit furnishes a declaration in **I Form**.

## 9.2 Enabling CST in Tally.ERP 9

Central Sales Tax integrated in Tally.ERP 9 takes care of your inter-state transactions. It eliminates error-prone information and comments on appropriate forms to be issued/ received at the end of the month or a financial year or at any point of time. It takes a one-time configuration in Tally.ERP 9 for Central Sales Tax features to be activated.

### 9.2.1 Company Setup

Create a new company - **Oriental Traders** to understand the CST Feature of Tally.ERP 9.

***Oriental Traders** is a registered dealer under the CST Act and is one of the leading all India distributors of industrial powder paints. It purchases various shades of powder paints from Unique Paints (P) Ltd. Margao, Goa and supplies to registered dealers outside the State on submission of the prescribed formats.*

Figure 9.2 Company Creation — Oriental Traders

- ❑ Press **Y** or **Enter** to accept the company creation screen.
- ❑ Enable **VAT**, by activating **Enable Value Added Tax (VAT)** and **Set/Alter VAT details** in the **F11: Features (Statutory and Taxation Features)**. Once VAT is enabled, Statutory Masters related to VAT and CST are also automatically loaded in Tally.ERP 9.

*The **CST** feature will be available only when **VAT** is activated.*

## 9.2.2 Creating Masters

### i. Purchases and Sales Ledgers

| Ledger        | Under             | Inventory values are affected | Used in VAT returns | VAT/Tax Class        |
|---------------|-------------------|-------------------------------|---------------------|----------------------|
| CST Sales     | Sales Accounts    | Yes                           | Yes                 | Inter-State Sales    |
| CST Purchases | Purchase Accounts | Yes                           | Yes                 | Inter-State Purchase |

**ii. Party Ledgers**

| Ledger                 | Under            | Maintain balances bill-by-bill | Inventory values are affected |
|------------------------|------------------|--------------------------------|-------------------------------|
| Sunrise Industries     | Sundry Debtors   | Yes                            | No                            |
| Unique Paints (P) Ltd. | Sundry Creditors | Yes                            | No                            |

**iii. Output CST Ledger**

| Ledger   | Under            | Type of Duty/Tax | VAT/Tax Class     | Inventory values are affected | Percentage of calculation | Method of calculation |
|----------|------------------|------------------|-------------------|-------------------------------|---------------------------|-----------------------|
| CST @ 4% | Duties and taxes | CST              | Inter-State Sales | No                            | 4                         | On Total Sales        |

**iv. Input CST ledger**

| Ledger    | Under             | Inventory values are affected | Used in VAT Returns | VAT/Tax Class  |
|-----------|-------------------|-------------------------------|---------------------|----------------|
| Input CST | Purchase accounts | Yes                           | Yes                 | Not applicable |

**v. Stock Items**

| Name of Item  | Under   | Units of measure |
|---------------|---------|------------------|
| Black Matt    | Primary | Kgs              |
| Golden Yellow | Primary | Kgs              |
| Metallic Blue | Primary | Kgs              |

**9.3 Recording Interstate Transactions in Tally.ERP 9**

As discussed earlier, in the course of inter-state trade or commerce the dealers have to issue/ submit certain declarations in prescribed forms to buyers/ sellers in order to avail concessional rates when:

- ❑ Sale or Purchase takes place outside a State.
- ❑ Sale or Purchase takes place in the course of imports into India or exports from India.

### 9.3.1 Inter-State Purchases

*On 5-4-2009, M/s. Oriental Traders purchased the following items from M/s. Unique Paints (P) Ltd. Goa, vide Invoice No. 2458/08-09, amounting to Rs. 148500.*

| Product Description | Quantity | Rate |
|---------------------|----------|------|
| Black Matt          | 500 Kgs  | 190  |
| Golden Yellow       | 100 Kgs  | 285  |
| Metallic Blue       | 100 Kgs  | 250  |

Enter the details of the transaction in a Purchase Invoice.

Setup :

- In the **F12: Configuration**, set **Use common ledger A/c for item allocation** to **Yes**.

The completed **Purchase Invoice** appears as shown below:

| Accounting Voucher Creation                        |          | Oriental Traders |                    | Ctrl + M    |

Figure 9.3 Purchase Invoice

- Press **Y** or **Enter** to accept the screen.

- ❑ In the **bill-wise details** screen select **New Ref** and type **2458/08-09**.
- ❑ The above **Purchase Invoice** can also be recorded in **Double Entry mode**.

You can also fill the **Form No.** during the Voucher Entry, if the forms are issued at the time of purchase. But usually, they are submitted at the end of the year covering all the transactions from that dealer during the year.

### 9.3.2 Inter-State Sales against C Form

*On 7-4-2009, M/s. Oriental Traders sold the following items to M/s. Sunrise Industries, Delhi against C Form. The freight charges of Rs. 750 were included in the Invoice.*

| Product Description | Quantity | Rate |
|---------------------|----------|------|
| Black Matt          | 100 Kgs  | 240  |
| Golden Yellow       | 20 Kgs   | 365  |
| Metallic Blue       | 10 Kgs   | 290  |

**Enter the details of the transaction in a sales invoice**

**Setup :**

- ❑ Create a ledger **Freight charges** under **indirect expenses**.

The completed **Sales Invoice** appears as shown below:

Figure 9.4 Sales Invoice

- 

- ### 9.3.3 Transit Sales against E1 and E2 Forms

Let us consider the following example :

***On 13-4-2009, M/s. Oriental Traders despatched the following goods to M/s. Star Power Controls, Orissa and raised an Invoice on M/s. Swastik Associates in Madhya Pradesh and charged 4% CST against C Form.***

| Product Description | Quantity | Rate |
|---------------------|----------|------|
| Black Matt          | 300 Kgs  | 240  |
| Chocolate Brown     | 50 Kgs   | 270  |
| P.O. Red            | 50 Kgs   | 245  |

During the movement of goods, **Swastik Associates** subsequently sold the goods to **M/s. Rainbow Colours** in West Bengal and Rainbow Colours ultimately sold the goods to **M/s. Star Power Controls** in Orissa.

On the same day, Oriental Traders received **C Form** vide No. **TC-2K-15023 dt. 13-4-09** from Swastik Associates and issued E1 Form vide no. **TE-1Q-0130 dt. 13-4-09**.

In this case, sale from Swastik Associates to Rainbow Colours and Rainbow Colours to Star Power Controls is by way of transfer of documents. Oriental Traders has to receive C Form from Swastik Associates and will issue an **E1 Form** to Swastik Associates. Later, Swastik Associates will issue **E2 Form** to Rainbow Colours and receive C Form. Finally, Rainbow Colours will issue E2 Form to Star Power Controls and receive the C Form.

Chart showing movement of goods under **E1** and **E2** :

Figure 9.5 Chart Representing Movement of Goods

Create the following Party Ledger

| Ledger             | Under          | Maintain balances bill-by-bill | Inventory values are affected |
|--------------------|----------------|--------------------------------|-------------------------------|
| Swastik Associates | Sundry Debtors | Yes                            | No                            |

The entries to be made in the books of **M/s. Oriental Traders** with regard to the above transaction are given in the following pages.

**Enter the details of the transaction in a Sales Invoice**

**Setup :**

- Press **F12: Configure** and set **Yes** to
  - Allow **separate Buyer Consignee names**
  - Activate **'E1' or 'E2' Transaction**

*The option **'Activate 'E1' or 'E2' Transaction'** is activated as this transaction amounts to the movement of goods by the transfer of documents.*

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales.**

- Change the date to **13-4-09**.
- Select **Swastik Associates** in the **Party's A/c Name** and press **Enter** to view the supplementary details screen.
- In the Buyer details section enter the following details and accept the screen
  - **Consignee: Star Power Controls**
  - **Address: B-3/114, Bhusan Vihar, Bhubaneswar, Orissa**
  - **Buyer: Swastik Associates**
  - **Address: 603, Marvel Complex, Madhya Pradesh**
- Enter the details of the transaction in a **Sales invoice** and accept the default bill allocations in the Bill-wise Details screen.

The completed **Sales Invoice** appears as shown below:

| Accounting Voucher Creation                                                                                                                                                                                                                    |          | Oriental Traders |                    | Ctrl + M              |

Figure 9.6 Sales Invoice

- Press **Y** or **Enter** to accept the screen.

- In the books of **Swastik Traders**, the C Form received from Rainbow Colours has to be entered and E2 Form needs to be selected. This must be issued since it is a subsequent inter-state sales by transfer of title.
- Generally, blank forms are received at the beginning of the year or on the commencement of an inter-state transaction with the respective dealer. However, Tally.ERP 9 gives you the flexibility to update Form Nos. and Date in the Reports Menu.

### 9.3.4 Branch Transfers/ Consignment Sales against F Form

*On 15-4-2009, M/s. Oriental Traders despatches the following goods to their Branch in Uttar Pradesh.*

Figure 9.9 Sales Invoice

- Press **Y** or **Enter** to accept the sales invoice.

## 9.4 Payment of CST

Central Sales Tax is payable in the State from which the goods are sold. The tax so collected is retained by the state in which it is collected. The State Government Sales Tax Officer who assesses and collects local State Sales Tax also assesses and collects Central Sales Tax.

The returns under General Sales Tax of the appropriate State has to be submitted within the due date. The CST payable should be rounded off to the nearest rupee.

***On 20-5-2009, M/s. Oriental Traders paid an amount of Rs. 7,308 towards CST payable of April 2009 vide Cheque No. 015630 dt. 20-5-09.***

**Create a payment voucher:**

Go to **Gateway of Tally> Accounting Vouchers > F5: Payment**

- **Date:** 20-5-2009.
- **Account:** HDFC Bank Ltd. (Create using Alt+C if it does not exist.)

- ❑ Select **CST @ 4%** and specify amount as **7308**.
- ❑ Type Cheque No. **015630** in the Narration field and press **Enter**.
- ❑ Press **Y** or **Enter** to accept.

## 9.5 CST Reports

Tally.ERP 9 facilitates the generation of CST related reports i.e Forms Receivable and Forms Issuable Reports for any period of time. It also offers the facility of auto-filling the form number for transactions related to the same dealer during the year, which hastens voucher entry and reduces the possibility of errors.

### 9.5.1 Forms Receivable Report

In Tally.ERP 9, you can generate the Forms Receivable Report ledger-wise. This report comments on various forms to be received from the dealer at any time. It displays the date of transaction, CST Sales ledger employed, gross amount inclusive of CST, form types and also contains two additional fields: Form Number and Date. These have to be filled when the prescribed forms are received from the purchasing dealer or the customer.

Usually, this report is generated at the end of a financial year or month end (in specific cases). However, Tally.ERP 9 facilitates the generation of this report at any point of time.

Go to **Gateway of Tally > Display > Statutory Reports > CST Reports > Forms Receivable > Ledger > Sunrise Industries** > press **Enter**.

The Forms Receivable Report of M/s. Sunrise Industries appears as shown below:

| Forms Receivable                |             | Oriental Traders          |         |                  |             |                          | Ctrl + M    |           |
|---------------------------------|-------------|---------------------------|---------|------------------|-------------|--------------------------|-------------|-----------|
| Ledger Name: Sunrise Industries |             | 1-Apr-2009 to 20-Apr-2009 |         |                  |             |                          |             |           |
| Date                            | Particulars | Vch Type                  | Vch No. | Assessable Value | CST Amount  | Invoice Form Amount Type | Form Number | Form Date |
| 7-4-2009                        | CST Sales   | Sales                     | 1       | 34,200.00 Dr     | 1,368.00 Dr | 36,318.00 Dr C Form      |             |           |

Figure 9.10 Forms Receivable

The above report shows that the C Form is to be received from the said customer for the supplies made during the respective period. In this report, you can fill the Form No. and Date when received.

View **M/s. Surya Exports** ledger for the forms to be received from them. You will notice that the report appears blank as the prescribed declaration in H Form was received at the time of sale and entered in the sales invoice during the voucher entry. However, you can view the vouchers for which forms have been received in advance or at the time of transaction.

To view all vouchers, press **F12: Configure** and change the following setting:

- ❑ Set **Show All Vouchers** to **Yes**.
- ❑ Select **H Form** in the **Show Vouchers** field - This feature allows you to view different Forms Receivable from the same dealer, if any. When set to **Not Applicable**, whatever forms are due from the dealer will be displayed.

| Configuration     |               | Form Types       |
|-------------------|---------------|------------------|
| Show All Vouchers | ? Yes         | J Not Applicable |
| Show Vouchers of  | <b>H Form</b> | C Form           |

Figure 9.12 Forms Receivable

- ❑ Press **Alt+P** to print the report.

Press **Alt+F5**, if there are many transactions and type the **Form No.** and **Date** to auto-fill the same in all the transactions pertaining to the related form.

In the same manner, you can view other Forms Receivable from the rest of the dealers during the required period.

## 9.5.2 Forms Issuable Report

In Tally.ERP 9, you can generate the Forms Issuable Report ledger-wise. This report comments on various forms to be issued to the dealer for any given period of time. It displays the date of transaction, CST Purchases ledger employed, gross amount inclusive of CST, form types and also contains two additional fields: Form Number and Date, which can be filled when the prescribed forms are issued to the selling dealer or supplier.

Similar to the Forms Receivable Report, this report is also generated at the end of a financial year or month end (in specific cases) and can be generated at any point of time in Tally.ERP 9.

Go to **Gateway of Tally > Display > Statutory Reports > CST Reports > Forms Issuable > Ledger > Unique Paints (P) Ltd > press Enter.**

The **Forms Issuable Report** of M/s Unique Paints (P) Ltd. appears as shown below:

| Forms Issuable                       |               |          | Oriental Traders |           |                |                           | Ctrl + M   |                          |             |           |
|--------------------------------------|---------------|----------|------------------|-----------|----------------|---------------------------|------------|--------------------------|-------------|-----------|
| Ledger Name : Unique Paints (P) Ltd. |               |          |                  |           |                | 1-Apr-2009 to 20-Apr-2009 |            |                          |             |           |

| 5-4-2009                             | CST Purchases | Purchase | 1                |           | 5-4-2009       | 1,48,500.00 Cr            |            | 1,48,500.00 Cr C Form    |             |           |

Figure 9.13 Forms Issuable

- As discussed earlier, fill the **Form No.** and **Date**.

View the **Forms Issuable report** of **M/s. Swastik Associates ledger**, where the movement of goods affected the transfer of documents.

Go to **Gateway of Tally > Display > Statutory Reports > CST Reports > Forms Issuable > Ledger > Swastik Associates > press Enter.**

- Press **F12: Configure** and change the following settings:
  - Set **Show All Vouchers** to **Yes**.
  - Select **E1 Form** in the Show Vouchers of field and press **Enter**.

The **Forms Issuable report** appears as shown:

| Forms Issuable                   |             |          |         | Oriental Traders          |                |                  |            | Ctrl + M                 |             |             |
|----------------------------------|-------------|----------|---------|---------------------------|----------------|------------------|------------|--------------------------|-------------|-------------|
| Ledger Name : Swastik Associates |             |          |         | 1-Apr-2009 to 20-Apr-2009 |                |                  |            |                          |             |             |
| Date                             | Particulars | Vch Type | Vch No. | Reference                 | Effective Date | Assessable Value | CST Amount | Invoice Form Amount Type | Form Number | Form Date   |
| 13-4-2009                        | CST Sales   | Sales    | 2       |                           | 13-4-2009      | 1,12,750.00 Dr   |            | 1,12,750.00 Dr E1 Form   | TE-1Q-0130  | 13-Apr-2009 |
|                                  |             |          |         |                           |                |                  |            |                          |             |             |

Figure 9.14 Forms Issuable

Even though the C Form has been received and the transaction has been reflected in the **Forms Receivable Report**, as per the rules the declaration in **Form E1** must be furnished. This is therefore, shown in the Form Issuable report.

### Practice Exercise

**M/s Jaykanth Agency** is a registered dealer under the CST Act and is one of the leading distributors of refractory materials. Create the following masters and pass the following transactions as per the CST Act:

#### i. Party Ledgers

### Points to Remember

- ❑ CST is levied on inter-state sales transactions.
- ❑ Various CST Forms are issued/ received in the course of inter-state trade which are mandatory to be produced while paying tax.
- ❑ Tally.ERP 9 facilitates the creation of invoice for inter-state purchase and sales with an additional field for specifying the type of Forms to be issued/ received while recording transactions.
- ❑ The Forms Receivable and Forms Issuable reports relating to CST for any period can be generated and printed in Tally.ERP 9.

## Lesson 10: Point of Sale (PoS)

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ Configure Tally.ERP 9 to create POS Invoice
- ❑ Create POS invoice with / without voucher class
- ❑ Generate POS Invoice for single and multi-mode payment
- ❑ Enter zero valued entries in POS invoice
- ❑ Record batch-wise details in a POS Invoice
- ❑ Print the POS Invoice
- ❑ Generate and print POS Register

**POS** or **PoS** is an acronym for point-of-sale. Point of Sale can be a retail outlet, a checkout counter in a shop, or any other location where a sale transaction takes place.

POS system is a computerised cash register which adds up the sales totals, calculates the balance to be returned to buyer and automatically adjusts the inventory levels to reflect the quantity sold. The equipment required for POS to work effectively are cash registers, card readers, bar-code scanners and so on.

The Advantages of a **Point of Sale** system are :

- ❑ It helps to calculate sales and manage the cash drawer.
- ❑ It manages inventory and facilitates the barcode scanner operations.
- ❑ It offers a flexible and simpler way of querying your inventory and sales database.
- ❑ It helps you track product movement and the cost to push certain brands over others.
- ❑ It tracks and records the date and time of every sale made at your point of sale.

## 10.1 Features of Point of Sale (PoS) in Tally.ERP 9

The Salient features **Point of Sale (PoS)** in Tally.ERP 9 are as follows :

- ❑ Generates POS Invoice with date and time of the transaction.
- ❑ Generates POS related reports such as Cash Registers, Sales Registers and Inventory reports.
- ❑ Ensures management of gift cards, vouchers, admissions, discounts and so on.
- ❑ Allows multiple mode of payment for a single invoice.
- ❑ Eases Cash and Credit/Debit transactions and tracks balances to be tendered to buyers.
- ❑ Provides quantified tracking of sales and promotions.
- ❑ Allows for real time updation of inventory and the option of quickly matching inventory with floor counts.
- ❑ Helps in identifying consumer-purchasing patterns.
- ❑ Facilitates bar-code scanning of Stock Keeping Units (SKU's) or items.
- ❑ Ensures multi-level security control of cash and Inventory.
- ❑ Increases efficiency and productivity at the point of sale.

Tally.ERP 9's point of sale application can search your inventory database not only on item description or SKU but also by alias name, part number, keywords and so on. Stock summary reports can be used for viewing group-wise, category-wise, godown-wise, batch-wise and supplier-wise details of the stock items.

## 10.2 Configuring Point of Sale in Tally.ERP 9

Tally.ERP 9's Point of Sale module makes it easy to streamline your retail operations by automating the 'Check out' process for your customers. It takes a one-time configuration in Tally.ERP 9 for POS features to be activated.

### Illustration for POS

Consider **M/s. City Super Market**, a leading retail chain, which deals in grocery products.

Create a new company **City Super Market** in Tally.ERP 9, maintaining **Accounts with Inventory**. The completed **Company Creation** screen appears as shown in figure.

### 10.2.1 Company Setup

Go to **Company Info. > Create Company**

- ❑ Create the company with the following details :

| Company Creation                     |                                                                               | Ctrl + M                                                                        |                           |
|--------------------------------------|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------|---------------------------|
| Directory                            | : C:\Tally.ERP9\data                                                          |                                                                                 |                           |
| Name                                 | : City Super Market                                                           |                                                                                 |                           |
| <b>Mailing &amp; Contact Details</b> |                                                                               | <b>Company Details</b>                                                          |                           |

## 10.2.2 Creating POS Voucher Type

The first step to enable POS Invoicing in Tally.ERP 9 is to create a **POS Invoice Voucher Type**. Using Voucher class, you can pre-define accounts, limit the list of ledgers for selection during voucher entry, automate ledger posting associated with stock items and create auto selection for duties, discounts and rounding off.

Go to **Gateway of Tally > Accounts Info. > Voucher Types > Create**

In the **Voucher Creation** screen,

1. Type the Name of Voucher Type as **POS Invoice**.
2. Select the Voucher Type as **Sales** from the list of voucher types.
3. Type the Abbreviation as **POS**.
4. **Method of Voucher Numbering** is set by default to **Automatic**, but can be set to **Manual** or **None**.
5. Set **Use Advance Configuration** to **Yes**. Tally.ERP 9 displays the **Secondary Voucher Type Creation** screen. Accept the default screen.
6. Set **Use EFFECTIVE Dates for Vouchers** to **No**.
7. Set **Make 'Optional' as Default** to **No**.
8. Set **Use Common narration and Narration for each entry** to **No**.
9. Set **Print after saving Voucher** to **Yes**.

- The completed **POS Invoice Voucher Type** screen appears as shown.

| Voucher Type Creation                                                                                                                                                                                                                           |               | City Super Market                                                                                                                                                                                                                                        |  | Ctrl + M                 |

Figure 10.4 Stock Item Creation – Olive Oil

- Press **Y** or **Enter** to accept the stock item creation screen.

- To view the field **Set Standard Rates**, set **Allow Standard Rates for Stock Items** to **Yes** in **F12: Configure**.
- In the **alias** column, the bar code details can be captured by simply scanning the bar code of the stock item using a bar code reader.

## 10.3 Entering POS Transactions

Let us consider the following transactions to illustrate Point of Sale in Tally.ERP 9.

### 10.3.1 Creating Purchase Invoice

**On 1-4-2009, City Super Market purchased the following item.**

| Name of Item | Quantity | Rate | Amount |
|--------------|----------|------|--------|
| Olive Oil    | 100      | 125  | 12,500 |

- i. Make an entry of the transaction in a purchase voucher.

*In **F11: Features (Inventory Features)**, set **Maintain Multiple Godowns** to **Yes**.*

6. **Name of item: Olive Oil**, Tally.ERP 9 displays the **Item Allocation for Olive Oil** screen

- Enter the details as shown in the table.

| Name of Item | Quantity | Rate | Per    | Amount |
|--------------|----------|------|--------|--------|
| Olive Oil    | 100      | 125  | Bottle | 12,500 |

7. Press **Enter**, Tally.ERP 9 displays the **Accounting Details for Olive Oil** screen

8. Accept the default screen.

The completed **Purchase Voucher** creation screen displays as shown.

| Accounting Voucher Creation    |            | City Super Market |        | Ctrl + M                     |
|--------------------------------|------------|-------------------|--------|------------------------------|
| <b>Purchase</b> No. 1          |            | Date :            |        | 1-Apr-2009<br>Wednesday      |
| Supplier Invoice No. :         |            |                   |        |                              |
| Party's A/c Name : <b>Cash</b> |            |                   |        |                              |
| Current Balance :              |            |                   |        |                              |

| Olive Oil                      | 100 Bottle | 125.00            | Bottle | 12,500.00                    |
| [ End of List                  |            |                   |        |                              |
| Narration:                     |            |                   |        | 100 Bottle                   |
|                                |            |                   |        | <b>Accept ?</b><br>Yes or No |

Figure 10.5 Purchase Voucher creation — Completed

9. Press **Y** or **Enter** to accept.

### 10.3.2 Creating POS Invoice with Single Payment Mode

*On 6-4-2009, City Super Market sold the following item :*

| Name of Item | Quantity | Rate | Amount |
|--------------|----------|------|--------|
| Olive Oil    | 9        | 150  | 1,350  |

The customer pays Rs. 1,500 by cash.

**i. Make an entry of the transaction in a sales voucher.**

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

1. Select the voucher type as **POS Invoice**.
2. Click on the button **Single Mode Payment** on the vertical button bar.

*By default, for the first time, the **POS Invoice** screen will appear in **Single Mode Payment**.*

3. Press **F2** and change the date to **6-4-2009**.
4. Enter the **POS Invoice No.**
5. Select the **Godown** as **Main Location**.

*Set **Allow Party Details** in **POS Invoice** to **No** in **POS Invoice Configuration***

6. Select the sales ledger as **Sales**.
7. Select the Name of Item as **Olive Oil**.
8. (Alternatively, the bar code on the stock item can be scanned with the help of the bar code reader and all the details are captured automatically. This is useful when there are numerous stock items and manual entry of each item proves to be a time consuming task.)
9. By default, Tally.ERP 9 displays the rate and amount for one unit of the stock item selected. To change the quantity, use the **backspace** key to shift the cursor on to the quantity column. Type **9** and press **Enter** to update the rate and amount details.

*If **Set Standard Rates** is activated, Tally.ERP 9 does not allow manual entry of rate for stock items.*

10. In the columns pertaining to payment details, Tally.ERP 9 shows the amount receivable, **1,350**. In the field **Cash Tendered**, enter the cash tendered by the customer, which is **1,500**. Tally.ERP 9 automatically calculates and displays the balance amount to be refunded as **150** in the **Balance** field.
11. Enter the narration if required.

The completed **POS Invoice** screen displays as shown.

| Accounting Voucher Creation   |          | City Super Market |                 | Ctrl + M                  |

| Name of Item                  | Quantity | Rate per          | Amount          |                           |
| Olive Oil                     | 9 Bottle | 150.00 Bottle     | 1,350.00        |                           |
| [ End of List                 |          |                   |                 |                           |
|                               |          | 9 Bottle          | 1,350.00        |                           |
| Cash                          | Cash     | 1,350.00          | Cash Tendered : | 1,500.00 Balance : 150.00 |
| Narration : Sale of Olive Oil |          |                   |                 |                           |
|                               |          |                   |                 | Accept ?<br>Yes or No     |

Figure 10.6 POS Invoice – Single Mode Payment

12. Press **Y** or **Enter** to accept the screen.
13. On saving the voucher, Tally.ERP 9 asks for a confirmation to print the invoice.
14. Press **N** or **ESC** to reject

### 10.3.3 Creating POS Invoice with Multiple Payment Mode

*On 9-4-2009, City Super Market sold the following item.*

| Name of Item | Quantity | Rate | Amount |
|--------------|----------|------|--------|
| Olive Oil    | 12       | 150  | 1,800  |

The customer pays Rs.900 by credit card, Rs.750 by cheque and Rs.150 by cash

**i. Make an entry of the transaction in a sales voucher.**

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

1. Select the voucher type as **POS Invoice**.
2. Press **F2** and change the date to **9-4-2009**.
3. Enter the **POS Invoice No.**

4. Select the **Godown** as **Main Location**.
5. Click on the button **Multi Mode Payment** on the vertical button bar.
6. Select the sales ledger as **Sales**.
7. Select the Name of Item as **Olive Oil**.
8. **Quantity: 12 Bottles**
9. Tally.ERP 9 calculates and displays the rate and amount details.
10. In the columns pertaining to payment details make the following entries.
  - **Gift Vouchers:** Payment received through gift vouchers is entered here. Select **Not Applicable**.
  - **Credit/Debit Card Payment:** Select the name of the bank with which you have the arrangement for collecting the card receivables.
    - Select **HDFC Bank**. (Press **ALT+C** to create the ledger HDFC Bank - under Bank Accounts).
    - The amount is automatically filled with the amount of the invoice **1,800**, type **900**.
    - This will prompt you to enter the card number. Type **5425051703594662** and press **Enter**.
  - **Cheque:** Enter the name of the bank in which you deposit the cheques.
    - Select **HDFC Bank**. The amount column is automatically filled with the balance amount receivable, Type **750** and press **Enter**.
    - This will take you to the column **Bank Name**. Enter the name of the bank on which the cheque has been drawn.
    - Type **Citibank**. Tally.ERP 9 prompts you to fill in the cheque no. Type **653114** and press **Enter**.
  - **Cash:** Select the ledger **Cash** (pre-defined). Tally.ERP 9 automatically fills the balance amount receivable, **150**.
    - Enter the cash tendered by the customer, which is **200**.
    - Tally.ERP 9 automatically calculates and displays the balance amount to be refunded as **50**.
11. Skip the narration field by pressing **Enter**.

The completed **POS Invoice** screen displays as shown.

| Accounting Voucher Creation           |           | City Super Market                             |                    | Ctrl + M                                 |  |

Figure 10.8 POS – Invoice

- You can configure the printer to alter paper dimensions. The standard paper size for a POS invoice is 4 inches by 11 inches.
- To accelerate the process of recording the sales invoice entries, create a voucher class by specifying the default ledger allocations for the payment details. If voucher classes are defined, Tally.ERP 9 will automatically display the ledger accounts for gift vouchers/ card/ bank/ cash in the POS Invoice.

### 10.3.4 Creating POS Invoice using Voucher Class

On 18-4-2009, City Super Market sold the following item :

| Name of Item | Qty | Rate | VAT   | Amount   |
|--------------|-----|------|-------|----------|
| Milk 500ML   | 10  | 95   | 12.5% | 1,068.75 |

The customer submits Sodexo Gift Voucher worth Rs.250, pays Rs. 600 by credit card and Rs.218.75 by cash

In Tally.ERP 9, you can create a voucher type with voucher class as shown :

*In F11: Statutory and Taxation Features,*

- ❑ *Set **Enable Value Added Tax (VAT)** to **Yes***
- ❑ *Set **Set/Alter VAT Details** to **Yes***

*In the **Company VAT Details** screen,*

- ❑ *Select **State** as **Karnataka***
- ❑ *Type of Dealer as **Regular***
- ❑ ***Regular VAT Applicable from 1-4-2009***
- ❑ *Fill in the **Tax Information** as applicable.*

#### **i. Create Voucher Type → POS Invoice with Class**

Go to **Gateway of Tally > Accounts Info. > Voucher Types > Create**

1. Type the name of the Voucher Type as **POS Invoice with Class**.
2. Select the Voucher Type as **Sales** from the List of Voucher Types.
3. Type the Abbreviation as **POS**.
4. **Method of Voucher Numbering** is set by default to **Automatic**, but can be set to **Manual** or **None**.
5. Set **Use Advance Configuration** to **No**.
6. Set **Use EFFECTIVE Dates for Voucher** to **No**.
7. Set **Make 'Optional' as Default** to **No**.
8. Set **Use Common narration and Narration for each entry** to **No**.
9. Set **Print after saving Voucher** to **Yes**.
10. Set **Use for POS Invoicing** to **Yes** and press **Enter**.
11. You will find two additional fields for messages and can use them as per your requirements. Type **Thank You** and **Visit Again** in the **Print Message 1** and **Print Message 2** fields respectively.
12. Specify the **Default Print Title** as **INVOICE**.
13. Under **Declaration**, you can enter the statutory declaration if applicable. The same will be printed in the Tax Invoice.
14. Mention the **Name of Class** as **POS Invoice** and press **Enter** to view the **Voucher Class** screen.

*The options to enable various **Multi-mode Payment Ledgers** are set to **Yes** by default. But you need to create necessary ledger as applicable. The ledgers **Sodexo Gift Coupons** and **Citibank** have not been created before. You need to create the ledgers **Sodexo Gift Coupons** under **Sundry Debtors** and **Citibank** under **Bank Accounts** in secondary ledger creation mode.*

15. Enter the details as given in the table

| Default Ledger Accounts for POS Invoice | Enable | Ledger Name         |
|-----------------------------------------|--------|---------------------|
| Gift Vouchers                           | Yes    | Sodexo Gift Coupons |
| Credit/Debit Card Payment               | Yes    | Citibank            |
| Cheque/DD                               | Yes    | HDFC Bank           |
| Cash                                    | Yes    | Cash                |

16. Under **Default Accounting Allocations for each Item in Invoice** enter the following details.

- ❑ **Ledger Name:** Create Ledger **Sales @ 12.5%** under **Sales Account** by selecting the appropriate **VAT/Tax Class**.
- ❑ **VAT/Tax Class:** **Sales @ 12.5%**
- ❑ **Percentage %:** **100**
- ❑ The options **Rounding Method** and **Rounding Limit** are automatically skipped.
- ❑ **Override using Item Default:** **No**

17. Under **Additional Accounting Entries to be added in Invoice**, enter the following details.

- ❑ **Ledger Name:** Create ledger **Output VAT @ 12.5%** under **Duties and Taxes**. Select the **Type of Duty/Tax** as **VAT** and **VAT/Tax Class** as **Output VAT @ 12.5%**.
- ❑ **Type of Calculation:** **On VAT Rate**
- ❑ **Value Basis:** **12.5%**
- ❑ **Rounding Method:** **Not Applicable**
- ❑ **Rounding Limit:** **Automatically Skipped**
- ❑ **Remove if Zero:** **Yes**

The resultant screen displays as shown.

| Voucher Type Class                                                                |                                                         | City Super Market   |                 |                 |                  |                               |  | Ctrl + M                                   |

## 10.4 POS Reports

### 10.4.1 POS Register

POS Register provides the list of Invoices. These Vouchers are collated and listed together for a period to give meaningful information. Each POS Invoice is further drilled down to obtain the lowest level of information.

To view the list of **POS Invoice Statement**,

Go to **Gateway of Tally > Display > Accounts Books > POS Register**

- Click **F1: Detailed**

*POS Register option will appear, only if the option **Use for POS Invoicing** is activated in **Voucher Type** and at least one entry has been made.*

The **POS Register** displays as shown.

Figure 10.14 POS Register – Printed

**POS Invoicing** can also be used for billing **Pharmaceutical products** in the following manner.

- ❑ Set **Use Security Control** to **Yes** in Company Creation/Alteration screen and create the user login name using the security feature in Tally.ERP 9. The user who logs in to Tally.ERP 9 with the name of the user and password can print the POS Invoice with the user name.
- ❑ Set **Maintain Batch-wise Details** and **Set Expiry Dates for Batches** to **Yes** in the **F11:Features** screen.
- ❑ Set **Use different Actual & Billed Quantities** to **Yes** in **F11: Features** screen to specify the free items.
- ❑ Set **Separate Discount column on Invoices** to **Yes** to specify the discount on any items while making a POS sales invoice.

### Points to Remember

- ❑ POS, an abbreviation for Point-of-Sale can mean a retail shop, a check-out counter in a shop, or a variable location where a sales transaction occurs.
- ❑ Tally allows the generation of POS Invoice with / without the use of a voucher class.
- ❑ In single-mode payment, the POS invoice will consist of only fields pertaining to cash.
- ❑ In multi-mode payment, any number of modes can be created for recording the amount received from the customer.
- ❑ The POS invoice will display the amount allowed as a discount with a negative sign.
- ❑ The POS invoice will display the rate as '0' when the items are given free of cost to the customer.
- ❑ When items with batch details are sold the same is displayed in the POS invoice.

## Lesson 11: Job Costing

### Lesson Objectives

On completion of this lesson, you will be able to

- ❑ Enable and capture job costing details in Tally.ERP 9
- ❑ Record the consumption of materials for each job
- ❑ Generate the report for jobs carried out in multiple godowns
- ❑ Compare and analyse jobs done

Job Costing applies to specific jobs undertaken according to customer requirements and specifications. Tally.ERP 9 enables the tracking of cost and revenue information down to the smallest detail.

In order to determine the actual costs incurred, every job is assigned a job number or a job name. Job costing systems determine the costs separately for each product or service, based on the jobs undertaken.

In a typical job costing environment:

- ❑ Many non-standard (customised) products/ service are produced/ rendered.
- ❑ Orders are executed based on customer requirements.
- ❑ Cost records are maintained for each distinct job.
- ❑ Costs are traced or allocated to jobs.

The advantages of Job Costing are as follows.

- ❑ Costs can be allotted to each element while the job is in progress.
- ❑ On the completion of a job, each element of cost, selling price and profit can be compared with estimates made earlier and other similar jobs.
- ❑ Suitable methods can be used to determine the price on a cost plus contract basis.

## 11.1 Configuring Job Costing In Tally.ERP 9

Let us consider **Computer Associates** to understand the Job Costing feature of Tally.ERP 9. **Computer Associates** supplies computers configured as per customer requirements and upgrades old computers.

### 11.1.1 Company Setup

Create a company called **Computer Associates** as shown below :

The completed **Company Creation** screen appears as shown below:

| Company Creation                     |                                                         | Ctrl + M                                                                       |                           |

Figure 11.3 Inventory Features screen

- Press **Y** or **Enter** to accept the Inventory Features screen.

## 11.2 Creating Masters for Job Costing

The masters required for Job costing are as follows:

- Cost centres used for job costing.
- Sales or direct income accounts related to job revenue.
- Direct and Indirect expenses related to job costs.
- Suppliers, vendors and other party account.
- Godowns dedicated to specific jobs necessary to assess stock consumption.
- Stock items.
- Voucher types and classes for stock transfer, consumption.

### 11.2.1 Creating Jobs as Job Cost Centres

Each job is identified with a name or number and this is used while creating the cost centre for the job. Create **Upgrading Job** as a Job Cost Centre under Primary.

Go to **Gateway of Tally > Accounts Info. > Cost Centres > Single Cost Centre > Create**

1. Name: **Upgrading Job**
2. (alias): Skip field
3. Under: Select **Primary** from List of Cost Centres
4. Use for Job Costing: **Yes**

The completed **Cost Centre Creation** screen appears as shown below:

**Cost Centre Creation**

Name : **Upgrading Job**

(alias) :

Under : **Primary**

Use for Job Costing ? **Yes**

Figure 11.4 Cost Centre Creation – Upgrading Job

5. Press **Y** or **Enter** to accept the screen

Similarly, create the following Cost Centres

| Name            | Alias      | Under   | Use for Job Costing |
|-----------------|------------|---------|---------------------|
| New Systems Job | Skip Field | Primary | Yes                 |
| Retail Trade    | Skip Field | Primary | No                  |

*The Parallel allocation of cost to regular cost centres takes place when more than one cost category is enabled.*

### 11.2.2 Creating Ledgers

Create the following ledger,

| Name     | Under             | Inventory values are affected | Cost Centres are applicable |
|----------|-------------------|-------------------------------|-----------------------------|
| Purchase | Purchase Accounts | Yes                           | Yes                         |

The completed **ledger creation** screen appears as shown below:

| Ledger Creation                     |  | Computer Associates                                                        | Ctrl +                |
|-------------------------------------|--|----------------------------------------------------------------------------|-----------------------|
| Name : Purchase                     |  |                                                                            | Total Op. Bal.        |
| (alias) :                           |  |                                                                            |                       |
| Under : Purchase Accounts           |  | <b>Mailing Details</b><br>Name :<br>Address :<br><br>State :<br>PIN Code : |                       |
| Inventory values are affected ? Yes |  | <b>Tax Information</b><br>PAN / IT No. :<br>Sales Tax No. :                |                       |
| Cost centres are applicable ? Yes   |  |                                                                            |                       |
| Opening Balance ( on 1-Apr-2009 ) : |  |                                                                            | Accept ?<br>Yes or No |

Figure 11.5 Ledger Creation – Purchases

- Press **Y** or **Enter** to accept the screen.

Similarly, create the following ledgers:

| Name               | Under             | Maintain balances bill-by-bill | Inventory values are affected | Cost Centres are applicable |
|--------------------|-------------------|--------------------------------|-------------------------------|-----------------------------|
| Sales              | Sales Accounts    | —                              | Yes                           | Yes                         |
| Service Charges    | Direct Expenses   | —                              | No                            | Yes                         |
| Travel Expenses    | Indirect Expenses | —                              | No                            | Yes                         |
| Reliable Computers | Sundry Creditors  | Yes                            | No                            | No                          |

Create a **Capital Account** under the **Capital Account** group and enter Rs.10,00,000 as the Opening Balance for the Capital and alter the Cash account to a opening balance of Rs. 10,00,000.

### 11.2.3 Creating Godowns dedicated to jobs

Godowns are geographical locations or persons responsible for stock handling. Whereas, Dedicated Godowns are created to keep track of stocks transferred, consumed and manufactured for each job.

*In this lesson, godowns have been created in the names of persons responsible for stock handling.*

Create a Dedicated Godown allotted to holding stocks for a default job and a normal Godown, used regularly and not assigned to any particular job.

#### Create Stores godown

Go to **Gateway of Tally > Inventory Info. > Godowns > Create**

1. Name: **Stores**
2. (alias): **Skip field**
3. Under: **Primary**
4. Allow Storage of materials: **Yes**
5. Set Job/Project Name for Job Costing: **Not Applicable**

Figure 11.6 Godown Creation – Stores

6. Press **Enter** twice to accept the screen.

Similarly, create the following **Godowns** with the details given below:

| Godown Name | Under   | Allow Storage of materials | Default Job Name |
|-------------|---------|----------------------------|------------------|
| Raj         | Primary | Yes                        | Upgrading Job    |
| Archana     | Primary | Yes                        | Upgrading Job    |
| Rajesh      | Primary | Yes                        | New Systems Job  |

### 11.2.4 Creating Units of Measure

A Unit of Measure is created to measure the stock items. Create **Units of Measure** as **Numbers**

Go to **Gateway of Tally > Inventory Info. > Units of Measure > Create**

- Ensure that the details are as shown in the following screen:

| Unit Creation          |                                            |
|------------------------|--------------------------------------------|
| Type                   | : <b>Simple</b>                            |
| Symbol                 | : <b>Nos</b>                               |
| Formal Name            | : Number                                   |
| Number of Decimal Plac | <b>Accept ?</b><br><b>Yes</b> or <b>No</b> |

Figure 11.7 Unit Creation – Numbers

- Press **Y** or **Enter** to accept the screen.

### 11.2.5 Creating Stock Item

**i. Create stock item as Mother Board**

Go to **Gateway of Tally > Inventory Info. > Stock Items > Create**

1. Name: **Mother Board**
2. (alias): **Skip field**
3. Under: Select **Primary** from List of Groups
4. Units: Select **Nos** from Units list
5. Rate of Duty: **Skip Field**
6. Opening Balance: Do not enter any details

The completed **stock item creation** screen appears as shown below :

| Stock Item Creation |                                    | Computer Associates                                                                                                  |                |
|---------------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------|----------------|
| Name                | : Mother Board                     |                                                                                                                      |                |
| (alias)             | :                                  |                                                                                                                      |                |
| Under               | : <input type="checkbox"/> Primary | <u>Tax Information</u><br>Tariff Classification : <input type="checkbox"/> Not Applicable<br>Rate of Duty (eg 5) : 0 |                |
| Units               | : Nos                              |                                                                                                                      |                |
| Opening Balance :   |                                    | Quantity                                                                                                             | Rate per Value |
|                     |                                    | Accept ?<br>Yes or No                                                                                                |                |

Figure 11.8 Stock Item Creation – Mother Boards

7. Press **Y** or **Enter** to accept the screen.

ii. Similarly, create the following Stock Items.

| Stock Item | Under   | Units |
|------------|---------|-------|
| Hard Disk  | Primary | Nos   |
| Monitor    | Primary | Nos   |
| CPU        | Primary | Nos   |
| Keyboard   | Primary | Nos   |
| Mouse      | Primary | Nos   |

iii. Creating Stock Item with Bill of Materials

Go to **Gateway of Tally > Inventory Info. > Stock Items > Create**

1. Name: **Computers**

2. Press **F12: Stock Item Configuration**,

- Set **Allow Component list details (Bill of Materials)** to **Yes**

The **F12: Stock Item Configuration** screen appears as shown below :

| Stock Item Configuration                         |              |
|--------------------------------------------------|--------------|
| Allow ALIASES along with Names                   | ? Yes        |
| Allow Language ALIASES along with Names          | ? No         |
| Allow ADVANCED entries in Masters                | ? No         |
| Use PART NUMBERS for Stock Items                 | ? No         |
| Use Description for Stock Items                  | ? No         |
| Use REMARKS for Stock Items                      | ? No         |
| Specify Default Ledger Allocation for Invoicing  | ? No         |
| Use ALTERNATE UNITS for Stock Items              | ? No         |
| Allow Std. Rates for Stock Items                 | ? No         |
| Allow Component list details (Bill of Materials) | ? <b>Yes</b> |

Figure 11.9 F12: Configuration

- Accept the screen.
- 3. Under: Select **Primary** from the **List of Groups**
- 4. Units: Select **Nos** from the **Units** list
- 5. Set **Components (BoM)** to **Yes**
- 6. Rate of Duty: **Skip Field**
- 7. In the **List of Components** screen,
  - Define the **Unit of Manufacture** as **1**
  - Type the name of the components and godown details as given in the following table:

| Item     | Godown | Qty<br>(Nos) |
|----------|--------|--------------|
| Monitor  | Rajesh | 1            |
| CPU      | Rajesh | 1            |
| Keyboard | Rajesh | 1            |
| Mouse    | Rajesh | 1            |

The **Components details screen** appears as shown below :

| Components of<br>Unit of manufacture |        | : <b>Computers</b><br>: <b>1 Nos</b> |
|--------------------------------------|--------|--------------------------------------|
| Item                                 | Godown | Quantity                             |
| Monitor                              | Rajesh | 1 Nos                                |
| CPU                                  | Rajesh | 1 Nos                                |
| Keyboard                             | Rajesh | 1 Nos                                |
| Mouse                                | Rajesh | 1 Nos                                |

Figure 11.10 Components List

Figure 11.11 Stock Item Creation – Computers

9. Press **Y** or **Enter** to accept the screen.

### 11.2.6 Creating Voucher Type with Voucher Class

In Tally.ERP 9, stock journals are used for the following purposes:

- ❑ To record the stages in the manufacturing process.
- ❑ To record the transfer of materials between godowns.
- ❑ To record the consumption of materials for Job Costing.

Create one new Voucher Type and two Voucher Classes to deal with the scenarios in a manufacturing as well as non-manufacturing environment.

#### i. Create Manufacturing Journal Voucher Type

Go to **Gateway of Tally > Inventory Info. > Voucher Types > Create**

1. Enter **Manufacturing Journal** as **Name** of the Voucher Type.
2. Select the **Type of Voucher** as **Stock Journal** from the list of voucher types.
3. Type the **Abbr.** as **Mfg.**
4. Select the **Method of Voucher Numbering** as **Automatic**.
5. By default **Use Common narration** is set to **Yes**.
6. Set **Use as a Manufacturing Journal** to **Yes**.

The completed **Voucher Type creation** screen appears as shown below:

| Voucher Type Creation                                                                                                                                                                                                                                                                                                                            |  | Computer Associates                                       | Ctrl + M              |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-----------------------------------------------------------|-----------------------|

|                                                                                                                                                                                                                                                                                                                                                  |  |                                                           | Accept ?<br>Yes or No |

Figure 11.12 Voucher Type Creation – Manufacturing Journal

7. Press **Y** or **Enter** to accept the screen.

## ii. Create Transfer Journal Voucher Type with Voucher Class

Go to **Gateway of Tally > Inventory Info. > Voucher Types > Create**

1. Enter **Transfer Journal** as **Name** of the Voucher Type.
2. Select the **Type of Voucher** as **Stock Journal** from the list of voucher types.
3. Type the **Abbr.** as **Transfer**.
4. Select the **Method of Voucher Numbering** as **Automatic**.
5. By default **Use Common Narration** is set to **Yes**.
6. Set **Use as a Manufacturing Journal** to **No**.
7. Type the **Name of Class** as **Transfer**

**Voucher classes** are available when stock journals are not used as manufacturing journals. The options available are as follows:

- ❑ **Use class for inter Godown transfers** : Create this class to record transfer of materials from one godown to another.
- ❑ **Use class for Job Costing consumption** : Create this class to record the consumption of materials at godown level.

8. Press **Enter** and set **Use Class for Inter-Godown Transfers** to **Yes**.

|                                       |              |
|---------------------------------------|--------------|
| <u>Class : <b>Transfer</b></u>        |              |
| Use Class for Inter- Godown Transfers | ? <b>Yes</b> |
| Use Class for Job Costing Consumption | ? <b>No</b>  |

Figure 11.13 Transfer Class

The completed **Voucher Type Creation screen** appears as shown below:

| Voucher Type Creation                                                                                                                                                     |  | Computer Associates                                       | Ctrl + M E                              |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-----------------------------------------------------------|-----------------------------------------|
| Name : <b>Transfer Journal</b>                                                                                                                                            |  |                                                           |                                         |

9. Press **Y** or **Enter** to accept the screen.

## 11.3 Recording Transactions

On the receipt of orders from **SimplyC Solutions**, **Computer Associates** planned to buy and store the components required for the execution of jobs.

### 11.3.1 Creating Receipt Note

*On 1-4-09, Computer Associates, placed an order with Reliable Computers for the following items :*

| Name of Item  | Quantity | Rate per Unit | Value    |
|---------------|----------|---------------|----------|
| Mother Boards | 12       | 3,000         | 36,000   |
| Hard Disk     | 12       | 4,500         | 54,000   |
| Mointors      | 22       | 7,500         | 1,65,000 |
| CPU           | 22       | 2,750         | 60,500   |
| Keyboard      | 27       | 725           | 19,575   |
| Mouse         | 27       | 250           | 6,750    |

### i. Create Receipt Note

*In the **F11: Inventory Features**, set **Yes** to **Use Tracking Numbers (Delivery/Receipt Notes)** and **Use Rejection Inward/ Outward Notes**.*

**Go to Gateway of Tally > Inventory Vouchers > Alt + F9** to view **Receipt Note** entry screen

1. Press **F2** to change voucher date. Type **1-4-2009**.
2. In the **Party's A/c Name** select **Reliable Computers** from the List of Ledgers Accounts.
3. Press **Enter** to view the order details screen and accept the default screen.
4. In the **Purchase Ledger** field, select **Purchases** from the List of Ledger Accounts.
5. Select **Mother Boards** from **List of Items**.
6. The **Item Allocation** screen appears. Enter the details as shown below:

| Tracking No                              | Godowns | Quantity | Rate  | Amount |
|------------------------------------------|---------|----------|-------|--------|
| Select 1 (from List of Tracking Numbers) | Stores  | 12 Nos   | 3,000 | 36,000 |

### Tracking Numbers

*Many businesses deliver stock with a delivery note or a challan and the bill is raised later. There may be a situation where a bill is raised first and the goods are delivered against it or the goods are received later against a purchase bill.*

*In either case, it is important to 'track' the delivery or receipt of inventory against the bill. Tally.ERP 9 provides a facility called Tracking Numbers to achieve the same.*

The completed **Receipt Note** appears as shown below :

| Inventory Voucher Creation                   |          | Computer Associates |                    | Ctrl + M   |

### 11.3.2 Creating Purchase Invoice

*On 2-4-09, received a purchase bill from Reliable Computers for the supply booked.*

#### Create Purchase Invoice

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. Press **F2** and change the date to **2-4-2009**.
2. Enter the **Supplier Invoice No.** and **Date**.
3. In the **Party's A/c Name** select **Reliable Computers** from the List of Ledgers Accounts.
4. In the **Receipt Details** screen, select **1** from the List of Tracking Numbers.
5. In the **Purchase Ledger** field select **Purchases** from the List of Ledgers Accounts.
6. In the **Bill-Wise Details** screen,
  - Select **New Ref**
  - Type the name as **RC1**
  - Enter the amount as **Rs. 341825**

The completed **Purchase Invoice** appears as shown below:

| Accounting Voucher Creation           |          | Computer Associates |     | Ctrl + M    |
|---------------------------------------|----------|---------------------|-----|-------------|
| <b>Purchase</b>                       | No. 1    |                     |     | 2-Apr-2009  |
| Supplier Invoice No. : RC1            |          | Date : 2-Apr-2009   |     | Thursday    |
| Party's A/c Name : Reliable Computers |          |                     |     |             |

Figure 11.19 Godown Summary

### 11.3.3 Creating Transfer Journal

**Computer Associates has employed Raj and Archana. The following components have been issued to them on 4-4-2009 for the upgrading job.**

Details of Stock issued to **Raj** :

| Name of Item  | Godown | Quantity | Rate  | Value  |
|---------------|--------|----------|-------|--------|
| Mother Boards | Stores | 6        | 3,000 | 18,000 |
| Hard Disk     | Stores | 6        | 4,500 | 27,000 |

Details of Stock issued to **Archana** :

| Name of Item  | Godown | Quantity | Rate  | Value  |
|---------------|--------|----------|-------|--------|
| Mother Boards | Stores | 6        | 3,000 | 18,000 |
| Hard Disk     | Stores | 6        | 4,500 | 27,000 |

## Create Transfer Journal

Go to Gateway of Tally > Inventory Vouchers > press **Alt + F7**

1. The **Voucher Type** subscreen appears as shown:

|                            |                           |                    |
|----------------------------|---------------------------|--------------------|
| <b><u>Voucher Type</u></b> |                           |                    |
| Name                       | : <b>Transfer Journal</b> | Voucher Class List |
| Class                      | : <b>Transfer</b>         | ▣ Not Applicable   |
|                            |                           | <b>Transfer</b>    |

Figure 11.20 Voucher Type – Transfer Journal

2. Select **Transfer Journal** as **Voucher Type** and **Class** as **Transfer**
3. Press **F2** and change the date to **4-4-2009**.
4. Select **Raj** as the **Destination Godown**
5. Enter the details as shown below :

| Name of Item  | Godown | Quantity | Rate  | Value  |
|---------------|--------|----------|-------|--------|
| Mother Boards | Stores | 6        | 3,000 | 18,000 |
| Hard Disk     | Stores | 6        | 4,500 | 27,000 |

The completed **Transfer Journal** appears as shown below :

| Inventory Voucher Creation             |        | Computer Associates             |              | Ctrl + M               |                       |
|----------------------------------------|--------|---------------------------------|--------------|------------------------|-----------------------|

Figure 11.21 Transfer Journal – April 3, 2009

- The **Rate** and **Amount** are automatically displayed.
- Press **Y** or **Enter** to accept the screen.

Similarly, make an entry in a **Transfer Journal**, selecting **Archana** as the **Destination Godown** and ensure that the date is 4-4-2009.

### 11.3.4 Creating Consumption Journal

*On 5-4-2009, Raj and Archana found that 8 Systems needed a replacement of Mother Boards and Hard Disk. The respective consumption has to be recorded as a job cost.*

| Name of the Item | Godown  | Quantity | Rate  | Value  |
|------------------|---------|----------|-------|--------|
| Mother Boards    | Raj     | 4        | 3,000 | 12,000 |
| Mother Boards    | Archana | 4        | 3,000 | 12,000 |
| Hard Disk        | Raj     | 4        | 1,000 | 4,000  |
| Hard Disk        | Archana | 4        | 1,000 | 4,000  |

### Create Consumption Journal

Go to Gateway of Tally > Inventory Vouchers > press **Alt + F7**

1. Select **Consumption Journal** as **Voucher Type**
2. Select **Consumption** as **Voucher Class**
3. Press **F2** to change the voucher date. Type **5-4-2009**. Ensure that the screen is displayed as shown:

| Inventory Voucher Creation |         |          |              |           | Computer Associates         |                          |          |      |        | Ctrl + M             |  |
|----------------------------|---------|----------|--------------|-----------|-----------------------------|--------------------------|----------|------|--------|----------------------|--|
| Consumption Journal No. 1  |         |          |              |           | Voucher Class : Consumption |                          |          |      |        | 5-Apr-2009<br>Sunday |  |
| Transfer of Materials      |         |          |              |           |                             |                          |          |      |        |                      |  |

| Hard Disk                  | Archana | 4 Nos    | 4,500.00/Nos | 18,000.00 |                             |                          |          |      |        |                      |  |
|                            |         |          |              | 16 Nos    | 66,000.00                   |                          |          |      |        |                      |  |
| Narration:                 |         |          |              |           |                             |                          |          |      |        |                      |  |

Accept ?  
 Yes or No

Figure 11.22 Consumption Journal – April 5, 2009

4. Press **Y** or **Enter** to accept the screen.

- ❑ On recording the above entry, the stock available in the godowns decrease. This value is considered for the consumption of materials during a job work analysis.
- ❑ A **Manufacturing Journal** can also be used to obtain the same result, but in this, a voucher class cannot be used and the voucher should not have any output.

Both direct and indirect expenses can be recorded through accounting vouchers by assigning them to job cost centres.

***On 6-4-09, Computer Associates made a cash payment of Rs. 31,250 as Service Charges and Rs. 20,000 as Travel Expenses, collectively to Raj and Archana. The costs were assigned to Upgrading Job.***

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment**

1. Select **Cash** in the **Account** field.
2. Select **Service Charges** from **List of Ledger Accounts**.
3. Enter **31,250** in the **Amount** field
4. Press **Enter** to view the **Cost Allocations** screen
5. Select **Upgrading Job** from **List of Cost Centres**

[illegible]

Figure 11.23 Cost Allocations for Service Charges

6. Select **Travel Expenses** from **List of Ledger Accounts**, enter **20000** in the **Amount** field and press **Enter** to view the **Cost Allocations** screen.
7. Select **Upgrading Job** from **List of Cost Centres**.
8. Press **Y** or **Enter** to accept the screen.

**Go to Gateway of Tally > Display > Statement of Inventory > Godowns >**

- ❑ Select **Primary**
- ❑ Press **Alt+F1** to view the **Godown summary** in detailed format.
- ❑ In the **F12: Configuration**, set **Show All Items (incl. zero balance)** to **Yes**.

Figure 11.24 Godown Summary

### 11.3.6 Creating Sales Invoice

*On 6-4-2009, Raj and Archana successfully completed the upgrading job at SimplyC Solutions. Computer Associates raised an invoice on 6-4-2009 for the upgrading job.*

**Create Sales Invoice :**

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

*In the **F12: Configuration**, set **Use Common Ledger A/c for Item Allocation** to **No**.*

1. In the **Party's A/c Name** select **SimplyC Solutions** from the List of Ledger Accounts.
2. Press **Enter** to view the **Despatch Details** screen and accept the default screen.

3. Select **Sales** from **List of Ledger Accounts**, enter **3,75,000** in the **Amount** field and press **Enter** once to view Cost Allocations for the Sales screen.
4. Select **Upgrading Job** from **List of Cost Centres**.
5. In the **Bill-Wise Details** for **SimplyC Solutions**,
  - Select **New Ref**
  - Type the **Name** as **SS-1**
  - Enter the amount as **Rs. 4,25,000**
6. Press **Y** or **Enter** to accept the screen.

### 11.3.7 Creating Stock Journal for Returns of Materials

*On 6-4-2009, Raj and Archana return the remaining components to the stores having completed the job.*

| Name of the Item | Godown  | Quantity | Rate  | Amount |
|------------------|---------|----------|-------|--------|
| Mother Boards    | Raj     | 2        | 3,000 | 6,000  |
| Hard Disk        | Raj     | 2        | 4,500 | 9,000  |
| Mother Boards    | Archana | 2        | 3,000 | 6,000  |
| Hard Disk        | Archana | 2        | 4,500 | 9,000  |

#### Create Stock Journal

- Ensure that the **Voucher Type** is **Transfer Journal** and the **Voucher Class** is **Transfer**.
- Enter the details as shown

| Inventory Voucher Creation                    |         | Computer Associates             |              | Ctrl + M             |                              |
|-----------------------------------------------|---------|---------------------------------|--------------|----------------------|------------------------------|

Figure 11.26 Godown Summary at the end of Upgrading Job

### Practice Exercise

Similarly, let us record transactions for **New Systems Job**.

- On 7-4-2009, the following components are issued to **Rajesh** from the stores. This is for the installation of **New Systems** for **SimplyC Solutions**. The details of Stock issued to **Rajesh** are given below:

| Name of the Item | Godown | Quantity | Rate  | Value    |
|------------------|--------|----------|-------|----------|
| CPU              | Stores | 15       | 2,750 | 41,250   |
| Monitor          | Stores | 15       | 7,500 | 1,12,500 |
| Keyboard         | Stores | 15       | 725   | 10,875   |
| Mouse            | Stores | 15       | 250   | 3,750    |

- Make an entry of the following transaction in Stock Journal.

Ensure that the **Voucher Type** is a **Transfer Journal** and the **Voucher Class** is **Transfer**.

- ❑ Select the **Destination** Godown as **Rajesh**.
- ❑ Ensure the entry is as shown in the following table:

| Name of the Item | Godown | Quantity | Rate  | Value    |
|------------------|--------|----------|-------|----------|
| CPU              | Stores | 15       | 2,750 | 41,250   |
| Monitor          | Stores | 15       | 7,500 | 1,12,500 |
| Keyboard         | Stores | 15       | 725   | 10,875   |
| Mouse            | Stores | 15       | 250   | 3,750    |

2. Using the above components, Rajesh produced 15 computer systems on 8-4-2009. A manufacturing entry was passed when the components were converted into fully assembled computer systems for the job.

Once the entry is passed:

- ❑ The quantities of components get reduced from one godown while the quantity of assembled product increases in another.
- ❑ The aggregate value of the consumed components from each Godown will be taken as the consumption value for job work analysis.
- ❑ The value of the finished product (assembled computer systems) is considered as inward.

#### i. Make an entry of the transaction in a Manufacturing Journal.

Go to **Gateway of Tally > Inventory Vouchers > Alt + F7: Select the Voucher Type as Manufacturing Journal**

- ❑ Enter the details as shown below:

| Inventory Voucher Creation  |        |          | Computer Associates |             |                      | Ctrl + M                |               |               |

Figure 11.28 Godown Summary after Manufacturing of Systems

3. On 8-4-2009, **Computer Associates** paid **Rajesh** Service charges of **Rs. 31,250** and Travel Expenses of Rs. 20000.

i. **Make an entry of the transaction in Payment Voucher**

- ❑ Select **Cash** in the **Account** field.
- ❑ Select **Service Charges** and enter the amount as **Rs. 31250**. Press **Enter** once to view Cost Allocation for the Service Charges screen.
- ❑ Select **New Systems Job** from **List of Cost Centres** and press **Enter** once.
- ❑ Select **Travel Expenses** and enter the amount as **Rs. 20000** and press **Enter** once to view Cost Allocation for the Travel Expenses screen.
- ❑ Select **New Systems Job** from **List of Cost Centres**.
- ❑ Press **Y** or **Enter** to accept the screen.

4. On 8-4-2009, Rajesh delivered 15 new systems to SimplyC Solutions. The agreed price was Rs. 20000 per system.

**i. Make an entry of the following transaction in Delivery Note**

Go to **Gateway of Tally > Inventory Vouchers > Alt + F8: Delivery Note**

*In the **F12: Configuration**, set **Use Common Ledger A/c for Item Allocation** to **Yes**.*

- ❑ In the **Party's A/c Name** select **SimplyC Solutions** from the List of Ledger Accounts.
- ❑ Press **Enter** to view the **Order Details** screen and accept the default screen.
- ❑ Select **Computers** from **List of Items** and press **Enter** once to view the Item Allocation screen for computers.
- ❑ Select **Tracking No: 1** and accept the Item Allocation screen. Ensure that the Item Allocation screen for computers is as shown:

| Godown | Quantity | Rate   | Amount   |
|--------|----------|--------|----------|
| Rajesh | 15 Nos   | 20,000 | 3,00,000 |

- ❑ Select **Sales** in the **Sales Ledger** field.
  - ❑ Press **Y** or **Enter** to Accept the Delivery Note.
5. On 8-4-2009, **Computer Associates** raises a sales invoice of **Rs. 3,00,000** at the rate of **Rs. 20,000** per system for **15 New systems** delivered by **Rajesh**.

**i. Make an entry of the transaction in a sales item invoice.**

*In the **F12: Configuration**, set **Common Ledger A/c for Item Allocation** to **No**.*

- ❑ In the **Party's A/c Name** select **SimplyC Solutions** from the List of Ledger Accounts.
- ❑ In the **Despatch Details** screen, select **Delivery Note No. 1** and accept the default details. The Item, Quantity, Rate and Amount fields are updated automatically.
- ❑ Accept the default Item Allocation screen.
- ❑ In the **Accounting details** screen select **Sales** from **List of Ledger Accounts**.

- ❑ In the **Cost Allocation for Sales** screen, select **New Systems Job**.
- ❑ In the **Bill-Wise Details** screen, select the **New Ref** and enter the Name as **SS-2**. Enter the amount as **Rs. 300000**.
- ❑ Press **Y** or **Enter** to accept the screen.

## ii. View Godown Summary

Go to Gateway of Tally > Display > Statements of Inventory > Godowns

- ❑ Select **Primary**
- ❑ Press **Alt+F1** to view the report in detailed format.

Figure 11.33 Job Work Analysis – New Systems Job

Similar to the **Upgrading Job**, the **Material Consumption Summary** and the **Godown Summary** can be viewed, by drilling down the report.

#### 11.4.4 Comparative Job Work Analysis

**Computer Associates** would like to compare the total jobs executed by them for **SimplyC Solutions**.

Go to Gateway of Tally > Display > Statement of Accounts > Job Work Analysis > New Systems Job >

- ❑ Select **New Column** from the **Buttons bar** and select the **Upgrading Job**.
- ❑ Select any number of jobs as required.
- ❑ Press **F12: Configuration** and change the settings as shown below:

| Configuration           |                    | Format          |
|-------------------------|--------------------|-----------------|
| Format                  | : <b>Detailed</b>  | Condensed       |
| Show Percentages        | ? <b>No</b>        | <b>Detailed</b> |
| Appearance of Names     | : <b>Name Only</b> |                 |
| Scale Factor for Values | : <b>Default</b>   |                 |

Figure 11.34 Configuration

- Accept the Configuration screen to view the summary of Jobs performed for **SimplyC Solutions**.

Figure 11.35 Summary of Jobs Performed for SimplyC Solutions

### Points to Remember

- ❑ Job Costing is evaluating the cost of each specific job order.
- ❑ Tally.ERP 9 permits you to create a Godown / Location where you need not store materials but treat it as a virtual godown.
- ❑ Tally.ERP 9 allows a stock journal voucher type to be used as a manufacturing and as a non-manufacturing journal.
- ❑ A Manufacturing journal voucher type is used to track the list of components used, its value and the additional cost of manufacture associated with each product.
- ❑ A stock journal voucher type that is not used as a manufacturing journal, can be used to create voucher classes for the purpose of inter-godown transfers and for job costing consumption records.
- ❑ There are two levels of reports generated in job costing viz., Job Work Analysis and Material Summary Report
- ❑ A Godown summary displays consumption and other transfer details of all the godowns.

## Lesson 12: Multilingual Capabilities

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ The Multilingual capabilities of Tally.ERP 9
- ❑ How to change the Interface for different languages
- ❑ Generating reports and invoices in different languages

The multilingual functionality of Tally.ERP 9, allows you to interact with the software in the language of your choice. It offers you tremendous freedom in communication. You can maintain your accounts in an Indian language, view them in another and print them in yet another Indian language.

All Indic languages are unicode. They are presently supported only on Windows ME/ Windows NT/ Windows 2000 and Windows XP operating systems. You can enable Indic languages support at the operating system level or at the time of installing Tally.ERP 9.

### Salient features of Multilingual Tally.ERP 9

Tally.ERP 9 has the following salient features which makes it the most popular accounting software:

- ❑ Is user-friendly.
- ❑ Is fast and reliable.
- ❑ Offers concurrent multilingual support.
- ❑ Allows a dynamic selection of scripts.
- ❑ Supports flexible data input in the language of the user's choice.
- ❑ Has easy to use keyboards layouts – inscript as well as phonetic.
- ❑ Captures language specific aliases for all masters.

- ❑ Supports user interface in about 10 languages.
- ❑ Provides the facility to switch to the multilingual user interface quickly.
- ❑ Allows effortless transliteration from one Indian language to another within the Indic family of languages.
- ❑ Supports the translation of masters based on predefined aliases.
- ❑ Inbuilt dictionaries provide appropriate language conversion during runtime.
- ❑ Supports Discrete and Combinatorial type uni-directional scripts.
- ❑ Enables comprehensive localised accounting and financial reporting.
- ❑ Allows you to display and print bills, vouchers, invoices, receipts, reports and ledgers in the language of your choice.
- ❑ Generates MIS reports such as confirmation letters, reminder letters in multiple languages.
- ❑ Allows you to cut or copy multilingual text from other applications such as Microsoft Word, WordPad, Instant Messenger, Outlook Express. Press **Ctrl+C** to copy and **Ctrl+Alt+V** to paste in Tally.ERP 9.

## 12.1 Configuring Tally.ERP 9 for Multilingual Capabilities

Tally.ERP 9 provides you with the facility to maintain your books of accounts in any Indian language while the data is accepted, sorted, maintained, displayed and printed in another Indian language.

Follow the steps given below to experience the multilingual capabilities of Tally.ERP 9.

### 12.1.1 Creating a Company

Let us consider **Allgrains Traders**, which is engaged in trading of Groceries for understanding Tally.ERP 9's multilingual capabilities. Create a new company as **Allgrains Traders**

The completed **Company Creation** screen appears as shown below:

| Company Creation                     |                                                | Ctrl + M                                                                        |                              |

Figure 12.1 Completed Company Creation screen

- Press **Y** or **Enter** to accept the company creation screen.

### 12.1.2 Defining User Interface Language

The user interface language is by default the same as the initial start-up language selected during Tally.ERP 9 installation. However, Tally.ERP 9 allows you to configure the user interface language before or after the creation of a company. Presently, Tally.ERP 9 supports nine Indian languages and Hinglish (colloquial Hindi).

- Hindi
- Marathi
- Gujarati
- Bengali
- Kannada
- Tamil
- Telugu
- Malayalam
- Punjabi

To define user Interface language,

Go to **Gateway of Tally** > press **Alt+G** (Language).

- ▣ Select **Hindi** from the list of languages.

The **Language Configuration** screen appears as shown below:

Figure 12.2 Language Configuration

Tally.ERP 9 automatically loads the relevant dictionary for the configured language and the interface (menus and prompts) is accordingly translated into the selected language.

The **Gateway of Tally** screen in Hindi appears as shown below:

| पु: प्रिंट                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | वु: विर्यात                                 | म: ई.मेल                                                                                                                     | ओ: अपलोड                                                                | ब: भाषा    | क: कीबोर्ड | क: Control Centre | रु: Support Centre | रु: सहायता | F1: कंपनी पुने |         |         |         |               |            |                                                    |                                             |                                                                                                                              |                                                                         |          |

Figure 12.4 F12: Configuration – General

**Show tables with Masters only in Current Language** when set to **Yes**, displays the pre-defined and user-defined masters only in the language selected. Otherwise, the pre-defined and user-defined masters are displayed in English or in the selected language along with defined aliases of other languages, if any.

*When **Show tables with Masters only in Current Language** is set to **Yes**, displays the pre-defined and user-defined masters only in the language selected. Otherwise, the pre-defined and user-defined masters are displayed in English or in the selected language along with defined aliases of other languages, if any.*

## 12.2 Creating Masters

Tally.ERP 9 gives you the flexibility to create ledgers/ stock items using phonetic as well as inscript (Operating System) keyboard.

### 12.2.1 Using Phonetic Keyboard Layouts

Generally, a phonetic keyboard is useful for those who speak the language, but cannot type in it. All Indian languages share a common phonetic base which allows a direct comparison of scripts. In a phonetic keyboard, the alphabets are assigned keys on the Standard English keyboard,

based on their nearest phonetic equivalents. Spell the word in English for Tally.ERP 9 to display it in the selected language.

By using Tally.ERP 9, you can now enter data in any Indian language using a phonetic keyboard to generate bills, vouchers, invoices, receipts, reports and ledgers, confirmation letters, reminder letters and so on. These reports are displayed in the language selected after transliteration.

Examples:

| English Word       | Keys to be used for phonetic representation in Indic languages |
|--------------------|----------------------------------------------------------------|
| Purchase           | Parachej                                                       |
| Sales              | Sels                                                           |
| Item               | AiiTam                                                         |
| Inventory          | invenTrii                                                      |
| Conveyance         | Kanveyans                                                      |
| Salary             | Selarii                                                        |
| Postage & Telegram | posTej end Teligram                                            |
| Commission         | Kamiishan                                                      |

Figure 12.5 F12: Configuration

This allows you to create ledger masters and stock items with their respective aliases in Indic languages.

### 12.2.2 Creating Stock Item

Create a stock item **Rice** in Hindi and provide **aliases** for it in different languages.

- Press **Alt+G** (Language) and Select **Hindi**.

Go to **Gateway of Tally > Inventory Info. > Stock Item > Create.**

1. **Name of the Item:** Type as **chaaval** and press **Enter** (Tally.ERP 9 automatically interprets the name in Hindi).

## 12.3 Entering Transactions in Multiple Languages

Tally.ERP 9 presently supports 11 uni-directional scripts. Using Tally.ERP 9, you can maintain your accounts in Hindi; send invoices in Marathi to your customers in Bombay; and place purchase orders with suppliers in Tamil Nadu and Kolkatta in Tamil and Bengali, respectively.

### 12.3.1 Creating Purchase Invoice

*On April 1, 2009, Allgrains Traders purchased the following goods from Suma Traders :*

| Item Description | Qty | Rate |
|------------------|-----|------|
| Rice             | 25  | 425  |
| Soap             | 500 | 20   |

**Create Purchase Voucher :**

Go to **Gateway of Tally > Accounting Vouchers > F9: purchase**

1. Press **F2** and change the **Date** to **1-4-09**
2. Select **Suma Traders** in **Party's Name** field and press **Enter**

3. Select **Purchases** ledger
4. Select **Rice** as the first Stock Item, and specify the **Quantity** and **Rate** and press **Enter**
5. Select **Soap** as the second item, and specify the **Quantity** and **Rate** and press **Enter**

The completed **Purchase Voucher** appears as shown below :

Figure 12.21 Print Preview of Sales Invoice – Kannada

- The Name of the company, the Unit of Measure and the Currency are neither translated nor transliterated, but appear in the language in which they were created.

## 12.4 Transliteration

In Tally.ERP 9, the masters created with aliases in more than one Indic language can be dynamically converted or transliterated. Transliteration is based on the phonetic behaviour of Indian languages. Tally.ERP 9 permits the transliteration of strings across all Indian scripts. However, such transliteration is possible because of the in-built **Language Precedence** feature in Tally.ERP 9.

The order of Language Precedence in Tally.ERP 9 is as follows:

1. English
2. Hindi
3. Gurumukhi (Punjabi)
4. Gujarati
5. Tamil
6. Kannada
7. Malayalam
8. Marathi

For instance, if a master is created in Hindi, with aliases in Kannada, the resultant report displayed will be in the language selected. However, if you want to view the report in another Indic language, then the transliteration of the Name of the Master is in the script selected. The pronunciation is Hindi-based since Hindi precedes Kannada in the language precedence order.

Go to **Gateway of Tally > Display > Day Book**

### Points to Remember

- ❑ You can maintain your accounts in any one of the Indian languages that Tally.ERP 9 supports, view them in another and print the same data in yet another Indian language.
- ❑ Tally.ERP 9 permits the transliteration of strings across all Indian scripts.

## Lesson 13: Technological Advantages of Tally.ERP 9

### Lesson Objectives

On completion of this lesson, you will be able to understand

- ❑ TallyVault a Company
- ❑ Activate Security Control for a Company
- ❑ Create Security Levels and Assign Passwords
- ❑ Activate TallyAudit and View the TallyAudit list of Vouchers/Ledgers
- ❑ Backup and Restore Tally.ERP 9 Data
- ❑ Split Company Data
- ❑ Export and Import Data and Vouchers
- ❑ Export Reports using ODBC
- ❑ Use Web-Enabled, Print Preview and Online Help Features
- ❑ Print Reports and Cheques
- ❑ Tally.NET Features
- ❑ Control Centre Capabilities
- ❑ Advantages of Support Centre

### 13.1 TallyVault

The Security of Data, is always a matter of concern for businesses since most organisations depend on the confidentiality of information. The Tally Vault feature is an enhanced security system which allows for encryption of the company data.

TallyVault ensures that the original information is under no circumstances made available to another user. This technique is similar to **encryption-decryption**, and the decrypted form of data is never stored in the system. Apart from this, it uses the **non-stored password** mechanism. This is done by using highly advanced mechanisms to validate a new user who does not have a prior

knowledge of the original password. The combination of all these facilities makes, TallyVault one of the most secure means of information storage.

### 13.1.1 Using TallyVault Feature

Tally.ERP 9 allows you to encrypt your company data either at the time of creation of the company or in the alteration mode. Let us first encrypt National Traders.

- Ensure that you are at the Gateway of Tally screen is as shown below:

Figure 13.1 Gateway of Tally

- Press **Alt+F3** to view the **Company info.** menu, highlight **Change TallyVault** and press **Enter**.

Figure 13.2 Company Info. Menu

- ❑ The **Change TallyVault** screen appears.
  - Select the company once again (this is done when you have loaded multiple companies).
  - The screen appears as shown below:

| Change TallyVault                       |                                                                                       | National Traders | Ctrl + M |
|-----------------------------------------|---------------------------------------------------------------------------------------|------------------|----------|
| Current Period<br>1-4-2009 to 31-3-2010 | <b>Change TallyVault</b><br>Name : <b>National Traders</b>                            |                  |          |
| List of Se                              | New Password : <span style="background-color: black; color: black;">XXXXXXXXXX</span> |                  |          |
| Name of Company<br>National Traders     | Repeat New Password :                                                                 |                  |          |

Figure 13.3 Change TallyVault

- ❑ Enter the Password as **NTC** (all in capitals) in the **New password** field and repeat the same in the **Repeat New Password** field.
- ❑ Press **Enter** to accept.  
Tally.ERP 9 prompts change – **Yes** or **No**.
- ❑ Press **Enter** once again and Tally.ERP 9 displays the Information screen as shown below:

Figure 13.4 Information screen

- ❑ After TallyVaulting a company, Tally.ERP 9 retains the original company and creates a new encrypted company to allow you to decide whether you want to retain the encrypted company or not.
- ❑ The number 10000 is displayed to help you identify your company. This differs based on the number of companies already existing in the data directory.
- ❑ Accept by pressing any key.
- ❑ Tally.ERP 9 brings you back to the Company Info. menu.
- ❑ Use **Alt+F1** to **Shut the Company** and press **Enter** on **Select Company** and the screen appears as shown below

Figure 13.5 List of Companies

- ❑ You cannot see the name of the encrypted or TallyVaulted company. This ensures that nobody has access to your data.
- ❑ Press **Enter** and select the company 10000.
- ❑ Tally.ERP 9 prompts for the **TallyVault Password** as shown below :

Figure 13.6 TallyVault Password

- ❑ Enter the password as **VCC** to open National Traders.

*Do not forget your **TallyVault password** because the data once lost cannot be retrieved.*

## 13.2 Security Control

Security Control is required in an environment where many people work on accounts using the same computer at different times or the same set of accounts on a network.

Tally.ERP 9 has a variety of management reports that are flexible in nature allowing you to create, alter, display and print any information. The Security Control system of Tally.ERP 9 is used to set the authority rights of the user or user groups. This prevents other users from using the system to create, alter, display and print any data. Tally.ERP 9 has a customised security system where the authority levels are set for users at different levels. Tally.ERP 9 has two security types, one for the Owner by default and the other for Data Entry. Other security types can be created based on these predefined types.

The Owner has full access and rights to Tally.ERP 9, except for **Tally Audit**, which is reserved for the administrator alone. Data Entry has restricted rights. Security control can be activated during company creation or by company alteration. Once this is activated, Tally.ERP 9 asks you to enter the name of the user and the password.

### 13.2.1 Activate Security Control

Go to **Gateway of Tally of National Traders** > press **Alt+F3** > Select **Alter** > press **Enter** and reselect **National Traders** to view the **Company Alteration** screen.

- ❑ Set **Yes to Use Security Control**.
- ❑ An additional field appears asking for the name of the administrator, type **Admin**.
- ❑ In the **Password** field type **Admin** and repeat the password.
- ❑ An option **Use Tally Audit Features** appears, set this to **Yes**.
- ❑ An additional option **Disallow opening in Educational mode** appears, set this to **No**. Accept the screen and return to the Company Info menu.
- ❑ Shut the company and select **National Traders** once again (Do not select the TallyVaulted company).
- ❑ Tally.ERP 9 prompts the user for the user name and password as shown below:

Company : National Traders

Name of User : XXXXXXXXXX

Password (if any) :

Figure 13.7 User and Password screen

- Give the details according to what you had entered in the Company Alteration screen and accept.

Tally.ERP 9 loads the company and displays the Gateway of Tally on entering the correct user name and password. Now that we have activated the Security Control for National Traders, let us create the Security Levels.

*The password is case sensitive. Any variation in the case will not allow you to login to Tally.ERP 9.*

### 13.2.2 Create Security Levels

Go to **Gateway of Tally >** Press **Alt+F3** and view the **Company Info.** menu.

- Press **Enter** on **Security Control** and a sub-menu appears as shown below:

Figure 13.8 Security Control Menu

- The menu allows you to define the security level under the field Types of Security. The user name and password for that access level is defined under the field Users and Passwords.
- Press **Enter** on **Types of Security**.

Figure 13.9 Security Level Definition screen

- ❑ Under **List of Security Levels**, the default value is **Data Entry**, **Tally.NET User** and **Tally.NET Auditor**
- ❑ Press the **Down Arrow Key** to create a new security level.
- ❑ Enter **Manager** in the **List of Security Level** field.
- ❑ Press **Enter** to view the Level definition screen.

### Security Level Definition Screen

The Level definition screen displays the following:

- ❑ **Name of Security Level:** This by default displays the name created.
- ❑ **Use Basic Facilities of:** Select Owner from the security List. However the other option called Data Entry is also available. Press O to get the popup list or revert from the next field for it to pop up. Likewise, a Manager is created at the next level. Select the Owner.
- ❑ **Days Allowed for Back – dated vouchers:** It refers to the number of days the users at this level are allowed to alter Back-Dated Vouchers. For example, specifying 0 will indicate that back – dated vouchers are not allowed and entering 7 will allow the user at this level to insert vouchers going back 7 days. Here enter 0. This is only effective if you disallow back-dated entries in the disallow column.
- ❑ **Cut-off date for Back-dated Vouchers:** Specify the dates before which users of this profile or Security level may not create or alter vouchers. This is useful in cases where the Tax Assessment for a period are complete and no further changes are required in the data for that period. Here, enter 31st December 2009.
- ❑ **Allow to Connect Company:** If this option is set to Yes, the user classified under this security level can connect to a Company with a valid Tally.NET subscription.

- **Use Tally.NET Authentication:** If this option is set to Yes, the user classified under this security level can login remotely with Tally.NET User capabilities.
- **Use Tally.NET Auditor Authentication:** If this option is set to Yes, the auditor can access the client's data remotely and perform an audit. However, a user not having the auditor's license will not be able to perform an audit by setting this option to Yes.

The **Security Levels Definition** screen is displayed as shown below:

| Security Levels                                                                                                                                                                                                                                                                                                              |  | National Traders                                                              |  |

Figure 13.10 Security level Definition screen with Allow and Disallow Facilities

- Once the above details are entered, the screen is divided into two broad columns having two sub – columns. The left side is to disallow access to the various options of the systems. The right side allows the security level, different facilities.
- The sub-columns are **Types of Access** and the **List of Reports** under both **Allow** and **Disallow** facilities **Enter** the type of access you wish to give and the option to be controlled. Once the entry is completed select **End of List** from the **Type of Access** field to complete the allocation.
- Press **Enter** after specifying the cut-off date as 31-Dec-2009 under **Disallow the following Features**
- Select **Full Access** (from the **Type of Access** list):
- Select the **Balance Sheet** from the List of Reports as per this screen:

| Security Levels                                                      |                      | National Traders          |  |

Figure 13.12 Security Levels screen

Once you accept the above settings you are taken back to the **Security Levels for Company** screen. The cursor rests at the blank field following the recently created one. Follow the same procedure if you require to create another Security level else accept and return from this screen to the Security Control Menu.

### 13.2.3 Users and Passwords

A Security level called Manager uses the basic facilities of the Owner. To set up a user name and password for this level, press **Enter** on Users and Passwords in the Security Control Menu.

#### Create Users and Passwords

Go to **Gateway of Tally > F3: Company Info > Security Control > Select Users and Passwords**

- Tally.ERP 9 prompts you to select the Security Level, Select **Manager** and the screen appears as shown below:

| List of Users for Company     |                                                                                                                                                                             |                   |                     |                 |               |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|---------------------|-----------------|---------------|
| Name: <b>National Traders</b> |                                                                                                                                                                             |                   |                     |                 |               |
| Security Level                | Security List                                                                                                                                                               | Password (if any) | Allow Remote Access | Allow Local TDL | Mobile Number |
|                               | <ul style="list-style-type: none"> <li>End of List</li> <li>Data Entry</li> <li><b>Manager</b></li> <li>Owner</li> <li>Tally.NET Auditor</li> <li>Tally.NET User</li> </ul> |                   |                     |                 |               |

Figure 13.13 List of Users for Company screen

- Enter **Manager** for both the **Name of User** and **Password**.
- By default **Allow Remote Access** and **Allow Local TDL** is set to **No**.

- Enter the user's mobile number in **Mobile Number** field

| List of Users for Company     |                |                   |                     |                 |               |
|-------------------------------|----------------|-------------------|---------------------|-----------------|---------------|
| Name: <b>National Traders</b> |                |                   |                     |                 |               |
| Security Level                | Name of User   | Password (if any) | Allow Remote Access | Allow Local TDL | Mobile Number |
| <b>Manager</b>                | <b>Manager</b> | *****             | <b>No</b>           | <b>No</b>       | 9827159963    |

**Accept ?**  
 Yes or No

Figure 13.14 Users and Password screen

- **Accept** this and return to the Gateway of Tally.

You would need to create different users who belong to one or more different Security Levels or Types of security. Select the option at the Security Control menu to define users, give their passwords and their security levels.

Only the **Administrator** can assign users and their passwords.

### 13.2.4 Alter/ Display a User / Type of Security

There is no separate menu option to alter or display the security options. Use the same menu to display or alter user or security level set-up. To delete a user, simply blank out the user name by pressing Esc/ Spacebar and accept the screen. Do the same for the security level. A user defined under a security level cannot be deleted without deleting the users under it.

### 13.2.5 Loading a Company with a User name

#### Security Level

The Manager Security Level is set by using **Admin** as the user name and password. A password is assigned at this level.

Let us shut **National Traders** and re-select it with the **Manager** user name and password.

Figure 13.15 Gateway of Tally screen

Notice that the report Balance Sheet is not appearing in the menu. This is because the access was denied while defining the security level. Practice this by disallowing other reports and make your observations.

## 13.3 Tally Audit

Tally.ERP 9 Audit allows the Administrator/ Auditor to track changes in the accounts made subsequent to the earlier review. Changes in two areas are important i.e in the transactions or vouchers and in the ledger masters. Only changes that affect the integrity of a transaction are considered.

Tally.ERP 9 Audit feature is enabled while creating a Company. This option is activated only when the user-levels are defined. In this case, it was already enabled when the Security Control feature was activated and given a user name and password.

### 13.3.1 Using Tally Audit Feature

1. Ensure that you have loaded **National Traders** with Admin as the user name and password. Now, to view the Tally.ERP 9 Audit Lists Go to **Gateway of the Tally > Display > Statements of Accounts > Tally Audit**.

The menu is displayed as shown below:

Figure 13.16 Tally Audit Menu

- ❑ You can audit both ledgers and vouchers.
- ❑ Change the period of the report from **1-Apr-2009** to **31-Mar-2010**.
- ❑ Click on **F12: Configure** and enter **Yes** to **Show Entered/Altered By**.

The listing now incorporates the user's name as shown below :

| Tally Audit Listing           |                               | National Traders |         | Ctrl + M                  |               |
|-------------------------------|-------------------------------|------------------|---------|---------------------------|---------------|
| List of New/Modified Vouchers |                               |                  |         | 1-Apr-2009 to 31-Mar-2010 |               |

Figure 13.17 Tally Audit Listing screen

Only a portion of the actual report has been displayed for your reference. Since the password feature was not activated when these entries were made, the field **Entered By** appears as **Unknown**.

- Place the cursor on the relevant voucher, click on **F7: Accept One** to accept the voucher as valid and remove it from the list.
- Click on **F7: Accept All** option, If you are satisfied that all the vouchers are valid.
- To view the **Ledger Audit list**, select **Ledger** from the **Tally Audit**.

A screen showing the Id, Ledger Names and the Opening Balance is displayed as shown below:

Figure 13.18 Tally Audit Ledgers screen

Make changes to any two Ledger Accounts these will be shown in the list of new or altered Ledger Accounts. Notice that their Id does not change. Hence it is useful to track them. The user who changed the accounts and when it was done, can be identified. Once you are satisfied with the changes made in the ledger click on **F7: Accept One** or **F7: Accept All**. This would accept the ledger as valid and it will be removed from the list.

## 13.4 Backup and Restore

### 13.4.1 Backup

Tally.ERP 9 has a flexible backup mechanism where in you can virtually take a backup of the data from one storage medium to another. The more commonly used mechanisms are floppy drive, hard disk drive, zip drive, tape drive etc. installed either locally or on a network. In the backup screen, the source and destination of the backup is entered. Tally.ERP 9 will do as required.

- From the **Company Info** screen, select the **Backup** option and the screen appears as shown below:

| Backup Companies on Disk                                                                                                                                                      |  | National Traders                                                       |  | List of Companies                                                                                          |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|------------------------------------------------------------------------|--|------------------------------------------------------------------------------------------------------------|--|

Figure 13.19 Tally.ERP 9 Company Backup screen

- ❑ Specify the source (where Tally.ERP 9 has to take the data from).
- ❑ Specify the destination (where you want Tally.ERP 9 to store the data backup).
- ❑ Tally.ERP 9 then displays the list of companies created – select one.

### Backup Precautions

As we are already aware, data on a computer is vulnerable to data loss. It is therefore important that we do not overlook the importance of taking a regular backup of data, however strong the database may be. The maintenance of important data can be made continuous and hassle-free with a little planning and forethought.

Depending on the volume of data entry, an appropriate backup mechanism is devised. This can be done by maintaining a backup directory in the local hard disk or server. External storage media such as floppy disks and zip diskettes can also be used. We can have sub-directories for every day of the week under the main backup directory. Regularly data backups, depending on the day of the week can be taken in the following manner:

Monday – C:\TallyBackup\Monday

Tuesday – C:\TallyBackup\Tuesday

Wednesday– C:\TallyBackup\Wednesday and so on till Saturday

- ❑ The Backup option is available only on the **Company Information** screen.
- ❑ In the example, we have used the C drive path, this does not mean that the Tally.ERP 9 backup facility is limited to the Hard Disk drive alone.

The above procedure ensures that there exists a reliable data backup at any given time. The **Restore** option is used to bring back data from the data backup.

### 13.4.2 Restore

Restore literally means 'to bring back'. Tally.ERP 9 allows the restoration of data from one medium to another. In Tally.ERP 9's context, restore means we have a Tally.ERP 9 backup and we want to work on the data backup instead of the current data. This can be done from the Company Info screen by selecting the Restore field.

The **Select Companies to Restore** screen appears as shown below:

| Restore Companies on Disk                                                                                                                                               |                                | National Traders                       |        | List of Companies <span>Ctrl + M</span> |         |                                  |  |                                                                                                                                                                                         |  |             |  |                   |                                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|----------------------------------------|--------|-----------------------------------------|---------|----------------------------------|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-------------|--|-------------------|--------------------------------|

| National Traders                                                                                                                                                        | (10028)                        |                                        |        |                                         |         |                                  |  |                                                                                                                                                                                         |  |             |  |                   |                                |
| End of List                                                                                                                                                             |                                |                                        |        |                                         |         |                                  |  |                                                                                                                                                                                         |  |             |  |                   |                                |
| Indus Enterprises                                                                                                                                                       | (10029) 17-Sep-2009 (03:31 pm) |                                        |        |                                         |         |                                  |  |                                                                                                                                                                                         |  |             |  |                   |                                |

Figure 13.20 Tally.ERP 9 Company Restoration screen

- ❑ You have to specify the destination (where Tally.ERP 9 has to store the data backup).
- ❑ Then specify the source (where you want Tally.ERP 9 to take the data from).
- ❑ Tally.ERP 9 then displays the list of companies you have in the source. Select the required companies to be restored as desired.

#### Restore Precautions

*It is preferable not to restore a backup on the original data directory primarily to ensure that no data is unintentionally overwritten.*

*The **Restore** option is also available only on the **Company Information** screen.*

### 13.5 Split Company Data

Tally.ERP 9's flexible period-less accounting permits entry of data for any number of years. This in itself has tremendous benefits. However, presence of old data in cases where they are voluminous, causes greater overhead on the system. Splitting financial years enables you to retain most benefits while overcoming this overhead.

On splitting the data, two things happen:

- ❑ New companies are created for the respective split periods.
- ❑ The full data is retained in the original company.

### Important Pre-split Activity

- ❑ Before you split data, ensure that:
  - ❑ All the unadjusted forex-gains/ losses have been fully adjusted by journal entries. Verify that the item does not appear in the Balance Sheet.
  - ❑ There are no pending Purchase Bills/ Sales Bills. Check the Profit & Loss Account and Inventory Statements for the pending Purchase/ Sales Bills. These bills can be accounted for in the respective party accounts or in the 'Bills Pending' Account.
  - ❑ Ensure that a backup of the data exists.

### To Split Company Data,

- ❑ Load **National Traders** with the Admin user name and password.
- ❑ At the **Gateway of Tally.ERP 9 > Select Alt+F3: Cmp Info.**
- ❑ Press **Enter** on Split Company Data.
- ❑ Tally.ERP 9 prompts you to re-select the company name, select National Traders and the screen appears as shown below:

| National Traders                                                                |                                          |
|---------------------------------------------------------------------------------|------------------------------------------|
| <b>Split Company Data</b>                                                       |                                          |
| Name                                                                            | : National Traders                       |
| Split from                                                                      | : <b>1-Sep-2009</b>                      |
| <i>(this date will become the Financial Year Beginning for the new company)</i> |                                          |
| <i>(valid values: 2-Apr-2009 to 1-Apr-2010 : Recommended is 1-Sep-2009 )</i>    |                                          |
| <b>These new companies will be created and opened</b>                           |                                          |
| First Company                                                                   | : National Traders - ( From 1-Apr-2009 ) |
| Second Company                                                                  | : National Traders - ( From 1-Sep-2009 ) |

Figure 13.21 Split Company Data screen

- ❑ Since National Traders has data only for one year (April 1, 2009 to March 31, 2010).The split will take place from the mid-point (September 1, 2009).
- ❑ You can change the date given in the **Split From**.
- ❑ Press **Enter** and accept to the split. Tally.ERP 9 creates two new companies.

## 13.6 Export and Import of Data

We will now learn about Tally.ERP 9's export and import capabilities, which enables Tally.ERP 9 to interact globally. Statements and data from Tally.ERP 9 can be exported to other programs like spreadsheets and databases. Only data from Tally.ERP 9 can be imported and not data from other systems. Importing from other systems involves the usage of 'Tally.ERP 9's Definition Language' TDL and this is outside the scope of this training.

### 13.6.1 Export of Data

You might need to export information for different purposes, viz:

- To re-import data into another company run on Tally.ERP 9.
- To export data out to be used by other programs.

### 13.6.2 Exporting Masters

**Step 1:**

Go to **Gateway of Tally.ERP 9 > Display > List of Accounts > click on Export.**

- Tally.ERP 9 first asks for the export **format**. The different formats are, **ASCII**, **EXCEL**, **HTML** and **XML**. The filename extension will take the default format.

The screenshot shows a dialog box titled "Exporting List of Ledgers". It contains the following fields and options:

- Language**: Default (All Languages)
- Format**: XML (Data Interchange) (This option is highlighted in the dropdown menu)
- Export Location**: C:\Tally.ERP9\
- Output File Name**: Format
- Type of Masters**: Ledgers

The dropdown menu for Format is open, showing the following options: ASCII (Comma delimited), Excel (Spreadsheet), HTML (web-publishing), and XML (data interchange). The XML (data interchange) option is currently selected.

Figure 13.22 Exporting the List of Ledgers screen

- For example, since we have selected XML, the filename displayed will be **Master.xml**

| Exporting List of Ledgers |                           |
|---------------------------|---------------------------|
| Language                  | : Default (All Languages) |
| Format                    | : XML (Data Interchange)  |
| Export Location           | : C:\Tally.ERP9           |
| Output File Name          | : Master.xml              |
| Type of Masters           | : <b>All Masters</b>      |

**Type of Masters**  
 All Acctg. Masters  
 All Inventory Masters  
**All Masters**  
 All Statutory Masters  
 Budgets & Scenarios  
 Cost Categories  
 Cost Centres  
 Currencies  
 Godowns  
 Groups  
 Ledgers  
 Serial Numbers  
 Stock Categories  
 Stock Groups  
 Stock Items  
 Tariff Classifications  
 Units  
 Voucher Types

Figure 13.23 Exporting List of Ledgers

- **Type of Masters** – Any of the mentioned master types can be exported. Select **All Masters** and accept it to Export.

### 13.6.3 Exporting Data for Re-import into another Company

#### Step 1: Exporting Daybook

Go to **Gateway of Tally > Multi Account Printing > Daybook > click on Export.**

| Exporting Day Book                                            |                           |
|---------------------------------------------------------------|---------------------------|
| Language                                                      | : Default (All Languages) |
| Format                                                        | : XML (Data Interchange)  |
| Export Location                                               | : C:\Tally.ERP9           |
| Output File Name                                              | : DayBook.xml             |
| Format                                                        | : Condensed               |
| Show Voucher Numbers also                                     | ? No                      |
| Show Narrations also                                          | ? No                      |
| Show Billwise Details also                                    | ? No                      |
| Show Cost Centre Details also                                 | ? No                      |
| Show Inventory Details also                                   | ? No                      |
| Select vouchers to show                                       | : All Vouchers            |
| Show Forex Transactions                                       | ? No                      |
| <div> <b>Export ?</b><br/>           Yes or No         </div> |                           |

Figure 13.24 Exporting Day Book

- ❑ Tally.ERP 9 first asks for the language. Select **Default (All Languages)**, then convert it into the export format. The different formats are: ASCII, EXCEL, HTML and XML. The filename extension will take the default format. For example: Selecting **ASCII**, results in the filename being displayed as **Daybook.txt**.
- ❑ Specify the other details as desired.
- ❑ **Accept** to export, Data exported from a company can be imported into another.

### 13.6.4 Import of Data

#### Step 1: Importing Masters

- ❑ Return to the **Gateway of Tally**.
- ❑ Shut National Traders and load **Indus Enterprises** (Ensure that it has the same financial year as the current company National Traders).
- ❑ Select **Import of Data > Masters**
- ❑ Type in the file name. The name and path of the source file should match. In this case the current directory is in use, hence you do not need to give the path.

| Import of Data                                                                                                                                                                                                               |                                        | National Traders | Behaviour <span>Ctrl + M</span>               |

| Current Period<br>1-4-2009 to 31-3-2010                                                                                                                                                                                      | Current Date<br>Wednesday, 3 Mar, 2010 |                  | Combine Opening Balances<br>Ignore Duplicates |
| List of Selected Companies                                                                                                                                                                                                   |                                        |                  | <b>Modify with new data</b>                   |
| Name of Company<br>National Traders                                                                                                                                                                                          | Date of Last Entry<br>3-Mar-2010       |                  |                                               |
| <div> <div>Import of Masters</div> <div>(Only Tally (XML) Format is Supported)</div> <div> Import File Name (XML) : <b>Master.xml</b><br/> Treatment of entries already existing : <b>Modify with New Data</b> </div> </div> |                                        |                  |                                               |

Figure 13.25 Import of Masters screen

The opening balance can be modified from the exported source file. Carefully select, **Modify with new data**.

*Data can be imported from the previous version, provided the Import filename is in the XML format, since Tally.ERP 9 supports only the XML format.*

- ❑ Verify that the import is completed successfully.

## Step 2: Importing Vouchers

- ❑ Return to the Gateway of Tally.
- ❑ Select **Import of Data > Vouchers**.
- ❑ Give the filename **Daybook.xml**.
- ❑ Check the statistics after import.

### 13.6.5 Export to Excel

Tally.ERP 9 now comes with the functionality, wherein all reports can be exported to Microsoft Excel spreadsheet. This feature enables you to export any report generated by Tally.ERP 9 into Excel.

To export the Trial Balance,

Go to **Gateway of Tally > Display > Trial Balance**

- ❑ Click on **Export**.

Figure 13.28 Report in Excel Imported from Tally.ERP 9

## 13.7 ODBC Connectivity

ODBC is expanded as Open database Connectivity and is used to merge the imported data with the existing data. In short, Tally.ERP 9 uses ODBC to exchange data.

Tally.ERP 9 ODBC extracts data from Tally.ERP 9 and submits the reports in MS Excel format.

A brief exercise will explain the process. We wish to send greeting cards to all our customers. The customer (local debtors) database exists in Tally.ERP 9. These names and addresses can be printed out on MS Excel.

*Ensure that **MS-Query** is installed on the computer in which you will be installing Tally.ERP 9. This enables ODBC as soon as Tally.ERP 9 is installed.*

The **steps** to be followed are:

- ❑ Start Tally.ERP 9 and select **National Traders**
- ❑ Ensure that the words **ODBC Server** is visible in the **Information Panel** under **Configuration** section of Tally.ERP 9 screen.
- ❑ Ensure that Tally.ERP 9 is running and is minimized
- ❑ Start **MS Excel** > click on **Data > Import External Data > New Database Query** from the menu.
- ❑ Select **TallyODBC** (Example: TallyODBC 9000\*) from the **Choose Data Source** dialog box.
- ❑ The screen appears as shown below:

Figure 13.29 Choose Data Source screen

- ❑ Let the option **Use the Query Wizard to create/edit queries** remain checked.
- ❑ The Query Wizard displays the Tally.ERP 9 fields that are selected. You can also give filter conditions to limit the data to only those that match your criteria

Figure 13.30 Query Wizard — Choose Columns screen

- Select the ledger and move it by clicking the > button to the right of the following fields:
  - \$Name, \$Parent, \$Address (move all the other address fields as well.)
- Click on **Next**.

Figure 13.31 Query Wizard — Choose Columns screen

- Then in the next Query Wizard Screen, filter the data to limit all ledger accounts belonging to the group that contains the name **Sundry Debtors**. We want to print the List of Sundry Debtors only.

Figure 13.32 Query wizard — Filter Data

- Click **Next**, If any sorting is required select the sorting

Figure 13.33 Query wizard — Sort Data

- Select **Return Data to Microsoft Excel** from the last window of the Query Wizard and click on **Finish**. Then the process in the domain of MS-Excel is complete.

Figure 13.34 Query wizard — Finish

- Click **OK** in the **Import Data** window to import the data to Excel

Figure 13.35 Import Data in Excel

## 13.8 Web Enabled, Print Preview and Online Help

Tally.ERP 9 is web enabled, has a Print Preview facility and online help.

### 13.8.1 Web Enabled

Email and Internet Publishing are the Web enabled features available in Tally.ERP 9. This facility of Tally.ERP 9 reduces the paper work. Reports, Reminder letters, Statement of Accounts, Invoices and Purchase Orders can be e-mailed directly from Tally.ERP 9. Thus, the user does not have to send printed invoice or purchase orders. This feature helps you to save on postage and valuable time.

## E-mailing Customer's Outstanding Statement

Select a customer's Outstandings Statement from the following path:

Go to **Gateway of Tally > Display > Statements of Accounts > Outstandings > Ledger >** click the **E-mail** button.

The **Mailing Ledger Outstanding** screen appears as shown below :

| Mailing Ledger Outstanding                                                                                                                                                                                                                                                                                                                        |                                                 |

Figure 13.36 Mailing Ledger Outstanding screen

There are various options that are automatically filled in provided the information had been supplied in the master records. Check if the details are all right. Select **Yes**, If they are, and if not select **No** to change the options. The cursor first goes to the **To E-mail address** field as it saves time by skipping standard information. However, to change the standard information, use a backspace and retype.

The fields that appear in the **Mailing Outstanding Ledger** screen is briefed below:

- **E-mail Server:** Give the name of your E-mail SMTP server, e.g. mail.btinternet.com. It should be a valid and compatible SMTP server to send your mail. Ask your Internet Service Provider or network administrator for help, if required. This information is entered only once and thereafter use it by default.
- **From:** Your Company name is picked up from the Company Information Master records.
- **From E-Mail Address:** Your own e-mail address. Tally.ERP 9 picks up the address given in the Company Information master data. Fill this option, if it does not exist.

- **Format:** There are three formats available:
  - **ASCII (Comma delimited):** This is plain text format where data is separated by commas. This format does not have any special formatting or fonts. This is the most common e-mail format are compatible with all mail programs. ASCII data can be easily worked upon by other programs.
  - **HTML (Web-publishing):** Reports are attractive and retain their formatting and fonts. They can be read by an HTML enabled mail program. It can also be read by using a browser like the Microsoft Internet Explorer.
  - **XML (data interchange):** Stands for Extensible Mark-up Language, it is an extension of HTML but the data is capable of being imported by other XML compatible systems. Using XML, Tally enables you to exchange information even with non-Tally systems. An XML output will have an XML envelope and is formatted with XML tags to enable import into other systems. Therefore, Your Tally invoice in XML format can be imported by another system without difficulty reducing data entry time and errors. This language is fast emerging as the de-facto standard for information exchange all over the world and with it Tally gives you the means to collaborate with others and share information like never before.

Select the one required by your recipient. An explanation on each format is given below:

- **Resolution:** This is required only in the case of HTML formats and refers to the resolution of graphic images in terms of pixels. This is a feature that is used to format a report since it affects the quality of output. Higher resolutions are generally recommended to obtain clear prints. Tally recommends a standard pixel resolution size of 1024x768.
- **To E-Mail Address (Mandatory field):** This is for the recipient's e-mail address. A valid e-mail address is required.
- **CC: (if any):** For sending the same mail to another recipient.
- **Subject:** This is pre-filled for you. This can be changed to any other subject, according to your requirements.
- **Additional Text:** The text in this will appear as the first lines in the message body of the recipient's mail program. The other options are the same as in Print option and are self-explanatory.

### 13.8.2 Internet Publishing

Tally.ERP 9 makes commercial use of your web space by uploading reports and documents on the website. For this purpose, it creates reports in the web-language HTML, that is directly put on the website. You can use this feature to inform customers of the latest business offers. The data used for transmission is encrypted.

### 13.8.3 Upload

Any report, statement or data can be published on the internet. Publishing is carried out by uploading the report to an Internet Server that has been configured to accept files in specific protocols. A Site is basically a specific directory space allotted on that server. Protocols are sets of rules and specifications on how data and files are transferred over a network. It covers all aspects of communication between computers including the content, its formatting and error control.

For example: You want to publish your **Price List** on your Website. Select the Price List from Inventory Information. Click the Upload button. The first time you upload, fill up the dialogue box with the information required. Select **No** initially, in the upload window to edit information on the screen.

|                    |                                |                              |
|--------------------|--------------------------------|------------------------------|
| Upload to          | : <b>Web Page (HTTP/HTTPS)</b> | Upload to                    |
| URL                | :                              | FTP Site                     |
| Secure Server      | ? No                           | <b>Web Page (HTTP/HTTPS)</b> |
| User Name (if any) | :                              |                              |
| Password (if any)  | :                              |                              |
| Format             | : XML (Data Interchange)       |                              |

Figure 13.37 Upload screen

The fields that appear in the **Upload screen** are briefed below:

- **Upload to FTP Site:** FTP or File Transfer Protocol, is the most common choice of transferring data or files of any type to an Internet site. An FTP site is a directory space in a server that accepts FTP connections called the FTP Server. If you know that your server is set up for HTTP/HTTPS, then use this option, else choose FTP.
- **Upload to Web Page – HTTP/HTTPS:** HTTP - short for Hyper Text Transfer Protocol is a standard for the transfer of HTML files over the internet. HTTP Servers are pre-programmed to accept HTTP connections. HTTPS sites are Servers that are configured to accept secure connections. They conform to standard security protocols (e.g. SSL and SET) to ensure that your data and files are not tampered.

- **URL:** Stands for Universal Resource Locator, identifies the server address where you want your report to be published. In order to use FTP you will need to know the FTP server name and directory path. The FTP server name is the domain name of the Web server to which you are publishing (for example, ftp.server.com). The directory path is the folder on the server where your web page is stored (for example, /public\_html). For a web page, an URL will typically be in the form www.myweb.com/public\_html.
- **Secure Server:** In order to upload a Web Page a secure connection is required. Select **Yes**, in this option if you think your data is sensitive. A secure site is one that has an 's' prefixed with http. You will know it is a secure site when you see in your browser URL like: <https://www.mybank.com/myaccount/stats.htm>.
- **User Name and Password:** The Internet server would require an Id proof before allowing you to upload data and files on site. Contact your Internet service provider if you have forgotten your user name, password or FTP location.
- **File Name:** A file name is given to an FTP Site to where the content is uploaded. Accept it as it is or modify it, if necessary.
- **Format:** There are four formats that have already been explained earlier under the e-mail section.

#### 13.8.4 Print Preview

Tally.ERP 9, provides you with the facility to check report formats and layouts, before the actual printing takes place. The same can also be e-mailed.

For example, to see the print preview of the Trial Balance.

Go to **Gateway of Tally > Display > Trial Balance >** Click on **Print** and click on the button **With Preview**.

The screen now appears as shown below:

---

| National Traders<br>No 24, Phase 1,<br>Peenya Industrial Area<br>Bangalore |                     |                     |
|----------------------------------------------------------------------------|---------------------|---------------------|
| Trial Balance<br>1-Apr-2009 to 31-Mar-2010                                 |                     |                     |
|                                                                            | Page 1              |                     |
|                                                                            | Closing Balance     |                     |
|                                                                            | Debit               | Credit              |

| Loans (Liability)                                                          |                     | 53,033.33           |
| Current Liabilities                                                        |                     | 14,46,450.50        |
| Fixed Assets                                                               | 1,00,000.00         | 12,500.00           |
| Current Assets                                                             | 44,78,232.20        |                     |
| Sales Accounts                                                             |                     | 42,13,647.50        |
| Purchase Accounts                                                          | 14,27,875.00        |                     |
| Direct Incomes                                                             |                     | 1,000.00            |
| Direct Expenses                                                            | 1,370.00            |                     |
| Indirect Incomes                                                           |                     | 5,439.70            |
| Indirect Expenses                                                          | 10,663.83           | 4,000.00            |
| Profit & Loss A/c                                                          |                     | 32,070.00           |
| <b>Grand Total</b>                                                         | <b>60,18,141.03</b> | <b>60,18,141.03</b> |

Figure 13.38 Print Preview of Trial Balance

The button **With Preview** toggles with **No Preview** and the last saved setting is retained.

### 13.8.5 Local / Online Help

This is a Local help system, which displays the help screen relevant to the topic, by just clicking on the help button provided in Tally.ERP 9.

For example: For information on Cash Flow or Funds Flows, press Alt+H.

Go the **Gateway of Tally** >select **Display** > **Cash/Funds Flow** >**Cash Flow** and click on the Help button (or use Alt + H) and the following screen appears:

| Help Options              |              | Help Options |             |
|---------------------------|--------------|--------------|-------------|
| Search in                 | : Local Help | Local Help   | Online Help |
| ( Press enter to search ) |              |              |             |

Figure 13.39 Help Options screen

- Select **Local Help** to access the relevant topics in the Tally.ERP 9 Reference Manual.

The screenshot shows the Tally.ERP 9 Online Help screen. The main window displays the 'Cash Flow' report for 'National Traders' for the period '1-Apr-2009 to 3-Mar-2010'. The report is structured as follows:

| Particulars | Cash Movement |         | Nett Flow    |
|-------------|---------------|---------|--------------|
|             | Inflow        | Outflow |              |
|             |               |         | 3,750.00     |
|             |               |         | 7,500.00     |
|             |               |         | (-)14,288.93 |
|             |               |         | (-)1,905.00  |
|             |               |         | 35,975.00    |
|             |               |         | (-)900.00    |
|             |               |         | 30,131.07    |

The left pane shows the 'Tally.ERP 9 Reference Manual' with a tree view of reports. The right pane displays the 'Cash Flow in Tally.ERP 9' section, which includes instructions on how to view the Cash Flow report and a sample report for 'ABC Company' for the period '1-Apr-2008 to 30-Sep-2008'.

To view **Cash Flow**:

- Go to **Gateway of Tally > Display > Cash/Funds Flow > Cash Flow**
- Press **ALT+F2**, change the period - From: 1-4-2008 to 30-9-2008.

The **Cash flow statement** is displayed as shown:

| Particulars        | Cash Movement       |                     | Nett Flow           |
|--------------------|---------------------|---------------------|---------------------|
|                    | Inflow              | Outflow             |                     |
| April              | 8,79,000.00         | 7,02,625.00         | 1,76,375.00         |
| May                | 12,00,000.00        | 73,050.00           | 11,26,950.00        |
| June               | 4,95,000.00         | 30,300.00           | 4,64,700.00         |
| July               | 15,00,000.00        | 13,59,100.00        | 1,40,900.00         |
| August             | 46,250.00           |                     | 46,250.00           |
| September          |                     |                     |                     |
| <b>Grand Total</b> | <b>41,20,250.00</b> | <b>21,65,075.00</b> | <b>19,55,175.00</b> |

Figure 13.40 Online Help screen

The Tally.ERP 9 Reference Manual, displays the content for the particular screen. This facility is available on all screens in Tally.ERP 9.

## 13.9 Printing of Reports and Cheques

In this chapter, we will examine the different issues involved in printing a desired report quickly and easily.

There are two types of printing:

- Display and Print.
- Multi-Account Printing menu.

Both will yield the same output. The display and print method is more flexible where you can see on screen the details required. However, the Multi-Account prints without an on-screen display.

### 13.9.1 Display and Print

You can obtain a printed version of the screen currently being displayed by selecting **Print** from the button bar menu. This brings up the *Print Configuration* screen for the report, which asks

**Print? Yes or No.** The report will be printed using the options specified on the screen on selecting **Yes**. However, the options before printing can be changed by selecting **No**, if required.

There are two types of print configuration options. They are **Common Printing Options** and **Dynamic– Report Specific Options**.

#### **Common printing options**

Common printing options affect the printing of all reports and are changed by selecting the appropriate button which are explained below as follows:

- ❑ **Print Language:** Reports can be printed in the language supported by Tally.ERP 9.
- ❑ **With Preview:** To view the report in print preview mode before actual printing.
- ❑ **Titling:** To change the title of the report.
- ❑ **Page Nos.:** To specify the page number range.
- ❑ **Pre - Printed / Plain Paper:** Toggle to make the selection.
- ❑ **Print Format:** A pop-up list displays the printing formats available in Tally.ERP 9. The formats provided are, Dot-Matrix Format, Neat Format and Quick (Draft) Format.
- ❑ **With Colour:** This option is only relevant if you have a colour printer.
- ❑ **Copies:** To specify the number of pages to be printed.
- ❑ **Printer:** To change the printer. This also displays the default paper size that you have set for the printer.

#### **Dynamic - Report specific options**

Options specific to a report, are displayed in a sub-screen when you select to print it. You are permitted to change various options before you finally print. Tally.ERP 9 supports printing of reports in various languages.

Notice the Standard Options in the button bar on the right hand side. The specific options for printing the Balance Sheet appears in the sub-screen.

| Printing Balance Sheet                       |                        |                   |                                                                      |
|----------------------------------------------|------------------------|-------------------|----------------------------------------------------------------------|
| <b>Printer</b>                               | : RnD Printer (Ne01:)  | <b>Paper Type</b> | : A4                                                                 |

Figure 13.41 Printing Balance Sheet

### 13.9.2 Print Format

Print Format is a button which appears on the Print screen (after pressing Alt+P or click on the Print button). By clicking on the Print Format button,

Tally.ERP 9 displays a list of Print Formats as follows:

| Print Mode                    | Print Mode        |
|-------------------------------|-------------------|
| Print Mode : <b>Neat Mode</b> | Dot Matrix Format |
|                               | <b>Neat Mode</b>  |
|                               | Quick / Draft     |

Figure 13.42 Print Mode — Neat Mode

**Neat Mode** and **Quick/Draft Mode** print formats are compatible with most of the printer drivers installed on the Windows Operating System. Dot Matrix Format in Tally.ERP 9 is a special print format which allows you to print Tally.ERP 9 reports in text format using the Blazing speed of Dot Matrix printers.

In today's hi-technology software environment, most GUI-based softwares do not provide Dot Matrix printing capabilities. On the selection of a Dot- Matrix Format, the screen appears as shown below :

Figure 13.43 Print Mode — Epson

The Epson printer drivers have been defined by default. You may install Epson Printer drivers in Windows for any Dot Matrix printer and use this format for faster report printing.

*Any Dot Matrix printer may be used, but ONLY the Epson printer drivers (LQ and FX series) should be used for the Dot Matrix Format printing of Tally.ERP 9.*

### 13.9.3 Multi-Account Printing

#### Gateway of Tally > Multi-Account Printing

Principally geared towards printing all the Primary Books of Accounts, like the Cash and Bank Books, Account Ledgers, Sales and Purchase Registers etc. can be printed as: **One Account at a time**, **All Accounts**, or **All Accounts in a selected Group**. Before printing, the date range and other selections may also be set up.

The current mechanism of printing used by Tally.ERP 9, require that for large company accounts, choose each ledger account is printed on separate pages.

### 13.9.4 Draft Mode Printing (Quick Format)

Almost every report except for cheques can be printed in a Draft Mode. In Tally.ERP 9, the Neat print format functions by default. However, this may be altered by pressing **Alt+F** just before printing. All subsequent reports will be printed in Quick Format, until **Alt+F** is pressed again. (The button equivalent for this is marked Quick Format).

Draft mode brings in additional restrictions in the printing, which you will quickly learn by experimentation. After selecting the Draft mode or Quick Format, click on Alt+S – to select the option **Print to a File**. Specify the name of the File to output the data and select the Printer whose dimensions are to be used.

### 13.9.5 Cheque Printing

A Cheque is a written order to the bank to pay the stated sum of money. Cheques are usually handwritten. In order to automate the entire cheque printing process, Tally.ERP 9 allows cheques

to be printed directly. Cheques are printed only when printing a Payment Voucher. Since the cheque formats differ from bank to bank, Tally.ERP 9 facilitates cheque printing according to user defined cheque dimensions.

Let us activate the Cheque Printing capability in the **F11: Features (Accounting Feature)**.

### Activating Cheque Printing

- ❑ Ensure that you are on the Gateway of Tally of **Indus Enterprises** (shut National Traders)
- ❑ Create a ledger namely > **Canara Bank** under the **Group Bank Accounts** (accept all other defaults) and return to the Gateway of Tally
- ❑ Click on the button **F11: Features (Accounting Features)** and set **Enable Cheque Printing** to **Yes** as shown below:

| Company: <u>Indus Enterprises</u>                    |       |                                            |              |
|------------------------------------------------------|-------|--------------------------------------------|--------------|
| <u>Accounting Features</u>                           |       |                                            |              |
| <u>General</u>                                       |       | <u>Invoicing</u>                           |              |
| Integrate Accounts and Inventory                     | ? Yes | Allow Invoicing                            | ? Yes        |
| Income/Expense Statement instead of P & L            | ? No  | Enter Purchases in Invoice Format          | ? Yes        |
| Allow Multi-Currency                                 | ? No  | Use Debit/Credit Notes                     | ? Yes        |
|                                                      |       | Use Invoice mode for Credit Notes          | ? No         |
|                                                      |       | Use Invoice mode for Debit Notes           | ? No         |
| <u>Outstandings Management</u>                       |       | <u>Budgets &amp; Scenario Management</u>   |              |
| Maintain Bill-wise Details                           | ? Yes | Maintain Budgets and Controls              | ? No         |
| (for Non-Trading A/cs also)                          | ? No  | Use Reversing Journals & Optional Vouchers | ? No         |
| Activate Interest Calculation                        | ? Yes |                                            |              |
| (use advanced parameters)                            | ? Yes |                                            |              |
| <u>Cost/Profit Centres Management</u>                |       | <u>Other Features</u>                      |              |
| Maintain Payroll                                     | ? No  | Enable Cheque Printing                     | ? Yes        |
| Maintain Cost Centres                                | ? Yes | Set/Alter Cheque Printing Configuration    | ? <b>Yes</b> |
| Use Cost Centre for Job Costing                      | ? No  | Allow Zero valued entries                  | ? No         |
| More than ONE Payroll / Cost Category                | ? No  |                                            |              |
| Use Pre-defined Cost Centre Allocations during Entry | ? Yes |                                            |              |
| Show Opening Balance for Revenue Items in Reports    | ? No  |                                            |              |
| F1: Accounts    F2: Inventory    F3: Statutory       |       |                                            |              |

Figure 13.44 F11: Accounting Features screen

- ❑ Press **Enter** after setting the feature **Set Alter Cheque Printing Configuration** to **Yes**.

Tally.ERP 9 displays the **Company Cheque Details** screen according to this screen:

| Company Cheque Details   |                                                                                                                  |
|--------------------------|------------------------------------------------------------------------------------------------------------------|
| Company Name on Cheque : |                                                                                                                  |
| Names of Banks :         | <div>Bank Accounts</div> <div>End of List</div> <div>Deposit Account</div> <div><b>State Bank of India</b></div> |

Figure 13.45 Company Cheque Details screen

- **Company Name on Cheque:** Many banks give cheques with the company name already printed on it. To print Tally.ERP 9 on the cheque beneath the signature, give the name e.g. **Indus Enterprises** to print the name, or leave the option blank if you don't want to utilise this option.
- **Name of Banks:** Press the space bar and you will get a pop-up list of the bank ledger accounts created in the company. There are two ledgers viz. the **Deposit Account** and the **State Bank of India**.
  - Select the bank for which you want to specify the user-defined cheque dimensions. Here select **State Bank of India** and press **Enter**.

You can now fill in the dimensions of the cheque in the **Cheque Printing Configuration** screen.

| Cheque Printing Configuration                           |                               |

| Salutation of 1st Signatory (if 2 signatories)          | :                             |
| Salutation of 2nd or Single Signatory                   | : <b>Authorised Signatory</b> |

Figure 13.46 Cheque Printing Configuration screen

The cheque will be printed as shown :

### For National Traders

#### Authorized Signatory

In case of a cheque with two signatories, both can be specified. Both could be the same salutation or different, e.g., one could be Director, the other could be Secretary.

Give whatever you currently use. Many banks pre-print both the company name and the salutation.

*Take the bank's cheque book and measure the dimensions of a cheque carefully in millimetres and fill the form. You may need to correct it after trying out a couple of cheques so that the positioning is accurate. The placing of the cheque in the printer also determines the printing. Trials could be made on photocopies of a cheque before using an actual cheque leaf.*

*All the fields are self-explanatory. The Salutation fields, are for signatures and naturally follow the Company name (that you might have chosen to print), e.g. Director.*

### 13.9.6 Printing Cheques

Go to **Gateway of Tally > Accounting Vouchers > F5: Payment**

- The **Cheque printing** option is available only from the Payment Voucher when the concerned Bank account (State Bank of India) is credited. Make a payment entry as shown below :

| Accounting Voucher Creation                                                                                                                                                      |             | Indus Enterprises                      |  | Ctrl + M                     |          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|----------------------------------------|--|------------------------------|----------|
| <b>Payment</b> No. 6                                                                                                                                                             |             | Cost Centre/Classes : ■ Not Applicable |  | 4-Dec-2009 Friday            |          |
| Particulars                                                                                                                                                                      |             | Debit                                  |  | Credit                       |          |

Figure 13.47 Payment Voucher

Here, after crediting the State Bank of India account, two additional fields appear. They are: Name on Cheque and Cross Cheques explained below:

- ❑ **Name on the Cheque:** On selection of the Party Account, the Name on the cheque is filled with the Party's account name. Thus, instead of the Party Account, if any other expense head is selected, the expense head will not appear as the name on the cheque.
- ❑ **Cross Cheque using:** This is filled in by the most common words used - Account payee. However, you can change it.

After accepting the voucher, Tally.ERP 9 immediately prompts you to print the cheque! Click on the button **Print Preview** and then accept the print command to view the printed cheque.

- ❑ Check the dimensions given in the F11: Features. Ensure that you have not left any field, other than the salutation fields, blank.
- ❑ Trial and error is the only way to get the printing in the right positions. Therefore do not panic if some words do not print in the correct positions. Change the set-up a couple of times to set it right. This is necessary to be able to print on the many different cheque styles used by different banks.

### Points to Remember

- ❑ Tally.ERP 9 has a customisable security control for company's data.
- ❑ Tally.ERP 9 has a flexible backup mechanism where in you can take a backup of the data and can restore the same data.
- ❑ Tally.ERP 9 Audit provides the capability to the administrator/auditor to track changes in the accounts.
- ❑ Data exported to a spreadsheet can be reorganised and used for statutory presentations.
- ❑ ODBC (Open Database Connectivity) compliance allows other programs to use data from Tally.ERP 9 directly.
- ❑ E-mail, internet publishing and web browser are the web-enabled features available in Tally.ERP 9.
- ❑ Tally.ERP 9 provides an online help system, which is context sensitive.
- ❑ TallyVault feature is an enhanced security system
- ❑ Tally.ERP 9 Print Preview facility helps you check printed report formats and layouts before actual printing takes place.
- ❑ Tally.ERP 9 allows us to print cheques directly.

## Lesson 14: Tally.NET and Remote Capabilities

### Lesson Objectives

On completion of this lesson, you will learn how to

- ❑ Configure Tally.NET Features
- ❑ Connect Company on Tally.NET
- ❑ Create and Authorise Remote Users
- ❑ Access Company data Remotely

### 14.1 Overview of Tally.NET

Tally.NET is an enabling framework which establishes a connection through which the remote user can access the Client's data without copying / transferring the data. In other words, the remote user can access the company data, provided the Company is open and connected on Tally.NET.

Using Tally.NET features, the user can create remote users (ids), authorize & authenticate them for accessing the connected (available) companies. The remote users can be mapped to a particular user and assigned security controls based upon their security levels (viz., Tax Auditor / Administrator, Standard User etc.). The remote user can further create sub-ids under him to assign tasks based on their security levels.

The user making the company available and a person accessing the data behave as clients to Tally.NET, thereby rendering a secure exchange system.

#### Tally.NET Features

Tally.NET is a default feature available in the product and provides the following host of capabilities.

- ❑ Connect companies from Tally.ERP 9
- ❑ Create and maintain Remote Users
- ❑ Synchronization of data (via Tally.NET)

- Remote access of data by authorised Remote User(s)
- Use online help and support from Tally or the browser
- Use Control Centre for centralised Account Management
- Remote availability of Auditors' Edition of Tally License

As discussed above, Tally.NET is enabled in Tally.ERP 9 but however, certain configurations are required to be setup for enabling Company data to get connected. Follow the steps given below :

1. Configuring Tally.NET features
2. Creating and Authorising Remote Users

## 14.2 Configure Tally.NET Features

To configure Tally.NET follow the steps shown:

Go to **Gateway of Tally > F11: Features > F4: Tally.NET Features**

- The **Tally.NET Features** screen appears.
- In the **Registration Details** section:
  - In the **Connect Name** field provide a specific name with which the company is displayed on **Tally.NET** servers.
  - Provide the name of the contact person in the field **Contact Person Name**.
  - Provide the Mobile/Telephone numbers of contact person in the field **Contact Number**
- The name of the contact person and the contact number are published alongwith **Company Name**, **Account ID** and **Serial Number** in the **List of Companies** screen.
- In the **Connect for Remote Access** section,
  - **Allow to Connect Company** is set to **Yes**, in case you want the company to be connected for remote access.
  - **Contact on Load** is set to **Yes**, when you want the company to be connected for remote access on loading.
  - Press **Enter** to accept.

The completed **Tally.NET Features** screen is displayed as shown:

Figure 14.1 Tally.NET Features

- **Accept** to save the Configurations

- You must set **Security Controls** to **Yes** while creating/altering a company, in order to enable **Tally.NET** in **Tally.ERP 9**.

## 14.3 Connect Company on Tally.NET

To connect the company on **Tally.NET**,

Go to **Gateway of Tally** > press **F4: Connect**.

Figure 14.2 Connected to Tally.NET

A message **Company connected successfully** is displayed in the **Calculator** panel. In the same way to disconnect a Company from Tally.NET,

Go to **Gateway of Tally**,

- Press **F4: Disconnect**

Figure 14.3 Disconnected from Tally.NET

A message **Company disconnected successfully** is displayed in the **calculator** panel.

## 14.4 Create Remote Users

**Tally.ERP 9** allows you to connect from a remote location and access your data. The Remote users are broadly classified into two security levels, namely:

- ❑ **Tally.NET User:** can access data from a remote location.
- ❑ **Tally.NET Auditor:** can audit data from a remote location, subject to using Auditor's Edition of **Tally.ERP 9**.

To create the remote users:

Go to **Gateway of Tally**

- ❑ Click **K: Control Centre** or press **Ctrl + K**.
- ❑ The **Login as Remote Tally.NET User** screen is displayed.

- Enter the required **Account ID** in the **Your E-Mail ID** field and Password in **Your Tally.NET Password** field. The password is sent by e-mail separately to the email address provided while activating **Tally.ERP 9**.

**Login As Remote Tally.NET User**

Your E-Mail ID : tallynetnormal1@tallysolutions.com

Your Tally.NET Password :

(if you have forgotten your Tally.NET Password, please press F5:Reset Password.  
A new password will be sent to your E-Mail address, and you can then login).

Figure 14.4 Login as Tally.NET User

- Press **Enter**

The **Control Centre** screen appears as shown:

**Control Centre**

Tally.NET ID : tallynetnormal1@tallysolutions.com

**M : My Tally.NET Accounts**  
... Administer your Tally.NET Accounts for Users, Licensing, and Security. You can even remove your own ID from one of them.

**J : Jobs & Recruitment (Coming soon)**  
Search for people, publish your requirements, give Online Examinations to judge whether candidates possess the required knowledge.

**S : Shop (Coming soon)**  
... buy Tally products, subscriptions and extensions from Tally marketplace.

**T : My Active Sessions**  
... In case you are logged in from more than one machine, or an earlier session was not properly 'logged out' from, you could examine and delete the sessions.

**P : My Profile**  
...some details about you, which others may find useful.

**W : My Password**  
... control your password. You are advised to change it whenever you feel that others know it, or just change it periodically to be extra safe.

Figure 14.6 List of Tally.NET Users

- ❑ Select the required **Account ID** and press **Enter**.
- ❑ The **Control Centre** for the selected **Account ID** screen appears

To view **User Management** screen, select **User Management** and press **Enter**

To create **Remote Users**, execute the following steps:

- ❑ Select **Standard User** from the list of **Security Level**.
- ❑ Enter **user@tallysolutions.com** in the **Tally.NET ID** field and press **Enter**.
- ❑ Set **Yes** to **Tally.NET User** in case you want this user to access data remotely
- ❑ Based on your requirement, select the required status from the list of **Status**.
- ❑ Similarly you can create the required **Tally.NET User**.

6 Tally.NET user(s) out of 10

Accept ?

Yes or No

Figure 14.7 User Management

- Accept to save the new **Tally.NET User** that has been created

- The company's system administrator should authorise the **Tally.NET User ID** and connect to **Tally.NET** and allow remote access.
- A brief write-up about each feature of the **Control Centre** is discussed under the section **Features of the Control Centre**

## 14.5 Authorise Remote Users

Once the Company is registered and connected, the system administrator can authorise users created under **Tally.NET User** security level to access by logging in from a remote location. To authorise the remote users to login follow the steps shown:

### Authorise Remote User

Go to **Gateway of Tally** > Press **Alt + F3**

- The **Company Info.** menu appears
- Select **Security Control > Users and Password**

The **List of Users for Companies** screen is displayed as shown.

| List of Users for Company |                                                                                                    |                   |                     |                 |               |
|---------------------------|----------------------------------------------------------------------------------------------------|-------------------|---------------------|-----------------|---------------|
| Name: Alfa Associates     |                                                                                                    |                   |                     |                 |               |

 Yes or No

Figure 14.9 Creation of Users

- Accept to **Authorise the Tally.NET User**.

## 14.6 Remote Access

**Tally.ERP 9** provides remote capabilities to access the data from anywhere. The account administrator can create user id's, authorise and authenticate them to access data remotely.

The Remote users created under the security level **Tally.NET Auditor** or **Tally.NET User** can login, audit and access data from a remote location using another instance of **Tally.ERP 9** running in Licensed or Educational mode.

The data is transferred between the remote location and the server is transferred using a secured mechanism called encryption.

### 14.6.1 Login as Remote User

- Start **Tally.ERP 9** at the remote location

In the **Company Info** screen

- Select **Login as Remote User** or
- Select **Login as Remote Tally.NET User** in the **Startup** screen.

Figure 14.10 Login as Remote Tally.NET User

- Press **Enter**, the **Login As Remote Tally.NET User** screen is displayed.
  - Enter your email address in the **Your Email ID** field.
  - Enter the password in **Your Tally.NET Password** and Press **Enter**.
- The **Select Remote Company** screen is displayed, showing the list of remote companies accessible by the remote user.

| List of Remote Companies |                                |               |                |                | Ctrl + M |
|--------------------------|--------------------------------|---------------|----------------|----------------|----------|
| Current Period           |                                | Current Date  |                |                |          |

### Points to Remember

- ▣ Tally.NET allows to access Company data Remotely

## Lesson 15: Application Management and Controls

### Lesson Objectives

On completion of this lesson, you will learn how to

- ❑ Access Control Centre
- ❑ Manage Accounts using Control Centre

### 15.1 Concept of Control Centre

**Tally.ERP 9** provides a powerful feature named **Control Centre** to its users, which works as an interface between the user and Tally.ERP 9 installed at different sites, it enables the user to centrally configure and administer Site/User belonging to an account.

#### 15.1.1 Features of Control Centre

The Control Centre encompasses the following features

- ❑ Manage Licenses
- ❑ Central Configuration
- ❑ Manage Users
- ❑ Manage Company Profile

- ❑ Shop (Coming Soon)

#### 15.1.2 Advantages of Control Centre

With the help of Control Centre, you will be able to

- Create users with predefined Security levels
- Centrally Configure & manage your Tally.ERP 9
- Surrender, Confirm or Reject activation of a Site
- Maintain Account related information
- Manage Licenses and Activity History

### **Create users with predefined Security levels**

Using the Control Centre feature, the Account Administrator can create users and map them to a predefined security level and authorise them to access a Site/Location linked to that Account. And further the system administrator can also create Remote users and allow / disallow them to remotely access the data.

The predefined security levels in Tally.ERP 9 are:

- Owner
- Standard User
- Tally.NET User
- Tally.NET Auditor

### **Centrally Configure and manage your Tally.ERP 9**

The Control Centre provides the flexibility to make changes to product configurations in the Tally.ini (Configuration file) and apply them to immediate effect without restarting the application.

The following master configurations set can be made from the Control Centre

- Add/Modify the Tally.ini parameters
- Assign TDL's to a site or all the sites under an Account
- Permit or Deny changes to the local configurations

The master configurations set created is applied initially to the Account centrally which is inherited by the site(s) on updation of license, based on the site level permissions by the Account Administrator.

### **Surrender, Confirm or Reject activation of a Site**

The Account Administrator is authorised to surrender, confirm a site license or Reject the request received on activation from another site.

### **Maintain Account related information**

Allows you to maintain information about the organisation. Based on the requirements, the Account Administrator can merge multiple accounts into one or split an account into multiple account for easy and better management.

Before we start using Control Centre in Tally.ERP 9, it is recommended to understand the process of installation of Tally.ERP 9 as explained.

## 15.2 Installing & Activating Tally.ERP 9

Tally.ERP 9 software installation is a simple and one time activity. You can install program files on any drive (if the hard disk has partitions) or specify a directory for installation. You can also specify the location of the data directory.

### 15.2.1 Installing Tally.ERP 9

To install Tally.ERP 9:

- ❑ Insert the **Tally.ERP 9 Installation CD** in the computer's CD drive
- ❑ Select **My Computer** on Desktop
- ❑ Select **CD drive**
- ❑ Run **Install.exe** > Specify Path (for Program files and data directory)
- ❑ Click **Install**
- ❑ After Installation a message **Installation Successful** is displayed. Click **OK**.

On successful installation of Tally.ERP 9, a shortcut is placed on the desktop, a folder titled Tally.ERP 9 is created in the selected drive and all the files required to run Tally.ERP 9 are stored in this default folder.

In the same way, you can install Tally.ERP 9 Multi-User. In Multi-User installation, select the required programs (Tally.ERP 9 / License Server) to install at Server and client locations and specify other required details.

### 15.2.2 Activating Tally.ERP 9 License

On successful installation of Tally.ERP 9, the **Licensing Operations** Startup screen appears on your computer, once you start Tally.ERP 9.

#### Step 1 : Activate License

To activate license, follow the steps given below :

The **Startup** screen appears as shown:

Figure 15.1 Startup screen

- Select **Activate License**, the **Activate License** screen appears as below

Figure 15.2 Activate License

The **Activate License** has three options which allows you to activate the license based on your requirements.

1. **First time activation for your organization:** allows you to activate a single site license.
2. **Activation of an additional Site for your organization:** allows you to activate the next or consecutive site licenses for your organization.
3. **Activation of Promotional Rental License :** allows you to activate promotional rental license.
  - Select **First time activation for your organization**

- ❑ The **Activate License** Form appears, **Enter** the required **License Serial Number** in the **Serial Number** field
- ❑ Enter the required Activation Key in the **Activation Key** field
- ❑ Enter your E-Mail ID in the **E-Mail ID of Administrator** field
- ❑ Repeat the Email-ID in the **Repeat (E-Mail ID of Administrator)** field

**Activate License**

Serial Number : 730004072  
Activation Key : AHP7MCN2P

E-Mail ID of Administrator : tally1@tallysolutions.com  
Repeat (E-Mail ID of Administrator) : tally1@tallysolutions.com

*Activating your License is a simple two-step process. Once your Serial Number and Activation Key are confirmed, you will receive an E-Mail giving you some important details:*

1. Your Tally.NET Account ID (which you may later modify)
2. An Unlock License Key (which you will require to complete the Activation process)
3. Details on how to access your Tally.NET Account and use it effectively for your organization.

*Please remember that the Activation process can be completed only with the 'Unlock License Key' which is sent in the E-Mail to the Administrator. It is important, therefore, that a valid E-Mail is given.*

Figure 15.3 Activation Form

An unique account identification is created using this E-Mail Id and the license serial number is linked to this account. The **License Key**, **Password** and **Account** related information are mailed to the E-Mail Id provided in the activation form.

- ❑ Press **Enter**, Tally.ERP 9 searches for the availability of Internet Connectivity on your computer.
- ❑ If Internet Connection is Available, Tally.ERP 9 displays a message **Congratulation! Your activation Request has been processed.**
- ❑ The **Tally\_lic.lic** file is created and placed in the default **Tally.ERP 9** directory.

You can also **Activate License** in Offline Mode, if Internet Connection is not Available. To activate License in Offline Mode, generate the License File Offline and paste the license file onto the system where internet is available and Tally.ERP 9 is installed, go to the **licensing menu**, select **send External request**, the license file will be generated, copy the file and paste it where the license is to activated.

## Step 2 : Unlock License File

- ❑ Access your mail and retrieve the unlock key
- ❑ In the **Startup** screen, select **Unlock License**
- ❑ Type the **Unlock Key** in unlock field and press **Enter**
- ❑ On successfully unlocking the license file, Tally.ERP 9 displays the message **Congratulations! Your License is successfully activated.**

- Start Tally.ERP 9, the License Serial Number and Account ID are displayed under the Version and Licensing sections of the information panel respectively.

In the same way, you can **activate license** for **Multi-Site**, by selecting **Activation of an Additional Site for your Organisation** in the Activate License screen and providing **Site Name**, **Site Administrator Email ID** and other related details.

### 15.2.3 Launch Tally.ERP 9

Start **Tally.ERP 9** by choosing any one of the methods discussed earlier. On starting **Tally.ERP 9** the **Gateway of Tally** screen appears displaying the **Edition** and **Users** under **Version** block, **Serial Number** and **Account ID** under **License** block and Stat version and ODBC details in **Configuration** block of the Information panel.

Figure 15.4 Gateway of Tally

## 15.3 Logging to Control Centre

To start Control Centre follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- Press **K**: Control Centre or press **Ctrl + K**

Figure 15.5 Start Control centre

- The **Login As Remote Tally.NET User** screen appears
  - Enter the **User ID** in Your **E-Mail ID** field.
  - Enter the password emailed in **Your Tally.NET Password** field.

Figure 15.6 Start Control Centre

Based on the authentication received from **Tally.NET** you can access the **Control Centre**.

- Depending on the requirement, you can enter the **Account/Site Administrator's Id** to administer an **Account** and **Site** respectively. You can also provide the other User Id to access the support centre and access other areas of the control centre based on the permissions assigned.
- Incase, you have Forgotten the **Password**, provide the **Account/Site/ User ID** in Your **E-Mail ID** and press **F5**. The new password will be emailed to the respective **E-Mail ID**.

## 15.4 Managing Accounts using Control Centre

After logging in, the **Control Centre** screen will appear as shown :

Figure 15.7 Control centre

The **Control Centre** screen displays the options available which are briefly described below

- **My Tally.NET Account** use this option to configure, activate / deactivate sites, create users and assign security levels and manage your Account details. The My Tally.NET Account has the following sub-options:
  - **Licensing & Configuration** enables you to configure and surrender a site belonging to an account. The configuration set can be created for each site by the Account / Site administrator. Further, the Account Administrator may allow or restrain the site administrator from making any changes to the configuration set locally.

- **User Management** enables you to administer users belonging to an account by assign security levels with predefined permissions to enable remote access, assign users to a site and maintain the active users as required.
- **Profile Management** enables you to enter the essential information related to the **Account/Site ID**.
- **Change Account Admin** enables you to change the Account Administrator's ID. To change the account id, the account administrator should provide the existing account id and the new account id.
- **My Active Sessions** displays the number of active session for a logged in user. You can analyse and delete the required session in case you have logged in from more than one machine or improperly logged out or did not logout from the previous session.
- **My Profile** enables you to manage the Tally.NET User's profile by providing the required details for further communications.
- **My Password** this option enables you to change password at your convenience.

#### 15.4.1 My Tally.NET Accounts

- Select **My Tally.NET Accounts** and press **Enter**
- On selecting **My Tally.NET Accounts**, the **My Tally.NET Accounts** screen appears as shown.

My Tally.NET Accounts

Alfa Associates

Ctrl + M

My Tally.NET Accounts

Tally.NET ID : tallynetnormal1@tallysolutions.com

| S.No. | Account ID                    | Security Level | Tally.NET User | Site ID | Admin | Status |
|-------|-------------------------------|----------------|----------------|---------|-------|--------|
| 1     | tally1@tallysolutions.com     | Standard User  | Yes            | Primary | No    | Active |
| 2     | tallyberhampur@rediffmail.com | Owner          | Yes            |         | No    | Active |

Figure 15.8 My Tally.NET Accounts

The **My Tally.NET Accounts** screen displays the **User ID** against **Tally.NET ID** field, the **Account ID**, **Security Level**, permission to access **Tally.NET**, **Site ID** (for Multi Site only), permission to administer the **Account** and the account **status**. It also displays the **Account IDs** associated with your **Account**, based on your requirement you may disassociate your **Account ID**.

- ❑ *Site ID will not appear when you have a **Single Site Account**.*
  - ❑ *To disassociate from another account, select the required **Account ID** and press **Alt+D**.*
  - ❑ *The **Account/Site Administrator ID** cannot be disassociated from associated accounts.*
- ❑ Select the required Site **Account ID** and press **Enter**, the **Control Centre** of an **Account** appears

Figure 15.9 Control Centre of an Account

You can use this option to configure, activate / deactivate sites, create users and assign security levels and manage your **Account** details. The options available are briefly explained below :

- ❑ **Licensing & Configuration:** Allows you to configure and activate/ deactivate a site
- ❑ **User Management:** You can create Remote Users and assign security controls
- ❑ **Profile Management:** Maintain details related to your account
- ❑ **My Activity History:** Display the list of accounts where your ID is used
- ❑ **Change Account Admin:** Allows the Account Administrator to change the Account Administrator's User ID

## Licensing & Configuration

The Account administrator can configure and surrender a site belonging to an account. The configuration set can be created for each site by the Account/Site administrator. Further, the Account administrator can allow or restrain the site administrator from making any changes to the configuration set locally.

The **Licensing & Configuration** screen displaying the information related to each site / license serial number and the date on which the site was created.

| Licensing & Configuration                                                                      |               |                  |        |
|------------------------------------------------------------------------------------------------|---------------|------------------|--------|
| Alfa Associates                                                                                |               |                  |        |
| Ctrl + M                                                                                       |               |                  |        |
| Licensing & Configuration                                                                      |               |                  |        |
| Account ID : tallyberhampur@rediffmail.com                                                     |               |                  |        |
| S.No.                                                                                          | Serial Number | Date of Creation | Status |
| 1                                                                                              | 771063489     | 06-Jan-2006      | Active |
| Number of Site(s) = 1, Active = 1, Pending for Confirmation = 0, Not Used = 0, Surrendered = 0 |               |                  |        |
| Q: Quit                                                                                        | A: Accept     |                  |        |

Figure 15.10 Licensing & Configuration

By default, the status is **Active**, based on your requirement you can surrender the license by selecting **Surrender** from the list of Status. The license status are briefly explained for your benefit:

- **Active:** indicates that the site is in operation
- **Surrender:** indicates that the site has been surrendered

*The Licensing & Configuration screen displayed above is for **Single Site Account**. The **Site ID** will be displayed for **Multi-Account Site**.*

- The **Licensing & Configuration** screen of **Multi-Site Account** will display the information for the sites associated with the selected account :
- To view the **Site Profile**, press **Enter** on the required **Site ID**
- A brief explanation on each **Status** types for **Multi-Site Account** are given below :
  - **Active** : Is displayed when the site is in use and the account administrator has confirmed the activation of a site within the stipulated period or the site is not surrendered.
  - **Surrendered** : Is displayed when the Tally.ERP 9 license of the respective site is given up.
  - **Pending for Confirmation** : Is displayed after the activation of a site and awaits a confirmation from the account administrator.
  - **Confirm** : The account administrator selects this option to confirm the activation of a site.
  - **Reject** : The account administrator selects this option to reject the activation of a site.

### General Configuration

To create configuration set for a Site, follow the steps given below

In the **Licensing & Configuration** screen

- Click on **F6: Show Config** or press **F6**
- The **General Config** and **TDL Config** fields appear

| Licensing & Configuration                                                                      |               |                  |        |                |                         |
|------------------------------------------------------------------------------------------------|---------------|------------------|--------|----------------|-------------------------|
| Alfa Associates                                                                                |               |                  |        |                |                         |
| Licensing & Configuration                                                                      |               |                  |        |                |                         |
| Account ID : tallyberhampur@rediffmail.com                                                     |               |                  |        |                |                         |
| S.No.                                                                                          | Serial Number | Date of Creation | Status | General Config | List of General Configs |
| 1                                                                                              | 771063489     | 06-Jan-2006      | Active |                | Not Applicable          |
| Number of Site(s) = 1, Active = 1, Pending for Confirmation = 0, Not Used = 0, Surrendered = 0 |               |                  |        |                |                         |

Figure 15.11 Licensing & Configuration

- In the **General Config** field, press **Alt+C** to create configuration
  - The **General Configuration Management** screen appears
  - Enter the required configuration name in **Name of Configuration** field. The configuration parameters are saved with the configuration name provided in the account.
  - Set **Want to set client/server configuration** to **Yes** to create a fresh set of configuration.
  - In **Tally is Acting as** field, select the required behaviour from the list of **Client/Server** list. **Tally.ERP 9** will act as **Server/Client/Both/None** based on the parameter selected.
  - Set **Enable ODBC Server** to **Yes**, when you want to transfer data from any third party application to **Tally.ERP 9** or Vice Versa.
  - Enter the required port number in **Port** field.
  - Set **Can be overridden locally** to **Yes**, when you want the above parameters to changed / modified by the site administrator locally.
  - In **Disallow Request** section, specify the required Server Name/ IP Address/URL in **From** field to deny a request from the Server/IP Address/URL.
  - Similarly, specify the required **Server Name/ IP Address/URL** in **To** field to deny a request to Server/IP Address/URL
  - In **Allow Request** section, specify the required Server Name/ IP Address/URL in **From** field to allow a request from the Server/IP Address/URL.
  - Similarly, specify the required **Server Name/ IP Address/URL** in **To** field to allow a request to Server/IP Address/URL.

| General Configuration Management                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |               | Alfa Associates      |                              |

| <small>(This can be used to control Tally's access as a server and client. Tally as a server can receive request from other applications. You can specify the IPs from which Tally as a server can accept these request or reject it using 'Request From'. Similarly Tally can access other servers and you can control the same by specifying it in 'Request To'. Leaving them empty means all requests are allowed. For example you want to allow request from 202.168.100.2 or you want to specify all IPs of this network like 202.168.100.*)</small> |               |                      |                              |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                      | <b>Accept ?</b><br>Yes or No |

Figure 15.12 Licensing &amp; Configuration

- Press **Enter** to save the **General Configuration**
- Select the specified configuration package in the **General Configuration** field.

### To View/Alter General Configuration

In the **Licensing & Configuration** screen

- Click **F7: Gen Config List** or press **F7**

The **Select Item** screen appears

Figure 15.13 Licensing & Configuration

- 

Similarly, you can also create a TDL configuration pack by pressing **Alt+C** in **TDL Config** field.

In the **Control Centre** screen

- 423

- By default, the **Security Level** for the **User ID**, **Permission to access Tally.NET** and the **Status** is displayed.
- To create the required user:
  - Select the required **Security Level** from the list of Security Level

*The options which appear in the **Security Level** field are explained below :*

- **Owner:** has the capability to manage **Sites/Users** belonging to an account. The **Owner** is not permitted to change **Account/Site Admin ID**, **Site Status** and **Account Profile**.
- **Standard User:** Created with predefined permissions. All users other than the **Owner** are created under this security level.

- Enter the required E-Mail ID in the **Tally.NET ID** field. Using the E-Mail ID provided a Tally.NET ID is created and the Password is emailed.
- Set **Tally.NET User** field to **Yes** when you want the user to access data from a anywhere using **Tally.NET**.
- In the **Status** field, select the required status from list of **Status**

*The options which appear in the **Status** field are explained below :*

- **Active:** Set the status to active when you want the user to be in operational mode.
- **Deleted:** Set the status to deleted when you want the user to be removed permanently.
- **In-active:** Set the status to In-active when you want the user to be non-operational mode. You can change the status to Active as required.

6 Tally.NET user(s) out of 10

Accept ?  
Yes or No

Figure 15.14 User Management

- **Accept** to save the user created.

- Default users such as **Account Administrator** or **Site Administrator** are assigned the security levels of **Owner**. However, based on the requirements, you can change the security level.
- From the above screen, you can change the **Tally.NET ID** for any user other than **Account/Site Administrators**. However, you will not be able to change the status to **Delete** or **In-Active** for **Account/Site Administrator**.
- To change the **User ID**, type the new user id in the **Tally.NET ID** field.

The **User Management** screen also displays the number of **Tally.NET Users** created for an account. To view in **Detailed mode**,

In the **User Management** screen,

- Click **F1: Detailed** or press **Alt+F1**
- The **User Management** screen appears displaying the user details as shown

| User Management                            |                                                            | Alfa Associates                    |                | Ctrl + M  |  |

Figure 15.24 Change Password

- ❑ **Accept** to change the password.

### Points to Remember

- Control Centre allows us to manage and centrally configure Tally.ERP 9.

## Lesson 16: Online Help and Support

### Lesson Objectives

On completion of this lesson, you will learn how to

- ❑ Access Support Centre
- ❑ Use Support Centre

**Tally.ERP 9** provides a new capability to its users known as **Support Centre**, wherein a user can directly post his support queries on the functional and technical aspects of the Product. Using Support Centre feature, the user can view all the support queries reported via Support Centre and also through other modes viz., Email, Chat, Calls, etc.

The Support Centre features facilitates viewing queries for a activated license alongwith the Status i.e., Closed / Pending and Ticket Summary. The report is viewed based on Date, Status and Location and so on.

### 16.1 Features of Support Centre

- ❑ **Faster reach for help and support** :The Support Centre feature makes it easy and convenient to reach out to Tally.ERP 9 service partner and Tally-support team for any product help and support, by click of a button from within the product.
- ❑ **Access solutions to your problems any time** : This feature facilitates instant reference to the solutions provided for your queries at any point of time.
- ❑ **Avoid repeated explanations** : Availability of information on the issues, interactions and resolutions, to Tally Service Partners and Tally Support Team, largely reduces the possibilities of repeated explanations on the issues/support queries and thereby ensures quality help and support.
- ❑ **Track your issues on real-time basis** : The Support Centre makes available the status of your queries including the full chain of interactions irrespective of the mode of communication. i.e., if you have posted a query onto the Support Centre feature in Tally.ERP 9 and

then interacted over phone, even in such cases, the complete discussion will be available to you.

- ❑ **Access issues of any Location/Site** : In Multi-site License, using the Support Centre feature you can view details of issues of any location /site from any of your Location(s).
- ❑ **Reach out to your nearest Service Partner instantly** : You can search for a service partner and post your queries instantly.
- ❑ **Access your Support Centre remotely from any Tally.ERP 9** : The Support Centre feature can also be accessed remotely from any Tally.ERP 9 from anywhere with Tally.ERP 9 installed and activated or in **Educational** mode, as an authorised Tally.NET user.

## 16.2 Accessing the Support Centre

Support Centre can be accessed locally from your machine as well from another remote location where Tally.ERP 9 is installed and activated or in **Educational** mode.

### 16.2.1 Local Access

To access the Support Centre locally:

- ❑ Start **Tally.ERP 9**
- ❑ From the **Company Info** menu or **Gateway of Tally**, click **H: Support Centre** or press **Ctrl + H**.

Figure 16.2 Support Centre

- ❑ To exit the **Support Centre**, press the **Esc** or press **Ctrl + Q**.

- ❑ The **Support Centre** appears blank for newly activated Tally.ERP 9.
- ❑ When you log on to the Support Centre from **Gateway of Tally** and select a company, the **Username** is displayed on the top right corner of the screen. The **Username** does not appear when you log on to the Support Centre from **Company Info.** menu
- ❑ Issues posted on the current date appear in **Blue**.

## 16.2.2 Remote Access

To access the Support Centre from any remote location you can use the **Login** option available. To login remotely follow the steps shown::

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H: Support Centre** or press **Ctrl + H**

The **Support Centre** screen appears

- Click **L: Login** or press **Alt + L**.

The **Login As Remote Tally.NET User** screen appears:

- Enter your **Tally.NET ID** in **Your E-Mail ID** field
- Enter the Password in **Your Tally.NET Password** field.

**Login As Remote Tally.NET User**

Your E-Mail ID : **tallynetnormal1@tallysolutions.com**

Your Tally.NET Password : **\*\*\*\*\***

*(if you have forgotten your Tally.NET Password, please press F5:Reset Password. A new password will be sent to your E-Mail address, and you can then login).*

Figure 16.3 Login As Remote User

- Press **Enter**
- The **Select Account** appears displays the list of **User Accounts**. The list of **User Accounts** will appear when your E-mail ID is linked to one or more accounts.

Figure 16.6 Support Centre - Query List

- Issues posted on the current date are in **Blue**.
- Click on **R: Refresh** button or press **Ctrl + R** to refresh the query list, as required.

The screen displays the following information in different views:

**Query List :**

The default page size is set to 10 queries per page. Click **There are 10 rows more, show next 10 rows** to view the next set of 10 queries. An option to view **10 more** or **show previous 10 rows** is displayed above the list of queries.

**Ticket Summary :**

The Ticket Summary column displays the **Ticket** number of the query, **Account ID** of the user, the date on which the query was **Reported On**, the **Current Owner** of the query, the **Current Status** of the query (Pending or Closed) and the **Ticket Interactions**. It also displays the **Date**, **Subject** of the query, **From** indicates the name of the person who posted the query, **To** to whom the query was addressed and **Description** of the query.

You can also view the content in **zoom in content** mode which gives an expanded view of the Ticket Summary.

To view the query/ issue horizontally:

- ❑ Highlight the required query/ issue and press **Enter**.
- ❑ The detailed query appears in the bottom part of the Support Centre screen
- ❑ You can also click **B: Go to Browser** to browse the **Ticket View** in detail.

### 16.3.1 Adding a New Issue/ Query

You can post your query for any support required on the functional and technical aspects of the Product.

To add a New Issue/ Query:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H:Support Centre** or press **Ctrl + H**
- ❑ Click **N: New Issue** or press **Alt+N**
- ❑ The form entitled **Post Your Support Query** is appears, enter the required details in the fields provided:

Figure 16.7 Post Your Support Query

**Send to:** Select a **New Service Partner** or **Tally Solutions Pvt Ltd.**

- ❑ **New Service Partner** the query is directed to the Service Partner.
- ❑ **Tally Solutions Pvt Ltd.**, the query is directed to Tally (Customer) Support.

- ❑ Select **New Service Partner** from **Send your query to**, the **New Service Partner** screen appears. Enter the Partner Account ID or Name in the **Tally Service Partner** field

Figure 16.8 New Service Partner

To search for a service partner based on the **Location**:

- ❑ In **Search by** field, select the **Location** from the list of **Searching Methods**
- ❑ In the **Location** field, enter the name of the location and press **Enter**
- ❑ The **New Partner Details** screen will appear displaying the **Name of the Partner** along with the **Distance**
- ❑ Select the required **Partner** and press **Enter**

To search for a service partner by **Name**:

- ❑ In the **Search by** field, select **Name** from the list of **Searching Methods**
- ❑ In the **Name Containing** field, enter the name of the service partner and press **Enter**

- ❑ The **New Partner Details** screen will appear displaying the **Name of the Partner**
- ❑ Select the required **Partner** and press **Enter**

Press **Alt + F1** or click on **F1: Detailed** button to view the contact details of the partners.

If you have selected **Tally Solutions Pvt. Ltd.** under **Send to**, the **Post Your Support Query** form will be displayed as shown:

| Post Your Support Query                  |                                                                                                                                                                                                                                                                                                                                 |

Figure 16.10 Support Centre

Subsequently when you send a **New Query**, the **Send to** field in the **Post Your Support Query** form will display the service partner selected earlier in the **Send your query to** list suffixed with **Preferred service partner** in brackets.

### 16.3.2 Reply to an Issue/Query

You can respond or seek clarification/additional information from the Customer Centre or a Service Partner to a query raised. You can also forward the queries received with status Pending or Closed by selecting the required query from the list.

To reply to a query:

Go to **Company Info** menu or **Gateway of Tally**

- Click **H** : **Support Centre** or press **Ctrl + H**
- Select the query that has to be replied/forwarded
- Click **R**: **Reply** or press **Alt + R**

- ❑ The **Post Your Response** screen appears, in the **Description** field, type the response to the query posted.

Figure 16.11 Reply to an Issue/Query

- ❑ **Accept** the reply to the query raised.

The reply to the query is updated in the Query List as shown:

Go to Gateway of Tally &gt; Multi Account Printing &gt; Outstanding Statements &gt; Ledger &gt; Group of Accounts &gt; Sundry Debtor/Other Sub Debtor Group</p> <p>2. Set the other options, such as From/To Date, Range of Bills to Show etc.</p> |

Figure 16.12 Support Centre

As the query is linked to the reply using the ticket number, you can view the reply along with the query raised.

To view the query and its reply select the subject under **Ticket Interaction** or **Thread View** or **Zoom in Content** or **Go to Browser**

- ❑ The **ticket number** of the query/ issue to which a reply has been posted, will automatically be displayed on top of the form, as shown in the image.
- ❑ When the **Reply** button is pressed, the cursor will blink at the **Description** field automatically in the **Post Your Response** form.
- ❑ The **Send to** and **Subject** fields will automatically be pre-filled with the recipient address and the subject, respectively. You may change the same by pressing back-space if required.
- ❑ You may also select the required **Subject** under **Ticket Interactions** available in the **Zoom Out Content mode** (default query list) or in the **Zoom in Content** mode and press **Enter**, to **Reply**.

### 16.3.4 Other Functions

To view support centre information in Detailed/ Condensed mode,

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F1: Detailed/Condensed** or press **F1**

You can toggle between the detailed and the condensed mode by pressing the F1 button. It is active when you opt to view the list in **Status wise** or **Site wise** mode. The **Detailed** report displays a list of queries whereas the **Condensed** report displays the **count** of queries based on their **Status**.

#### Period

By default, the query listing is displayed for the last 7 days. To change the period follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F2: Period** or press **F2**

Enter the number of **Days/Weeks/Months/Years** in the **Default Period** field to display the query listing for the mentioned period.

#### Group by

To view the query list by organising them based on the **Date**, **Site** and **Status**, you can also set the **Default Grouping** using this option.

Go to **Company Info** or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F3: Group by** or press **F3**

Select any one of the following options to group

- ❑ **Group by Date**: Allows you to view the list of queries based on the Date
- ❑ **Group by Site**: Allows you to view the query list based on the **Site/Location**
- ❑ **Group by Status**: Allows you to view the query list based on their Status

#### List/ Thread View

To view the Support queries in the **List View** mode or in the **Thread View** mode follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F4: Thread View/List View** or press **F4**

A brief description for the modes are as below:

- ❑ **List View** displays the queries individually in a detail
- ❑ **Thread View** displays the entire chain of interaction

### Zoom In/ Zoom Out List

To view the query list with other column details, in an enlarged mode follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **Z: Zoom In List/ Zoom Out List** or press **Alt + Z**

Press **Alt + Z** to toggle between the **Zoom In** and **Zoom Out** view

### Zoom In Content/ Zoom Out Content

To view the selected query in an enlarged mode follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **Z: Zoom In Content/ Zoom Out Content** or press **Ctrl + Z**

Press **Ctrl + Z** to toggle between the **Zoom In Content** and **Zoom Out Content** view.

### Browser View

The **Browse** mode displays all the additional information that is not displayed in the **Zoom In Content** option, such as **Reported by**, **Issue type**, **Priority**, **Product**, **Product Serial No.**, **Status**, etc., under **Ticket Summary**

Similarly, the content area in the Support Centre is limited and when the content displayed exceeds the limit, the **Browse Issue** mode will display the entire content and their properties under interaction details .

To view the content in **Browse** mode, click **B: Go to Browser** or press **Alt + B**.

### Site Filter

You can use the site filter to view the queries posted for each on a site. To arrange the queries based on each site follow the steps shown:

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F8: Site Filter** or press **F8**
- ❑ Select the required site from the list of **Sites** or Select **All** to displays queries/ issues related to all Sites/Locations.

## Status Filter

You can view the queries posted based on their status,

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F9: Status Filter** or press **F9**
- ❑ Select the required status from the list of **Default Status** available.

The **Status** are briefly explained for your benefit:

- ❑ **All**: will display all the queries/ issues irrespective of their status.
- ❑ **Pending**: will display all the **Pending** queries/issues
- ❑ **Closed**: will display all the **Closed** queries/ issues.

## Page Size

You can use this option to set the page size or the number of queries that can be displayed per screen, by default the page size is set to display 10 queries per screen.

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F10: Page Size** or press **F10**
- ❑ The **Configuration** screen appears
- ❑ In the **Page Size** field enter the required number, so as to display the number of queries per page.

## F12: Configure

Allows the user to configure the support centre based on their requirement. The configuration settings are also as buttons on the horizontal toolbar.

Go to **Company Info** menu or **Gateway of Tally**

- ❑ Click **H** : **Support Centre** or press **Ctrl + H**
- ❑ Click **F12: Configure** or press **F12**

The **Configuration** screens appears as shown :

| Configuration                                       |                             |
|-----------------------------------------------------|-----------------------------|
| Default Period                                      | <b>7 Days</b>               |
| <i>(Enter period in Days/ Weeks/ Months/ Years)</i> |                             |
| From                                                | 27-2-2009                   |
| To                                                  | 6-3-2009                    |
| Default Grouping                                    | Status                      |
| Default Status                                      | Pending                     |
| Default View                                        | List                        |
| Default View Mode                                   | Detailed                    |
| Default Page Size                                   | 10 <i>(Range: 10 - 100)</i> |

Figure 16.14 Configuration

The **F12: Configuration** options are explained as below :

#### Default Period

You can re-set the default Period to display the queries as per your requirement. For instance, you can select **Last 15 Days** from the **Default Period** list to display the queries listed for the past 15 days. Similarly, you can also choose other options from the **Default Period** list to display the queries for the respective period.

#### Default Grouping

This option allows you to view the list of queries based on the **Grouping** options selected.

- ❑ **Default Grouping - Date** : In cases where **Date** is selected from the **Default Grouping** list, the queries are displayed in a chronological order (Date wise).
- ❑ **Default Grouping - Site** : In cases where the **Site** option is selected from the **Default Grouping** list, the queries are displayed **Site/ Location wise**. The option **Site** under **Default Grouping** will not be listed for Single Site users.
- ❑ **Default Grouping - Status** : In cases where the **Status** is selected from the **Default Grouping** list, the queries are displayed on the basis of the Status (All / Pending / Closed).

**Default Status** : This option allows you to set the default Status, i.e., All, Closed or Pending, for any **Group by option** selected.

#### Default View

You can opt to view the list of queries either in a **List View** or in a **Thread View** mode.

- ❑ **Default View - List** : In cases where the option **List View** is selected, the query list can be viewed in List View mode.

**Default View - Thread** : In cases where the option **Thread View** is selected, the query list can be viewed in Thread View mode.

#### **Default View Mode**

You can opt to view the list of queries in either a **Detailed** or **Condensed** mode.

- ❑ **Default View Mode - Detailed** : The **Detailed View Mode** displays the list of queries in **Detail** based on the **Status** (All/ Pending/ Closed) selected.
- ❑ **Default View Mode - Condensed** : The **Condensed View Mode** displays only the counts of queries based on the **Status** (All/ Pending/ Closed) selected. The **Default View Mode** option will be disabled in case **Date** is selected under **Default Grouping** option.

#### **Default Page Size**

This option allows you to define the number of queries/ issues to be listed in the Support Centre screen, for instance: 15, 20, 25, and so on.

The **default Page Size is 10**. i.e., the Support Centre screen displays 10 queries in a screen at a time. The next set of 10 queries can be viewed by clicking on '**X rows more, show next x rows**' available below the list.

The **Page Size** can be set to display between **10** and **100** rows.

You can change the configuration as required in the **Configuration** screen or individually click on the required buttons available on the Horizontal tool bar.

The configuration setting options available in **F12: Configuration** are also available in the button bar viz., **F1: Detailed/Condensed**, **F2: Period**, **F3: Group by**, **F9: Status Filter**, **F4: Thread/List View** and **F10 Page Size**.

### Points to Remember

- Support Centre features facilitate viewing queries for a activated license along with the Status.

## Lesson 17: Service Tax

### Lesson Objectives

On completion of this lesson, you will be able to

- ❑ Enable Service Tax in Tally.ERP 9
- ❑ Create the masters necessary for Service Tax transactions
- ❑ Record Service Tax transactions
- ❑ Generate Service Tax reports and challans in Tally.ERP 9

Service Tax is a tax on services rendered. The person, one who renders the service, is liable to pay service tax. Service tax was imposed for first time in 1994 and its scope is increasing every year.

### 17.1 Basics of Service Tax

Let us understand the following definitions and terminologies used in Service Tax :

#### Features of service tax

- ❑ Service tax is payable on gross amount charged for service provided or to be provided, excluding material cost. Tax is also payable on reimbursement of expenses which form part of service. However, payments made by service provider as 'pure agent' of service receiver is kept outside the purview of Service Tax.
- ❑ In cases, where the value of Service provided is not ascertainable the valuation is done on the basis of similar service or on basis of cost.
- ❑ Gross amount charged is considered as inclusive of service tax and then tax is back calculated.
- ❑ Service tax is payable only when bill amount is received from service receiver. However, in case of service provided to associated enterprises, service tax is payable on booking such entry.

### Taxable Service

Service tax is payable on '**taxable service**'. The definition of taxable service is different for each class of services, e.g. in case of advertising agency, any service provided to a client, by an advertising agency in relation to advertisement, in any manner will be '**taxable service**'.

### Value of Taxable Service

Service tax is payable on '**value of services**'. Value of Service shall be the gross amount charged by the service provider for such service rendered by him.

### Service Provider

As defined u/s 65(105) a service provider is one who provides taxable service.

### Person liable to pay service tax

Every person providing taxable service to any person has to pay service tax at the prescribed rates. In few cases, tax is payable by service receiver, under reverse charge method.

### Exemption from service tax

- ❑ Small service providers whose total value of services provided (including exempt and non-taxable services) is less than Rs 10 lakhs in previous year are not required to pay service tax in current financial year till they reach turnover of Rs 10 lakhs.
- ❑ Services provided to SEZ units or developer for consumption within SEZ are exempt.
- ❑ Refund is eligible for specified services utilised for export.
- ❑ Services provided by RBI are exempt but service provided to RBI are not exempt.

### Rate of Service Tax

According to Section 66 of Finance Act, 1994 there shall be levied a tax at the rate of 10% of value of taxable services referred in section 65(105) of Finance Act, 1994. In addition, education cess @ 2% and Secondary Higher Education cess @ 1% is payable. Thus, total service tax is 10.3%.

Let us consider the following example to understand how Service Tax is calculated :

|    | Particulars                          | Rs.           |
|----|--------------------------------------|---------------|
| a. | Charge on service (i.e. Bill amount) | 10,000        |
| b. | Service Tax @ 10%                    | 1,000         |
| c. | Cess on Service Tax @ 2%             | 20            |
| d. | Sec Cess on Service Tax @ 1%         | 10            |
|    | <b>Total invoice amount</b>          | <b>11,030</b> |

Assuming the buyer pays the seller only Rs. 5,000 the Service Tax payable is calculated as below:

|    | Particulars                                               | Rs.             |
|----|-----------------------------------------------------------|-----------------|
| a. | Charge paid on service $(10,000 \times 5,000)/11,030$     | 4,533           |
| b. | Service Tax on Rs.5000/- is $(1,000 \times 5,000)/11,030$ | 453             |
| c. | Cess on Service Tax is $(20 \times 5,000)/11,030$         | 9               |
| d. | Sec Cess on Service Tax is $(10 \times 5,000)/11,030$     | 5               |
|    | <b>Total Payment Received</b>                             | <b>5,000.00</b> |

### Abatements

Abatement refers to the percentage of tax exemption provided by the government on the value to be considered for calculation of Service Tax. It is either a percentage of the service charges or a lump sum amount.

|    | Particulars                                                                                  | Rs.    |
|----|----------------------------------------------------------------------------------------------|--------|
| a. | Charge on Service                                                                            | 10,000 |
| b. | An abatement of 30% amounts to:                                                              | 3,000  |
| c. | Here, the assessable value is (a-b)                                                          | 7,000  |
|    | <b>Therefore, Service Tax @ 10% on Rs. 7,000, Cess @ 2% and Sec Cess @ 1% on Service Tax</b> |        |

### Cenvat Credit

Service provider can avail Cenvat credit of service tax paid on input services and excise duty paid on inputs and capital goods. The credit can be utilised for payment of service tax on output services. However, in cases where the assessee is providing both taxable and exempt services and if input services are common, Cenvat credit can either be taken on proportionate basis or 8% 'amount' is required to be paid on exempted services.

### Payment of Service Tax

when the assessee is a corporate, service tax is payable on a monthly basis by the 5th of the following month. For example, service tax has to be paid by January 5, for the month of December.

Non-corporate bodies such as individuals, proprietary firms and partnership firms pay service tax for the fiscal quarter. The payment is to be made by the 5th day of the month, following the quarter. For example, service tax for the quarter ending June 30, is to be paid by July 5th. For the month of March though, corporate and non-corporate bodies, have to pay the service tax by March 31.

The service tax assessee must use a GAR 7 Challan to pay tax in the bank nominated by the commissionerate. The payment must be rounded off to the nearest rupee. It is advisable to use separate GAR 7 Challans for different categories of service.

## 17.2 Configuring Tally.ERP 9 for Service Tax

It is a one time configuration for Service Tax features to be enabled in Tally.ERP 9.

### 17.2.1 Salient Features of Service Tax compliant Tally.ERP 9

- ❑ Tally.ERP 9 tracks the details bill-wise and automatically calculates the Service Tax payable and Input Credit on each bill while offering the flexibility to make adjustments later.
- ❑ It has a built-in assessable value feature on which Service Tax is calculated. It also accounts for abatement and expenses.
- ❑ It maintains information on Service Tax category-wise which is mandatory for filing the Service Tax returns.
- ❑ It also makes a provision for exemption notification details.
- ❑ Eliminates error-prone information, incorrect remittances.
- ❑ It generates reports in the government suggested formats like GAR-7 Challans, ST3 Report, Management Information Services (MIS) reports and Service Tax Payable Reports.

Create a company called **FirstC Services** to understand the Service Tax feature of Tally.ERP 9.

### 17.2.2 Company Setup

#### Create a company

Go to **Gateway of Tally > Alt + F3: Company Info. > Create Company**

In the **Company Creation** screen,

- ❑ Specify **FirstC Services** as the **Company Name** and **Address details**
- ❑ Select **India** in the **Statutory Compliance** for field
- ❑ Specify the **State, Pin code & Accounts with Inventory** details
- ❑ Specify **Financial Year From & Books beginning from** date as **1-4-2009**

The completed **Company Creation** screen is displayed as shown below :

| Company Creation                     |                                                                      | Ctrl + M                                                                        |                           |
|--------------------------------------|----------------------------------------------------------------------|---------------------------------------------------------------------------------|---------------------------|
| Directory                            | : C:\Tally.ERP9\Data                                                 |                                                                                 |                           |
| Name                                 | : FirstC Services                                                    |                                                                                 |                           |
| <b>Mailing &amp; Contact Details</b> |                                                                      | <b>Company Details</b>                                                          |                           |
| Mailing Name                         | : FirstC Services                                                    | Currency Symbol                                                                 | : Rs.                     |

8. **Division:** Enter the code and name of the division your company falls under.
9. **Range:** Enter the code and name of the range your company falls under.
10. **Commissionerate:** Enter the code and name of the Commissionerate of Service Tax Department, under which the address of your Company's registered office is located.

#### 17.2.4 Service Tax Statutory Masters

Before creating masters, the following Statutory Master is loaded into Tally.ERP 9. To view the **Service Category**,

Go to **Gateway of Tally > Display > Statutory Info. > Service Categories > Advertising Agency**

| Service Category              |               | FirstC Services  |                      |               |                   |
|-------------------------------|---------------|------------------|----------------------|---------------|-------------------|
| Name : Advertising Agency     |               |                  |                      |               |                   |
| Applicable to Country : India |               |                  |                      |               |                   |
| Code                          |               | 00440016         |                      |               |                   |
| Accounting Code               |               | 00440013         |                      |               |                   |
| Category Code                 |               | ADV              |                      |               |                   |
| Sub-Clause No.                |               | e                |                      |               |                   |
| Service Tax Details           |               |                  |                      |               |                   |
| Applicable From               | Abatement (%) | Notification No. | Service Tax Rate (%) | Cess Rate (%) | Sec Cess Rate (%) |
| 1-4-2005                      |               |                  | 10 %                 | 2 %           |                   |
| 18-4-2006                     |               |                  | 12 %                 | 2 %           |                   |
| 11-5-2007                     |               |                  | 12 %                 | 2 %           | 1 %               |
| 24-2-2009                     |               |                  | 10 %                 | 2 %           | 1 %               |

Figure 17.5 Service Category

- ❑ The **Service Category** screen has a **Name** field showing the category, followed by the **Country Code**, **Accounting Code**, **Category Code** and **Sub-Clause No.** fields.
- ❑ The **Applicable From** column displays the date from which the **Abatement (%)**, **Service Tax Rate (%)**, **Cess Rate (%)** and **Secondary Cess Rate (%)** are applicable.

Each service category has a predefined master in Tally.ERP 9 which can also be updated for statutory changes from the Tally website ([www.Tallysolutions.com](http://www.Tallysolutions.com)). You can view the values for each of these categories in Tally.ERP 9.

### 17.3 Creating Masters

Let us create the following ledger masters related to Service Tax :

- ❑ Sundry Creditors
- ❑ Sundry Debtors
- ❑ Duties and Taxes
- ❑ Sales Accounts
- ❑ Purchase Accounts

### i. Create Sundry Creditor Ledger

Go to **Gateway of Tally > Accounts Info. > Ledgers > Create**

1. Enter the Name as **KrazyCool Agencies**.
2. Select **Sundry Creditors** from the **List of groups** in the **Under** field.
3. Set **Maintain balances bill-by-bill** to **Yes**.
4. **Default Credit Period**: Leave the field blank
5. The **Inventory Values are affected?** field is set by default to **No**
6. Set **Is Service Tax Applicable** to **Yes**.
7. In the **Exemption Detail** screen enter the details as shown below:

| Exemption Details      |             |
|------------------------|-------------|
| Type of Classification | : Exempt    |
| Notification No.       | : KAR/09/72 |

Figure 17.6 Service Tax Exemption Details Screen

8. Under **Mailing Details** enter the **Address, State** and **PIN Code** details
9. Under **Tax Information** enter the **PAN/IT No.**
10. Enable the field **Set/Alter Service Tax Details** to **Yes**

| Ledger Creation                                   |  | FirstC Services                                          | Ctrl + |
|---------------------------------------------------|--|----------------------------------------------------------|--------|
| Name : KrazyCool Agencies<br>(alias) :            |  | Total Op. Bal.                                           |        |
| Under : Sundry Creditors<br>(Current Liabilities) |  | Mailing Details                                          |        |
| Maintain balances bill-by-bill : ? Yes            |  | Name : KrazyCool Agencies                                |        |
| Default Credit Period :                           |  | Address : Shop No. 05,<br>Jayanagar Complex<br>Bangalore |        |
| Inventory values are affected : ? No              |  | State : Karnataka                                        |        |
|                                                   |  | PIN Code : 560034                                        |        |
| Statutory Information                             |  | Tax Information                                          |        |
| Is Service Tax Applicable : ? Yes                 |  | PAN / IT No. : AGFRR5240B                                |        |
|                                                   |  | Sales Tax No. :                                          |        |
|                                                   |  | Set/Alter ServiceTax Details? <b>Yes</b>                 |        |
| Opening Balance ( on 1-Apr-2009) :                |  |                                                          |        |

Figure 17.12 Ledger Creation — Computech Systems

12. Press **Y** or **Enter** to accept the ledger creation screen.

Similarly, create a ledger for **Global Business House** under the **Sundry Debtors** group.

*A Service Tax Ledger is used to predefine the rate of **Service Tax** and the rate of **Cess** on each transaction. Tally.ERP 9 gives you the option to predefine these values or directly select them during voucher entry.*

### iii. Create Service Tax Ledger

Go to **Gateway of Tally > Accounts Info. > Ledgers > Create**

1. Enter the Name as **Input Service Tax**.
2. Select **Duties & Taxes** from the **List of groups** in the **Under** field.
3. In the **Type of Duty/ Tax** field select **Service Tax** from the **Type of Duty/Tax** list
4. In the Category Name, select **Advertising Agency** from the **List of Service Tax Categories**
5. Set **Inventory values are affected** to **No**.

The completed **Ledger Creation** screen appears as shown below :

| Ledger Creation                                 |  | FirstC Services                                                            | Ctrl                  |
|-------------------------------------------------|--|----------------------------------------------------------------------------|-----------------------|
| Name : Input Service Tax                        |  |                                                                            | Total Op. Bal.        |

6. Press **Y** or **Enter** to accept the screen.

### Practice Exercise

Create the following ledgers.

| Ledger                  | Under          | Type of Duty/Tax | Category Name      | Opening Balance |
|-------------------------|----------------|------------------|--------------------|-----------------|
| Output Service Tax      | Duties & Taxes | Service Tax      | Advertising Agency | Nil             |
| Input ST-TELEPHONE CHRG | Duties & Taxes | Service Tax      | Telephone Service  | Nil             |
| HSBC                    | Bank Accounts  | -                | -                  | 5,00,000        |

#### iv. Create Sales Ledger for Services

Go to **Gateway of Tally > Accounts Info. > Ledgers > Create**.

1. Enter the **Name** as **Consultancy Services**.
2. Select **Sales Accounts** from the **List of Groups** menu in the **Under** field.

3. Set **Inventory values** are affected to **No**.
4. Set **Is Service Tax Applicable** to **Yes**.
5. In the **Category Name**, select **Advertising Agency** from the list.
6. Set **Is Abatement Applicable** to **No**.

The completed **Ledger Creation** screen appears as shown below:

| Ledger Creation                     |  | FirstC Services        | Ctrl |
|-------------------------------------|--|------------------------|------|
| Name : Consultancy Services         |  | Total Op. Bal.         |      |

| Is Service Tax Applicable ? Yes     |  | PAN / IT No. :         |      |
| Is Abatement Applicable ? No        |  | Sales Tax No. :        |      |
|                                     |  | <b>Accept ?</b>        |      |
| Opening Balance ( on 1-Apr-2009 ) : |  | Yes or No              |      |

Figure 17.14 Ledger Creation — Consultancy Services

7. Press **Y** or **Enter** to accept the screen.

#### v. Create Purchase Ledger for Services

Go to **Gateway of Tally > Accounts Info. > Ledgers > Create**

1. Enter the **Name** as **Professional Services**.
2. Select **Purchases Accounts** from the **List of Groups**.
3. Set **Inventory Values** are affected to **Yes** if service is purchased as an item.
4. Set **Is Service Tax Applicable** to **Yes**.
5. In the **Category Name**, select **Advertising Agency** from the list.
6. Set **Is Abatement Applicable** to **No**.

The completed **Ledger Creation** screen appears as shown below:

| Ledger Creation                     |  | FirstC Services | Ctrl           |
|-------------------------------------|--|-----------------|----------------|
| Name : Professional Services        |  |                 | Total Op. Bal. |
| (alias) :                           |  |                 | 5,00,000.00 Dr |
|                                     |  |                 | Difference     |
|                                     |  |                 | 5,00,000.00 Dr |
| Under : Purchase Accounts           |  | Mailing Details |                |
| Inventory values are affected ? Yes |  | Name :          |                |
|                                     |  | Address :       |                |
|                                     |  | State :         |                |
|                                     |  | PIN Code :      |                |

| Statutory Information               |  |                 |                |
| Opening Balance ( on 1-Apr-2009) :  |  | Accept ?        |                |
|                                     |  | Yes or No       |                |

Figure 17.15 Ledger Creation — Professional Services

7. Press **Y** or **Enter** to accept the screen.

*If the field **Is Abatement Applicable** is set to **Yes** in the **Income/Expenses** or **Sales/Purchase** ledger masters, the **Abatement Details** screen appears, in which **Notification No.** and **Percentage** can be entered, which is captured in the invoice and can be altered.*

## 17.4 Entering Transactions

Tally.ERP 9 allows the user to record the Service Tax transactions in **Accounting Invoice** Mode or **Voucher** Mode. Enter the invoice using the **Accounting Invoice** Mode. This allows the Service Tax amount to be displayed automatically in the invoices, on selection of the Service Tax ledger. Tally.ERP 9 also supports purchase or sale of a service, as an item.

### 17.4.1 Creating Purchase Invoice

**On 15-4-09, FirstC Services received Professional Services from KrazyCool Agencies worth Rs. 1,75,000. The payment for the services was made on 16-4-2009.**

### Step1: Create Purchase Invoice

Go to **Gateway of Tally > Accounting Vouchers > F9: Purchase**

1. Press **F2** and change the date to **15-4-2009**.
1. Enter the **Supplier Invoice No.** and **Date** as desired.
2. In the **Party's A/c Name**, select **KrazyCool Agencies** from the List of Ledger Accounts.
3. Select the **Name of Ledger** as **Professional Services** from the List of Ledger Accounts.
4. Enter the amount **Rs. 175000**.
5. Select the **Input Service Tax** ledger from the List of Ledger Accounts.

The **Service Tax Details** sub-form appears as shown below:

| Service Tax Computations                                    |                         | FirstC Services |                          | Ctrl + M           |

### 17.4.2 Creating Sales Invoice

**On 20-4-2009, Consultancy Services worth Rs. 7,00,000 was provided to Computech Systems and the amount was received on 25-4-2009.**

#### Step 1: Create Sales Invoice

Go to **Gateway of Tally > Accounting Vouchers > F8: Sales**

1. Press **F2** and change the date to **20-4-2009**.
2. In the **Party's A/c Name**, select **Computech Systems** from the List of Ledger Accounts.
3. Press **Enter** to view the **Despatch Details** and accept the default details.
4. Select **Consultancy Services** from the List of Ledger Accounts.
5. Enter the amount as **Rs. 700000**.
6. Select **Output Service Tax** from the List of Ledger Accounts.

The resultant **Service Tax Details** appears as shown below:

| Service Tax Computations                                     |                        | FirstC Services          | Ctrl + M              |

Figure 17.26 Service Tax Payable

The **Service Tax payable report** displays **Rs. 72,100** as the Service Tax due

## 17.5 Accounting for Advance Receipts

As mentioned earlier, Service tax is not applicable on the receipt of advance for a service until the invoice is raised. Service tax is to be paid on the amount received on the invoice value including the advance received.

*On 27-4-09, FirstC Services receives an advance of Rs. 70,000 for a service rendered by it from Global Business House as on 29-4-2009.*

*On 29-4-2009, FirstC Services, completed the contract and raised an invoice on Global Business House towards Advertising Agency Services with 10% Service Tax, 2% Education Cess and 1% Secondary Education Cess for a total amount of Rs 1,70,000 of which Rs 70,000 was received as an advance. Service tax, Education Cess and Secondary Cess is calculated on the total assessable value of Rs. 1,70,000.*

### Step 1: Create Receipt Voucher

Go to **Gateway of Tally > Accounting Vouchers > F6: Receipt**

1. Press **F2** and change the date to **27-4-2009**.
2. Select **Global Business House** in the **Credit** field and enter the amount as **Rs. 70,000**.
3. In the **Bill-wise Details** screen, select **Advance** from the **Method of Adj.**

The **Bill Wise Details** screen appears as shown below :

| Bill-wise Details                                                                     |      |                                                 |                           |           | FirstC Services                                                                                                                                                                                            |  | Ctrl + M |  |
